

REPORT on RELOCATIONS and DIVERSIONS from INSTITUTIONS

As required by s. 51.06 (8)

Executive Summary

Through three programs, the Department provides elders and people with physical and developmental disabilities residing in nursing facilities and Intermediate Care Facilities for the Mentally Retarded (ICFs-MR) the opportunity to relocate to community-based settings. Under another program, the Department provides support to a limited number of individuals who are at imminent risk of entering a nursing home to be diverted from nursing home admission and remain in community settings.

The Department's relocation and diversion programs have been highly successful, providing the opportunity in FY07 for 1,064 elderly individuals and people with physical and developmental disabilities to live in community settings, closer to family and friends and community activities. As shown in the summary table below, 591 or 56%, of all relocations and diversions were frail elders; 297 or 28%, were persons with physical disabilities and 176 or 16% were individuals with developmental disabilities.

Community Relocations and Diversions in FY07				
	Persons with Developmental Disabilities (DD)	Frail Elders	Persons with Physical Disabilities (PD)	Total
Relocations	176	484	240	900
Nursing Home Diversions		107	57	164
Total	176	591	297	1064
% of Total	16%	56%	28%	

Over the full 05-07 biennium, approximately 1,830 elders and people with physical and developmental disabilities have successfully relocated from institutional settings and an additional approximately 310 individuals were diverted from admission to a nursing home through the Department's programs. The quality of life for these 2,140 individuals has been enhanced through the opportunity to live in the community and be near family and friends and more fully engaged in community activities. The experience of the past two years is summarized in the table below.

Community Relocations and Diversions								
	Persons with DD		Frail Elders		Persons with PD		Total	
SFY	Relocations	Diversions	Relocations	Diversions	Relocations	Diversions	Relocations	Diversions
2006	372		409	98	152	47	933	145
2007	176		484	107	240	57	900	164
Total	548		893	205	392	104	1833	309
GRAND TOTAL							2142	

As shown in the table, highlights of the relocation and diversions initiatives in the 05-07 biennium include:

- 548 people with developmental disabilities, many of whom resided in institutions for decades, moved to the community and participated in community activities that were not available to them when they resided in institutions.
- 893 frail elders who resided in nursing facilities chose to live in the community near their families and friends. Prior to this initiative, these people would have been on a waiting list for home and community-based care, and few would have had the opportunity to return to the community.
- 392 people with physical disabilities chose to live in the community where they were able to access community activities, rather than live in nursing facilities.
- People with developmental disabilities have been served in the community at a cost that is within the institutional budget for this population.
- Frail elders and people with physical disabilities are being served in the community at a cost below that of institutional care, resulting in a level of savings under the Medical Assistance Program in the 05-07 biennium of \$12 million, which exceeds the projected savings in the 05-07 biennial budget bill by \$1 million.
- 205 elderly and 104 people with physical disabilities, who were determined to be at imminent risk of having to move to a nursing facility, were able to remain in community-based settings because diversion funding was made available.

Based on a strong commitment to and sound strategies for relocations, in January 2007 the Department was awarded a federal “Money Follows the Person” Medicaid grant to support rebalancing of the long-term care system through further relocations from institutions to the community. Starting October 2007 and continuing to October 2011, the federal government will pay an enhanced matching rate higher than the standard Medicaid matching rate for the costs of certain relocated individuals. Wisconsin is projected to earn up to \$15 million of increased federal funding over the grant period. The Money Follows the Person federal grant will help sustain the momentum for Wisconsin’s relocation initiatives in the next biennium.

Background

Relocation Initiatives

The Department provides elders and people with physical and developmental disabilities residing in nursing facilities and ICFs-MR the opportunity to relocate to community-based living arrangements under the following three programs:

- ICF-MR Restructuring Initiative
- Community Integration Program 1A
- Community Relocation Initiative

