

**Instructions to Download *AbstractPlus* Version 2.4.0
(updated 1/4/2010)**

The latest version of *AbstractPlus*, Version 2.4.0, data entry software is now available from WCRS. The software, along with the accompanying *AbstractPlus* user manual, CRS Main Line data submission software and CRS Main Line manual are available for download from the following FTP site:

ftp://sftp.cdc.gov/Abstract_Plus/WI/WIHOSP/

You will need a userID and password to access the above ftp site. Please use the following:

userID = nccdnc
password = 2009cNdsc

Five files are available for download:

1. AP_020400_113_WIHosp_062909.exe
 AbstractPlus executable program
2. AbstractPlusManual WI June2009.doc
 AbstractPlus User Manual, updated June 2009
3. ML_setup.exe
 CRS Main Line executable program
4. ML_Manual.doc
 CRS Main Line User Manual
5. v11dataforWI.txt
 The tutorial file for *AbstractPlus*.

This version of *AbstractPlus* should be downloaded by facilities not yet using the program and also by facilities who are using the program but have an earlier version. Instructions are available in the manual on how to install the program for different situations (update vs. new install).

If you already have CRS Main Line installed, it is not necessary to download those two files as no updates were made.

If you encounter problems downloading the files, please contact Laura Stephenson at 608/266-8926 or laura.stephenson@dhs.wi.gov

A WCRS webcast training on how to use the *AbstractPlus* data entry software and CRS Main Line submission software is available for viewing at the following link:

<http://medial.wi.gov/DHFS/Viewer/?peid=31f21b54-2a9a-4e4d-9012-3e1494d2fc05>

Instructions for viewing the Webcast are available at:

<http://dhs.wisconsin.gov/wcrs/reporterinfo.htm>

- NOTE: You may see the following error message if you try to click on the ftp web site address directly from this document. If that happens, copy the ftp address directly to your internet browser and hit the Go button or your 'Enter' key. The site should appear and allow you to type in the userID and password.
