

Five-Star Quality Rating for Wisconsin Nursing Homes

The federal government ranks all nursing homes on a scale of 1-Star (poor) to 5-Star (best). Ratings are based on three criteria: (1) The results of inspections of the nursing home over the last three years; (2) The number of nurses and nursing assistants in relation to the number of residents; and (3) The nursing home's quality indicators (which is based, for example, on the percentage of residents with pressure ulcers; the percentage of residents with unplanned weight loss; the percentage of residents in pain, etc.). The following chart shows the most recent rating for each Wisconsin nursing home. It is color-coded as follows: 5-Star = **Green**; 4-Star = **Blue**; 3-Star = **Yellow**; 2 -Star = **Orange**; 1-Star = Gray. The complete rating of each nursing home can be found at the federal government's website www.medicare.gov/NHcompare. The final column indicates if the nursing home is a Special Focus Facility. There are four Special Focus Facilities in Wisconsin. These nursing homes have a poor history and their performance is monitored closely by the Division of Quality Assurance. Please remember that this rating system has some flaws and should not be used in place of visiting a nursing home.