ICF-MR Restructuring Initiative

The ICF-MR Restructuring Initiative serves persons with developmental disabilities receiving active treatment in a non-state-owned Intermediate Care Facility for the Mentally Retarded (ICF-MR) or a non-state-owned nursing facility. (Relocations from the three State Centers for the Developmentally Disabled are part of the Community Integration Program 1A described below.) The initiative was authorized in the 2003-05 biennial budget bill and became effective on January 1, 2005. Under the initiative, counties are required to prepare a community plan for every person residing in an ICF-MR and for every person seeking admission to an ICF-MR. The plan must be submitted to the court and the court must consider the plan, along with other information presented to the court. If the court determines that the community plan is the most integrated setting appropriate to the needs of the individual, the court must order the person to be served in the community. If the person with a developmental disability was a resident of an ICF-MR or a nursing facility, the initiative allows money that was previously used to fund his/her institutional care to follow the person into the community to fund community-based care. Funding can also be used under this initiative for community placements for people relocated from facilities that are closing or downsizing. Under this initiative, the entire cost of the person's care plan is funded by the state. Therefore, no county tax levy funding has been required to fund these relocations.

In fiscal year 2007, a total of 143 individuals with developmental disabilities relocated into the community from ICFs-MR and nursing facilities under this initiative. In their new community settings, these individuals had their care needs fully met and participated in community activities that were not available to them when they resided in institutions.

The ICF-MR Restructuring Initiative has significantly rebalanced the long term care system for individuals with developmental disabilities. Since the start of this initiative in January 2005 through June 2007, a total of 577 individuals transitioned to community settings. As of July 2007, only 522 individuals, less than half of the population in ICFs-MR other than the State Centers at the start of the initiative, are residing in ICFs-MR other than the State Centers. Fifteen ICFs-MR, accounting for half of all ICFs-MR other than the State Centers, closed over the course of the initiative.

Relocations under the ICF-MR Restructuring (effective January 2005)	
SFY05	94
SFY06	340
SFY07	143
TOTAL	577

Community Integration Program (CIP) 1A

The Community Integration Program 1A supports relocations of individuals with developmental disabilities from the three State Centers for the Developmentally Disabled to community settings. The CIP 1A program began in 1981. Currently under the CIP 1A program, the state provides up to \$325/day for an individual’s community costs. The institutional cost of the Center is reduced by \$325/day for each relocated resident. In fiscal year 2007, 33 people were relocated from the State Centers into the community. Northern Wisconsin Center no longer provides long term care and treatment for individuals. All three Centers provide short-term intensive treatment for individuals with developmental disabilities residing in the community.

Community Relocation Initiative

The Community Relocation initiative provides elders and persons with physical disabilities residing in nursing homes the opportunity to relocate to community settings. People being cared for in nursing homes have a choice to remain in their current setting, or move to the community, if their care needs can be met at home, in an apartment or in an assisted living setting. The funding being used for an individual’s institutional care “follows” the person into the community to be used in the home and community-based waiver. The Community Relocation Initiative was authorized in the 05-07 biennial budget bill and began in August 2006. In fiscal year 2007, a total of 724 people relocated from nursing homes under the Community Relocation Initiative. Of the 724 total, 484 were elders and 240 were people with physical disabilities. These individuals chose to live in the community where they could be closer to family and friends and more fully access community activities. An additional 102 individuals residing in nursing homes enrolled in the Family Care program. These individuals may relocate to the community in the future.

Individuals of all ages chose to relocate to community settings under the Community Relocation Initiative, as shown in the chart below. It is particularly striking that 180, or one-quarter, of the individuals who chose to relocate were age 85 or older.

Age of Individuals Relocated under the Community Relocation Initiative: FY07						
18-49	50-64	65-74	75-84	85-99	>99	Total
83	157	104	200	179	1	724

Individuals with both relatively short-term and long-term stays chose to relocate, as shown in the chart below. Of the people relocated, 531 or approximately 70% had been in the nursing home more than 100 days, 342 or approximately 50% for six months or more, and 170 or approximately 25% relocated after having been in the nursing home for more than one year.

Length of Time in Nursing Home Prior to Relocation: FY07				
≤100 days	101-179 days	6 mo-1 year	> 1 year	Total
193	189	172	170	724

Diversions

Nursing Home Diversion Program

The Nursing Home Diversion Program provides support to a limited number of individuals who are at imminent risk of entering a nursing home to be diverted from nursing home admission and remain in community settings. The program was authorized in 2005 Wisconsin Act 355 and began in April 2006. Participants in this program are served under the Community Integration Program II (CIP II) Medicaid home and community-based waiver. To be eligible for these diversion funds, a person is required to meet certain risk criteria as defined by the Department in addition to meeting the functional and financial eligibility criteria for CIP II. The statute authorizes the Department to provide an enhanced CIP II rate for up to 150 individuals who are diverted from imminent entry into a nursing home and to provide diversion opportunities for additional individuals, subject to the concurrence of the legislature.

