Release Notes ENC_ DM_1.19.0.0

Field Additions to the
# LTCare Encounter Datamart

Purpose/Background

The following fields, and associated attributes, have been added the LTCare Encounter Datamart:
- National Drug Codes (NDCs) for Physician Administered Drugs
- Billing and Rendering Taxonomy and Specialty Codes
- New filters for NDCs

National Drug Codes for Physician Administer Drugs

Location: Encounter Detail >> Encounter Drug Rebate for PAD

A National Drug Code is comprised of a 5 byte numeric labeler code, 4 byte numeric product code and a 2 byte numeric package code. It's used to uniquely identify a drug, its labeler & package size of a product for pricing and service/prior authorization.

The Provider Taxonomy Code Set is a hierarchical code set that consists of codes, descriptions, and definitions. Provider Taxonomy Codes are designed to categorize the type, classification, and/or specialization of health care providers.
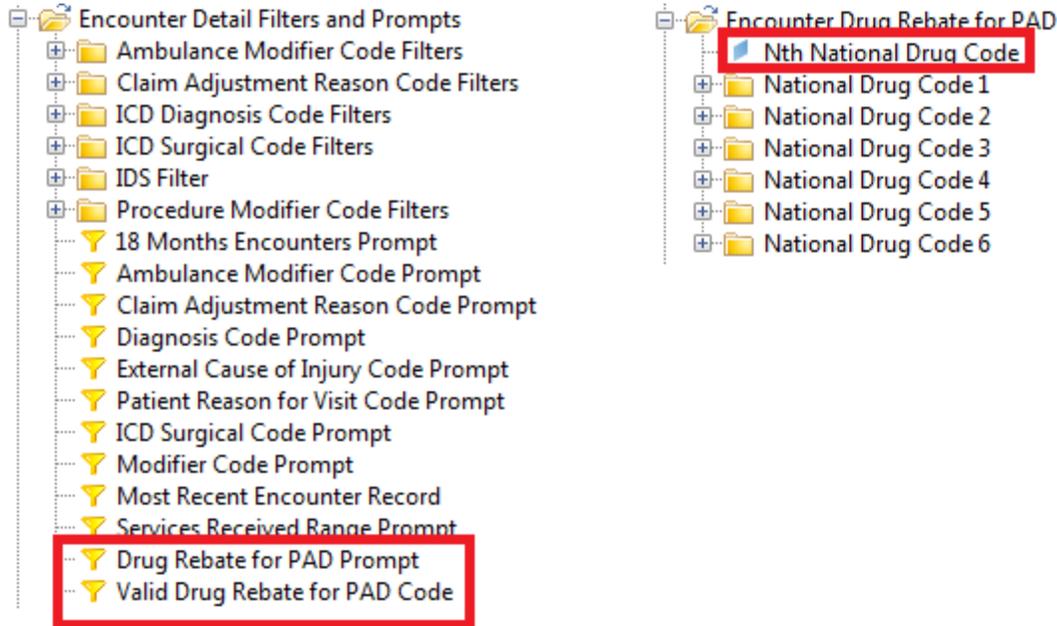

New filters for NDCs

Location: Encounter Detail >> Encounter Detail Filters and Prompts and
Encounter Detail >> Encounter Drug Rebate for PAD

Drug Rebate for Prompt:

Allows end user to filter by NDC columns and match on a specific, user-defined value. Records with no NDC code will have a value of??-VNR (value not reported).

Valid Drug Rebate for PAD Code:

Allows end user to filter for any records with a valid NDC code.

Nth National Drug Code:

Allows end user to filter for a NDC code in a specific position (1-6). This can be used as an object or as a filter, e.g. query for records whose third NDC code has a value of 9999. If a value outside of 1-6 is entered, it will be treated as??-VNR.
