**LANGLADE COUNTY HEALTH DEPARTMENT PASSES  
REVIEW BY STATE HEALTH OFFICIALS**

MADISON—Dr. Seth Foldy, State Health Officer, today announced that the Langlade County Health Department has successfully passed the state's health department review. As a result, the Langlade County Health Department will maintain their Level II status.

“The hard-working staff of the Langlade County Health Department help make their community a healthier and safer place to live,” said Foldy. “Their department has an actively engaged and supportive Board of Health, and does an excellent job of engaging the community to work collaboratively on priority health problems.”

The Wisconsin Department of Health Services is required to formally review the operations of all 92 Wisconsin local health departments at the county or municipality level at least every five years. The review establishes the health department as a level II agency. A level I agency meets the minimum requirements and a level III agency meets the maximum requirements established for a local health department.

The Langlade County Health Department provides services important to the community, such as:

- Childhood injury prevention services
- Emergency planning and response to prevent and control communicable disease outbreaks, such as flu
- Tobacco prevention and control