To be eligible for diversion funding, an individual must meet all of the following criteria:

- Belong to a target group served by CIP II (elderly age 65 or older and/or have a physical disability)
- Be functionally and financially eligible for the CIP II program;
- Reside or intend to reside in a community setting that is eligible for CIP II;
- Meet high risk criteria for imminent entry into a nursing home;
- The costs of the person's Medicaid funded community care plan must be no greater than the Medicaid costs the person would have incurred in the nursing home. The care must be cost-neutral.

As a part of the diversion initiative, the Department was required to develop and utilize criteria to determine who is at imminent risk of entry into a nursing home. In developing the criteria, the Department reviewed national studies, analyzed Wisconsin data and consulted with county long-term support coordinators and staff. Factors that are considered in the criteria include:

- Meeting an intensive skilled nursing (ISN) level of care;
- Facing an imminent loss of current living arrangement;
- Having a fragile or insufficient informal caregiver arrangement;
- Having a terminal illness;
- Having multiple other factors that are associated with nursing home entry.

Under the Nursing Home Diversion program in fiscal year 2007, a total of 164 individuals were diverted from nursing home admission and remained in community-based settings, staying close to family and friends and involved in the community. Of the total, 107 were elders and 57 were individuals with physical disabilities. There is a strong and widespread demand for diversion

opportunities. The 164 diversion opportunities were filled within four weeks and were utilized in 40 counties.

Individuals of all ages benefited from the Nursing Home Diversion program, as shown in the chart below. Significantly, 50 or approximately one-third, of the individuals diverted from nursing homes were age 85 or older.

Age of Individuals Relocated under the Community Relocation Initiative: FY07						
18-49	50-64	65-74	75-84	85-99	>99	Total
21	36	23	34	50	0	164

Nature of Living Arrangement

The following table shows the living arrangement for individuals people relocated in FY 2007. Elderly individuals primarily relocate to Community Based Residential Facilities (CBRF); this setting accounts for 267 or approximately half of all elderly clients. Another 165 or one third of elderly relocated individuals moved into a home or apartment, either alone or with family.

Individuals with physical disabilities primarily relocate to a home or apartment; 121 or half of individuals with physical disabilities successfully relocated to their own home or apartment. Another 91, or approximately one third of individuals with physical disabilities relocated to CBRFs.

Individuals with developmental disabilities primarily relocate to Adult Family Homes (AFHs); 121 or 69% of individuals with developmental disabilities utilized this setting. A small number relocated to CBRFs, 37 or 21%, and to a home or apartment, 18 or 10%.

Overall, 304 or one third of all individuals relocated to a home or apartment.

Living Arrangement for Individuals Relocated in FY07				
	Elderly	Persons with PD	Persons with DD	Total
Home or Apartment	165	121	18	304
Adult Family Home	15	23	121	159
Community-Based Residential Facility	267	91	37	395
Residential Care Apartment Complex (RCAC)	37	5		42
TOTAL	484	240	176	900

Appendix A provides information about the living arrangements for individuals relocated under the Community Relocation Initiative by the program under which they were served.

The living arrangements of individuals diverted from nursing home admission under the Nursing Home Diversion program are summarized below. Almost all individuals remained in their same living arrangement. The majority, 104 or approximately two-thirds, remained in a home or apartment. Almost all of the other one-third are living in CBRFs.

Living Arrangement for Individuals Diverted from Nursing Homes in FY07		
	Prior Living Arrangement	Living Arrangement on Program
Home or Apartment	109	104
Adult Family Home	1	1
CBRF	47	55
RCAC	5	4
Hospital	2	0
TOTAL	164	164

Duration of Relocations

Of the 724 individuals relocated in FY07 through the Community Relocation Program, 46 died of natural causes and 33 returned to a nursing home.

