

# WISCONSIN MATERNAL MORTALITY REVIEW TEAM (MMRT)

## November 2025 Meeting Summary

### **PLEASE READ:**

The MMRT met in November 2025 to review all 2018 pregnancy-associated deaths, which had not yet been reviewed due to a large backlog that was preventing the program from releasing timely data. These deaths were reviewed by small groups of MMRT members, which met at the same time to complete the entire year of review in one day. To ensure timely review, recommendations were not created for any 2018 deaths. These deaths were fully reviewed, and a comprehensive report will be released at a later date. A brief summary can be found below.

**Cases Reviewed:** 25

**Preventability:** 100% preventable

**Pregnancy-Relatedness:** 36% pregnancy-related

**Causes of Death\*:** Mental health conditions, cardiomyopathy and other cardiovascular conditions, injury, embolism - thrombotic (excludes cerebral)

\* Pregnancy-related only
