1.

A. Template Objective 1

School-Based Fluoride Supplement Program: By December 31, 2016, (insert number) children ages 6 months through 16 years from non-fluoridated communities will participate in a dietary fluoride supplement program administered by the (insert name) Health Department.

B. A report to document, by age and community, the number of children who participated in a dietary fluoride supplement program administered by the (insert name) Health Department.

C. The target population for fluoride supplements is children 6 months to 16 years of age who are at high risk for dental caries. Before dispensing fluoride supplements, providers should evaluate all potential fluoride sources and conduct a caries risk assessment. Caries risk status can change over time therefore children should be reassessed at regular intervals. The supplements should be prescribed in adherence to the ADA Dietary Fluoride Supplements: Evidence-based Clinical Recommendations. See the Wisconsin Oral Health Program Fluoride Supplement Program Boundary Statement boundary statement for additional details.

C.

D.

E.

F. 1. Wisconsin Oral Health Program (OHP) Fluoride Supplement Program Annual Report must be completed and submitted with documentation of the number of children, including age and community, who participated in the dietary fluoride supplement program, total number of fluoride prescriptions dispensed, fluoride prescriptions written, initial fluoride prescriptions, children receiving multiple prescriptions, and unduplicated children receiving fluoride supplements.

2. SPHERE Community Report to include the data from the following screens: Community Activity (all appropriate fields) and Fluoride Supplement (no detail screen).

G. Technical assistance is available through the Department of Health Services Wisconsin Oral Health Program. Contact Robbyn Kuester, BSDH, RDH at (608) 266-0876 or Robbyn.Kuester@wisconsin.gov.
