

Transition to Control-D

Lexi Koler, ISBA Specialist

March 17, 2016

Income Maintenance Advisory Committee (IMAC) Meeting

Purpose

To provide the necessary information you need to transition from using Enterprise Output Solution (EOS) to using Control-D for CARES Mainframe reports

Key Dates

- July 1, 2016: Mainframe reports will only be accessible in Control-D.
- June 13, 2016: Users should access reports in EOS and Control-D to become comfortable in the new system.

Resources

- Operations Memo [15-22](#): An amended version with small changes will be sent in early June.
- User Guide: A link is available at the end of the Operations Memo (both initial and amended versions).
- Link to Control-D:
<https://controld.wisconsin.gov/wa>

Next Steps

- Users should log into Control-D between now and June 10 to verify they have access.
 - If you do not have access to Control-D and you have access to EOS, contact DHS Security for support.
- Users should identify their most-used reports by Form Name, so they can compare the reports in EOS and Control-D between June 13 and July 1.
