

**WISCONSIN DEPARTMENT**  
*of* **HEALTH SERVICES**

# **The National Healthcare Safety Network for New Infection Preventionists**

Ashlie Dowdell  
Director, HAI Prevention Program  
October 23, 2019

# Objectives

- Provide high-level National Healthcare Safety Network (NHSN) overview
- Review NHSN data entry
- Discuss NHSN analysis options
- View resources for successful NHSN use

# Hospital CMS Reporting

## Affects

- Prospective payment system (PPS) hospitals
- Inpatient rehabilitation facilities
- Long-term acute care hospitals

## Modules

- CLABSI
- CAUTI
- SSI (inpatient colon and abdominal hysterectomy)
- MRSA bacteremia
- CDI

Note: All acute care and critical access hospitals contribute these measures to the Wisconsin Hospital Association CheckPoint public reporting website ([https://www.wicheckpoint.org/Home\\_main.aspx](https://www.wicheckpoint.org/Home_main.aspx)) too.

# Wisconsin Hospital Reporting

Department of Health Services carbapenem-resistant *Enterobacteriaceae* (CRE) mandate

- Reporting via NHSN
- Reporting via WEDSS (DHS chapter 145)

More information available at

<https://www.dhs.wisconsin.gov/disease/cre.htm>

<https://www.dhs.wisconsin.gov/hai/nhsn-resources.htm>

# NHSN Enrollment Basics

- Facility enrollment vs. individuals
- Secure access management system (SAMS)
- NHSN facility administrator
- Conferred rights

Back

# Facility Activation Basics

- Location mapping

[https://www.cdc.gov/nhsn/pdfs/pscmanual/15locationsdescriptions\\_current.pdf](https://www.cdc.gov/nhsn/pdfs/pscmanual/15locationsdescriptions_current.pdf)

- Additional users

- Annual facility survey

[https://www.cdc.gov/nhsn/forms/instr/57\\_103-toi.pdf](https://www.cdc.gov/nhsn/forms/instr/57_103-toi.pdf)

# Tip 1: Review Location Mapping At Least Annually

- Review location mapping (Facility > Locations > Find)
- Assess accuracy and adjustment needs
- Consult with unit managers for typical patient populations on an average day (80-20 rule)
- Edit units as needed during/after construction
- Determine need to edit versus add locations
  - Edit: Name change, population stays the same
  - Add: Change to patient population

# NHSN Data Entry

Every month:

- Reporting plan
- Numerator
- Denominator
- Missing data alerts

# Tip 2: Surveillance Protocols

- Have the current surveillance protocol in front of you while assessing cases.
- Bookmark the surveillance protocol index.  
<https://www.cdc.gov/nhsn/acute-care-hospital/index.html>
- Don't forget about "Chapter 17."  
[https://www.cdc.gov/nhsn/pdfs/pscmanual/17pscnosinfdef\\_current.pdf](https://www.cdc.gov/nhsn/pdfs/pscmanual/17pscnosinfdef_current.pdf)

# Monthly Reporting Plan

- Lists surveillance plan for the month
- Certifies adherence to NHSN protocols
- Triggers missing data alerts
- Allows data inclusion in national benchmarking aggregates

NHSN Home	
Alerts

Procedure	
Summary Data	

# Monthly Reporting Plan

Facility ID \*: NHSN Test Medical Clinic #3 (ID 14352) ▼

Month \*: August ▼

Year \*: 2019 ▼

No NHSN Patient Safety Modules Followed this Month

## Device-Associated Module

	Locations	CLABSI	VAE	CAUTI
🗑	SICU - SURGICAL ICU ▼	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
🗑	MEDSURG2 - MED/SURG WARD ▼	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Add Row

Clear All Rows

Copy from Previous Month

## Procedure-Associated Module

	Procedures	SSI
🗑	COLO - Colon surgery ▼	IN: <input checked="" type="checkbox"/> OUT: <input type="checkbox"/>
🗑	HYST - Abdominal hysterectomy ▼	IN: <input checked="" type="checkbox"/> OUT: <input type="checkbox"/>

## Multi-Drug Resistant Organism Module

	Locations	Specific Organism Type
🗑	FACWIDEIN - Facility-wide Inpatient (FacWIDEIn) ▼	CRE - CRE (CRE-Ecoli, CRE-Enterobacter, CRE-Klebsiella) ▼

