## H1N1 Vaccine Distribution Update

The Department of Health Services (DHS) is providing an update on the amount of H1N1 vaccine allocated to Wisconsin from the U.S. Centers for Disease Control and Prevention (CDC). The CDC allocates, or assigns, the amount of H1N1 vaccine each state will receive each week.

DHS places orders with the CDC for more than 2,000 public and private health care providers based on the state's assigned allotment. There is a lag time between the state receiving its allocation and providers receiving those doses.

Since the vaccine production has been slower than expected, the allotments have fluctuated significantly. Currently, Wisconsin has been allotted a total of 697,700 doses of H1N1 vaccine.

### Wisconsin H1N1 Vaccine Allotments

Date	Daily Doses Allocated	Weekly Total	Total Doses Allocated
September 30, 2009	30,200		30,200
October 1, 2009	0		30,200
October 2, 2009	16,200	46,400	46,400
October 5, 2009	0		46,400
October 6, 2009	54,300		100,700
October 7, 2009	3,300		104,000
October 8, 2009	22,100		126,100
October 9, 2009	20,900	100,600	147,000
October 12, 2009	46,700		193,700
October 13, 2009	19,500		213,200
October 14, 2009	0		213,200
October 15, 2009	0		213,200
October 16, 2009	28,300	94,500	241,500

--MORE--

October 19, 2009	4,300		245,800
October 20, 2009	0		245,800
October 21, 2009	0		245,800
October 22, 2009	40,200		286,000
October 23, 2009	6,500	51,000	292,500
October 26, 2009	85,400		377,900
October 27, 2009	29,200		407,100
October 28, 2009	16,400		423,500
October 29, 2009	60,400		483,900
October 30, 2009	13,800	205,200	497,700
November 2, 2009	65,700		563,400
November 3, 2009	24,700		588,100
November 4, 2009	700		588,800
November 5, 2009	75,100		663,900
November 6, 2009	33,800	200,000	697,700

Due to limited vaccine, DHS is recommending that local health departments and health professionals target H1N1 vaccine for those individuals most-at-risk during the next several weeks as the vaccine supply continues to fluctuate. DHS recommends that public and private providers focus vaccination efforts on the following subset of CDC's target groups:

- Pregnant women
- Persons who live with or provide care for infants age 6 months or younger (examples: parents, siblings, daycare providers)
- Health care and emergency medical services personnel who have direct contact with patients or infectious material
- Children age 6 months - 4 years
- Children and adolescents age 5-18 years who have chronic medical conditions that put them at higher risk for influenza-related complications

Community vaccination clinics will resume as H1N1 vaccine becomes more readily available. People may call 2-1-1 to find out an H1N1 or seasonal influenza vaccine clinic nearest them. A "clinic finder" is also available online at <http://pandemic.wisconsin.gov> or [www.wisconsinfluclinic.info](http://www.wisconsinfluclinic.info).
