

CENTRAL LINE-ASSOCIATED BLOODSTREAM INFECTION (CLABSI) – MBI-LCBI 3
 (NHSN CLABSI protocol http://www.cdc.gov/nhsn/PDFs/pscManual/4PSC_CLABScurrent.pdf)

| | | | |
|--|-----------------------|-------------------------------------|--|
| Patient Name | | Medical Records No. | |
| Date of Admission | Date of Review | Date of Event | |
| Date of Central Line Insertion | | Date of Central Line Removal | |
| <input type="checkbox"/> Date of event is > 2 calendar days after admission (date of admission is day 1). | | | |
| <input type="checkbox"/> All elements used to meet infection criteria occur within the 7-day Infection Window (3 calendar days before first positive culture was taken, day culture was taken and 3 calendar days after culture was taken). Infection Window: _____ to _____ | | | |
| <input type="checkbox"/> Patient has a central line (CL) or umbilical catheter (UC) in place for > 2 calendar days on the date of event, with day of device placement being Day 1 (or, if the patient is admitted or transferred with a central line in place, day of first access is Day 1). <input type="checkbox"/> Day 1 of line <input type="checkbox"/> Day 2 of line <input type="checkbox"/> Day 3+ of line | | | |
| AND | | | |
| <input type="checkbox"/> A CL or UC is in place on the date of event or day before. If a CL or UC was in place for > 2 calendar days and then removed, the date of event of the LCBI must be the day of discontinuation or the next day. <input type="checkbox"/> Line in place on day of event <input type="checkbox"/> Line in place day before event | | | |
| AND | | | |
| Patient must meet the following criteria for mucosal barrier injury laboratory-confirmed bloodstream infection (MBI-LCBI) – criterion 3 (neonates or infants only) : | | | |
| <input type="checkbox"/> Patient ≤ 1 year of age meets criterion 3 for LCBI with at least one blood specimen identified by a culture or non-culture based microbiologic testing method with only viridans group streptococci and no other organisms isolated . | | | |
| AND | | | |
| Patient meets at least one of the following: <ul style="list-style-type: none"> <input type="checkbox"/> Is an allogeneic hematopoietic stem cell transplant recipient within the past year with one of the following documented during same hospitalization as positive blood specimen: <ul style="list-style-type: none"> <input type="checkbox"/> Grade III or IV gastrointestinal graft versus host disease (GI GVHD) <input type="checkbox"/> ≥ 20 mL/kg of diarrhea in a 24-hour period with onset on or within 7 calendar days before the date the first positive blood culture was collected. <input type="checkbox"/> Is neutropenic, defined as at least 2 separate days with values of absolute neutrophil count (ANC) or total white blood cell count (WBC) < 500 cells/mm³ within a seven-day time period, which includes the date the positive blood culture was collected (Day 1), the 3 calendar days before and the 3 calendar days after. | | | |
