Introduction

This report presents key information about marriages and divorces that occurred in Wisconsin in 2010. It also contains information from selected previous years, as well as information on the number and rate of marriages and divorces, both in Wisconsin and nationally. The sources of data for Wisconsin are marriage and divorce certificates on file with the State Vital Records Office, Office of Health Informatics, Division of Public Health, Wisconsin Department of Health Services.

The collection of marriage and divorce data is mandated by Chapter 69 of the Wisconsin Statutes. Chapter 69 authorizes the Department of Health Services to supervise and direct the collection of these data. This statute also specifies how local registrars are to collect and file certificates of marriage.

The Department of Health Services produced this publication. Staff of the State Vital Records Office, Registration and Statistics Unit, collected and compiled the marriage and divorce records. Joyce Knapton drafted the summaries in this report and produced the computer programs to generate the tables. Patricia Nametz edited the report. The report was prepared under the supervision of John Kiesow, State Registrar, State Vital Records Office, and Jane Kraus, Supervisor, Registration and Statistics Unit, State Vital Records Office.

The State Vital Records Office would like to thank the County Clerks and Clerks of Tribal Court for issuing accurate marriage licenses, the local Register of Deeds offices for their accurate recording of all marriage records, and the County Clerks of Court and Clerks of Tribal Court for their timely filing of completed divorce or annulment certificates.

This report is available on the Department of Health Services website, at <http://dhs.wisconsin.gov/stats/marriages.htm>.

Key Findings

- A total of 29,952 marriages occurred in Wisconsin in 2010, representing a slight decrease of just over 100 marriages from the 30,057 marriages that occurred in 2009. These counts reflect all marriages that occurred in Wisconsin (of both residents and non-residents of the state).
- The number of marriages has been declining annually since 1980.
- Wisconsin's marriage rate in 2010 was 5.3 per 1,000 total population, identical to the 2009 rate (5.3). The marriage rate has been gradually declining since 1980, when the rate was 8.7.
- The marriage rate in Wisconsin has been consistently lower than the national rate for more than 80 years. The United States provisional marriage rate for the 12 months ending in June 2010 was 7.0 per 1,000 population.
- The median age for first marriages in 2010 was 25.7 years for women and 27.2 years for men. In 1960, the median age at first marriage was 20.4 for brides and 22.9 for grooms.
- Since 1960, the bride in a first marriage, on average, has been a year or two younger than the groom.
- In 2010, the months with the highest number of marriages were August, July and June. August was the most popular month to marry. In each of the past six years, the month with the most marriages averaged approximately 14 percent of that year's total marriages. In those same six years, the month in which the fewest marriages occurred was January.
- Milwaukee County had the highest number of marriages in 2010 (4,228), followed by Dane County (2,613), Waukesha County (1,860) and Brown County (1,546). These are Wisconsin's four most populous counties. Of these four counties, Milwaukee and Brown had a decrease in the number of marriages from 2009 to 2010.
- A total of 17,285 divorces occurred in Wisconsin in 2010, for a divorce rate of 3.0 per 1,000 total population. This is slightly higher than the 2009 rate (2.9).
- In 2010, the ratio of Wisconsin marriages to Wisconsin divorces was 1.7 to 1 (there were 1.7 marriages for each divorce). This ratio has been falling since 1920, when it was 9.2 to 1; it was 6.7 to 1 in 1960; 2.2 to 1 in 1990; and 2.1 to 1 in 2000.
- The highest number of divorces in 2010 occurred in Milwaukee County (2,341 divorces and 1 annulment), followed by Dane County (1,490 divorces and 11 annulments) and Waukesha County (1,079 divorces and 3 annulments), reflecting the large populations of these three counties.
- Fifty-three percent of all Wisconsin divorces in 2010 involved families with children under 18 years of age. Among divorces involving children, an average of 1.8 children were affected by each divorce.

Note: The median age is one way of expressing the average age, and represents the midpoint of all persons in the group (half are older and half are younger than the median age). For example, in 2005 the median age for brides at first marriage was 25.0, meaning that half of all brides being married for the first time in 2005 were younger, and half were older, than 25.0. The numbers in this table reflect all marriages that occurred in Wisconsin in the stated years.

- The median age for first marriages in 2010 was 25.7 years for women and 27.2 years for men. In 1960, the median age at first marriage was 20.4 for brides and 22.9 for grooms.
- Since 1960, the bride in a first marriage, on average, has been a year or two younger than the groom.
