Data Source for Measurement

Agency report to be entered into an electronic data collection tool to be provided by the WI Division of Public Health

Baseline for Measurement

In 2014 (Jan 1, 2014-Sept 30, 2014), Crawford County LHD received 35 reports of potential human health hazards, 24 of which required investigation, and 19 of which were resolved.

Context

To maintain a healthy and clean environment within the county by abating or removing any actual or potential human health hazards in accordance with WI Statute 140.04 (e). In addition, through collaboration with partners and referral of clients to community resources, the LHD attempts to prevent the future incidence of human health hazards in accordance with WI Statute

Input Activities

The LHD will respond to, investigate and attempt to resolve human health hazards within the jurisdiction. The type of evidence based strategies varies with the exact type of hazard, but any known best practices will be utilized; often these are strategies that partner counties have utilized or that the LHD has found to be most useful and efficient over the many years of conducting human health hazard investigation and control.

CDC strongly encourages Preventive Health and Health Services Block Grant funds be used only on evidence based strategies, best practices or promising practices. Describe the strategies/practices to be used and identify the associated web links as available. Potential links to strategies for this objective include but are not limited to:
