Wisconsin Healthcare Account Quality Management System

Level 3 – LTCare Data Warehouse DSS/DW – Release Notes 1.21.0.0

Release Notes 1.21.0.0

11 Month Filter for Child Functional Screen Data Mart:

The LTCare Child Functional Screen Datamart Universe has been updated to include two new objects:

Annual Re-screen Due in Upcoming Month

Annual Re-screen Due in Upcoming Month limits results to screens with an Eligibility Calculated date during the full calendar month 11 months prior to the report run date.

If you were to run the report using this filter on November 12, 2012 you would only return screens with an Eligibility Calculated Date during December 2011. You can combine this filter with any other conditions, such as the Most Recent Child Screen by "X" filters.

Target Re-screen Date

This date has been added to the existing date objects and displays a date one calendar year after the screen's Eligibility Calculated date.