Of the 143 individuals with developmental disabilities who relocated in FY07 to the community under the ICF-MR Restructuring Initiative, 4 died of natural deaths and 1 returned to an ICF-MR. Of the 33 individuals with developmental disabilities who relocated in FY07 from the State Centers to the community under the CIP IA program, 1 died of natural causes and 1 returned to an ICF-MR.

Costs Under the Medicaid Program

To determine the net Medicaid cost of the relocation programs, Medicaid costs were calculated for both the period when the person was in an institution and the period when the person was living in the community. The analysis examined the following two components: (a) the institutional or home and community-based waiver costs; and (b) other Medicaid costs, termed MA Card Costs, which include the Medicaid costs for personal care services, therapeutic services, and all other MA services. This provides a comprehensive presentation of the person's Medicaid costs in each setting.

Waiver services are administered through state/county contracts on a calendar year basis. Precise costs for the January-June 2007 period are not fully reconciled and are not available until after the full calendar year is completed. For this reason, this report uses an estimate of the January-June 2007 waiver costs, based on average per person costs for relocations that occurred between July 1, 2006 and November 30, 2006. Relocations in December 2006 were excluded in the calculation of the average per person cost because the first month of a relocation is unrepresentative of the average monthly cost due to one-time costs related to start-up of a community placement.

Community Relocation Initiative

As summarized in the table below, in FY07 the average daily cost in the nursing facility for individuals before they relocated under the Community Relocation Initiative was \$129.47. In contrast, the average daily cost in the community after relocation for these same individuals was \$102.64. Community relocations under the CRI were cost effective, producing an average daily savings of \$27, representing a 21% cost reduction.

Preliminary Cost Information - Average Daily Costs for Individuals Relocated or Diverted in FY07								
Program		(1)	(2)	(3)	(4)	(5)	(6)	
	#	Facility Costs	Facility Card Costs	Facility Total	Prelim. Program Costs	Community Card Costs	Community Total	Average Savings
<i>CRI</i>	724	113.26	16.83	129.47	75.72	26.92	102.64	26.83
<i>CIP II – CRI</i>	583	111.45	14.59	126.04	74.42	30.97	105.39	20.65
<i>Family Care – CRI</i>	109	119.59	19.89	139.48	72.01	13.14	85.15	54.33
<i>PACE/Partnership-CRI</i>	32	124.61	33.24	157.85	112.09	-	112.09	45.76

As shown in the table below, the total MA cost in FY07 of serving the individuals under the Community Relocation Initiative during the period they lived in their new community settings was \$30.7 million. If instead these individuals had remained in their institutional settings during this time period, their MA cost of services would have been \$39.3 million.

Estimated Total FY07 Costs of Community Relocation Initiative

Program		(1)	(2)	(3)	(4)
	#	Aver. MA Costs in Community	No. of Days	Total MA Costs in Community	Ttl. MA Costs in Facility for same period
FY07 Relocations					
<i>CRI (Total)</i>	724	101.14	135,611	13,715,700	17,557,500
<i>CIP II – CRI</i>	583	105.39	107,252	11,303,300	13,518,000
<i>Family Care – CRI</i>	109	85.15	22,723	1,934,900	3,169,400
<i>PACE/Partnership-CRI</i>	32	112.09	5,636	631,700	889,600
FY06 Relocations	561	101.14	167,607	16,951,800	21,700,000
TOTAL: FY07 Costs				30,667,500	39,257,500

Notes

1. All Medicaid costs related to nursing home stay are based on paid claims as reported in MMIS averaged over prior three months. Some lag exists in data.
2. Includes allowance for county administrative costs.
3. Estimated card costs
4. Average MA community and facility costs of the FY06 relocation cohort during FY07 is assumed to be the same as those of the FY07 cohort.

Due to the difference between institutional and community costs, the Community Relocation Initiative produced total savings of \$8.6 million in FY07, as shown in the table below.

The CRI program was highly cost effective over the total 05-07 biennium, achieving Medicaid savings of \$12 million All Funds. This level of savings exceeds the projected savings in the 05-07 biennial budget bill of \$11 million by \$1 million All Funds.