**Process and Outcome Measures**

Infection Surveillance	AST-Timing	AST-Eligible	Incidence	Prevalence	Lab ID Event All Specimens	Lab ID Event Blood Specimens Only	HH	GG
<input type="checkbox"/>	▼	▼	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

# Tip 3: Enter Reporting Plans Monthly

- More frequent entry = more practice
- Create a habit (plan, numerator, denominator)

# Denominator Data

- Summary data: Unit-based surveillance for device-associated modules
  - Patient days
  - Device days
- Summary data: Facility-wide inpatient, ED, and 24-hour observation unit surveillance for the MDRO/CDI modules and process measures
  - Patient days
  - Patient admissions
  - Encounters (outpatient locations)

# Tip 4: Validate Electronic Data

- When to validate?
  - Manual to electronic reports
  - Electronic report vendor change
  - Consider regular validation (i.e., annual)
- How to validate?
  - Compare to manual collection for three months
  - Assess percent difference (goal is +/- 5%)

# Procedure Data

## Surgical site infections

- Procedure record for every surgery done each month in selected categories, even if there is no infection
- Manual entry
- Electronic entry
  - CSV file (Excel)
  - Clinical document architecture (CDA)

# Numerator Data

- Add an event

Or

- Check “report no events”
  - Missing procedure-associated events alert for SSI
  - Summary data form for all other modules

# Report No Events

	Specific Organism Type							
	MRSA	VRE	CephR-Klebsiella	CRE-Ecoli	CRE-Enterobacter	CRE-Klebsiella	C. difficile	MDR-Acinetobacter
LabID Event (All specimens)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Report No Events	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/> **	<input checked="" type="checkbox"/> **	<input checked="" type="checkbox"/> **	<input type="checkbox"/>	<input type="checkbox"/>

# Tip 5: Use Tables of Instruction and NHSN FAQs

Data Collection Forms	-

### All Data Collection Forms are Print-only

- [57.108 Primary Bloodstream Infection \(BSI\) form January 2019](#)  [PDF – 107 KB]
  - [Customizable form](#)  [DOCX – 39 KB]
  - [Table of Instructions for BSI form 57.108](#)  [PDF – 169 KB]

# NHSN CRE Definition

Any *Escherichia coli*, *Klebsiella oxytoca*, *Klebsiella pneumoniae*, or *Enterobacter* spp. testing resistant to imipenem, meropenem, doripenem, or ertapenem by standard susceptibility testing methods.

OR

Any organism producing a carbapenemase (specifically, KPC, NDM, VIM, IMP, OXA-48) demonstrated using a recognized test (examples: PCR, metallo- $\beta$ -lactamase test, Carba-NP, Xpert® Carba-R ).

**Report carbapenem-resistant *Enterobacteriaceae* (i.e., carbapenemase-producing [CP] and non-CP) of the following species: *Escherichia coli*, *Klebsiella oxytoca*, *Klebsiella pneumoniae*, or *Enterobacter* spp.**

# Is This CRE?

## Culture

>10,000 org/mL Enterobacter cloacae complex !

>10,000 org/mL Enterobacter cloacae complex !

Unable to rule out carbapenemase resistance (KPC/CRE/Oxa48/NDM1type). Patient requires isolation. Please see Policy #1074: Management of Patients with Carbapenem-Resistant Enterobacteriaceae (CRE). Isolate sent to State Laboratory for PCR confirmation. Please see separate report.

