About this Course

This Instructor-led Training (ILT) course introduces the Sandata Electronic Visit Verification (EVV) system and is meant to show a user how to access and use the different modules of the system. The instructor will use this guide to lead each lesson with an overview of the topic followed by a demonstration and hands-on practice (where possible) of the activities within Sandata EVV.

Course Duration

The estimated time for this course is 1 day.

Performance Objectives

- Navigate Sandata EVV
- Use the Security module to:
 - Create and modify users
 - Assign and modify roles/privileges to users
 - Delete/Reactivate users
 - Reset user passwords
 - Create roles and assign privileges
 - Change a password
- Use *Data Entry* to:
 - View/Enter clients
 - View employees
- Explain the purpose and basic functionality of Sandata Mobile Connect (SMC), Telephonic Visit Verification (TVV) and Fixed Visit Verification (FVV)
- Use the *Dashboard* module to view real-time exceptions
- Use the *Visit Maintenance* module to manage, correct visit issues as necessary
- Know the difference between Daily and Date Range reports
- Run both Daily and Date Range reports

Overview/Objectives

This training is an in-depth review of the Sandata EVV system, pointing out features and requirements. In this session, we will cover the following topics:

- Accessing and Logging on and off Sandata EVV
- Using features and functions to navigate Sandata EVV
- User Set-up and Security
- Data Input into Sandata EVV – Clients
- SMC, TVV and FVV
- Digital Dashboard and Visit Maintenance
- Accessing reports

The goal of this training is to present the functionality of Sandata EVV and to focus on the concepts of how Sandata EVV lends support in doing visit activities.

This class will be a combination of classroom instruction, handouts and practice exercises. At the end of the session, you will be asked to complete a Training Assessment exercise to reinforce the skills learned today, as well as an online training evaluation.

For the training exercises, we'll use an account that is designed specifically for training. We will not use real clients; therefore, the data cannot be harmed. The training account is a close copy of the live system, but clients and examples have been added to use during classes.

1 Program Overview

Module Time

15 minutes

This lesson introduces the Electronic Visit Verification (EVV) program. It provides an overview of the benefits and its main functionality.

Module Objectives

After completing this lesson, you will be able to:

- describe the 21st Century Cures Act; and
- describe the program objectives and the services under the program.

Key Terminology

Term/Acronym	Definition
EVV	Electronic Visit Verification

Introduction

Congress established a January 1ST, 2021 requirement for all states to use an EVV system, in accordance with the 21st Century Cures Act.

EVV is an electronic system that verifies when provider visits occur and documents the precise time services begin and end.

Program Objectives

- Promote quality outcomes for clients (Quality of Care)

Ensure the health and welfare of clients choosing to receive long-term services and support where they live, or otherwise receive care in the community

- Reduce billing errors and contain costs (Program Integrity)

Improved payment accuracy by using technology to match data on claims with data in service documentation (e.g., time and duration of visit)

2 System Overview

Module Time

15 minutes

This lesson demonstrates how to log in to Sandata EVV.

Module Objectives

After completing this lesson, you will be able to:

- access and log in to Sandata EVV;
- reset passwords;
- navigate Sandata EVV (with/without Americans Disabilities Act (ADA) support); and
- define common functions within Sandata EVV.

Key Terminology

Term	Definition
Americans with Disabilities Act (ADA)	The Americans with Disabilities Act of 1990 is a civil rights law that prohibits discrimination based on disability.
Job Access With Speech (JAWS)	Job Access With Speech is a computer screen reader program for Microsoft Windows that allows blind and visually impaired users to read the screen either with a text-to-speech output or by a refreshable Braille display

Introduction

This document details the functionality of the Sandata EVV system. It is a web-based system accessed via Mozilla Firefox, Google Chrome or Microsoft Edge web browsers. It allows for client/employee data entry, paperless review/approval of visits and reporting.

Browser Requirements

Sandata supports the current and prior major releases of Mozilla Firefox, Google Chrome or Microsoft Edge on a rolling basis. This policy to support modern browsers allows us to take advantage of the most recent efficiencies in the browsers to maximize the user experience and also ensure our solutions are running on the most recent security and performance updates.

Overview

The Sandata EVV system consists of the following modules.

- *Navigate Modules*
- *Dashboard*
- *Clients*
- *Employees*
- *Visit Maintenance*
- *Reports*
- *Security*
- *Online Manual*

Log-in Screen

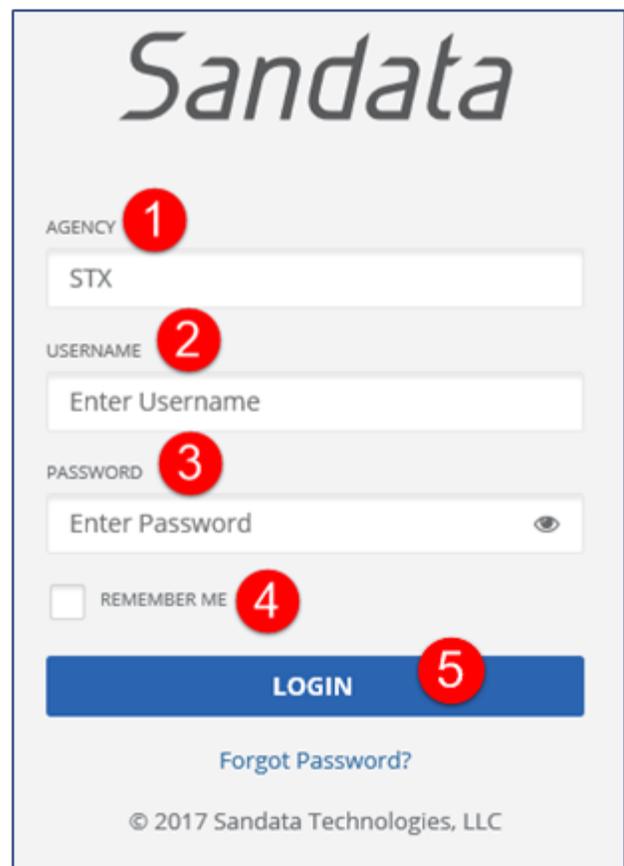

How to Log In

System security requires that you log on using the URL provided in the Welcome Kit. The Welcome Kit is provided upon completion of training.

Follow the steps below to log in to Sandata EVV for the first time:

- Agency EVV Security Administrator – use the credentials received in the Welcome Kit and click **LOGIN**
- All other Users – enter the credentials provided by the Agency EVV Security Administrator and click **LOGIN**

1. **AGENCY** – Example: STX##### (##### = account number)
2. **USERNAME** – The username is the email address used when creating a system user (username is not case sensitive).
3. **PASSWORD** – Must be at least twelve characters long, have at least one upper case, one lower case letter, one numeric character and one “special” character (@#\$%^). The password is case sensitive.
4. **REMEMBER ME** – When enabled, this checkbox will preserve the last Agency and Username entered.
5. **LOGIN** – gain access to Sandata EVV.

The image shows the Sandata login interface. At the top is the Sandata logo. Below it are five input fields and a button, each with a red circle containing a number from 1 to 5. 1. AGENCY: A text box containing 'STX'. 2. USERNAME: A text box with the placeholder 'Enter Username'. 3. PASSWORD: A text box with the placeholder 'Enter Password' and a small eye icon on the right. 4. REMEMBER ME: A checkbox followed by the text 'REMEMBER ME'. 5. LOGIN: A large blue button with the text 'LOGIN' in white. Below the button is a link that says 'Forgot Password?'. At the bottom of the form area is the copyright notice '© 2017 Sandata Technologies, LLC'.

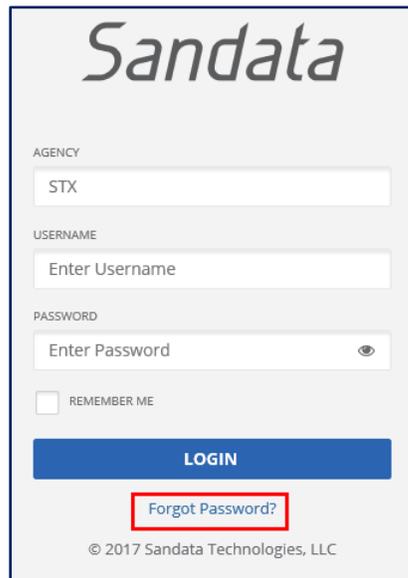

REMEMBER ME – When checked, preserves the last username entered.

How to Reset a Forgotten Password

Passwords need to be reset at regular intervals, based on program requirements. A user will begin receiving prompts 10 days before their password expiration date to reset the password.

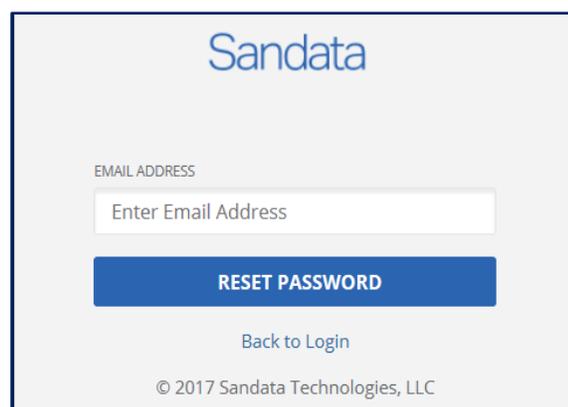

There can be times when a password is forgotten and it is necessary to reset the password (e.g., a new user forgets what they set as their password during the initial login process).

1. Click **Forgot Password?** A window opens to enter the email address to receive a temporary password.

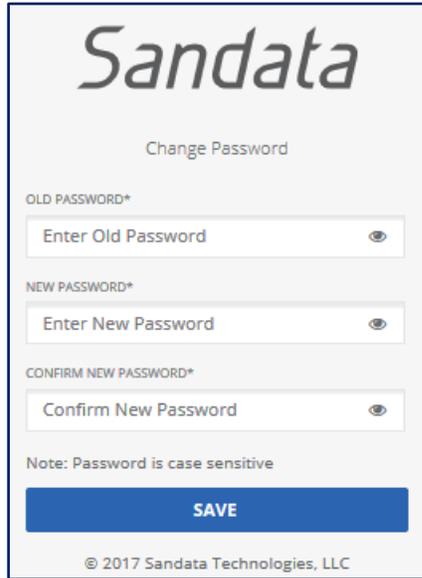

The image shows the Sandata login interface. At the top is the Sandata logo. Below it are three input fields: 'AGENCY' with 'STX' entered, 'USERNAME' with 'Enter Username' as a placeholder, and 'PASSWORD' with 'Enter Password' as a placeholder and an eye icon for visibility. Below the password field is a 'REMEMBER ME' checkbox. A blue 'LOGIN' button is centered below the fields. A red box highlights the 'Forgot Password?' link located below the login button. At the bottom, there is a copyright notice: '© 2017 Sandata Technologies, LLC'.

2. Enter the **EMAIL ADDRESS** (username) used to log in.

The image shows the Sandata forgot password interface. At the top is the Sandata logo. Below it is an 'EMAIL ADDRESS' input field with 'Enter Email Address' as a placeholder. Below the input field is a blue 'RESET PASSWORD' button. Below the button is a 'Back to Login' link. At the bottom, there is a copyright notice: '© 2017 Sandata Technologies, LLC'.

3. Click **RESET PASSWORD**. The system sends an email with a temporary password.
4. Click **Back to Login**. The *Login* screen displays.

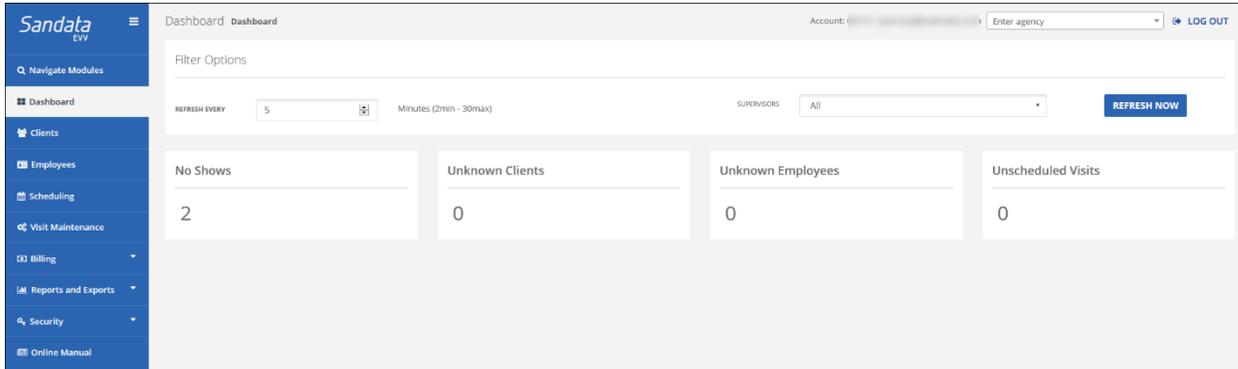

The screenshot shows a web form titled "Sandata Change Password". It contains three input fields: "OLD PASSWORD*", "NEW PASSWORD*", and "CONFIRM NEW PASSWORD*", each with a placeholder text and a toggle icon. Below the fields is a note: "Note: Password is case sensitive". At the bottom is a blue "SAVE" button and a copyright notice: "© 2017 Sandata Technologies, LLC".

5. Enter the temporary password in the **OLD PASSWORD*** field.
6. Create and enter a new password in the **NEW PASSWORD*** field.
7. Re-enter the password in the **CONFIRM NEW PASSWORD*** field.
8. Click **SAVE**.

Navigating Sandata EVV

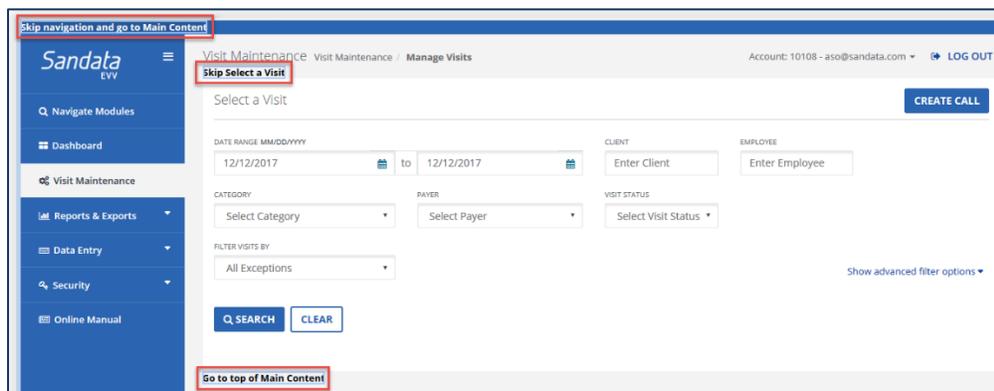

After successful login, the *Dashboard* screen displays.

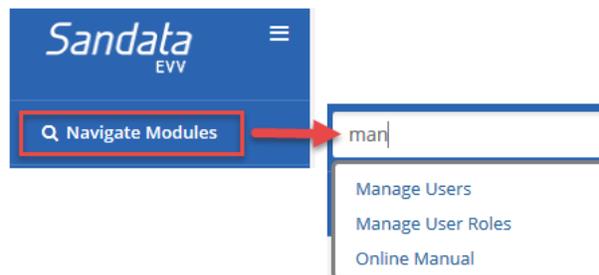

ADA Navigation Support

Sandata EVV can be navigated using only the keyboard. It is also Job Access With Speech (JAWS) Reader compliant. Below is the *Visit Maintenance* screen.

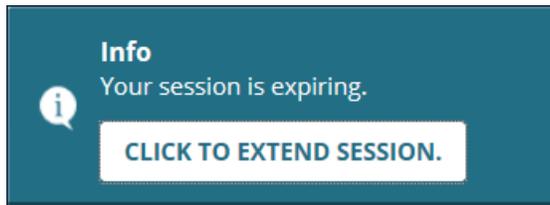

1. Using the <Tab> key to move through the system, the links below display individually. They allow you to skip the navigation options and begin with the main content.

2. Clicking **Navigate Modules** on the *Navigation* panel opens the **Navigate Modules** field. This allows users to jump between screens by typing the name of the screen in the field. A link to the screen displays below the field. Click the link to navigate to the page.

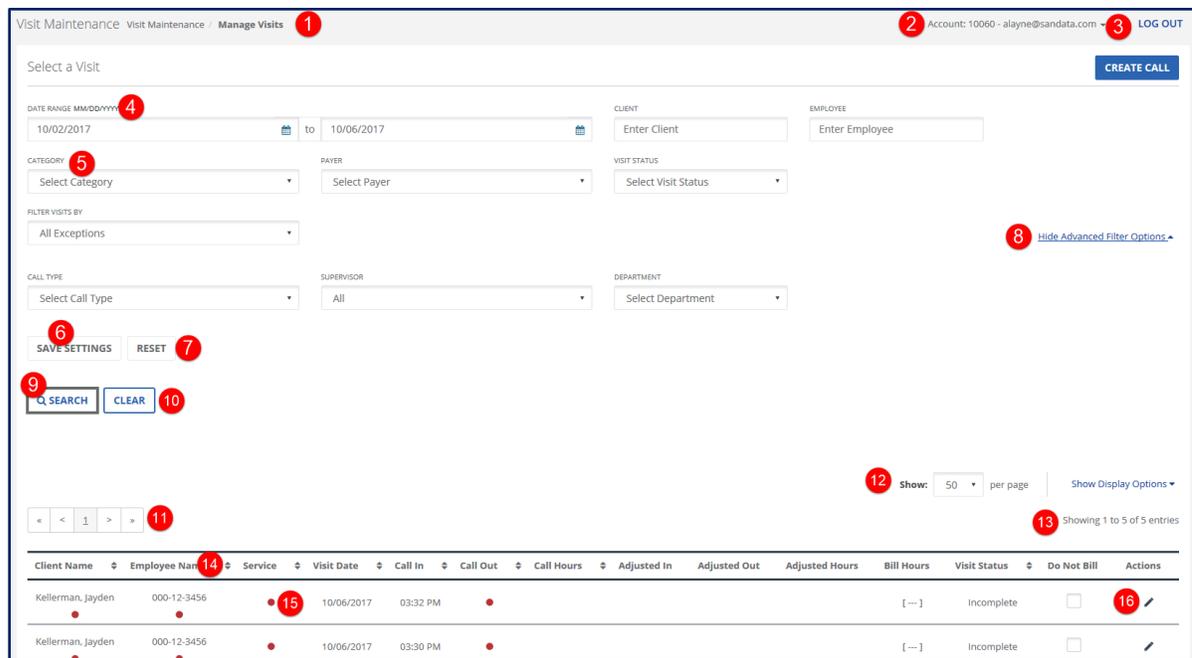

- To accommodate users that require more time, when a user remains idle for specified period of time, the system displays a warning message asking if they require more time. If the user does not respond to the prompt within 2 (two) minutes, Sandata EVV automatically times out.

