Learning Community Agreements

I/We agree to:

- Recognize conversation as the seed of action.
- Value and hold relationships at the center of this work.
- Engage and participate—this space is what we make it.
- Listen and make room for others to share.
- Be open to new ideas and ways of thinking.
- Be patient with others and with ourselves.
- Remain aware of how history, class, and environment shape our worldview.
- Acknowledge the intent but own the impact.

Housekeeping

- There will be statistics, resources, and tools shared over the course of our meeting.
 - Session will be recorded and posted on [DHS's training website](#)
 - Slide deck will also be posted and provided to attendees
- You may drop questions in the chat, Q/A at end of presentation.
- There will be a brief survey at the end of session.

Social Determinants of Health Defined

The circumstances in which people are born, grow, live, work, and age. These determinants interact with individual behavior and shape the choices that are available to them.

These circumstances are in turn shaped by a wider set of forces including economics, social policies on education and housing, and politics that enhance or impede access to opportunities for health based on social hierarchies of advantage and disadvantage (e.g., race/ethnicity, class, and gender).

Domains

Note: The preliminary estimates of the weighted average poverty thresholds for 2022 are calculated by multiplying the 2021 weighted average thresholds from the 2022 Current Population Survey Annual Social and Economic Supplement (CPS ASEC) by a factor of 1.0800273, the ratio of the average annual Consumer Price Index for All Consumers (CPI-U) for 2022 to the average annual CPI-U for 2021. These estimates may differ slightly from the final thresholds that will be published in September 2023 with the release of the official poverty estimates for 2022.
