Baseline for Measurement

This is a new initiative.

Context

Describe why this objective was chosen and the expected outcome measure(s). This objective was chosen because we have begun working on a Performance Management Plan, but have not been able to complete, educate department staff and implement. This plan will help evaluate our programming while moving forward toward accreditation.

Baseline for Measurement

2014, 100 families received anticipatory guidance through educational material. 75 children received face to face education. 22 children were seen for fluoride varnishes. Of those children 6 were identified as needing follow-up dental care. 83.3% established a dental home. The previous program was initiated in the daycares. The new initiative will expand to include daycares, Headstart, 4 year Kindergarten and 5 year Kindergarten.

Context

Describe why this objective was chosen and the expected outcome measures. Price County is designated as a Dental Health Professional Shortage Area, a Medical Health Professional Shortage Area and a Mental Health Professional Shortage Area. There is no public transportation available. Historically there has not been a sufficient workforce that can conduct the above best practices to improve the oral health and overall health of children aged six months to six years of age. Most area dentists do not accept state

insurance of Medicaid and they do not recommend that children have their first oral screening by age one. Primary care providers have reported already being over burdened with medical procedures and time constraints. Through this initiative parents will receive anticipatory guidance, children will receive fluoride application based on risk assessment, identified dental needs will be referred and dental home established.

Context Continued

Input Activities

The following early childhood oral health preventive services are considered best practice: 1) anticipatory guidance for parents and other caregivers, 2) an oral health risk assessment for infants and children ages 6 months through 6 years, 3) up to 4 fluoride applications (based on risk determination), and 4) referral to a dentist if necessary.