Report to follow

## Susceptibility

	Enterobacter cloacae complex (1) MIC - VITEK 2		Enterobacter cloacae complex (2)		MIC - DISK DIFFUSION
	MIC	Interpretation	MIC	Interpretation	
AMIKACIN	<=2 ug/mL	Susceptible <sup>S</sup>	<=2 ug/mL	Susceptible <sup>S</sup>	
Caz/Clav Zone Difference					Susceptible <sup>S</sup>
CEFAZOLIN	>=64 ug/mL	Resistant <sup>S</sup>	>=64 ug/mL	Resistant <sup>S</sup>	
CEFEPIME	<=1 ug/mL	Susceptible <sup>S</sup>	<=1 ug/mL	Susceptible <sup>S</sup>	
CEFOTAXIME					Resistant <sup>S</sup>
CEFOXITIN	>=64 ug/mL	Resistant <sup>S</sup>	>=64 ug/mL	Resistant <sup>S</sup>	
CEFTAZIDIME	<=1 ug/mL	Susceptible <sup>S</sup>	>=64 ug/mL	Resistant <sup>S</sup>	Resistant <sup>S</sup>
CEFTRIAZONE	<=1 ug/mL	Susceptible	>=64 ug/mL	Resistant	
CIPROFLOXACIN	<=0.25 ug/mL	Susceptible	<=0.25 ug/mL	Susceptible	
Ctx/Clav Zone Difference					Susceptible <sup>S</sup>
ERTAPENEM	<=0.5 ug/mL	Susceptible <sup>S</sup>			
GENTAMICIN	<=1 ug/mL	Susceptible	<=1 ug/mL	Susceptible	
keyhole					Negative <sup>S</sup>
MEROPENEM	<=0.25 ug/mL	Susceptible <sup>S</sup>	<=0.25 ug/mL	Susceptible <sup>S</sup>	
NITROFURANTOIN	128 ug/mL	Resistant	64 ug/mL	Intermediate	
PIPERACILLIN/TAZOBACTAM	16 ug/mL	Susceptible <sup>S</sup>	>=128 ug/mL	Resistant <sup>S</sup>	

# Tip 6: Carbapenems

- It's not CRE if the carbapenems were susceptible.
  - Meropenem
  - Imipenem
  - Doripenem
  - Ertapenem
- Carbapenem-resistant does not necessarily mean it is a carbapenemase-producer.

SENDING LAB <b>*Wisconsin State Laboratory of Hygiene (52D0669558)</b> 2601 Agriculture Dr Madison, WI 53718 (800) 862-1013	
ACCESSION # [REDACTED]	PLACER ORDER # [REDACTED]
SPECIMEN COLLECTED DATE 03/02/2019 11:42	SPECIMEN RECEIVED DATE 03/07/2019
SPECIMEN SOURCE Bacterial Isolate	RESULT
SPECIMEN NOTES Body Site: Urine	
REPORTED 03/13/2019 15:38	RESULTED 03/13/2019 15:38

**TEST ORDERED: CARBAPENEMASE PCR**

This test was developed and its performance characteristics determined by the Wisconsin State Laboratory of Hygiene. It has not been cleared by the U.S. Food and Drug Administration.

RESULT	VALUE	UNITS	REFERENCE RANGES	ABNORMAL	RESULT STATUS
KPC	KPC gene detected.			Abnormal	Final

blaKPC AnorectIIsI QI PCR	KPC gene detected.			Abnormal	Final
------------------------------	--------------------	--	--	----------	-------

RESULT	VALUE	UNITS	REFERENCE RANGES	ABNORMAL	RESULT STATUS
NDM-1	No NDM-1 gene detected.				Final

blaNDM AnorectIIsI QI PCR	No NDM-1 gene detected.				Final
------------------------------	-------------------------	--	--	--	-------

# All Carbapenem-Resistant Enterobacteriaceae (CRE)

# Tip 7: Is This CRE Reportable?

Consider	NHSN	DHS 145
Organism	<i>E. coli</i> <i>Enterobacter</i> <i>K. pneumoniae</i> <i>K. oxytoca</i>	Any <i>Enterobacteriaceae</i>
Carbapenem-resistant?	Report to NHSN	Lab will send specimen for carbapenemase testing
Carbapenemase-producer?	Report to NHSN	Report to local health department

# Alerts

- Based on reporting plan entries (i.e., missing plans won't display alerts for the month)
- Displayed upon login for every facility user and via “Alerts” navigation bar option

The screenshot displays the NHSN Patient Safety Component Home Page. On the left is a vertical navigation bar with the following items: NHSN Home, Alerts (highlighted with a red border), Dashboard, Reporting Plan, Patient, Event, Procedure, Summary Data, Import/Export, Surveys, and Analysis. The main content area features a header with a nurse icon and the text "NHSN Patient Safety Component Home Page". Below the header is a section titled "COMPLETE THESE ITEMS" followed by "ALERTS". Three alert cards are shown: "Missing Events" with a red vertical bar and the number 2, "Incomplete Event" with a yellow vertical bar and the number 1, and "Missing Summaries" with a purple vertical bar and the number 23.

Alert Category	Count
Missing Events	2
Incomplete Event	1
Missing Summaries	23

# Common Questions

- Summary data look at the population at risk, not just those with the specific MDRO/HAI.
- Data need to be entered every month, even when there are no HAIs.
- Ask your lab if unsure about the right CDI test type. PCR is a type of NAAT.

