

VACCINE FOR ADULTS (VFA) COMMUNITY OUTREACH

Local and Tribal Health Departments (LTHDs)		Today's Date
Contact Name	Phone Number	Email Address

Purpose:

Offer immunization services to adults at risk for complications of a vaccine-preventable disease. Administer hepatitis A, hepatitis B, hepatitis A/B, Tdap, MMR, and varicella vaccines in the community setting (e.g., food pantry, free medical/dental care clinic, homeless shelter, and county jail).

Goal:

Develop new partnerships and foster existing ones, while increasing adult immunization rates.

Application criteria:

- Tdap, HepA, HepB, HepA/B, MMR, and varicella may be offered as supply permits.
- LTHDs may work with multiple community sites.

LTHDs approved will be required to:

- Screen and immunize according to state-supplied vaccine eligibility criteria for adults listed in the Immunization Policy and Procedure Manual (Appendix B1). Persons who are currently incarcerated are considered to be uninsured.
- Maintain proper vaccine storage and handling.
- Order vaccine through the Wisconsin Immunization Registry (WIR), look up clients in WIR prior to offering immunization, and enter doses administered in WIR.

Provide the Community Site Name(s), Location(s), Timeline, and Vaccine Information

Community Site Name(s) and Location(s)	Date(s) of Vaccine Administration	Vaccine(s) Requested	Number of Vaccine Doses Requested

Approval Signature – Department of Health Services
