Nicholas Athanasiou, MD, MBA, DFASAM
Julia L. Chang, MS, MBA
Michael Fingerhood, MD, FACP, DFASAM

FOUNDING PRESIDENT

Ruth Fox, MD
1895-1989

July 7th, 2026

To whom it may concern,

In collaboration with the Wisconsin Department of Health Services, this letter is intended to provide you with notice of the American Society of Addiction Medicine's (ASAM) copyright permissions framework as it relates to the use of *The ASAM Criteria* and its suite of products by substance use disorder treatment providers.

To support the consistent and effective implementation of the Third and Fourth Edition of *The ASAM Criteria*, ASAM has developed a variety of standardized, paper-based assessment tools that are available for free for clinicians and treatment programs to download and use. These tools are intended to promote fidelity to *The ASAM Criteria* and to facilitate standardized assessment practices among treatment professionals.

ASAM recognizes that clinicians and treatment programs may need to incorporate aspects of *The ASAM Criteria* into their internal policies, procedures, clinical practices, and programs. Consistent with ASAM's [Fair Use Guidelines](#), they are permitted to make limited, non-commercial use of ASAM's copyrighted materials for their internal business purposes. Publishing or marketing such use is limited to the extent necessary to comply with applicable laws and regulations.

The State of Wisconsin requires certified SUD treatment providers to utilize recognized placement criteria, including *The ASAM Criteria*, the Wisconsin Uniform Placement Criteria (WI-UPC), or other placement criteria approved by the State. In connection with these requirements, the State of Wisconsin provides guidance that use of either ASAM's [Fourth Edition Level of Care Assessment Guide](#) or [Third Edition Intake Assessment Guide](#) are the required minimum standard for treatment provider certification purposes.

ASAM wishes to clarify that *The ASAM Criteria* and all associated standardized assessment tools made available by ASAM are copyrighted works owned exclusively by ASAM. The copyrights and related intellectual property rights in these materials remain the property of ASAM and are protected under applicable federal and state law.

Accordingly, providers seeking to meet the State of Wisconsin's certification requirements may not modify or adapt any of ASAM's standardized assessment tools and then represent or claim that the modified document is one of ASAM's standardized assessment tools required by the State. This includes, but is not limited to, removing or modifying any question and response fields included in the original document distributed by ASAM.

Further, any modification to an ASAM standardized assessment tool may not display ASAM's name, logos, trademarks, or other branding on the modified document in a manner that suggests ASAM authored, approved, or endorsed that document.

Any modified assessment instrument that is based on *The ASAM Criteria* and created by a provider is the responsibility of that provider and must not be presented as an official ASAM or ASAM Criteria tool. Providers who wish to use ASAM's standardized assessment tools should obtain and use the authorized versions distributed by ASAM on its [Implementation Tools](#) webpage and comply with all applicable copyright, and trademark requirements.

ASAM remains committed to supporting high-quality, evidence-based addiction treatment and the appropriate implementation of *The ASAM Criteria*. If you have questions regarding the permitted use of ASAM's copyrighted materials, trademarks, or assessment tools, please contact ASAM directly at asamcriteria@asam.org.

Sincerely,

A handwritten signature in cursive script that reads "Maureen Boyle".

Maureen Boyle
Chief Quality and Science Officer, American Society of Addiction Medicine