# NHSN Analysis

# Analysis Basics

- Data set generation
- Real-time availability
- Module-specific pre-configured reports
- Statistical testing built-in (p-values, confidence intervals)
- Risk adjustment
- Exportable results (Excel, SAS, Access, etc.)
- Report filtering/modification

# Reports

# Internal Data Validation

## Every month

- ✓ Monthly reporting plans
- ✓ Events
- ✓ Denominator data
- ✓ Denominator data plausability

## Every quarter

- ✓ CMS reports
- ✓ SIRs
- ✓ SURs
- ✓ Determine reasons for excluded procedures
- ✓ CDI test type

NHSN internal validation guide:

<https://www.cdc.gov/nhsn/pdfs/validation/2019/2019-nhsn-iv-for-facilities-508.pdf>

# Underutilized Reports

- Frequency tables for quick counts
- Data quality folder reports
- Procedure line list for details and general exclusion application

# Common Analysis Questions

- MDRO SIRs are available at a minimum by quarter.
- Annual survey answers can affect SIR reports.
- Protocol data analysis sections contain rate calculation details (especially LabID).
- Each SSI SIR has different inclusion and exclusion criteria (All, Complex A/R, and 30-day Complex A/R).

All SSI SIR Model	<ul style="list-style-type: none"> <li>• Includes separate models for inpatient and hospital outpatient procedures (under the 2015 baseline)</li> <li>• Includes Superficial, Deep &amp; Organ/Space SSIs</li> <li>• Superficial &amp; Deep incisional SSIs limited to primary incisional SSIs only</li> <li>• Includes SSIs identified on admission, readmission &amp; via post-discharge surveillance</li> </ul>
Complex A/R SSI Model	<ul style="list-style-type: none"> <li>• Includes <u>only</u> Deep incisional primary SSIs &amp; Organ/Space SSIs</li> <li>• Includes <u>only</u> SSIs identified on Admission/Readmission to facility where procedure was performed</li> <li>• Includes <u>only</u> inpatient procedures</li> <li>• Used for the HAI Progress Report, published annually by CDC</li> </ul>
Complex 30-day SSI model (used for CMS IPPS)	<ul style="list-style-type: none"> <li>• Includes only in-plan, inpatient COLO and HYST procedures in adult patients (specifically, <math>\geq 18</math> years of age)</li> <li>• Includes only deep incisional primary SSIs and organ/space SSIs with an event date within 30 days of the procedure</li> <li>• Includes SSIs identified on admission, readmission &amp; via post-discharge surveillance</li> <li>• <b>Uses Diabetes, ASA score, gender, age, BMI, oncology hospital and closure technique to determine risk for COLO (under the 2015 baseline, BS2)</b> <b>Uses Diabetes, ASA score, age, BMI and oncology hospital to determine risk for HYST (under the 2015 baseline, BS2)</b></li> <li>• <b>NOTE:</b> The Complex 30-day SSI model, under the 2006-2008 baseline, BS1, uses only age and ASA to determine risk for both COLO and HYST (BS1 applies to data up to 2016)</li> <li>• Used only for CMS IPPS reporting and for public reporting on Hospital Compare</li> </ul>

# Stay Current with NHSN Surveillance

- Review quarterly NHSN newsletters.
- Attend annual NHSN Patient Safety Component webstream training.
- Review notes or attend monthly DPH NHSN teleconferences.
- Contact DPH when you have questions. We are here to help!

# What's Next?

- Get access to NHSN if you do not have it yet, either as a user or as a facility administrator.
- Determine data sources. Ask questions.
- Start entering data.
- Reach out with questions. Don't struggle alone.
- Validate data to ensure accuracy and completeness.

## National Healthcare Safety Network (NHSN)

[www.cdc.gov/nhsn](http://www.cdc.gov/nhsn)

CDC's National Healthcare Safety Network is the nation's most widely used healthcare-associated infection tracking system. NHSN provides facilities, states, regions, and the nation with data needed to identify problem areas, measure progress of prevention efforts, and ultimately eliminate healthcare-associated infections.

In addition, NHSN allows healthcare facilities to track blood safety errors and important healthcare process measures such as healthcare personnel influenza vaccine status and infection control adherence rates.

**Drug Resistance**  
 Superbugs ranked, CDC outlines four core actions to halt resistance