Savings under Community Relocation Initiative				
	Total Savings	Budgeted Savings	Difference bet. Actual and Budgeted (AF)	Difference bet. Actual and Budgeted (GPR)
FY06	3,423,600	1,950,700	1,472,900	621,300
FY07	8,590,000	9,016,000	(426,000)	(181,000)
05-07 Biennium	12,013,600	10,966,700	1,046,900	440,300

ICF-MR Restructuring

The ICF-MR Restructuring Initiative establishes a set amount of funding to be used for the costs of all individuals eligible for the initiative either in institutional or community settings. In FY07, the total ICF-MR Restructuring budget equaled \$100.9 million All Funds. The Department is expected to manage the cost of serving those individuals remaining in institutions and the cost of new community relocations so as to stay within the global ICF-MR Restructuring budget.

In SFY07, the average daily MA cost of individuals in an ICF-MR before relocation was \$189.19, of which \$184.59 was facility cost and \$4.60 was card costs. The average daily MA cost of serving the same individuals in the community after relocation increased to \$293.58, of which \$246.96 was waiver costs and \$46.42 was card costs. The state MA program fully funds these community costs, with the result that counties do not bear any new costs due to this initiative.

Although the average cost of relocated individuals was higher than their institutional cost, the total expenditures were within the budgeted level, primarily because institutional costs were lower than expected due to deaths. In total, under the ICF-MR Restructuring Initiative in FY07, approximately \$42.9 million All Funds (AF) was spent on waiver costs, \$6.0 million AF for the increased cost of MA card services for relocated individuals in the community, and \$47.3 million AF for the costs of individuals residing in ICF-MR or nursing home institutions, for a total program cost of \$96.2 million AF. An additional \$4.2 million of ICF-MR Restructuring funding served to offset the loss of bed tax revenue related to the decrease in ICF-MR capacity. Thus, the cost of the entire ICF-MR program for FY07, \$100.4 million AF, was within the SFY 07 budgeted level of \$100.9 million AF.

CIP IA Program

As noted above, individuals with developmental disabilities relocated under the CIP IA program are funded by the state MA program for their community costs up to \$325 per day. The

institutional cost at the state DD Center where they resided is decreased by \$325 per day, making the program cost-neutral.

Nursing Home Diversion Program

The average daily community cost of individuals served under the nursing home diversion program in FY07 was \$59.61, of which \$50.33 was waiver costs and \$9.28 was card costs. The projected daily MA cost of serving these individuals if they had entered a nursing home is \$130.87, assuming that their institutional costs would have been similar to those of the individuals served under the Community Relocation Initiative.

The estimated cost of the individuals relocated under the nursing home diversion program in SFY07 is \$723,400 AF. The projected cost of serving these individuals in nursing homes, if they had needed to enter a nursing home, during the same time period was more than double this amount, at \$1.6 million AF.

Impact on Health and Safety

Assuring the health and safety of frail elders and individuals with developmental and physical disabilities is a paramount goal of the Department whether these individuals live in an institution or community settings.

Individuals with developmental disabilities relocated from the State Centers or from other ICFs-MR under the ICF-MR Restructuring Initiative are served in the community through the Medicaid Home and Community Based Waiver program called the Community Integration Program (CIP) IA and IB; or through Family Care, a Medicaid managed care long-term care program. Elders and individuals with physical disabilities who are relocated or diverted from nursing homes are served in the community under the Community Integration Program (CIP) II, an MA Home and Community Based Waiver; Family Care; or PACE/Partnership, a fully integrated Medicaid/Medicare managed care program for individuals with long-term care needs.

Individuals with Developmental Disabilities: CIP IA and IB

For individuals with developmental disabilities served under the CIP IA and IB programs, Department staff work cooperatively with county care management staff in developing initial care plans for the people who relocate from ICFs-MR and nursing facilities. During the development of the initial care plan, health and safety concerns are identified and addressed comprehensively. The person's health and safety history is examined closely so that adequate protections can be put in place in the community. Through the care planning process, interdisciplinary teams, including those with nursing and behavioral expertise, work collaboratively with the individual and those who know the person best to design services and supports that are appropriate, are cost-effective, and address the person's health and safety needs.

