

**Certified Laboratories in Wisconsin
That Perform Bacteria Tests on Private Well Water**

The laboratories on this list are certified by the Wisconsin Department of Agriculture, Trade and Consumer Protection to perform coliform bacteria testing of drinking water **and** have agreed to perform those tests for private well owners. Fees vary from lab to lab. Unless a laboratory is marked with an &, their certification also allows them to perform Safe Drinking Water Act bacteria testing for wells serving the public, e.g., at taverns or mobile home parks. For a complete list of Safe Drinking Water Act certified bacteriology labs, contact your local DNR headquarters or check the following web page: [http://prodoasext.dnr.wi.gov/inter1/pk_ws582_lablist\\$.startup](http://prodoasext.dnr.wi.gov/inter1/pk_ws582_lablist$.startup)

Laboratories marked with an @ perform nitrate tests also, but may or may not be certified in Wisconsin to perform nitrate analyses. For a complete list of laboratories that are certified to perform nitrate tests on drinking water search the lists for the word nitrate on the following web page: <http://www.dnr.state.wi.us/org/es/science/lc/LABS/Lablists.htm>

Unless marked with an asterisk, the laboratory has agreed to provide test results to the Department of Natural Resources (DNR) if you request it. If your well has been assigned a unique well number, and if you provide this number and request that the test results be reported to DNR, the information will be kept in a database. Your voluntary cooperation will help regulators and researchers better understand the quality of Wisconsin's underground water supplies. (rev. 04/08).
