Quality Indicators with Pediatrics

<u>Foundations of Care</u>	<u>Process</u>	<u>Implementation</u>	<u>Analysis Methods</u>	<u>Outcomes</u>
what standards of practice do rely on	what is our delivery method of educating non pediatric based EMS and ED departments to the foundations of pediatric emergency	provide a uniform policy/protocol for treating the various pediatric traumas	create a tool to measure effectiveness of our protocols so that we can make changes appropriately	improved pediatric readiness statewide
what are we teaching who are we teaching	how often are providing education	who are we entrusting to educate	provide a standard educational conferences for specific EMSC reps in communities, who can provide continuous education	provide a constant EMSC resource to all communities, not just bigger cities like Madison and Milwaukee

Suggestions:

- Break the EMSC advisory board into 5 groups, who can focus on one of the following areas above
- Work on creating a EMSC Training Binder, with standards of practice and treatment protocols, and serves as a educational resources for EMS teams and EDs. We would have to update this annually.