Under Wisconsin's Home and Community-Based Waiver programs, the Department ensures the health, safety and welfare of Home and Community-based Waiver participants. The Department shares this responsibility with county agencies in the State-County Contract by requiring county compliance with the Medicaid Waivers Manual.

The Department requires each county agency administering these waivers to have a system to ensure waiver participants are adequately protected from physical, verbal, and sexual abuse as well as maltreatment, neglect and financial exploitation and violation of their rights under law.

The Department also requires counties to have an effective response system when incidents of this kind arise. Counties are required to report alleged or actual incidents to the Department.

There are several systems and processes in place that allow Wisconsin to achieve high levels of health and safety for citizens with disabilities living in community settings. For every person with a developmental disability who is relocated from an ICF-MR or nursing facility, the Department or county staff conduct an in-depth plan review 30 days after the person relocates, usually in the person's home. A second in-depth plan review is conducted between three and six months after the relocation.

Based on the follow-up reports available of persons relocated in fiscal year 2007 under the ICF-MR Restructuring, 83 % had their medical needs appropriately met. County case managers work with clients to address those situations where medical needs were not fully met.

Frail Elders and People with Physical Disabilities: CIP II

For frail elders and people with physical disabilities served under the CIP II program, each person's care plan is reviewed by the State's quality assurance contractor prior to state approval to ensure that critical needs are addressed with adequate services. Within 30 days after relocation, the care manager visits the participant to ensure that services are being provided and are appropriate to the person's needs and the person is safe. The care manager prepares a written report on his/her findings for the agency file and sends a report to the state. The care manager makes, at a minimum, monthly contacts with the participant or family or any provider to check on the person's progress and make any needed changes. The care manager is required to visit the participant 90 days after starting on the program, again checking on progress and making needed changes to the care/service plan. As part of these required visits, the care manager completes a 30-day and 90-day questionnaire with the client for submission to the Department.

Every year, half of the counties administering the CIP II program receive a quality assurance monitoring review by the state's quality assurance contractor. These reviews include a review of client files at the local agency to ensure that all requirements are adhered to. Also, each year a random sample of 500 participants receive a home visit by the quality assurance contractor to check on the health, safety and well-being of participants. The State's quality assurance contractor conducts a telephone interview with individuals who left the program and return to the nursing home or with the family of persons who died after relocating. The purpose of these contacts is to determine whether any changes could have made the process better.

The 90-day questionnaire for individuals relocated under the Community Relocation Initiative and served under the CIP II programs indicates that the health status of relocated individuals is as good, and in many cases better, in their new setting and that health and safety issues are being met. Specifically,

- The functional status remained the same for 42% of participants and improved for 49% of participants after relocating.
- 19% of participants had health and safety issues identified since relocating. County case managers work with the clients to address these issues.

Family Care and Partnership

For people served in Family Care, the care management team, which includes a nurse, completes an initial service plan, addressing current needs including safety and risk, within 10 days of enrollment, which may precede relocation. In the Partnership program, care management teams

also include a nurse practitioner and occur prior to enrollment. A comprehensive assessment is completed within 30 days of enrollment, and a comprehensive services plan within 60 days. Completeness, consumer choice, appropriateness of services, and coordination between long-term care and primary and acute medical care are subject to contractual requirements. Internal care-plan quality-control procedures—which may include supervisory review or peer review or both—review compliance with these requirements, and includes reviews by an External Quality Review Organization (EQRO) that further examine care plan quality specific to practice guidelines, continuity and coordination of care, and coverage and authorization of services.

Family Care and Partnership care managers visit the relocated members on a schedule determined by each member's need or at least once every 90 days to assess success of the care, needs, adequacy of services, and consumer satisfaction and choice. Depending on the member's individual needs and preferences, these visits may involve the nurse care manager or the social services coordinator, or both. Documented re-assessments and care plan revisions occur as needed or at least once every six months. The EQRO reviews records of the frequency of care-manager contact, and the collaboration within the care-management team, during its file reviews and other quality reviews, which are conducted at various times throughout the year for each managed-care organization. Additional more targeted reviews may occur for any individual in the event that there are any quality issues identified in other care plans, complaints, grievances, or critical incidents.

