

## PARTICIPATION AGREEMENT – ENVIRONMENTAL SERVICES

### FOR AGENCY USE ONLY

**Client ID Number:**

**Case ID Number:**

The Wisconsin Asthma-Safe Homes Program provides asthma education and an environmental check of your home. The program may help you manage your (or your child's) asthma. We need your consent to provide environmental services (Part B of the program), including a home assessment and possible asthma-related home repairs, and to share information with the Asthma-Safe Homes Program administrators (and your landlord if renter).

#### Consent to Receive Environmental Services

If you (and your landlord if renter) agree to receive environmental services, your Asthma-Safe Homes Program environmental services (Part B) provider will conduct a detailed home assessment and may recommend asthma-related home repairs valued up to \$5,000 based on their findings. If your home qualifies, your Part B provider will develop a scope of work to detail the proposed repairs. If you (and your landlord if renter) approve, the Part B provider will schedule work to be completed on your home at no cost to you (this may be completed by sub-contractors of your Part B provider). Upon completion, your Part B provider will review and approve the work. The benefit of agreeing to receive these environmental services is that your home may receive free asthma-related home repairs that can help reduce asthma triggers. You can choose to decline these services.

#### Consent to Release Information

Your Part B provider shares information about the home assessment and asthma-related home repairs with the Asthma-Safe Homes Program administrators at the Wisconsin Department of Health Services (WI-DHS) (and your landlord if renter). Information shared with WI-DHS is for purposes of reporting and program improvement. Any information shared for those purposes will not include identifiable information.

#### Program Expectations

- Ensure that your home is safe and accessible to Asthma-Safe Home environmental services providers while they conduct the home assessment and asthma-related home repairs.
- Notify your Part B provider of any issues that may interfere with project work or if you need to reschedule an appointment.
- If you are a renter, your landlord must agree to the project scope of work.
- Property owners must have home insurance.

I have read and understand the above program expectations. I agree to take part in Asthma-Safe Homes Program's environmental services.