Common Functions of Sandata EVV

This section describes common functions within Sandata EVV. Here is an example with the different items that are typically displayed.

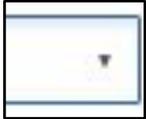

The screenshot shows the 'Manage Visits' interface with the following numbered callouts:

- 1: Manage Visits breadcrumb
- 2: Account: 10060 - alayne@sandata.com
- 3: LOG OUT button
- 4: DATE RANGE MM/DD/YYYY (10/02/2017 to 10/06/2017)
- 5: CATEGORY dropdown
- 6: SAVE SETTINGS button
- 7: RESET button
- 8: Hide Advanced Filter Options link
- 9: SEARCH button
- 10: CLEAR button
- 11: Page navigation (1)
- 12: Show: 50 per page
- 13: Showing 1 to 5 of 5 entries
- 14: Employee Name column header
- 15: Service column header
- 16: Actions column header

Client Name	Employee Name	Service	Visit Date	Call In	Call Out	Call Hours	Adjusted In	Adjusted Out	Adjusted Hours	Bill Hours	Visit Status	Do Not Bill	Actions
Kellerman, Jayden	000-12-3456		10/06/2017	03:32 PM							Incomplete	<input type="checkbox"/>	
Kellerman, Jayden	000-12-3456		10/06/2017	03:30 PM							Incomplete	<input type="checkbox"/>	

Common Functions in Sandata EVV

Here is a list of items commonly found in Sandata EVV.

	Item	Name	Description
1.		Navigation Path	System and which screen is displayed.
2.		Account and User Display	Displays the account the user is logged into and the username/email address of the user currently logged in. For more about these fields, see the section Sandata Header.
3.		Log Out Button	Logs the user out of the system and displays the log-in screen.
4.		Calendar Icon	Clicking this icon displays a calendar from which the user selects a date. 
5.		Show List Icon	Located in list fields, clicking this icon displays the list. 
6.		Save Settings Button	When advanced filter settings are displayed, this button will save selected search fields so that they will be displayed again at the next user login.
7.		Reset Button	If search settings have been saved, this button will clear them.

	Item	Name	Description
8.		Show/Hide Advanced Filter Options	On screens enabled for searches, clicking this link shows or hides any advanced filters that are available.
9.		Search Button	Executes a search.
10.		Clear Button	Clears a search field or series of search fields.
11.		Page Listing	This provides a button to go to the start and end of a list, along with the ability to display any individual page of the list.
12.		Number of Items per Page Setting	This setting allows users to select how many rows of a list are displayed on each page.
13.		Page Contents	This results display is shown on pages on which there are either lists or search results. Located at the top and bottom of each page, the results display shows the list entries displayed on each page, as well as the total number of rows in the list.
14.		List Sorting Icon	Located in lists and reports, users can sort the contents of a list by any column that has this icon in its header. Click to sort in ascending or descending order.
15.		Exception Indicator	When viewing search results for visits, any field marked by a red dot indicates data that is missing.
16.		Edit Button	Opens an individual record with its fields in an editable state.

Additional Buttons and Icons

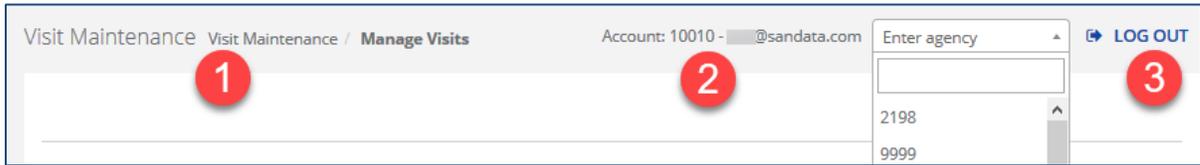

The following buttons are frequently displayed throughout the Sandata system:

Button	Function	Description
	Add Button	Clicking this button adds another row to a listing.
	Cancel Button	Cancels an operation and closes the screen.
	Check Box	Filling a check box enables a feature, clearing it disables it.
	Clock Icon	In fields that require a time to be entered, clicking this icon allows the user to select a time. 
	Create Button	Creates a new item in any list.
	Delete/Terminate Button	Moves an item/user to “Inactive” status. The User is prompted to confirm.
	Finish Button	Completes and terminates a task.
	Lock Icon	Displays the password to help with log-in and password entry.
	Play Icon	Starts a playback of the client Voice Verification recording.
	Radio Button	Radio buttons allow the user to select one or more items from a list.
	Reactivate Button	Moves and item/user to “Active’ status. User is prompted to confirm.
	Record Button	Pressing this button begins the client voice recording during the SMC call-out process.
	Refresh Button	Refreshes one or several fields on a screen, usually search fields.

Button	Function	Description
	Save Button	Located in <i>Data Entry</i> fields, this button saves the information that has been entered.
	Show Information Icon	Clicking this icon displays additional information about a system field. For example, at the login screen clicking this icon displays a password being typed in. <div data-bbox="824 625 1464 730" style="border: 1px solid black; padding: 5px; margin-top: 10px;"> NEW PASSWORD <input type="password" value="1970MonteCarlo@"/> </div>
	Stop recording Button	Pressing this button stops the client voice recording during the SMC call-out process.
	Terminate Button	This button moves either a client record or an employee record to “Terminated” status.

Sandata Header

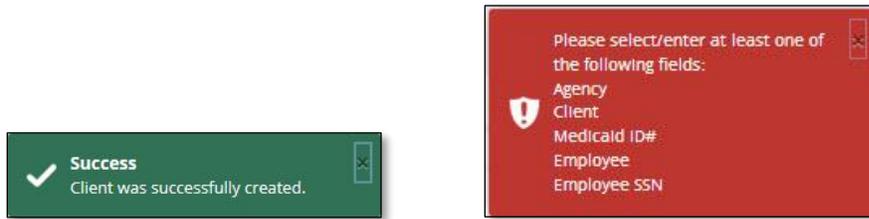

This header is located at the top of every screen in the Sandata EVV. It displays key information about each screen along with functionality to navigate between modules or to log out of the system.

	Function	Description
1.	Navigation Path	This field shows a user the exact location in the system and the current screen.
2.	Account and User Display	<p>Displays the account the user is logged into and the username/email of the user currently logged in.</p> <p><u>Moving Between Multiple Accounts</u></p> <p>Click the small arrow pointer in the 'Enter agency' field to display a list of accounts the user is authorized to access. Selecting the account number moves the user to that account without having to log out and log in again.</p> <hr/> <p> A user must have permissions to log into more than one account and the username must be the same across all accounts</p> <hr/>
3.	Log Out	Logs the user out of the system and goes back to the login screen.

Confirmation and Error Messages

Confirmation and error messages are displayed at the top, center of the screen.

Assignment Buttons

These buttons are displayed whenever a screen has settings that require moving items between **Available** and **Assigned** fields, for example in the Security settings. The buttons allow single or multiple items to be added or removed.

Button	Function	Description
	Add All	This button moves all items from the Available field to the Assigned field.
	Add Item(s)	This button moves single or multiple items from the Available field to the Assigned field. Click on multiple items to add them together, if necessary.
	Remove Item(s)	This button moves single or multiple items from the Assigned field to the Available field. Click on multiple items to add them together, if necessary.
	Remove All	This button moves all Items from the Assigned field to the Available field.

3 Security (User Set-up)

Module Time

40 minutes

This lesson teaches how to set-up, create and maintain system users.

Module Objectives

After completing this lesson, you will be able to:

- define key terminology;
- access the security module;
- create and manage users;
- create and manage user roles; and
- change your password.

Key Terminology

Term	Definition
Administrator	The person at the agency with the ability to create new users, assign roles, system privileges and reset passwords.
Client	A person who receives services through the Medicaid program.
Privilege	A single permission.
Role	A group of privileges (permissions) assigned to the user which allows the user to perform visit activities in Sandata EVV.
Security	The module in Sandata EVV where users (office staff) are set up to use the system.
User	A person with a unique login and password to Sandata EVV.
Username	The user's email address.

Introduction

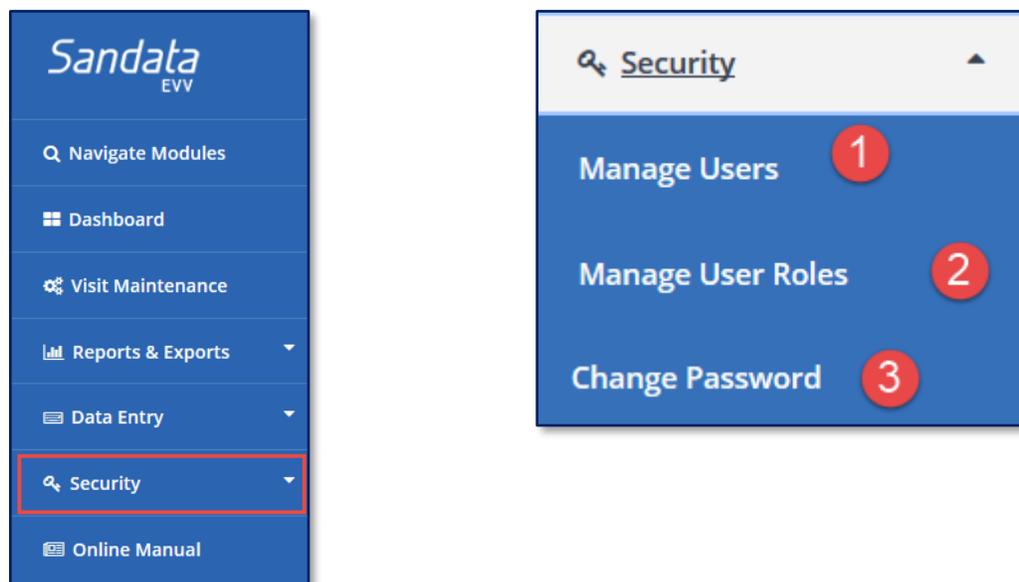

Sandata EVV Security Settings

The Security settings in Sandata EVV allow administrators to:

- assign user roles to specific users;
- create user roles and assign system privileges to those roles;
- assign system privileges;
- grant and revoke system privileges;
- reset user passwords; and
- reset own password.

Accessing Sandata EVV Security

From the Sandata EVV Main Menu click **Security**. The *Security* panel expands and displays three sections of security settings.

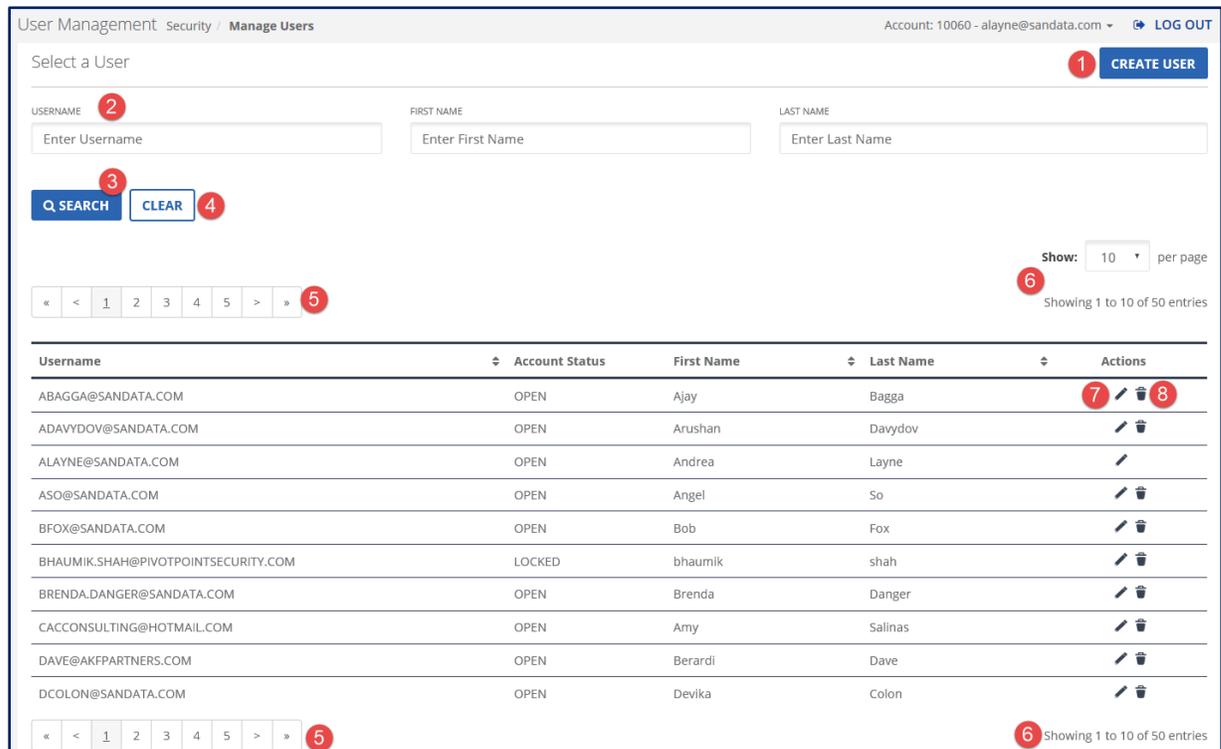

The security settings of Sandata EVV are divided into three sections:

1. **Manage Users** – This section allows the user to create and maintain users.
2. **Manage User Roles** – Roles allow the system administrator to group privileges and assign them to users of the EVV system.
3. **Change Password** – This section allows the logged in user to change his/her password.

Manage Users Screen Overview

This function includes the ability to search for users who can log in to the Sandata EVV system, view and update a user's assigned permissions within the system, reset a user's password, create new users, lock user accounts and delete user accounts.

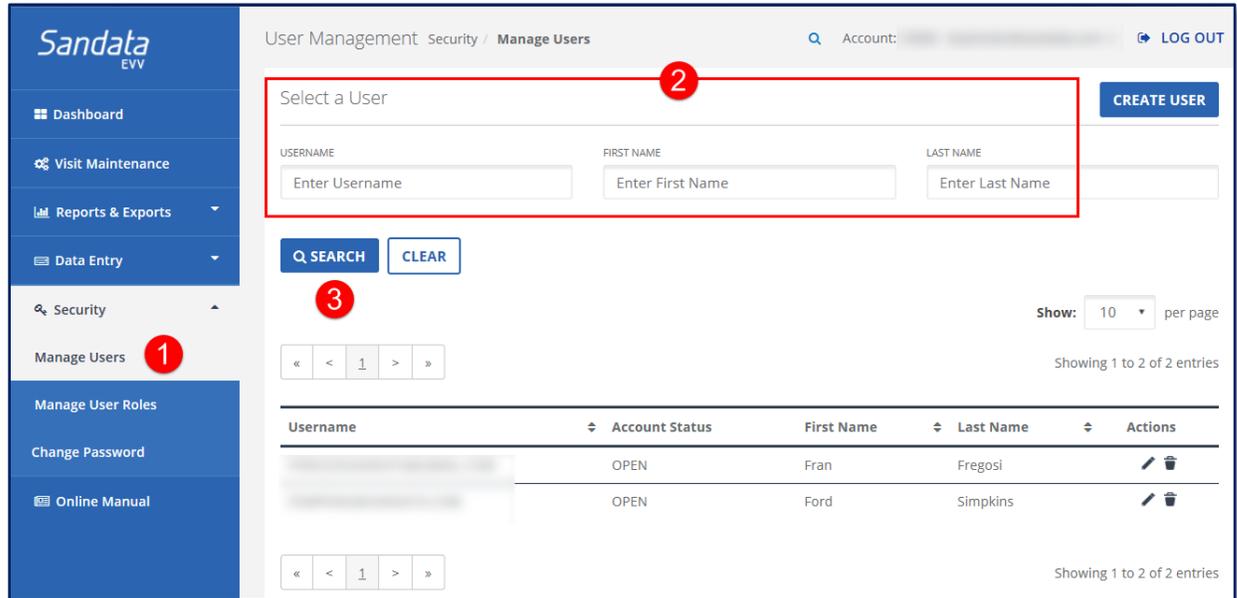

The screenshot displays the 'Manage Users' interface. At the top right, it shows the user's account information: 'Account: 10060 - alayne@sandata.com' and a 'LOG OUT' button. The main area is titled 'Select a User' and features three search input fields: 'USERNAME', 'FIRST NAME', and 'LAST NAME'. Below these fields are 'Q. SEARCH' and 'CLEAR' buttons. A 'CREATE USER' button is located in the top right corner. A pagination control shows 'Showing 1 to 10 of 50 entries' and a 'Show: 10 per page' dropdown. The table below lists users with columns for Username, Account Status, First Name, Last Name, and Actions. The Actions column contains icons for Edit and Delete. The table is paginated, showing 10 entries per page.

