# Release Notes ENC_DM_1.14.0.0

Encounter Datamart, Document Control Numbers

Summary

The Encounter Datamart has been updated to include 3 new data elements. These are the Document Control Numbers or DCNs and represent the number assigned to the original bill by the health plan or the health plan's fiscal agent as part of their internal control. This DCN is used to identify claim to be adjusted.

There can be up to 3 DCNs associated with a single claims row, each with identical formatting and description. These new objects are located under the Encounter Detail Fact in the Universe.
