

CENTRAL LINE-ASSOCIATED BLOODSTREAM INFECTION (CLABSI) – LCBI 1
 (NHSN CLABSI protocol http://www.cdc.gov/nhsn/PDFs/pscManual/4PSC_CLABScurrent.pdf)

Patient Name		Medical Records No.	
Date of Admission	Date of Review		Date of Event
Date of Central Line Insertion		Date of Central Line Removal	
<input type="checkbox"/> Date of event is > 2 calendar days after admission (date of admission is day 1).			
<input type="checkbox"/> All elements used to meet infection criteria occur within the 7-day Infection Window (3 calendar days before first positive culture was taken, day culture was taken, and 3 calendar days after culture was taken). Infection Window: _____ to _____			
<input type="checkbox"/> Patient has a central line (CL) or umbilical catheter (UC) in place for > 2 calendar days on the date of event, with day of device placement being Day 1 (or, if the patient is admitted or transferred with a central line in place, day of first access is Day 1). <input type="checkbox"/> Day 1 of line <input type="checkbox"/> Day 2 of line <input type="checkbox"/> Day 3+ of line			
AND			
<input type="checkbox"/> A CL or UC is in place on the date of event or day before. If a CL or UC was in place for > 2 calendar days and then removed, the date of event of the LCBI must be the day of discontinuation or the next day. <input type="checkbox"/> Line in place on day of event <input type="checkbox"/> Line in place day before event			
AND			
Patient must meet the following criteria for laboratory-confirmed bloodstream infection (LCBI) – criterion 1 (for any patient) :			
<input type="checkbox"/> Patient has a recognized pathogen cultured from one or more blood cultures or a non-culture based microbiologic testing method which is performed for purposes of clinical diagnosis or treatment (e.g., not active surveillance culture/testing [ASC/AST]).			
AND			
<input type="checkbox"/> Organism cultured from blood is not related to an infection at another site (see Appendix 1 – Secondary BSI Guide).
