Contact Tracing (*Activities while infectious*)

Now, we are going to try and determine who might have been exposed to COVID-19 during your infectious period. Please think of all activities, places visited, travel, and individuals seen during the **2 days** before your symptom onset (**2 days** before the date of specimen collection for a confirmed or probable asymptomatic case) until the last day of your isolation or until the date of this interview if still within infectious period.
Note: *Enter data from this section in the WEDSS Tab: 2019-nCoV Risk. This section also helps identify contacts.*

NOTE: If case went to work or caused an exposure while infectious, capture enough information to allow for public health follow-up including names, location details, contact information (including phone number), inside/outside, and number of attendees.

Symptom onset or positive test date if asymptomatic: **2 days prior:**

End of isolation period or today's date, whichever is earlier:

Contacts

Using your daily Activity History (from page 5), list anyone who you had close contacts with during this period. (This should only be during the case's infectious period.)

- Infectious period:
  - **For confirmed or probable symptomatic patients: 2 days** before symptom onset through when the patient began their isolation (OR discontinued home isolation for household contacts where isolation could not be implemented)
  - **For confirmed or probable asymptomatic patients: 2 days** before the date of specimen collection for confirmed laboratory test through when the patient began their isolation (OR discontinued home isolation for household contacts where isolation could not be implemented)
- Use the "Risk Assessment Flow Chart" to determine if the contacts meets the definition of close contact. Each close contact **will be notified** of their potential exposure and will be educated on self-quarantine and self-monitoring as needed.

EXPOSURE/SOURCE

Symptom onset/test collection date if asymptomatic: **14 days before symptom onset:**

In this section, we are trying to determine who exposed the individual or where the individual may have contracted COVID-19.

Did you have known close contact with a person diagnosed with COVID-19 in the 14 days before your illness onset (or collection date if asymptomatic)?

☐ **Yes** ☐ **No** ☐ **Unknown**

If yes, ☐ Household contact(s) ☐ Non-household contact(s) ☐ Both household and non-household contacts

If yes, please list the individuals you interacted with that were ill or a known case before your symptoms began.

Name: Last, First	Phone number	Occupation (if known)	Relationship to case-patient	Sex	Age	Date of last exposure	Were they diagnosed with COVID-19?

Do you know, or have a strong suspicion, where/how you were exposed? ☐ **Yes** ☐ **No** ☐ **Unknown**

If Yes, provide details of where the client believes their exposure occurred. (dates, location, circumstance, etc.)
