This is a new initiative

Context

In 2014, a self assessment to measure the readiness for voluntary national accreditation was completed. In Domain 9 - Evaluate and continuously improve health department processes, programs and interventions; our agency rated very low. Since that time, the agency has completed a quality improvement plan and completed a QI project.

This is an opportunity to develop a performance management system for the agency to improve the agency's capacity in Domain 9.

Context Continued

Input Activities

Oconto County Public Health will be developing a performance management system based on Domain 9 of the PHAB Standards.

Data Source for Measurement

Agency report to be entered into an electronic data collection tool to be provided by the WI Division of Public Health.

Baseline for Measurement

Between 1/1/2013 and 8/31/2013, 45 children received early childhood caries prevention services to children ages 6 months through 6 years. With the decrease funding for this contract period we will target 40 children to receive services.

Context

Community assessment had identified access to oral health services as a health focus in 2008. The 2013 assessment identified that access to oral health services had improved due to the services implemented following the 2008 assessment. The early childhood caries prevention program continues and tracks the number of children served.

The number of children with multiple applications is monitor for our tracking system to recall children.

Objective #: 2 of 2

Contract Year: 2014
Objective Value: \$3,953

In 2014, the agency began tracking if parents implement the goal established by the parent at the previous appointment to evaluate behavior change.

Context Continued

Input Activities

The following early childhood oral health preventive services are considered best practice: 1) anticipatory guidance for parents and other caregivers, 2) an oral health risk assessment for infants and children ages 6 months through 6 years, 3) up to 4 fluoride applications (based on risk determination), and 4) referral to a dentist if necessary.