Regulatory Oversight

The Division of Quality Assurance conducts regular on-site surveys of licensed community residential facilities (3-4 bed Adult Family Homes and Community-Based Residential Facilities) much like it does for ICFs-MR, using state guidelines and standards. Counties are responsible for assuring high quality services and environments for individuals living in smaller settings. Residential and day-service providers also have procedures and practices that maintain each person's safety and health. Because they interact with each person on a constant basis, medical conditions are monitored, social and environmental situations are structured, and individuals with special needs are given sufficient supports.

The Department oversees these programs and service delivery systems by having staff disbursed throughout the state to facilitate and monitor these efforts through several types of activities, including: random unannounced visits, in-depth annual plan review, as well as on-going dialogue with all stakeholders (including consumers and their families/guardians). The Department issues guidelines, and establishes policies and procedures whenever necessary, when gaps are identified or suspected.

The federal Centers for Medicare and Medicaid Services (CMS) requires the provision of health, safety and well-being of all waiver participants, while assuring patient rights, promoting individual and informed choice, community participation, and making sure that each person experiences a meaningful day. State staff currently conduct annual satisfaction surveys, and monitor information accumulated from a variety of sources. In addition to waiver services and supports, individuals also receive health services such as physician and dental visits, hospital care, personal care in their home, and pharmacy. Assessments are methodically completed and updated, and many counties and providers now employ nursing personnel as part of their care management teams.

Actual or suspected events

Any actual or suspected event that threatens the health or safety of an individual is investigated and reviewed by each provider and county. Counties are required to report all such instances to designated Department staff, who, depending on the nature and seriousness of the report, may investigate or involve others (such as police or the judicial system). All deaths in licensed or certified settings are reported to and scrutinized by a state review committee, who looks for negative trends associated with providers, counties, or the approaches that are used by the service delivery system with the intent of preventing further instances. Concerns are then shared with appropriate entities who are required to make systemic improvements or take corrective actions, which creates a constant cycle of improvement. Instances of abuse or neglect are remedied swiftly. Access to necessary medical services is closely monitored.

Involvement of Guardians or Family Members

Counties are required to prepare a plan for home or community-based care for all individuals residing in ICFs-MR and nursing homes who are at a developmental disability level of care. For ICFs-MRs other than the State Centers, these plans are part of the statutorily required annual court review (Watts review) to determine the most integrated setting appropriate to the person's needs. Counties involve guardians in the preparation of these plans and state law requires that the county provide a copy of the plan to the guardian prior to the Watts review.

When a person is relocated from a State Center or other ICF-MR or nursing home facility, the plan for that individual's care is signed by the guardian indicating his/her acceptance of the plan. Of the 143 persons relocated under the ICF-MR Restructuring Initiative in FY 2007, only 1 guardian disagreed with the plan. That fact notwithstanding, the court ordered the community placement of this individual according to the plans prepared for them. Guardians agreed with the plans of all 33 persons relocated from the State Centers in FY07 under the CIP IA program.

Most elderly persons and persons with physical disabilities relocated under the Community Relocation Initiative do not have guardians. However, in cases where people do have guardians, the guardians are involved in the efforts to relocate or divert individuals from institutions.

For persons who are competent to make their own decisions, family members are involved to the extent preferred by the individual participant. The Department does not keep a record of family involvement in care planning for individuals who are competent to make their own decisions.

Staff turnover

Attachment A provides 2006 staff turnover rates for Intermediate Care Facilities for the Mentally Retarded and Nursing Facilities. The rates are calculated based on information provided by nursing homes and ICFs-MR in response to the 2006 Annual Staffing Survey. The attachment sorts the facilities by county and identifies the city or town where the facility is located. Staff turnover rates are provided for both full and part time staff for three professions: Registered Nurses (RNs), Licensed Practical Nurses (LPNs), and Nursing Assistants (NAs). The turnover rate is calculated by dividing the new staff hired in 2006 by the number of staff on the payroll on 12/31/06, and multiplying this result by 100.

The 2006 statewide turnover rates are provided in the table below:

Staff Turnover Rates: 2006		
	Nursing Homes	ICF-MRs
Full time RNs	34%	7%
Part time RNs	43%	26%
Full time LPNs	27%	11%
Part time LPNs	54%	32%
Full time NAs	44%	15%
Part time NAs	80%	38%