Username	Account Status	First Name	Last Name	Actions
ABAGGA@SANDATA.COM	OPEN	Ajay	Bagga	[Edit] [Delete]
ADAVYDOV@SANDATA.COM	OPEN	Arushan	Davydov	[Edit] [Delete]
ALAYNE@SANDATA.COM	OPEN	Andrea	Layne	[Edit] [Delete]
ASO@SANDATA.COM	OPEN	Angel	So	[Edit] [Delete]
BFOX@SANDATA.COM	OPEN	Bob	Fox	[Edit] [Delete]
BHAUMIK.SHAH@PIVOTPOINTSECURITY.COM	LOCKED	bhaumik	shah	[Edit] [Delete]
BRENDA.DANGER@SANDATA.COM	OPEN	Brenda	Danger	[Edit] [Delete]
CACCONSULTING@HOTMAIL.COM	OPEN	Amy	Salinas	[Edit] [Delete]
DAVE@AKFPARTNERS.COM	OPEN	Berardi	Dave	[Edit] [Delete]
DCOLON@SANDATA.COM	OPEN	Devika	Colon	[Edit] [Delete]

1. **CREATE USER** – Used to create a new user profile.
2. **Filters** – Allows for a search by either **USERNAME**, **FIRST NAME** or **LAST NAME** or a combination of the three.
3. **SEARCH** – Retrieves the related information based upon the filters used.
4. **CLEAR** – Deletes the information from the filter fields to allow for additional searches with new criteria.
5. **Page Navigation** – Allows for navigating through the list using page numbers or arrows. The number of pages displayed is dependent upon the number of results.
6. **Show** – Allows for input of how many entries are shown per page and displays the total number of results returned.
7. **Edit** – Edit a user.
8. **Delete** – Inactivate a user.

Searching for Users

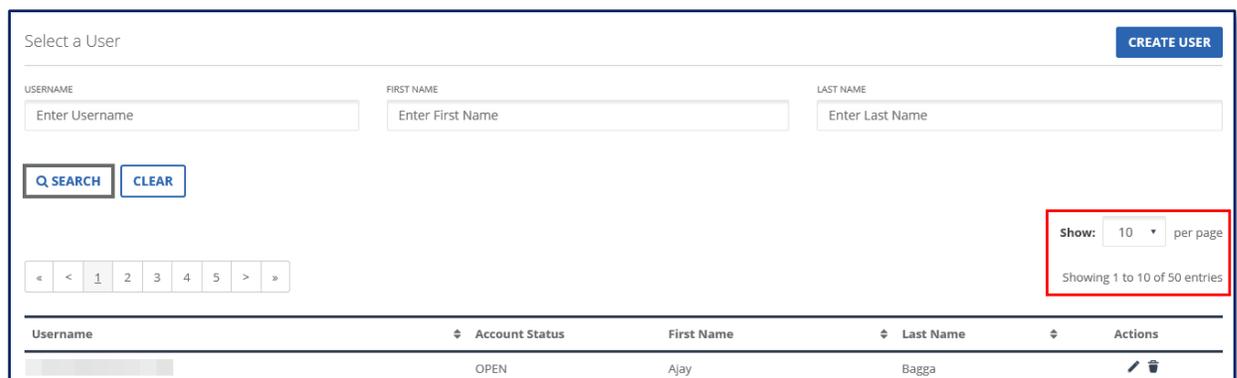

Search for users from the *Manage Users* screen.

1. Click **Security>Manage Users**.
2. Input the appropriate criteria (user name, first name or their last name) in the appropriate fields to filter the results.
3. Press **<Enter>** (on the keyboard) or click **SEARCH**.

If the user is found, their information displays. Depending on the criteria entered, multiple entries can display.

A search can be conducted with no criteria added, resulting in a complete list of users. Press **<Enter>** (on the keyboard) or click **SEARCH**.

Perform additional searches by clicking **CLEAR** and entering new search criteria.

11 CREATE USER

1. **USERNAME/EMAIL** – This field is to enter a user’s email address, which is also their username.
2. **LAST NAME** – User’s last name.
3. **FIRST NAME** – User’s first name.
4. **LOCKED** – If selected, prevents the user from logging into the system. It is unchecked by default.
5. **AVAILABLE ROLES** – The roles in this field are available for assignment.
6. **Assignment Buttons** – These buttons move items between the **AVAILABLE** and **ASSIGNED** fields.
7. **ASSIGNED ROLES** – The roles in this field are assigned to the user.
8. **AVAILABLE PRIVILEGES** – The privileges in this field are available for assignment.
9. **ASSIGNED PRIVILEGES** – The privileges in this field are assigned to the user.
10. **SUPERVISOR** – This functionality is available if clients are grouped by supervisor/coordinators.
11. **CREATE USER** – Creates the user and adds them in the system.

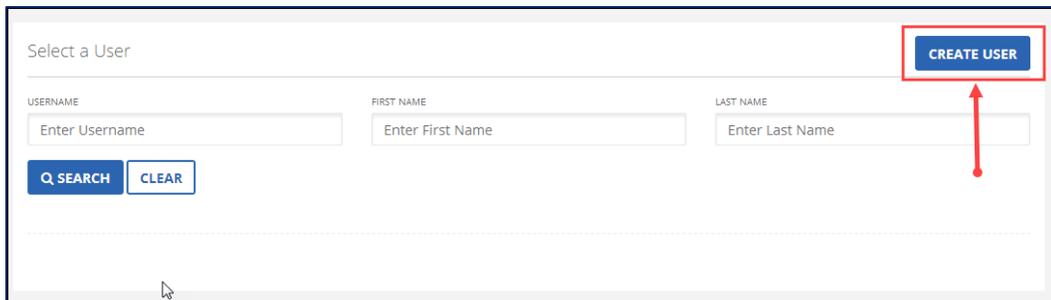

Follow along with the instructor to create a user.

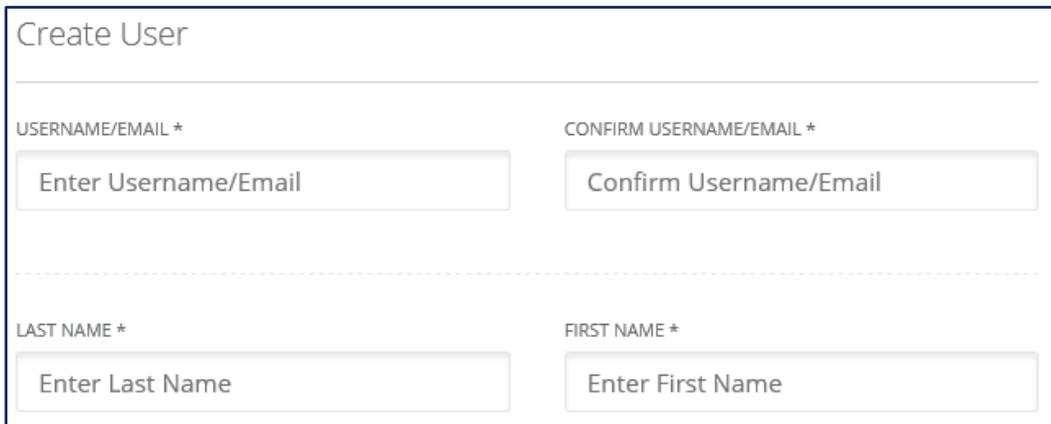

1. Click **Security>Manage Users** from the *Navigation* panel. The *Manage Users* screen displays.

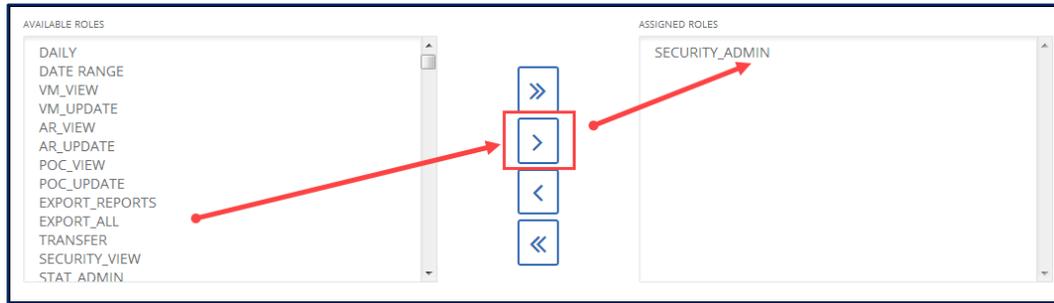

2. Click **CREATE USER**. The *Create User* screen opens.

3. Enter/Confirm the user's email address and their **LAST NAME** and **FIRST NAME**.

- The **LOCKED** checkbox prevents the user from logging into the system. Leave this field unchecked to allow the user to log in.
- Click the appropriate item in the **AVAILABLE ROLES** field and click the > button to move it into the **ASSIGNED ROLES** field. All user privileges assigned to the roles selected are granted to the user. Multiple roles can be assigned to a user, as necessary.

- Click the appropriate item in the **AVAILABLE PRIVILEGES** field and click the > button to move it into the **ASSIGNED PRIVILEGES** field.
- Click **CREATE USER**. A successful confirmation message displays.

If a user also provides care to a client, they must be added as an employee in Sandata EVV.

If any of the required fields are not filled out correctly or left blank, a tool tip message displays above the field to be completed.

Exercise: Create a User

Creating A New User as a Security Admin	
Task	Description
1.	Click the <i>Security Module</i> on the navigation panel and then click the <i>Manage Users</i> .
2.	Click the  button in the upper-right corner of the screen.
3.	Enter a username (Use the email extension of “@mailinator.com”. For example: <i>jsmith@mailinator.com</i>). Re-enter the username to confirm.
4.	Enter a Last Name and a First Name into the appropriate fields.
5.	Click the SECURITY_ADMIN role in the <i>Available Roles</i> box to highlight the role.
6.	Click the right pointer  to assign the Role the user.
7.	Click the double right pointer  under the Privileges section to assign all privileges to the Security Admin user.
8.	Click  in upper or lower right corners of the screen. A success screen appears at the top of the screen indicating the user was successfully created.

9.	<p>Open another web browser window and type in the URL: www.mailinator.com</p> <ol style="list-style-type: none"> 1. Click in the Check Any Inbox! field and enter the first part of the email address you created (Using the example in step 3 above, you would enter <i>jsmith</i>) for the new user and click GO. 2. Click on the <i>Sandata.evv Temporary Password</i> email displayed. 3. Copy the temporary password and click the Login button. 4. Enter your assigned training agency number 5. Enter the email address for your new user 6. Enter the temporary password you just copied and click LOGIN 7. Enter the temporary password in the OLD PASSWORD* field (click the “eye” icon to display the password information) 8. Enter a new password and re-enter the password to confirm 9. Click SAVE <p>You are now logged in to Sandata EVV under the user new account.</p>
----	--

Creating A Second User as A Coordinator	
Task	Description
	Click the <i>Security Module</i> on the navigation panel and then click the <i>Manage Users</i> .
	Click the  button in the upper-right corner of the screen to create another user.
	Enter a username (Use the email extension of “@mailinator.com”. For example: <i>jsmith@mailinator.com</i>). Re-enter the username to confirm.
	Enter a Last Name and a First Name into the appropriate fields.
	Click the COORDINATOR role in the <i>Available Roles</i> box to highlight the role.
	Click the right pointer  to assign the role the user.
	Click the  button in upper or lower right corners of the screen. A Success pop-up appears at the top of the screen indicating the user was successfully created.

Open another web browser window and type in the URL: www.mailinator.com

10. Click in the **Check Any Inbox!** field and enter the first part of the email address you created (Using the example in step 3 above, you would enter *jsmith*) for the new user and click **GO**.
11. Click on the *Sandata.evv Temporary Password* email displayed.
12. Copy the temporary password and click the Login button.
13. Enter your assigned training agency number
14. Enter the email address for your new user
15. Enter the temporary password you just copied and click **LOGIN**
16. Enter the temporary password in the **OLD PASSWORD*** field (click the “eye” icon to display the password information)
17. Enter a new password and re-enter the password to confirm
18. Click **SAVE**

You are now logged in to Sandata EVV under the user new account.

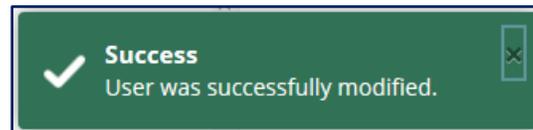

Modify a User

Follow along with the instructor to modify a user.

Modify User Roles/Privileges

1. Perform a user search.
2. Click **Edit**  in the **Actions** column on the right-hand side of the screen of the appropriate user. The *Modify User* screen opens.
3. Add/Remove any of the roles/privileges to modify the user account.
4. Click **MODIFY USER**. A successful confirmation message displays.

Lock/Unlock a User

If a user attempts to log in three (3) times in sequence with an incorrect password, they will be locked out. Follow these steps to unlock the user.

1. Perform a user search.
2. Click **Edit**  in the **Actions** column on the right-hand side of the screen of the appropriate user. The *Modify User* screen opens.
3. Check/Uncheck the **LOCKED** checkbox, as required.
4. Click **MODIFY USER**. A successful confirmation message displays.

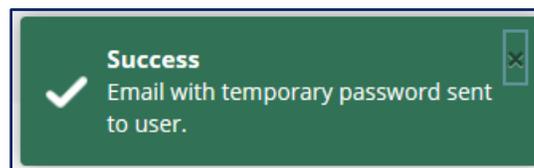

Resetting a User's Password

In addition to the ability to modify a user's information and privileges, the Administrator also has the ability to reset a user's password.

Follow along with the instructor to reset a user's password.

1. Perform a user search.
2. Click **Edit**  in the *Actions* column on the right-hand side of the screen of the appropriate user. The *Modify User* screen opens.
3. Click **RESET PASSWORD**. A message displays indicating a temporary password has been sent to the user.

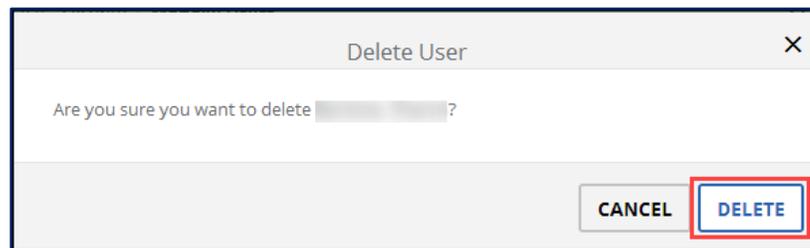

Deleting a User

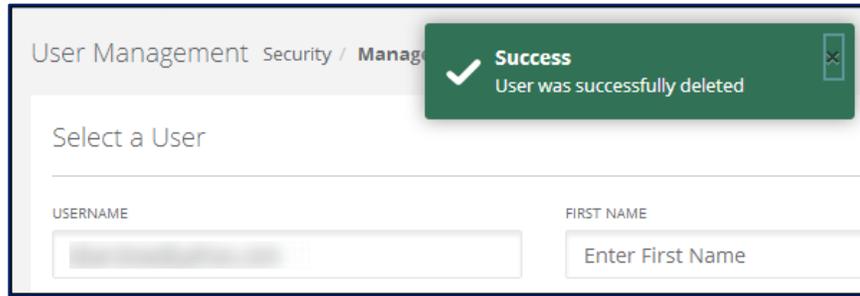

Follow along with the instructor to delete a user.

1. Perform a user search.
2. Click **Delete**  in the **Actions** column on the right-hand side of the screen of the appropriate user. The *Delete User* confirmation box displays.

Remember that deleting does not remove the user from Sandata EVV, but inactivates the record.

3. Click **Delete**. A successful confirmation box displays.

Manage User Roles

The use of roles allows administrators to define a set of system functions for each job title in the agency to make maintenance of user access easier. Whenever a role is edited, it affects **all** users who have been assigned to that role.

Sandata EVV includes a standard set of roles across all agencies. The roles are:

Default Role	Description
ASST_COOR (Assistant Coordinator)	Sandata EVV generalist that supports visit verification and visit reporting.
COORDINATOR	Intake/manage clients, intake/manage employees.
SECURITY_ADMIN	Agency set up, create and manage all EVV users.

Screen Overview

Manage User Roles 1 **CREATE USER ROLE**

3 **Show:** 10 per page

« < 1 2 3 > » 2 Showing 11 to 20 of 23 entries

Role Name	Role Description	Actions
ASST_COOR	Assigned users can run SCHEDULING application	  
SECURITY_VIEW	Assigned users can run SECURITY application	 5  
SECURITY_ADMIN	Assigned users can run SECURITY application	4    6
STAT_ADMIN	Assigned users can run STAT application	  
VM_UPDATE	Assigned users can run Visit Maintenance	  
VM_VIEW	Assigned users can run Visit Maintenance (view only)	  
SV_EMP_ADMIN_ROLE	Assigned users can start Employ Speaker Verification module	  
ACTUALS_ADMIN_ROLE	Assigned users can start Setup_Actuals module	  
FVV_ADMIN_ROLE	Assigned users can start Setup_FOB module	  
GPS_ADMIN_ROLE	Assigned users can start Setup_GPS_Phone module	  

« < 1 2 3 > » 2 Showing 11 to 20 of 23 entries

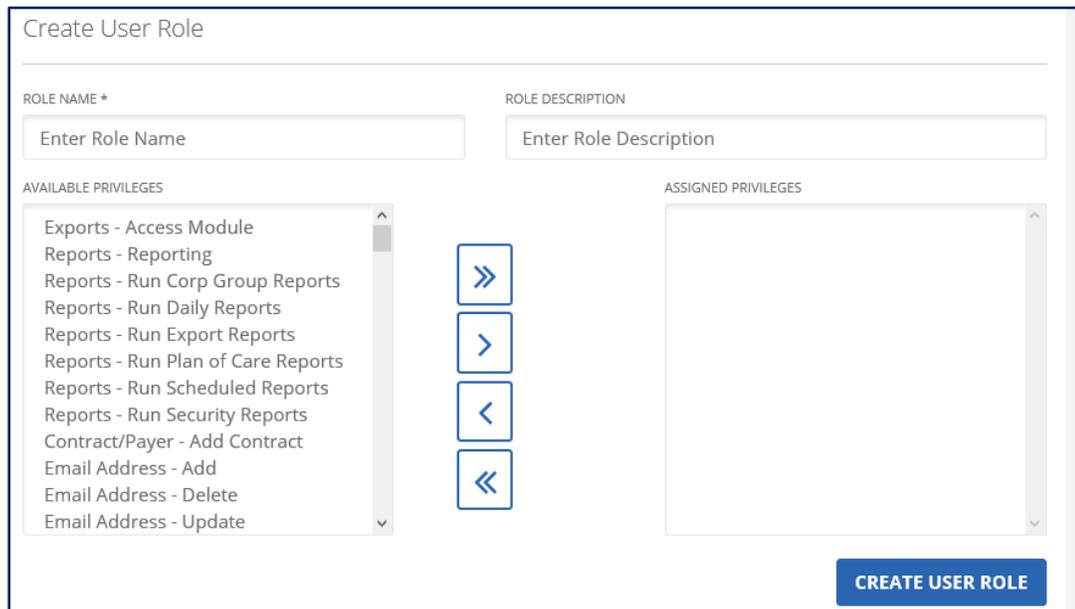

1. **Create User Role** – Used to create a new user role.
2. **Page Navigation** – Dependent upon the number of results, there can be 1 or multiple pages.
3. **Show** – Allows for input of how many entries are shown per page and displays the total number of results returned.
4. **Edit** – Edit a user.
5. **Delete icon** – Delete a user.
6. **Lock** – Allows the user to lock a role so that no other users can modify the user role.

Creating New User Role

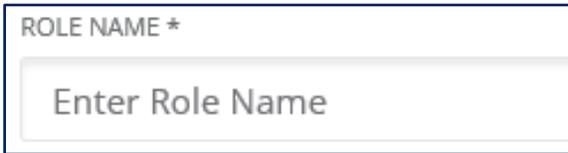

1. Click **Manage User Roles**. The *Manage User Roles* screen displays.

2. Click **CREATE USER ROLE**. The Create User Role screen opens.

3. Enter a name for the new role in the **ROLE NAME*** field.

ROLE NAME *

Enter Role Name

4. Enter a brief description in the **ROLE DESCRIPTION** field.

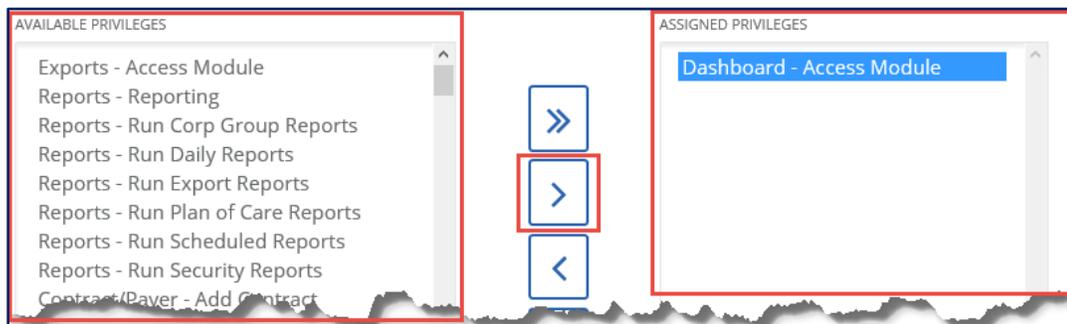

ROLE DESCRIPTION

Enter Role Description

5. Click **CREATE USER ROLE**. A successful confirmation message displays.

6. Click **Manage User Roles** from the *Navigation* panel.
7. Click **Edit**  on the newly created role.
8. Select the privilege(s) to be assigned to the new role in the **AVAILABLE PRIVILEGES** field.

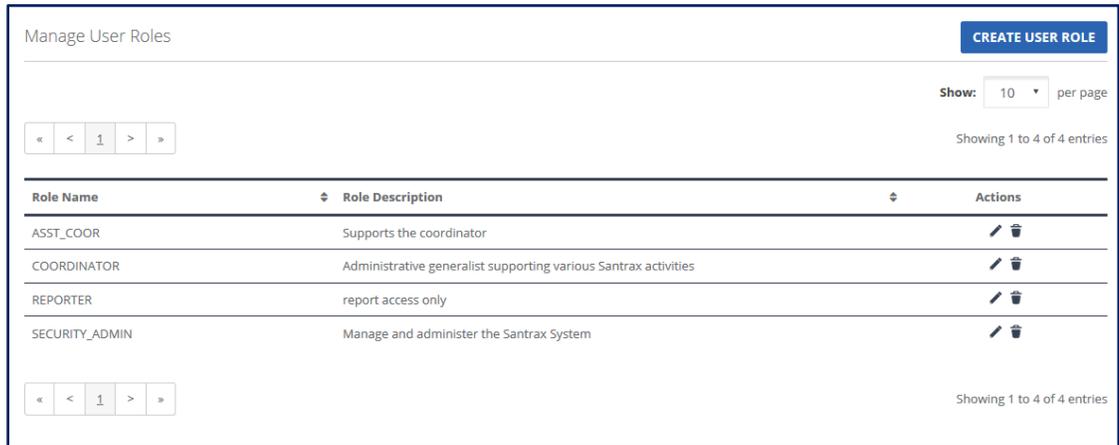

9. Click **MODIFY USER ROLE** to save the assigned privileges.

Modifying Roles

Making changes to a role impacts all users with that role assignment the next time they log in to the system.

1. Scroll through the list of roles and find the role to be edited.

2. Click **Edit**  in the **Actions** column on the right-hand side of the screen of the role to be modified. The *Modify User Role* screen opens.
3. Add (**AVAILABLE PRIVILEGES**) or remove (**ASSIGNED PRIVILEGES**), as necessary.

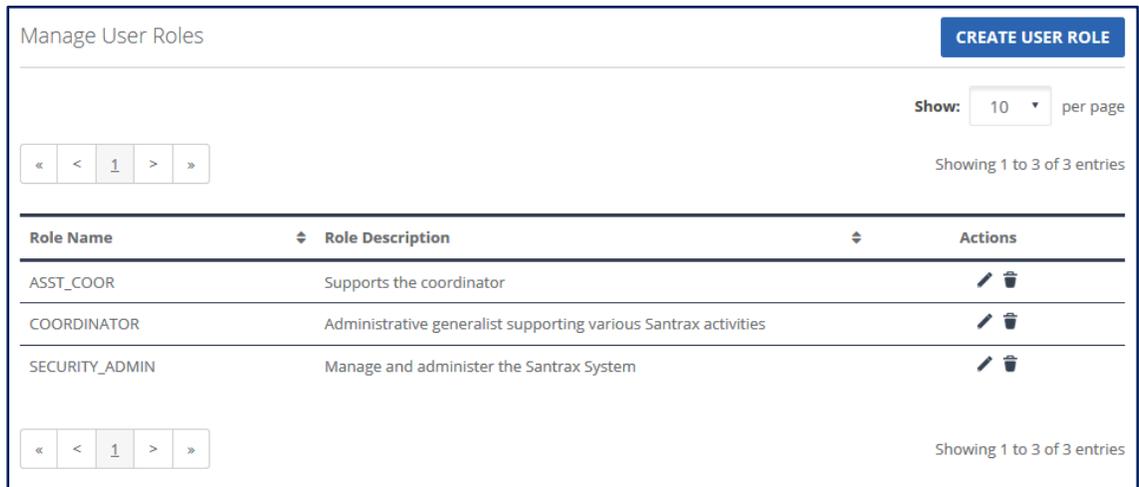

4. Click **MODIFY USER ROLE**. If successful, a confirmation message displays.

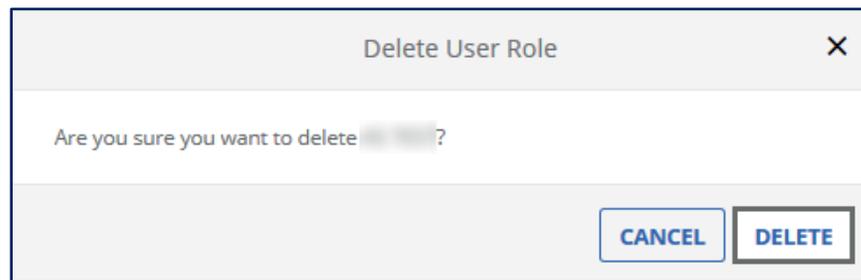

Deleting Roles

1. Scroll through the list of roles and find the role to be deleted.

Role Name	Role Description	Actions
ASST_COOR	Supports the coordinator	 
COORDINATOR	Administrative generalist supporting various Santrax activities	 
SECURITY_ADMIN	Manage and administer the Santrax System	 

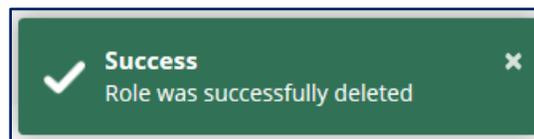

2. Click **DELETE**  in the **Actions** column on the right-hand side of the screen of the appropriate role. The *Delete User Role* confirmation box displays.

Are you sure you want to delete [role name]?

CANCEL **DELETE**

3. Click **DELETE**. A successful confirmation box displays.

Success
Role was successfully deleted

A Role cannot be deleted if it assigned to a user. The following message display's when trying to delete the role.

This role has been assigned to users. Delete Role failed.

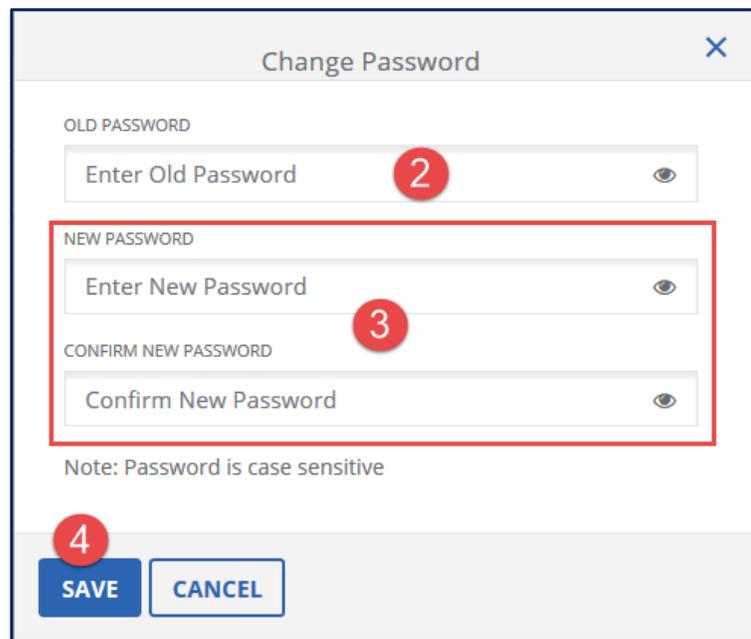

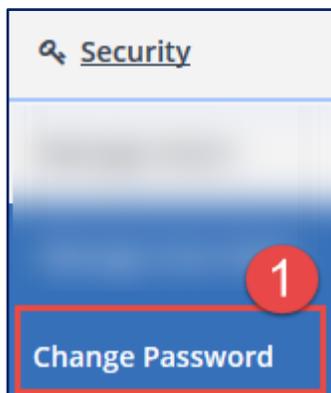

Change Password

Resetting Your Own Password

Change Password allows the logged in user to change his/her password.

To change another user's password, see the sub-section on this topic in the **Modifying a User** section of this document.

A screenshot of the 'Change Password' dialog box. It contains three password input fields: 'OLD PASSWORD', 'NEW PASSWORD', and 'CONFIRM NEW PASSWORD'. The 'NEW PASSWORD' field is highlighted with a red box and a red circle with the number '3' next to it. The 'OLD PASSWORD' field has a red circle with the number '2' next to it. At the bottom, there are 'SAVE' and 'CANCEL' buttons, with a red circle and the number '4' next to the 'SAVE' button. A note below the fields states: 'Note: Password is case sensitive'.

1. Click **Change Password** from the main **Security** menu. The *Change Password* panel opens.
2. Enter your current password in the **OLD PASSWORD** field.
3. Enter your new password in the **NEW PASSWORD** field; type it again in the **CONFIRM NEW PASSWORD** field.
4. Click **SAVE**.

4 Client Module

Module Time

30 minutes

This lesson introduces the process of how clients are input and maintained in Sandata EVV.

Module Objectives*

After completing this lesson, you will be able to:

- search for a client's record;
- add a client record;
- update a client record.

***Note** – *Functionality may not apply based on program configuration and requirements.*

Key Terminology

Term/Acronym	Definition
Client	A person who receives services through the Medicaid program
Employee	A person who is employed by an agency provider to provide care to one or more clients

Introduction

The Clients module allows system users to maintain client records.

Take note that 'Clients' is the term seen in the EVV system. This can translate to Individual, Consumer, Member or however the person/people for whom care is provided is termed for the program.

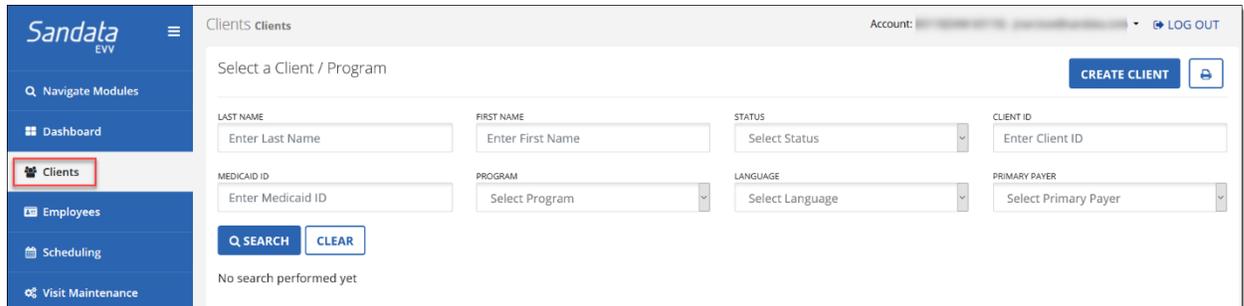

Accessing Clients

A system user with the appropriate permissions will see the **Clients** link listed in the Navigation panel on the left side of the screen. Clicking on the link will bring you to the Select a Client/Program screen.

Client Data

Search for a Client

Best practice is to perform a search to see if the client exists in the EVV system prior to creating/adding a new client.

Demonstration: How to search for a client

1. Click Clients from the Navigation panel. The search screen displays
2. Enter values either in the FIRST NAME, LAST NAME, or STATUS fields.
3. Click **SEARCH**. Any matching results are displayed at the bottom of the screen.

Create New Client(s)

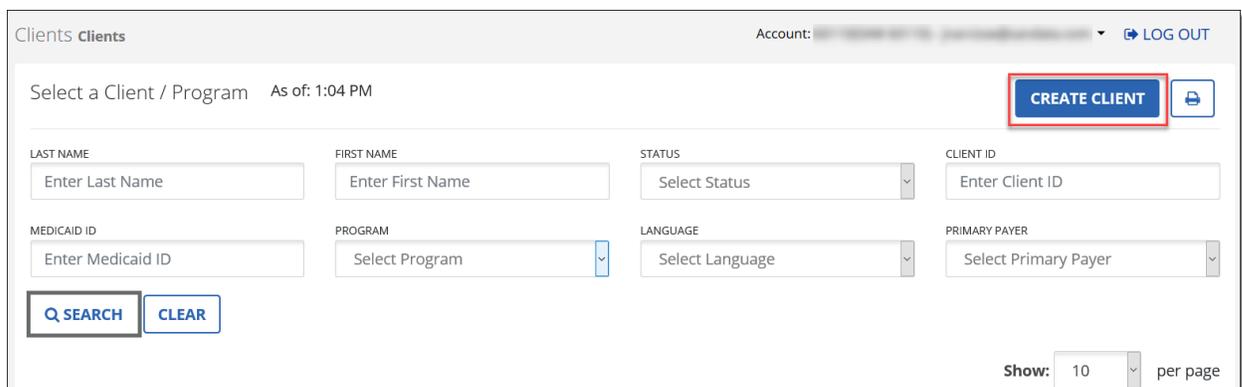

***Note:** Create New Client functionality only applies to Fee for Service

The first name, last name, program and Medicaid ID are the required fields to create a client record. Once created, any known addresses at which the client can routinely receive services and phone numbers used by the client, are also required fields. Enter the information into the Create New Client screen. The required fields, are indicated with an asterisk (*), to the right of the field. All other fields on the screen are optional and not necessary in order to save the new client record.

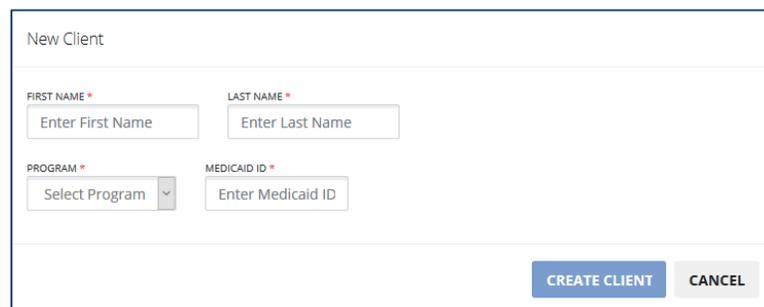

Demonstration: How to Create a Client

1. Click **CREATE NEW CLIENT**. The Create Client screen opens.

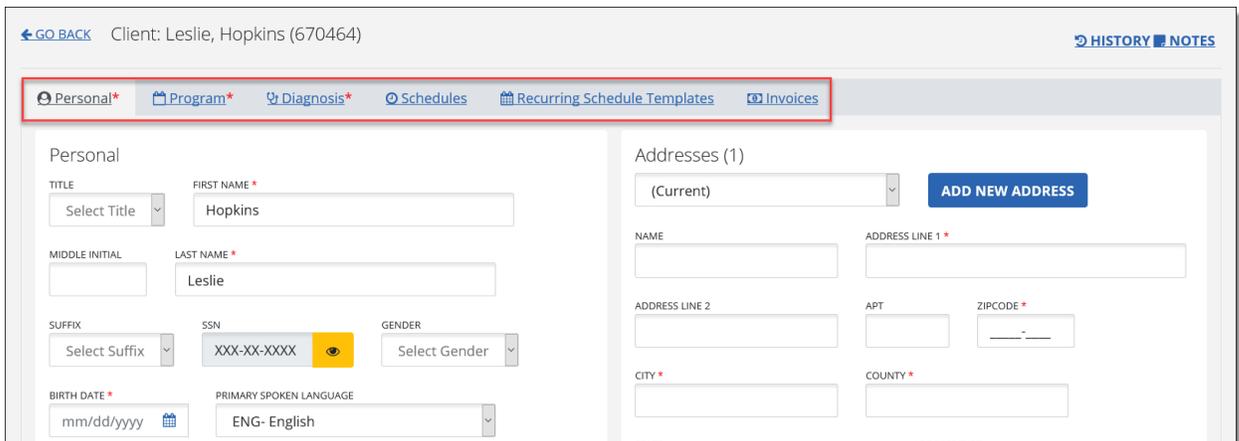

The screenshot shows the 'Clients' page with a search bar and a 'CREATE CLIENT' button highlighted with a red box. The page includes fields for LAST NAME, FIRST NAME, STATUS, CLIENT ID, MEDICAID ID, PROGRAM, LANGUAGE, and PRIMARY PAYER. There are also 'SEARCH' and 'CLEAR' buttons, and a 'Show: 10 per page' indicator.

2. Enter the required fields: FIRST NAME, LAST NAME, PROGRAM, MEDICAID ID and click **CREATE CLIENT**.

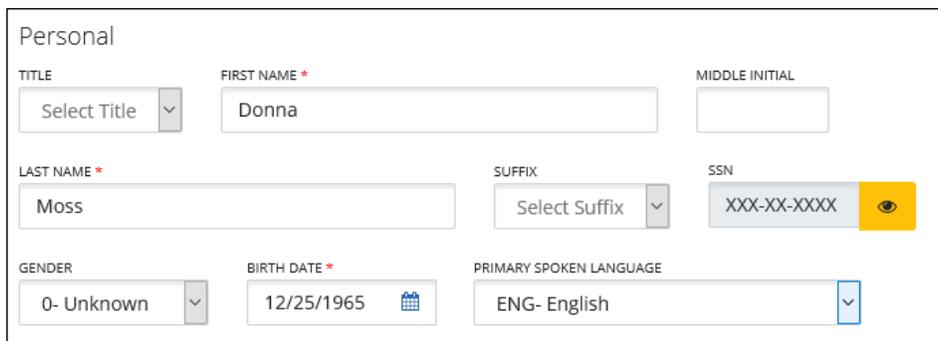

The screenshot shows the 'New Client' form with four required fields highlighted: FIRST NAME, LAST NAME, PROGRAM, and MEDICAID ID. Each field has a red asterisk next to its label. The form also includes 'CREATE CLIENT' and 'CANCEL' buttons.

- The new client record is created and the *Personal* screen is displayed for additional data entry. Navigate through the tabs to enter necessary information.

Personal

Personal

- TITLE:** Select from the drop-down.
- FIRST NAME*:** Populated when creating the client (required).
- MIDDLE INITIAL:** Enter if necessary.
- LAST NAME*:** Populated when creating the client (required).
- SUFFIX:** Select from the drop-down list.
- SSN:** Click the “eye” icon to display the field for entry.
- GENDER:** Select from the drop-down.
- BIRTH DATE*:** Type into the field (including slashes) or click on calendar icon to select (required).
- PRIMARY SPOKEN LANGUAGE:** Select from the drop-down list.

During the telephony call process, you will be prompted to enter a client ID to identify the client. This number can be found within the client record next to the client's name in parenthesis.

5 Employee Module

Module Time

10 minutes

This lesson introduces the process of how employees are input and maintained in Sandata EVV.

Module Objectives*

After completing this lesson, you will be able to:

- Search for an employee record.

***Note** – *Functionality may not apply based on program configuration and requirements.*

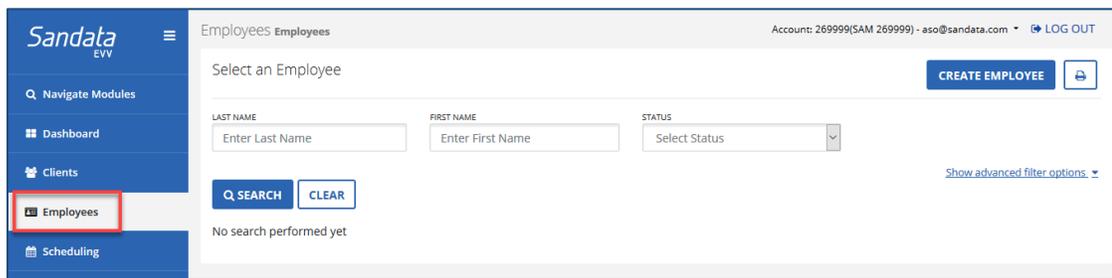

Employee Data

The Employee module allows system users to maintain employee records.

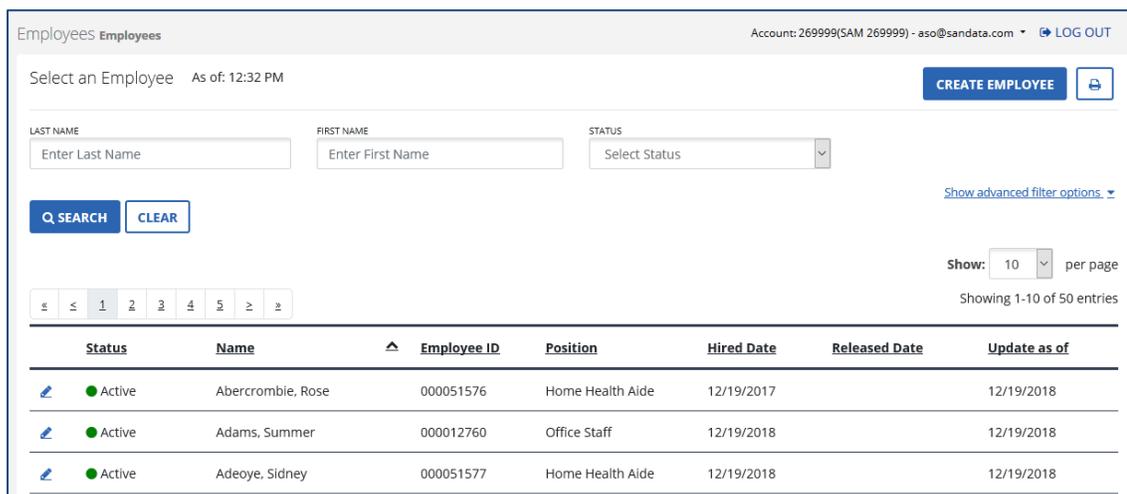

Take note that 'Employee' is the term used in the EVV system. This can translate to however the person for who is providing care is termed for the program.

Search for an Employee

Demonstration: Search for an Employee

1. Click **Employees** from the **Navigation** panel. The Search screen displays.
2. Enter the values either in **LAST NAME**, **FIRST NAME** or **STATUS** field.
3. Click **SEARCH**. Any matching results are displayed at the bottom of the screen.
4. Click the pencil icon on any results line to view the employee details.

Status	Name	Employee ID	Position	Hired Date	Released Date	Update as of
Active	Abercrombie, Rose	000051576	Home Health Aide	12/19/2017		12/19/2018

6 EVV-SMC/TVV/FVV

Module Time

60 minutes

This lesson introduces the module device call-in/call-out process and the telephone call process which employees utilize for every visit.

Module Objectives

After completing this lesson, you will be able to:

- Explain the purpose and basic functionality of Sandata Mobile Connect (SMC);
- access and log on to Sandata Mobile Connect;
- Identify the SMC window elements and explain how to navigate within the SMC App;
- describe the back-up process of using the client's telephone or phone associated with the client;
- describe the Fixed Visit Verification (FVV) option, used when a client does not have a phone, does not allow the use of their phone and the caregiver cannot use SMC
- explain the different Call Reference Guides (CRG) available for use.

Key Terminology

Term/Acronym	Definition
Fixed Visit Verification (FVV)	Sandata's alternate call process for a client when mobile and telephone are not available
Sandata Mobile Connect (SMC)	Sandata's mobile visit verification application
Sandata EVV	Sandata Technologies Electronic Visit Verification system
Telephonic Visit Verification (TVV)	System used to record visit data and verification when SMC is not available

Introduction

Sandata Mobile Connect allows an employee to start and end a visit without requiring the use of the client's home telephone.

SMC is the primary and preferred method of calling in and out for client visits.

An employee can start a visit using SMC and complete the visit using TVV and vice versa, if required.

Set Up and Credentialing

SMC user credentials for employees are generated when the caregiver is created as an Employee in Sandata EVV.

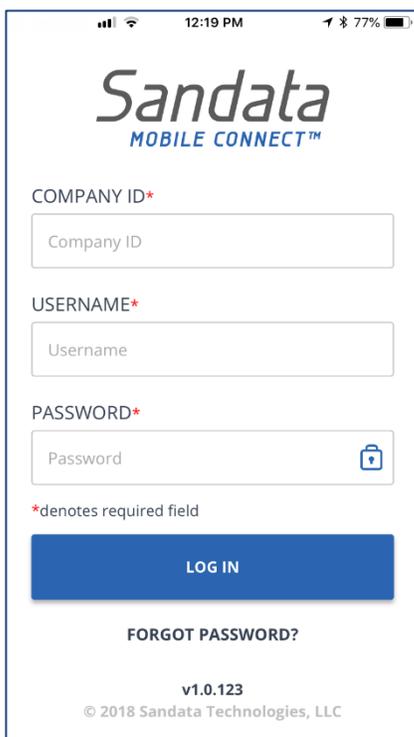

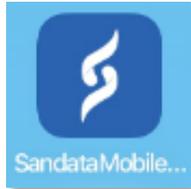

When an agency provider creates an employee, the following information must be specified in the employee profile in order for SMC to create login credentials.

- First and Last name
- Valid email address
- Check the **MOBILE User** checkbox in the *Agency* section

Note: *Additional fields may be required based on program requirements.*

When these values are captured and the employee record is saved, Sandata EVV generates a temporary SMC password and emails it to the employee at the email address entered.

Initial Set-up

The screenshot shows the Sandata Mobile Connect login interface. At the top, the Sandata logo and 'MOBILE CONNECT™' are displayed. Below the logo are three input fields: 'COMPANY ID*' with a placeholder 'Company ID', 'USERNAME*' with a placeholder 'Username', and 'PASSWORD*' with a placeholder 'Password' and a lock icon. A note below the fields states '*denotes required field'. A blue 'LOG IN' button is positioned below the fields. At the bottom, there is a 'FORGOT PASSWORD?' link, the version number 'v1.0.123', and the copyright notice '© 2018 Sandata Technologies, LLC'.

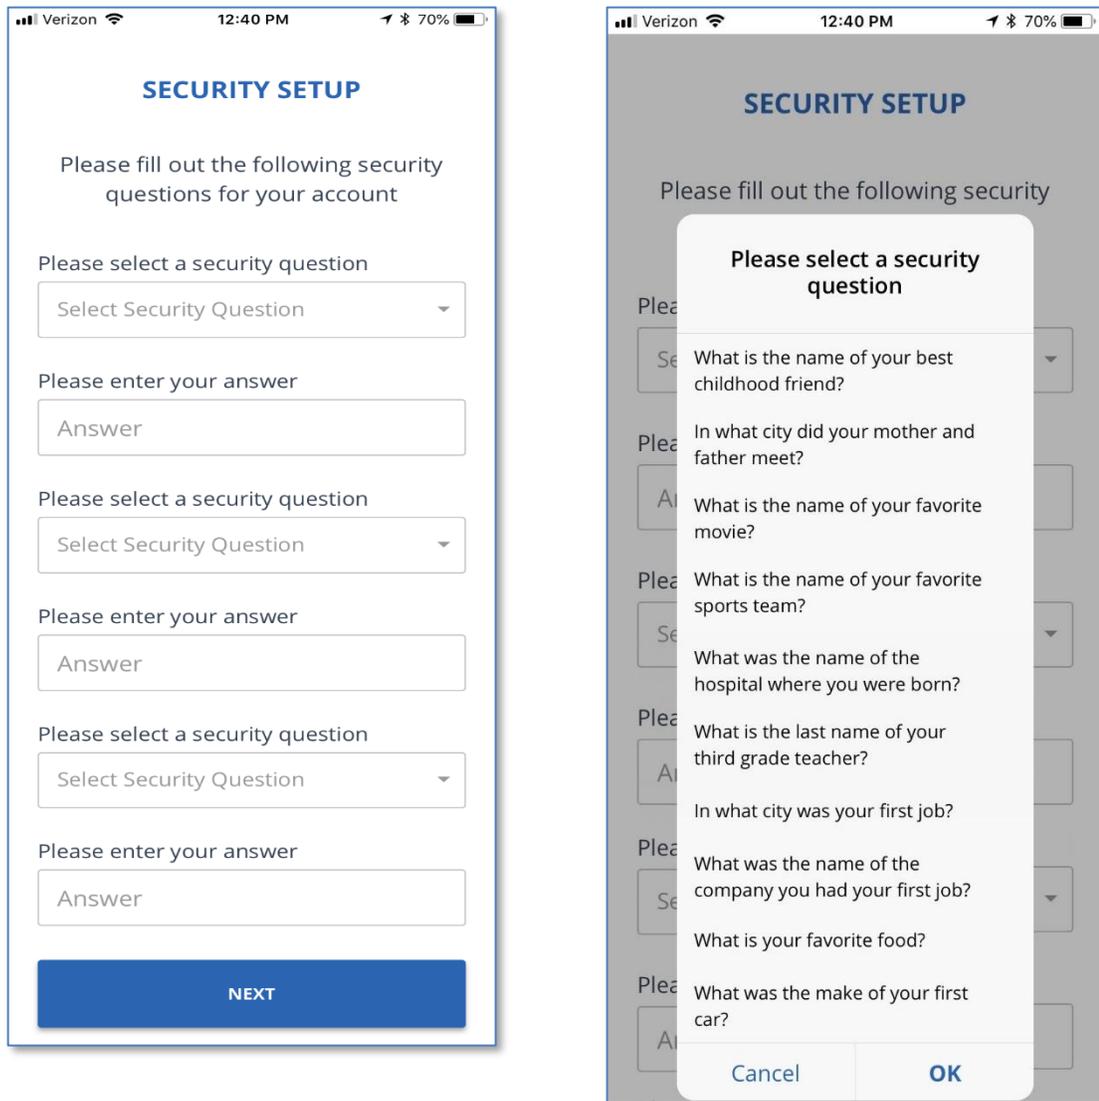

When the employee logs in to SMC for the first time, he or she will need to enter the following data elements:

- **Company ID:** 2-Sandata account # (always the number 2 plus a dash and the agency provider's assigned Sandata account #)
- **Username:** employee's email address
- **Password:** the temporary password emailed to the employee's email address entered when creating the employee

Tapping the lock icon in the **PASSWORD** field displays the password. Displaying the password can help with initial log-in and temporary password entry.

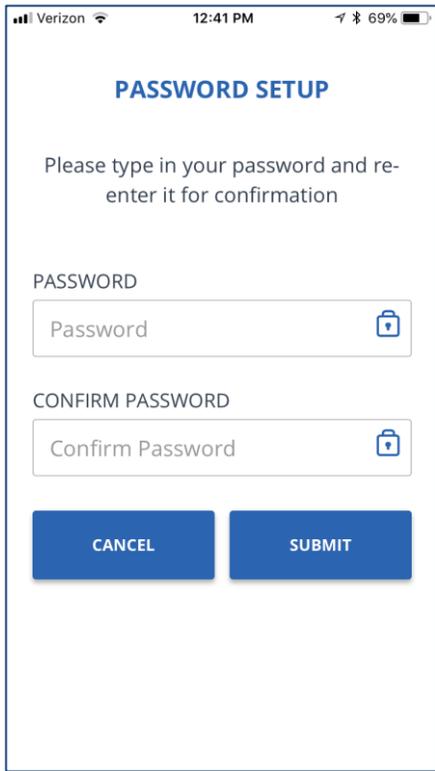

Upon logging in to SMC for the first time, the employee is asked to select and define answers to a set of security questions. The security questions are:

After answering the required security questions, the next screen prompts the employee to create a new password.

To verify the reset of a password later, SMC requires the security questions selected at set-up to be answered.

Resetting a Forgotten Password

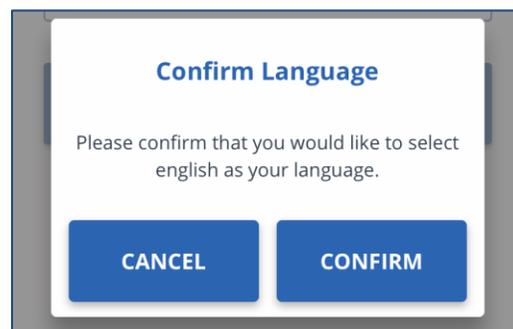

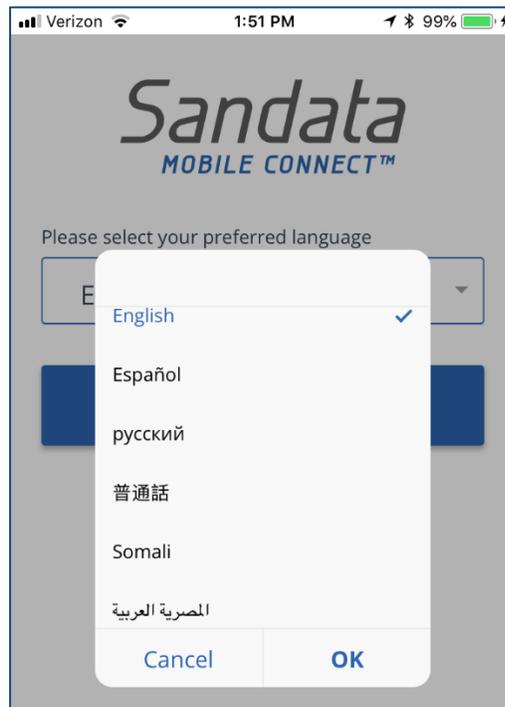

If an employee forgets their password, they can simply tap the **FORGOT PASSWORD?** link on the login screen. The employee is prompted to choose which method they wish to use to reset their password.

1. **Security Questions:** This option displays the security questions the employee chose during the initial set up.
2. **Email Temporary Password:** This option prompts the employee to enter their email to receive a temporary password to use to set new permanent password.

The screenshot shows the Sandata Mobile Connect login interface. At the top, the Sandata logo and "MOBILE CONNECT™" are displayed. Below the logo is a "COMPANY ID*" field with the value "2-25090". A white box titled "Reset Password By:" contains two blue buttons: "Security questions" and "Email Temporary Password". Below this box is a note: "*denotes required field". At the bottom of the screen, there is a "LOG IN" button and a "FORGOT PASSWORD?" link.

After successfully logging in with the new password, the next screen prompts the employee to confirm the language preference from a drop-down list on the screen.

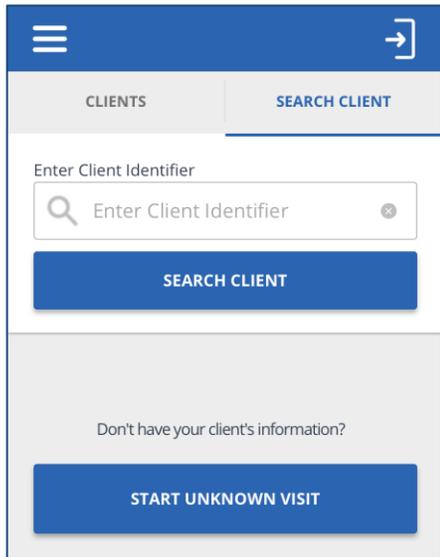

After confirming the language preference on the device, the *Home* screen displays.

The preferred language must be selected the first time the employee logs in to a new device.

Navigating the Home screen

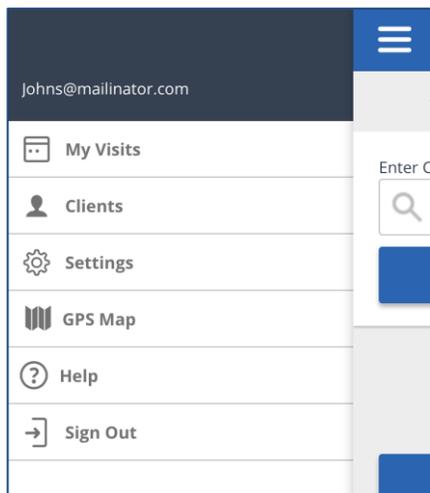

Upon successfully logging in to SMC, the user is presented with the *Home* screen. From this screen, the user is able to:

- **Search for a client to start a visit** – tap into the **ENTER CLIENT IDENTIFIER** field and enter the ID to search for the client.
- **Start an unknown visit** – tap the **START UNKNOWN VISIT** to enter the client’s name and Medicaid ID in order to start the visit.

The user can also tap the menu icon in the upper-left corner of the screen to access:

- **My Visits** -
- **Clients** – to perform a client search.
- **Settings** – to change language preference and password. All other options on the settings screen are disabled.
- **Help** – to open the SMC help guide.
- **Sign Out** – to exit SMC (The user can also tap the **Sign Out** icon  in the upper-right corner of the screen to log out of SMC).

Starting a Visit

When the employee arrives to provide care to the client, he or she will:

1. Log in to SMC.
2. Tap in the **ENTER CLIENT IDENTIFIER** search field and enter the ID of the client.

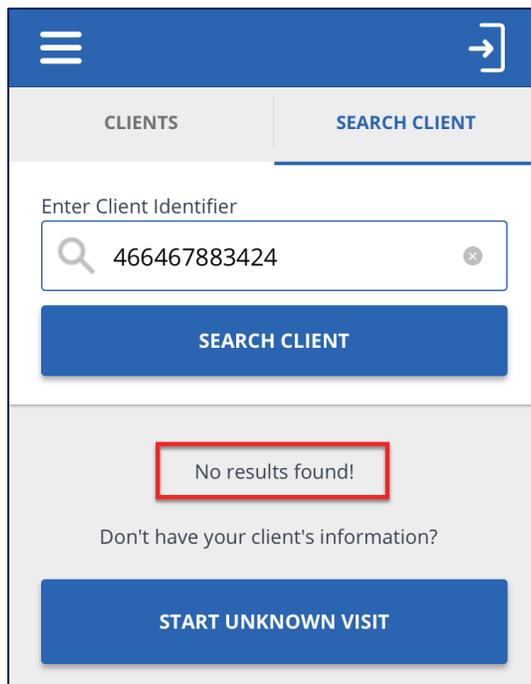

Starting an Unknown Visit

If the ID entered is not found, the employee can still call-in and out by starting an unknown visit.

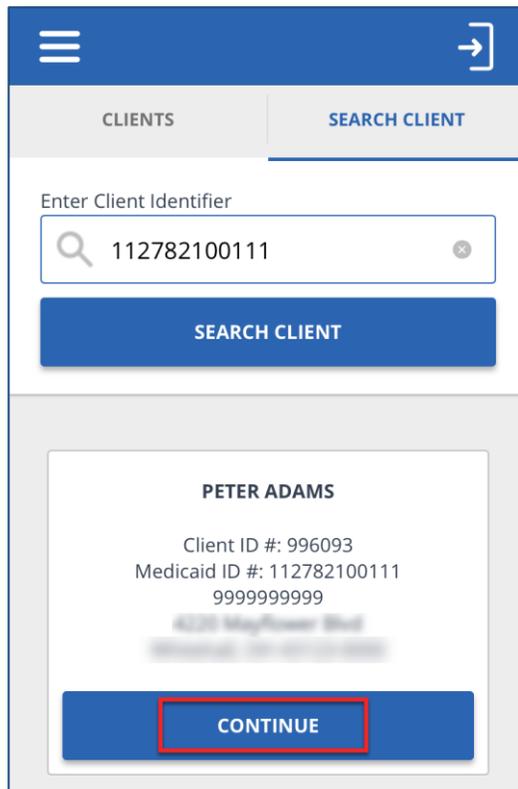

This will be covered after the known client call-in/call-out process.

3. Tap the **SEARCH CLIENT** button. (If ID entered does not match to any client, a “no results found” message displays).

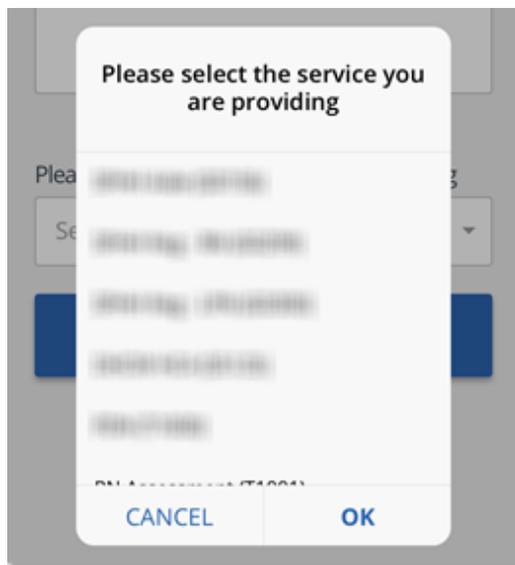

The screenshot shows a mobile application interface with a blue header. On the left is a hamburger menu icon, and on the right is a back arrow icon. Below the header are two tabs: 'CLIENTS' and 'SEARCH CLIENT'. The 'SEARCH CLIENT' tab is active. Underneath, there is a text input field labeled 'Enter Client Identifier' containing the number '466467883424'. Below the input field is a blue button labeled 'SEARCH CLIENT'. Below the button, a red rectangular box highlights the text 'No results found!'. Below this, the text 'Don't have your client's information?' is displayed, followed by a blue button labeled 'START UNKNOWN VISIT'.

4. Tap the **CONTINUE** button when the search results display.

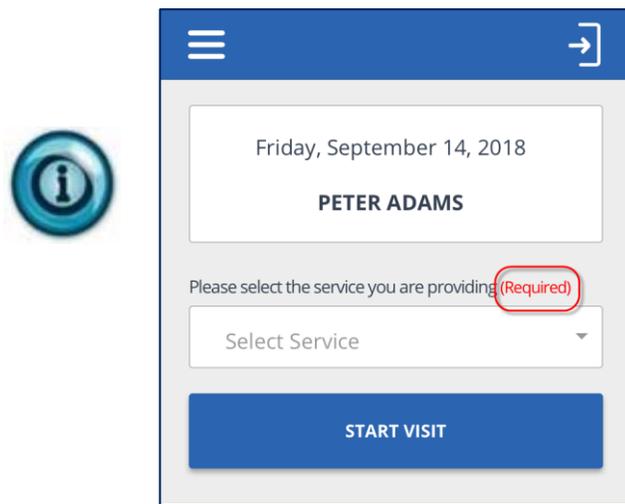

5. Select the *Service* from the drop-down list

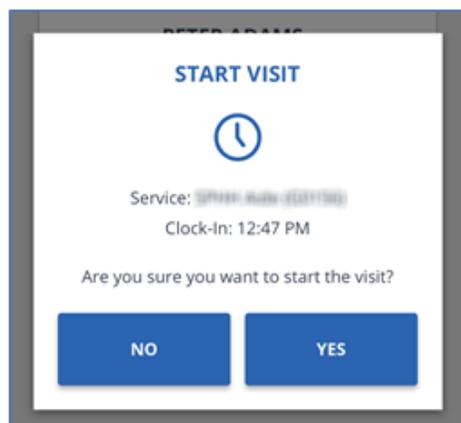

Service Selection Note

A service must be selected in order to start a visit. If a service is not chosen and the employee taps the **START VISIT** button, a pop-up appears indicating “no service selected”.

-
6. Tap the **START VISIT** button. A pop-up screen appears asking the employee to confirm the start of the visit.

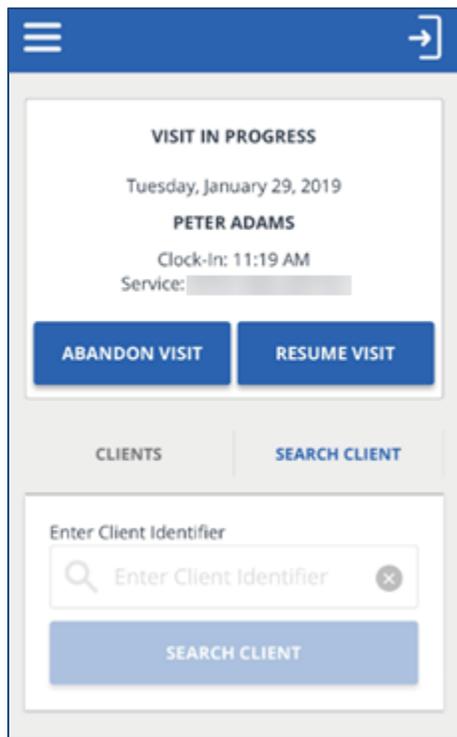

7. Log out of SMC and proceed with providing care.

To ensure security, after a configured period of inactivity, the employee is automatically logged out of SMC.

Completing a Visit

1. Log in to SMC. The *Home* screen shows the visit is in progress. Tap **RESUME VISIT**.

ABANDON VISIT button

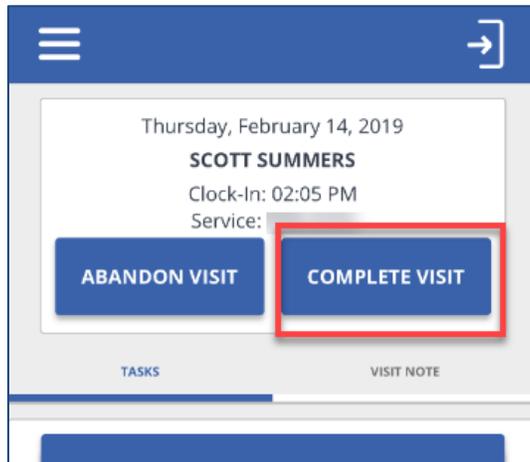

The **ABANDON VISIT** button allows the in-progress visit to be stopped so that a new visit can be started. This is used in cases when the visit was completed but the employee forgot to call-out. An abandoned visit appears in Sandata EVV as an incomplete visit and must be verified in **Visit Maintenance**.

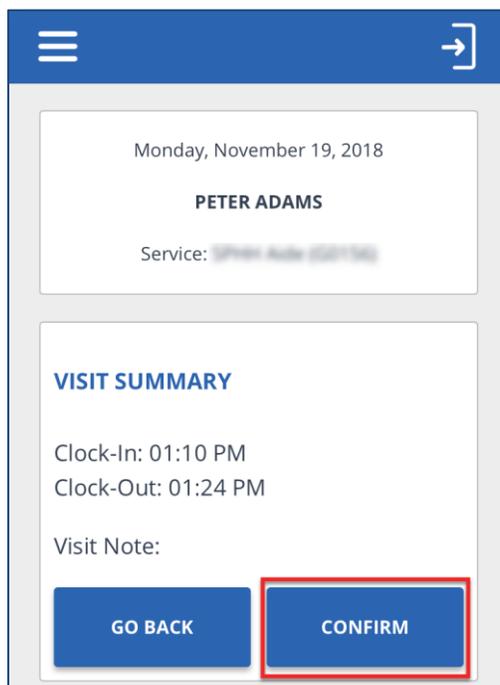

Please be aware that notes are not required. This **Visit Note** field should **not** be used to satisfy documentation requirements. This **Visit Note** field should **not** be used to capture any clinical data.

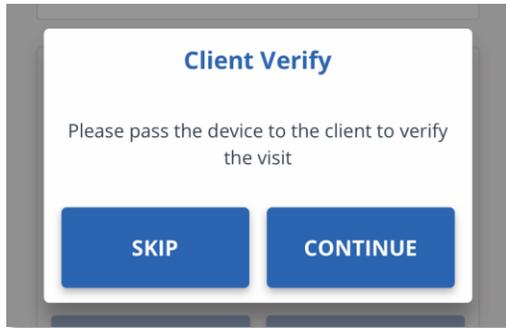

2. Tap **COMPLETE VISIT**.

3. The *Visit Summary* screen displays. Tap **CONFIRM**.

4. The *Client Verify* screen displays. Tap **CONTINUE** and pass the device to the client or tap **SKIP**.

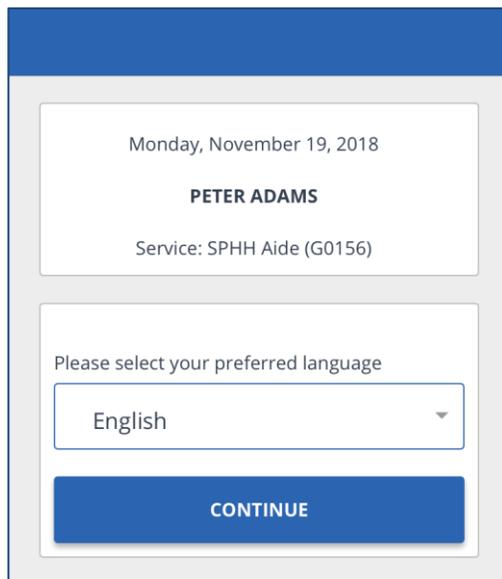

SKIP button

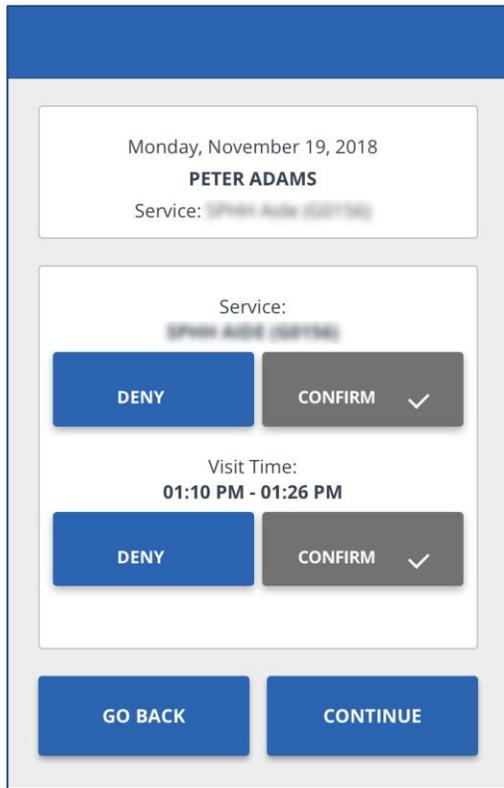

The **SKIP** button allows the in-progress visit to be completed when the client is not willing or able to verify the visit. This visit appears in Sandata EVV as an exception and must be verified in *Visit Maintenance*.

The following steps are completed by the client.

5. Tap on a language in the drop-down field then tap **CONTINUE**.

6. The *Client Confirmation* screen displays. The client must tap **CONFIRM** or **DENY** for the *Service* and *Visit Time*, then tap **CONTINUE**.

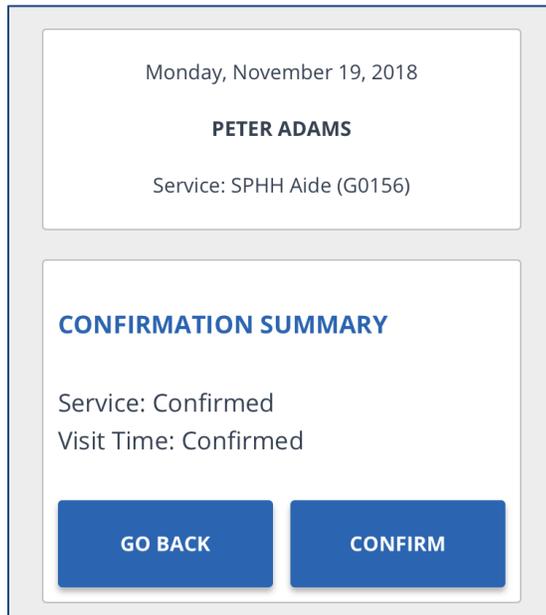

Client Confirmation

The client cannot bypass the confirmation screen; they must choose **CONFIRM** or **DENY** for each item before the **CONTINUE** button is enabled.

If the client taps **DENY** for either item on the visit, a *Visit Verification* exception is created for the visit in Sandata EVV *Visit Maintenance*.

7. The *Confirmation Summary* screen displays. Tap **CONFIRM** (Tapping **GO BACK** returns the user to the previous screen).

CONFIRMATION SUMMARY

Service: Confirmed
Visit Time: Confirmed

GO BACK **CONFIRM**

8. The *SIGNATURE/VOICE RECORDING* screen displays.

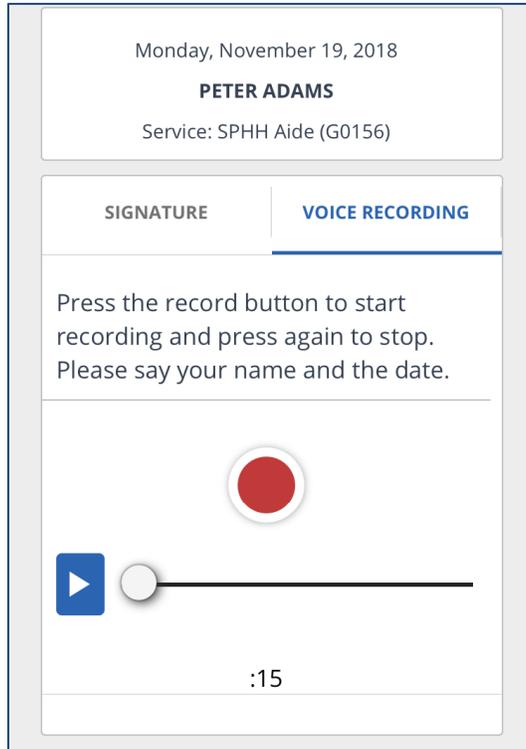

The preferred method of confirmation is to use voice recording.

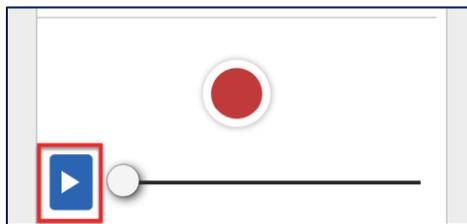

- **SIGNATURE:** Sign in the box

A screenshot of a mobile application screen. At the top, there are two tabs: 'SIGNATURE' (highlighted with a red border) and 'VOICE RECORDING'. Below the tabs, the text reads 'Sign by using your finger on the device'. A large white box contains a handwritten signature 'P. Adams' in black ink. A small grey circle with a white 'x' is located at the bottom right of the signature box. At the bottom of the screen is a blue button with the word 'CONTINUE' in white capital letters.

- **VOICE RECORDING:** Tap the circle to record your name and the date. Tap the circle again to end the recording.

To review the recording, simply tap the **Play** icon.

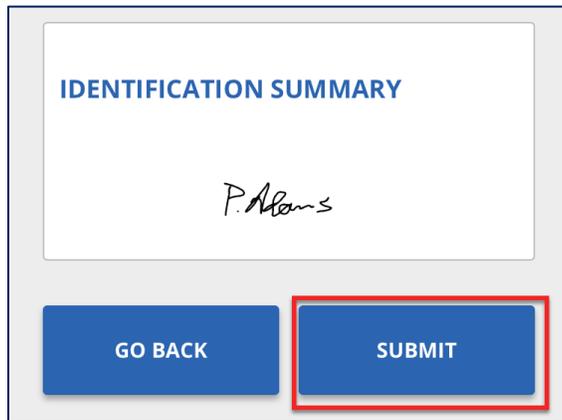

9. After signing or recording the voice, tap **CONTINUE**.

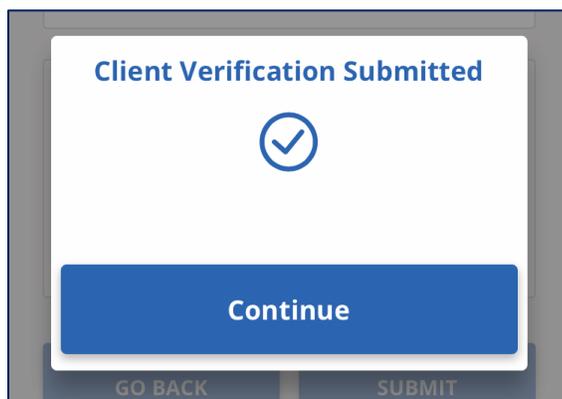

If both voice recording and signature exists, SMC prompts the user to choose which confirmation to associate to the visit.

10. The Identification Summary screen displays. Tap **SUBMIT**.

11. Tap **CONTINUE**. The visit is successfully submitted and the *Login* screen displays.

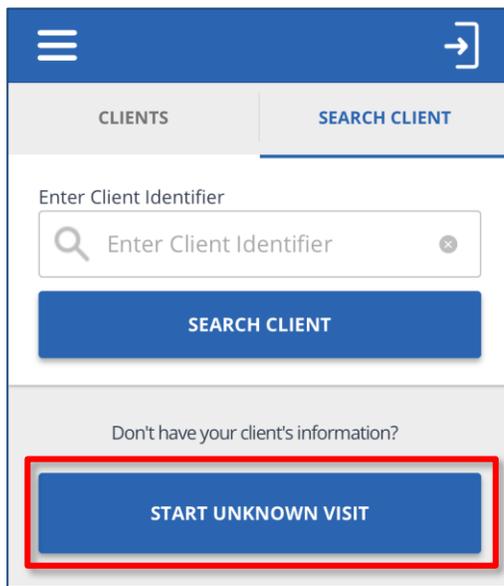

If a caregiver provides continuous care to a client for multiple days in a row (e.g. Monday – Thursday), the caregiver must check in and out every 24 hours. Visits that are in progress for more than 24 hours are automatically closed by SMC after the 25th hour.

Starting and Completing an Unknown Visit

If the Client Identifier entered to search for a client is not found when trying to start a visit, the employee can start an unknown visit. Unknown visits appear in the system as visits that require further review.

When the employee is unable to select the client by entering the Medicaid ID, he or she will:

1. Log in to SMC.
2. Tap **START UNKNOWN VISIT**.

3. Enter the following information for the client and tap **CONTINUE** (this information is available on the *Memo* screen of the *Visit Details* in the *Visit Maintenance* module).
 - **FIRST NAME** (Required)
 - **LAST NAME** (Required)
 - **MEDICAID ID #** (Optional – if available)

START VISIT

5. Tap **YES** to confirm the start of the visit. A pop-up displays asking the employee to confirm the start of visit.

1. The visit is completed following the same process used when completing a visit for a known client.
6. Log out of the SMC app.

Using SMC in an Offline Mode

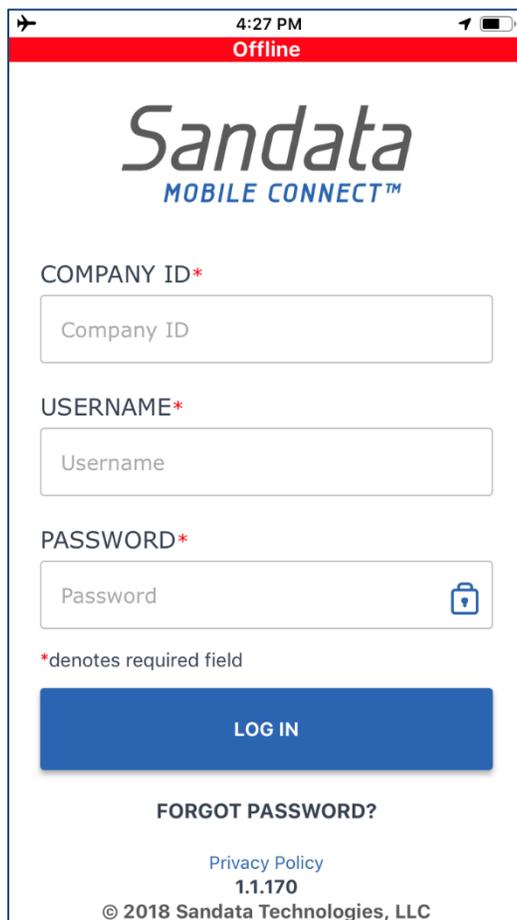

When an employee provides care in an area that does not have cellular or wi-fi service, the employee can still use Sandata Mobile Connect in an offline mode to check-in/check-out for their visits.

A red banner appears across the top of the screen when SMC is running in offline mode.

Logging in to SMC Offline

When opening SMC without a cellular or wi-fi connection, the login screen shows in red at the top of the screen that the app is Offline.

Starting an Unknown Visit Offline

- Tap **START UNKNOWN VISIT**.

The screenshot shows the Sandata mobile application interface. At the top, there is a blue header with a menu icon on the left and a back arrow on the right. Below the header is a red bar with the word "Offline" in white. Underneath is a grey bar with "SEARCH CLIENT" in blue. The main content area is white and contains a search form. The form has a title "Enter Client Identifier" and a search input field with a magnifying glass icon and a clear 'x' button. Below the input field is a blue button labeled "SEARCH CLIENT". Below the search form is the text "Don't have your client's information?". At the bottom of the screen is a large blue button labeled "START UNKNOWN VISIT", which is highlighted with a red rectangular border.

- Enter the following information for the client and tap **CONTINUE** (this information is available on the *Memo* screen of the *Visit Details* in the *Visit Maintenance* module).

CONTINUE VISIT

START GROUP VISIT

JOIN GROUP VISIT

The visit is started and completed following the same process as an Unknown Visit in an online connected mode.

Note that start and end times captured for a visit while SMC is in Offline mode are encrypted and stored on the device. The times are automatically sent to Sandata EVV the next time the employee signs in to SMC in an online/connected mode.

TVV

TVV is available as an alternative to the SMC call-in/call-out process. TVV should be utilized in cases where SMC is not available (e.g., the device has not been charged, connectivity issues, because the device has not yet been delivered, etc.).

An employee can start a visit using SMC and complete the visit using TVV and vice versa, if required.

When using TVV, employees can call-in/call-out from a phone associated to the client.

Call Reference Guide SAMPLE

Calling Instructions **STX«ACCOUNT»**

- If you made a mistake entering Tasks, press "00", the system will confirm by saying: "Starting Over, Enter number of tasks". Enter all task ID's again. Important: "00" can neither be used when selecting to enter a single task nor after the last task entry of a multi-task visit. Contact your agency to correct any errors/exceptions.

Santrax will say: "You entered (NUMBER) task(s). To record the client's voice please press "1" and hand the phone to the client, or press "2" if the client is unable to participate

15.  Press '1' to record the client's voice.
OR

 Press '2' if the client is unable to participate then skip to step 20.

16.  Hand the phone to the client and the client will be asked to state their first and last name and today's date.

 Santrax will say: "Please say your first, last name and today's date."

17.  The client should say their first, last name and today's date.
NOTE:
The system may skip the following prompts. If the prompt is skipped, please continue with the next prompt, or hang up if done.

 Santrax will say: "In call received at (TIME). Out call received at (TIME). Total visit length (NUMBER) minutes. Press one to confirm, two to deny, 3 to replay."

18.  The client should press the appropriate option.
 Santrax will say: "The service performed was (SERVICE). Press one to confirm, two to deny."

19.  The client should press the appropriate option.
 Santrax will say: "Please enter second client ID or hang up if done."

20.  Enter the ID for the second client receiving service.

21.  Follow the prompts to enter client IDs until all clients that share this call time have been entered.
NOTE: *If you enter the maximum number of clients allowed by Santrax, after entries are finished, the system will say: "Thank you, bye."*

22.  Hang up.

<p>Calling In: When arriving at the client's home, make sure you have the following information:</p> <ul style="list-style-type: none"> Your Santrax ID. <p>Remember: When speaking to Santrax on any toll-free line, speak in English, slowly and clearly one digit at a time (1075 = one, zero, seven, five).</p> <ol style="list-style-type: none">  Dial any of the toll-free numbers assigned to your agency. <i>If you are experiencing difficulties with the first toll-free number, please use the second toll-free number.</i> The Santrax system will say: "For English, please press one (1). For Spanish, please press two (2). For Somali, please press three (3). For Chinese Mandarin, please press four (4). For Arabic, please press five (5). For Russian, please press six (6). <i>These prompts are heard in their respective languages.</i>  Press the number that corresponds to the language you wish to hear. <i>All prompts for the remainder of the call will be heard in that language.</i> Santrax will say: "Welcome, please enter your Santrax ID."  Press the numbers of your Santrax ID on the touch tone phone. Santrax will say: "Please select "1" to call in or "2" to call out."  Press the one (1) key to "Call In". Santrax will say: "Received at (TIME) Please enter first client ID or hang up."  Enter the ID for the first client receiving service. Santrax will say: "Please enter second client ID or hang up if done."  Enter the ID for the second client receiving service.  Follow the prompts to enter client IDs until all clients that share this call time have been entered. NOTE: <i>If you enter the maximum number of clients allowed by Santrax, after entries are finished, the system will say: "Thank you, bye."</i>  Hang up. 	<p>Calling Out: When leaving the client's home, make sure you have the following information:</p> <ul style="list-style-type: none"> Your Santrax ID. The Service ID. The Client is available to verify the visit. <ol style="list-style-type: none">  Follow steps 1 – 3, and then continue. Santrax will say: "Please select "1" to call in or "2" to call out."  Press the two (2) key to "Call Out". Santrax will say: "Received at (TIME). Please enter first client ID or hang up if done."  Enter the ID for the first client receiving service. Santrax will say: "Please enter the Service ID."  Press the Service ID Number you performed. <i>Refer to your agency's Service list.</i> Santrax will say: "You entered (SERVICE). Please press "1" to accept, "2" to retry." <i>Once the service has been entered, the system will repeat it back to you. If the service is incorrect, press "2" to re-enter the service. When the service is correct, press "1" to accept.</i>  Press the one (1) key to accept, or press the two (2) key to retry. Santrax will say: "Enter number of tasks."  Press the total number of tasks performed for the client. Santrax will say: "Entered task ID."  Press the Task Number you preformed. NOTES: <ul style="list-style-type: none"> Refer to your agency's task list. If you performed more than one task, wait for the system to confirm the task and then enter the next task number until you have entered all tasks performed during the visit. 		

Santrax TVV prompts callers up to three times to input information.

If a caller receives a busy signal, try the alternate number.

Two or more calls made within one minute of another will make one of the calls extraneous.

For each prompt, Santrax allows a caller three attempts to enter the information correctly. After three unsuccessful attempts, the call is terminated. If the call is terminated, the caregiver should call and inform the agency. The agency will fix the call in Visit Maintenance.

Call Process

Call-In	
1	Dial the toll-free number. <i>Santrax will prompt for to select a language. Each prompt will be heard in its respective language followed by a selection number. (i.e. "For English, press 1; for Spanish, press 2, etc.)</i>
2	Press the number that corresponds to the desired language. <i>Santrax will say: "Welcome, please enter your Santrax ID."</i>
3	Press the numbers of your Santrax ID on the touch tone phone. <i>Santrax will say: "Press 1 to call-in or 2 to call-out."</i>
4	Press the one (1) key to "call-in." ** <i>Santrax will say: "Received at [Time]. Thank you, bye." (if the phone number the call is coming from is only associated to one (1) client, otherwise Santrax will give the time then prompt for a client ID)</i> ** When a phone is associated to more than one client in Sandata EVV, you will be prompted to provide the Client ID to identify the client for whom care is being provided. <i>Santrax will say: "Please enter first client ID or hang up if done."</i> Enter the client ID for the client receiving care.
5	Hang up.

Santrax IDs and Client IDs

- The Santrax ID is a unique system-generated number identifier for the employee and is used by the employee to identify themselves on a TVV call.
- The Client ID is a unique system-generated number identifier for the client, used by the employee on a TVV call to identify the client.

Call-Out	
1	Dial the toll-free number.
	<i>Santrax will prompt for to select a language. Each prompt will be heard in its respective language followed by a selection number. (i.e. "For English, press 1; for Spanish, press 2, etc.)</i>
2	Press the number that corresponds to the desired language.
	<i>Santrax will say: "Welcome, please enter your Santrax ID."</i>
3	Press the numbers of your Santrax ID on the touch tone phone.
	<i>Santrax will say: "Press 1 to call-in or 2 to call-out."</i>
4	Press the two (2) key to "call-out."
	<i>Santrax will say: "Received at [Time]." (if the phone number the call is coming from is only associated to one (1) client, otherwise Santrax will give the time then prompt for a client ID)</i>
	<i>Santrax will say: "Please enter the Service ID."</i>
5	Press the service ID performed (Service IDs and Tasks are listed on a separate sheet)
	<i>Santrax will say: "You entered [Service]. Please press 1 to accept, 2 to retry."</i>
6	Please press 1 to accept, 2 to re-enter
	<i>Santrax will say: "Enter number of tasks."</i>
7	Enter the total number of tasks performed for the client.
	<i>Santrax will say: "Enter task ID."</i>
8	Enter the ID of the task performed. Santrax will playback the task description. (If more than one task was entered as the total, Santrax will prompt for the next task ID. Repeat this step until all tasks are entered.

