

## Local Data on Poverty Status and Health Insurance Coverage in Wisconsin Southern Region, 2008-2010

	Estimated Number	95% Confidence Interval	Estimated Percent	95% Confidence Interval
<b>Southern Region Population</b>	1,048,000		100%	
<b>Poverty Status</b>				
Less than 100% of FPL	102,000	+/- 18,000	10%	+/- 2%
100%-199% of FPL	167,000	+/- 19,000	16%	+/- 2%
200% or more of FPL	749,000	+/- 35,000	72%	+/- 2%
Unknown	30,000	+/- 6,000	3%	+/- 1%
<b>Insurance Status</b>				
Insured all of the past year	937,000	+/- 39,000	89%	+/- 2%
Insured part of the past year	50,000	+/- 12,000	5%	+/- 1%
Uninsured all of the past year	55,000	+/- 16,000	5%	+/- 1%
<b>Primary Insurance Type</b> (please read note below)				
Currently uninsured	80,000	+/- 18,000	8%	+/- 2%
Employer-sponsored	715,000	+/- 34,000	68%	+/- 2%
Private	54,000	+/- 9,000	5%	+/- 1%
Medicaid	98,000	+/- 16,000	9%	+/- 1%
Medicare	77,000	+/- 10,000	7%	+/- 1%
Others	23,000	+/- 7,000	2%	+/- 1%

**Source:** 2008-2010 Wisconsin Family Health Survey, Office of Health Informatics, Division of Public Health, Wisconsin Department of Health Services (DHS), October 2012. Sample size for **Southern Region**: 3,314.

### Notes:

Estimated numbers have been rounded to nearest 1,000 to avoid unwarranted precision. Estimated percentages have been rounded to nearest whole percentage. A dash (--) indicates 0.5% or less, or fewer than 1,000 persons.

*Poverty status* is expressed as a percentage of the Federal Poverty Level (FPL), and is based on responses to questions about household size and income.

*Insured all of the past year, insured part of the past year or uninsured all year* measures health insurance status during the 12 consecutive months prior to the survey interview.

*Primary Insurance type* is a measure of persons insured and uninsured at one point in time. It is a “snapshot” of health insurance coverage at the time of the survey interview. **Some people have multiple types of insurance, but each person is counted only once in this table according to their primary insurance type.** Those with multiple types of insurance are tabulated according to the order of categories in the third panel of this table. **For example, someone with both Medicare and private insurance would be counted in the private category. This substantially reduces the estimated number and percent with Medicare coverage, and also slightly reduces estimates of private and Medicaid coverage.**

The Wisconsin Family Health Survey is a random-sample telephone survey conducted each year by DHS. An adult in each sampled household answers the survey questions on behalf of all people living in that household. Survey data represent all household residents. Persons living in group quarters such as nursing homes, dormitories, and jails are not represented by survey results. More information about the survey is on the Web: <http://dhs.wisconsin.gov/stats/healthinsurance.htm>
