Reports should be run with a 45 day buffer to ensure that all updated data has been received by the Wisconsin Immunization Registry (WIR). Include a report of the accountability targets and the progress achieved including the activities and interventions conducted; include any barriers that may have been identified. A summary of progress made on the selected objective(s) will be required at project mid-point.

### Baseline for Measurement

The WIR Benchmark Report was run to determine the baseline for measurement for this objective using the required criteria. Client is Lincoln County jurisdiction are 41% up to date with PCV13 and PPSV23.

Clients Residing in County: LINCOLN

Clients who did NOT meet the selected benchmark(s)

Just consider immunizations as meeting the benchmark

Birth date between 01/01/1900 and 12/31/1950

Evaluation date: 01/01/2016

Adult Benchmark

Total clients: 6362; 2626 clients (41%) met all benchmark criteria, 3736 clients did not

Late up-to-date: 2945 clients (46%) met all benchmark criteria as of report generated date, 3417 clients did not

Selected benchmarks: Pneumo-Poly (COMPLETE)

The 2015 end of year population based standard benchmark report will be used to determine the baseline for the current adult population based objective.

For the baseline the following parameters will be used to run the benchmark report:

Date of birth range:

19-26 years: 1/1/1989-12/31/1996

greater than or equal to 19 years (Tdap): less than or equal to 12/31/1996 (use 1/1/1900-12/31/1996 in benchmark report)

greater than or equal to 19 years (Influenza): less than or equal to 7/1/1996 (use 1/1/1900-6/30/1996 in benchmark report)

greater than or equal to 60 years: less than or equal to 12/31/1955 (use 1/1/1900-12/31/1955 in benchmark report)

greater than or equal to 65 years: less than or equal to 12/31/1950 (use 1/1/1900-12/31/1950 in benchmark report)

Evaluation date: 1/1/2016 (for Tdap, HPV 3, Zoster and Pneumococcal), 6/30/2015 to assess the 2014-2015 influenza season coverage rates.

Run date: 2/15/2016

### Context

Adults will be assessed using the benchmark report for having a dose or doses of PVC13 and PPSV23 vaccine. Progress towards reaching 90% will be measured using a WIR benchmark report. Only adults who have moved out of the agency's jurisdiction may be removed from the cohort for analysis. Unless you can prove that an adult has moved out of your jurisdiction, you cannot remove them from your cohort.

Guidelines for determining increase needed for progress toward contract cycle goals:

20%-29% - 8% above baseline

30%-39% - 7% above baseline

40%-49% - 6% above baseline

50%-59% - 5% above baseline

60%-69% - 4% above baseline

70%-79% - 3% above baseline

80%-85% - 2% above baseline

86%-89% - 1% above baseline

greater than or equal to 90% - maintain

Agencies should consult with their Regional Immunization Representative for assistance with determining activities and interventions that will help them achieve the required increase for their population assessment.

### Context Continued

### Input Activities

Lincoln County Health Department will conduct the following activities to assure the success of this objective:
