Hypertension in WI

Individuals living in **urban underserved areas** have the lowest rate of blood pressure control¹.

Hypertension control rates were 10% lower for those on **Medicaid (75%)** compared to those with Medicare (85%)¹.

Million Hearts® 2027 aims to advance healthy equity with a deliberate focus on people:

- from Racial/Ethnic Minority Groups
- with Lower Income
- who Live in rural areas and other 'Access Deserts'