After the tasks, Santrax will say: *“To record the client’s voice please press 1 and hand the phone to the client or press 2 if the client is unable to participate.”*

Press (1) to record client’s voice (hand phone to client):

Santrax will say: “Please say your first and last name and today’s date.”

The client will say their name and the date

Santrax will say: “In call received at [Time]. Out call received at [Time]. Total visit length [number] minutes. Press one to confirm, two to deny.”

Client will press appropriate choice.

Santrax will say: “The service performed was [service]. Press one to confirm, two to deny.”

Client will press appropriate choice.

Santrax will say: “Thank you, bye.”

Hang up.

Press (2) if the client is unable to participate.

Santrax will say: “Thank you, bye.”

Hang up.

Visit Scenarios (SMC and Telephone)

Multiple clients in the same home

- If a provider cares for more than one client in the same home (e.g. husband and wife), but not at the same time:
 - SMC – the employee calls in and out for the client receiving care at that time.
 - Telephone – the employee calls in and out and enters the Client ID of the client receiving care at that time.
- If both clients in the home are receiving care, back to back:
 - SMC – the employee calls in and out for each client receiving care.
 - Telephone – the employee calls in and out for each client receiving care. The employee enters the Client ID for each client’s calls. A total of four calls are made for this type of visit.

The Client ID can be found by looking up the client’s record in the Sandata EVV *Data Entry* module or running an *Active Clients Report* in the *Reports* module.

Providing multiple services for a client during a single visit

If an employee provides care for a single client under multiple services during a visit:

- SMC — the employee calls in and out for each visit and service. There will be a total of four calls made for the entire visit.
- Telephone — the employee calls in and out for each visit and service. There will be a total of four calls made for the entire visit.

After calling out for the first service, wait one minute before calling in to start the visit for the second service. If it's within the same minute, the call is treated as an extraneous call for the end-call of the first visit.

Provider providing care multiple times for a single client in one day

If an employee cares for a single client multiple times in one day:

- SMC – the employee calls in and out for each visit, capturing the visit hours and service performed.
- Telephone – the employee calls in and out for each visit, capturing the visit hours and service performed.

Visit that starts and/or ends away from the client's home

If an employee delivers care to the client outside the home, or picks up/drops off the client outside the home:

- SMC – the employee calls in and out from the client's location outside the home.
- Telephone – the employee calls in and out. Manual adjustments will be made in *Visit Maintenance*.

If neither SMC nor TVV are available, the agency provider enters the visit manually in *Visit Maintenance*.

Multiple providers caring for a single client at the same time

If multiple providers deliver care to a single client at the same time:

- SMC – each provider calls in and out for their visit, capturing the visit hours and service performed.
- Telephone – each provider calls in and out for their visit, capturing the visit hours and service performed.

Overnight Visits

If an employee provides care to a client that starts before midnight one day and ends after midnight the following day:

- SMC – the employee will call in upon arriving and call out when leaving.
- Telephone – the employee will call in upon arriving and call out when leaving.

Consecutive Days Visits

If a caregiver provides continuous care to a client for multiple days in a row (e.g. Monday – Thursday), the caregiver must check in and out every 24 hours.

A visit that is in progress for more than 24 hours is automatically closed by SMC after the 25th hour.

FVV

Fixed Visit Verification (FVV) is a process that allows a caregiver to clock-in and clock out for a visit in instances when a client does not have a phone or is unwilling to allow the caregiver to use their phone, and the caregiver does not have the ability to download the mobile App.

The process uses a small device that is requested by the provider agency, registered to a client and shipped to the client’s home. The device remains in the client’s home for use by all caregivers who provide care to that client.

The FVV device generates a 6-digit value each time it is pressed. The value represents the date and time at that instance. When a caregiver arrives at a client’s home which has an FVV device registered, the caregiver locates the device, presses the button and makes note of the 6-digit value displayed. The value represents the date and start time of the visit. At the end of the visit, the caregiver presses the button again and makes note of the new 6-digit value. The second value represents the date and end time of the visit. At the end of the day, when the caregiver has access to a telephone, he/she dials into the provider agency’s assigned toll-free number and enters the FVV values for that day’s client visit(s).

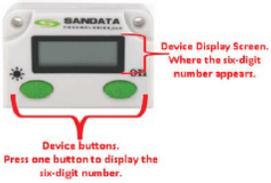

Call Reference Guide SAMPLE

FVV information:
Fixed Visit Verification (FVV) acts as a proof of work system. It allows the user to check in and check out from the client's home (like a time clock) without the use of the client's home telephone. This is done through the use of an FVV Device.

Common Phrases Related to FVV Usage:
Visit Verification Number - This is the six-digit number that is displayed on the FVV Device's screen when either FVV button is pushed.
Visit Verification Value - This is the actual date and time represented by the six-digit visit verification number.

The FVV Device:

- Is assigned to a specific agency and client.
- Is placed in the client's home.
- Is not a recording device.
- Is used by the attendant to check in and check out.

Important Information:

- Wait at least 15 minutes after the FVV Device button is pushed before making a call into Santrax for that visit.
- Both of the six-digit visit verification numbers obtained from the FVV Device will be entered during one Santrax call.
- If you think you have made a mistake entering the six-digit visit verification numbers during the Santrax call, contact your supervisor. Do not attempt to call again for this visit.
- When servicing two clients in the same household (a mutual case), each client will be assigned their own FVV Device. This means that the field staff will need to check in and check out for each client separately (two devices, two sets of visit verification numbers and two calls into Santrax).

The Visit Verification Number Reference Chart:
Use the "Visit Verification Number Reference Chart" document (provided to your agency's administrator) to write down the six-digit visit verification numbers you obtained from the FVV Device's display screen during the visit. Below is an example:

Client's ID	Visit Verification #	Date	Time
15768	In: 785 615	8/1	9:00
	Out: 458 361	8/1	10:30
	In:
	Out:

Press the star (*) key.  Santrax will say: "Please enter first Client ID." 4.  Enter the Client ID. If the Client ID is entered incorrectly, the Santrax system will prompt: "No FVV registered, please re-enter the client ID or press the pound (#) key to continue."  Once the Client ID is entered correctly, Santrax will say: "Please enter your <u>first</u> visit verification number or press the pound (#) key to continue." 	<ol style="list-style-type: none"> 5.  Enter the first visit verification number. <i>This is the first six-digit number you obtained from the FVV Device when you arrived at the client's home and will represent your time in.</i>  When the visit verification number is entered correctly Santrax will confirm it by saying: "The first visit verification number is (DATE/TIME). If this is incorrect, press 1 to retry or press the pound (#) key to continue." NOTE: Listen to check that the date and time provided are the same as the date and time the button on the device was pushed. If they don't match, an incorrect visit verification number may have been entered. Press 1 to re-enter the number. 6.  Press the pound (#) key to continue.  Santrax will say: "Please enter your <u>second</u> visit verification number or press pound (#) to continue." 7.  Enter the second visit verification number. <i>This is the six-digit number you obtained from the FVV Device at the end of the visit. It will represent your time out.</i>  When the visit verification number is entered Santrax will confirm it by saying: "The second visit verification number is (DATE/TIME). If this is incorrect, press 1 to retry or press the pound (#) key to continue." 8.  Press the pound (#) key to continue.  Santrax will say, "Enter number of tasks" 9.  Press the total number of tasks performed for the client.  Santrax will say, "Enter task ID" 10.  Press the Task Number you performed. NOTES: <ul style="list-style-type: none"> • Refer to your agency's task list. • If you performed more than one task, wait for the system to confirm the task and then enter the next task number until you have entered all tasks performed during the visit. • If you are performing a task with a reading, Santrax will pause after receiving the Task ID. During the pause, press the appropriate reading for this task using the amount of digits indicated on the task list. • If you made a mistake entering Tasks, press "00", the system will confirm by saying: "Starting Over, Enter number of tasks". Enter all task ID's again.  Santrax will say: "You entered (NUMBER) task(s)." 11.  Hang up 		

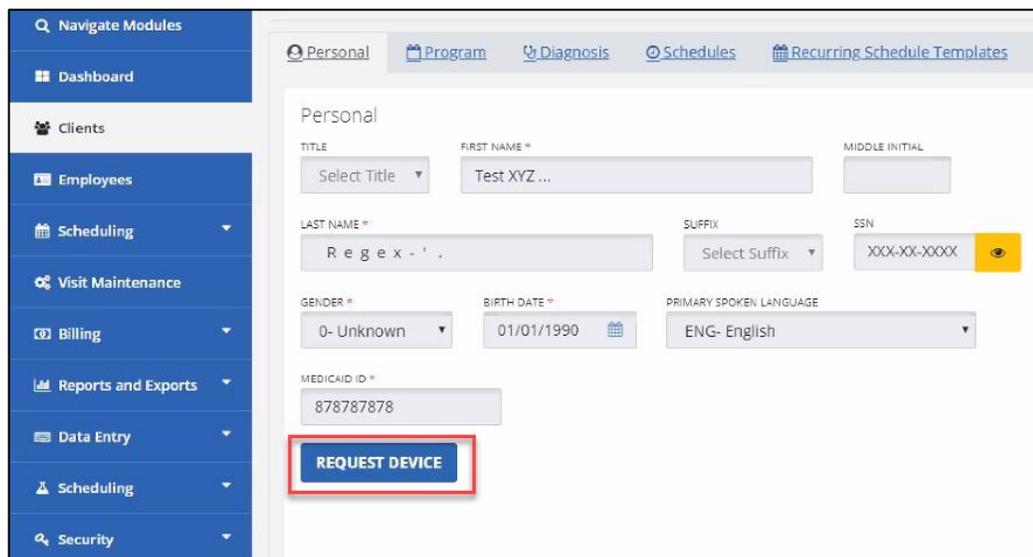

Call	
1	Dial the toll-free number.
	<i>Santrax will prompt for to select a language. Each prompt will be heard in its respective language followed by a selection number. (i.e. "For English, press 1; for Spanish, press 2, etc.)</i>
2	Press the number that corresponds to the desired language.
	<i>Santrax will say: "Welcome, please enter your Santrax ID."</i>
3	Press the numbers of your Santrax ID on the touch tone phone.
	<i>Santrax will say: "Received at [Time]. If this is a Fixed Visit Verification visit, press the star key to enter the visit verification numbers; otherwise, press the pound key to continue" (if the phone number the call is coming from is only associated to one (1) client, otherwise Santrax will give the time then prompt for a client ID)</i>
4	Press the star (*) key.
	<i>Santrax will say: "Please enter first client ID."</i>
5	Enter the client ID.
	<i>Santrax will say: "Please enter your <u>first</u> visit verification number or press the pound (#) key to continue."</i>
6	Enter the 6-digit value noted at the start of the visit.
	<i>Santrax will say: "The first visit verification number is (Date/Time). If this is incorrect, press 1 to retry or press the pound (#) key to continue."</i>
7	Press the pound (#) key.
	<i>Santrax will say: "Please enter your <u>second</u> visit verification number or press the pound (#) key to continue."</i>
8	Enter the 6-digit value noted at the end of the visit.
	<i>Santrax will say: "The second visit verification number is (Date/Time). If this is incorrect, press 1 to retry or press the pound (#) key to continue."</i>
9	Press the pound (#) key.
	<i>Santrax will say: "Enter the Service ID."</i>
10	Press the service ID performed (Service IDs and Tasks are listed on a separate sheet)
	<i>Santrax will say: "You entered [Service]. Please press 1 to accept, 2 to retry."</i>
11	Please press 1 to accept, 2 to re-enter
	<i>Santrax will say: "Enter number of tasks."</i>

12	Enter the total number of tasks performed for the client.
	<i>Santrax will say: "Enter task ID."</i>
13	Enter the ID of the task performed. Santrax will playback the task description. (If more than one task was entered as the total, Santrax will prompt for the next task ID. Repeat this step until all tasks are entered.

Requesting a Device in EVV

An EVV Device can also be requested from the client record in Sandata EVV simply by clicking the **REQUEST MOBILE DEVICE** button on the client record screen.

1. Search for and locate the client record.
2. Click the Edit icon to open the client record.
3. Click the **REQUEST DEVICE** button.

4. Select or confirm the Shipping address (If the client has multiple addresses, the primary address is selected by default). Enter special shipping instructions into the text box if needed (e.g. please go to side door).

Select Shipping Information for Device Request

7 Visit Maintenance

Module Time

75 minutes

This lesson explains how to use the Sandata EVV *Dashboard* to view current day visits. The lesson also reviews the *Visit Maintenance* module, explaining how to navigate the screens, understand the information presented on the screen for selected visits, and how to resolve exceptions that may be linked with a visit.

Module Objectives

After completing this lesson, you will be able to:

- use the Sandata EVV *Dashboard* to monitor current day visit exceptions;
- search and review visit exceptions; and
- resolve visit exceptions.

Key Terminology

Term/Acronym	Definition
Client	A person who receives services through the Medicaid program.
Dashboard	Real-time status of the current day's visit exceptions.
Employee	A person who is employed by an agency provider to provide care to one or more clients
GPS	Global Positioning System
Manual Call	Corrective action for the visit exception Visit Without In-Call/Visit Without Out-Call.
Reason Code	A pre-defined list of reasons/explanations for the various correction scenarios. A reason code must be selected when making a change to data in Visit Maintenance.
Visit	A "visit" is the electronic service provided during an in-person encounter to a client in a home and community-based setting.
Visit Maintenance	The module within Sandata EVV where visits can be reviewed, corrected and/or acknowledged to clear issues.

Introduction

The Sandata EVV *Dashboard* and *Visit Maintenance* module gives users with the appropriate permissions, the ability to monitor visit activity in real-time. It allows visits with system identified issues to be updated, ensuring that all necessary information is included.

A visit includes an employee, a client, a service, GPS location for SMC or the telephone number for TVV, the client verification information, as well as call-in and call-out times (date and time) from a client's location.

If a visit is missing any of the information mentioned above or if a visit does not meet the program rules, it appears in Visit Maintenance with one or more exceptions. An exception on a visit, such as 'Visit without Out-Calls', would be applied if a check-in was received but there is no check-out.

Exceptions are grouped by those that must be fixed and those that must be acknowledged. An exception that needs to be fixed means information must be entered to clear the exception. An exception that needs to be acknowledged means the user must accept the exception occurred.

Agencies should review *Visit Maintenance* daily, looking at the previous day's visits and clear exceptions as appropriate. Once all exceptions are cleared from a visit, the visit has a status of verified. A verified visit means that it has all required information and the information meets the program rules.

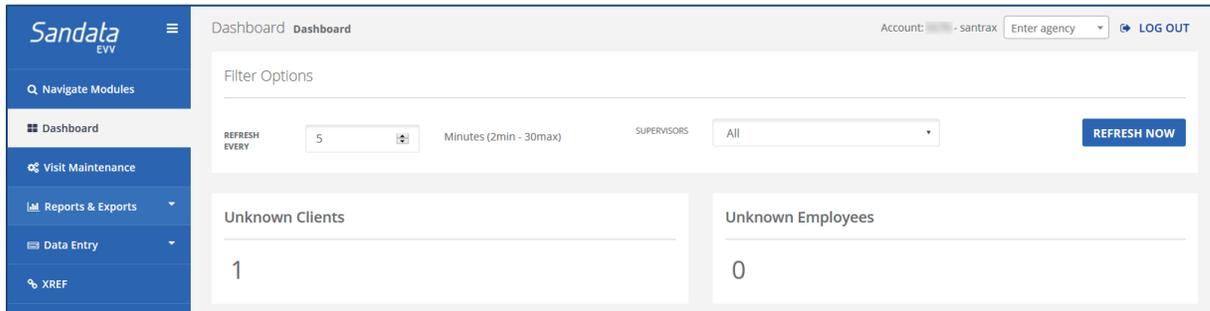

Visit maintenance should not be done while a visit is in process.

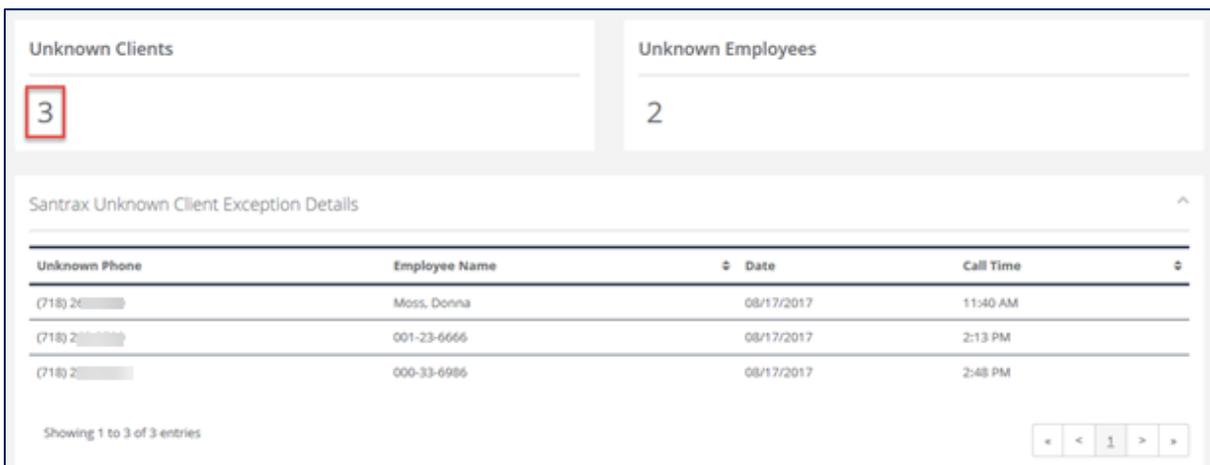

Sandata EVV Dashboard

The Sandata EVV *Dashboard* monitors current day's visits, identifying when a client could not be identified (Unknown Client) or the employee could not be identified (Unknown Employee).

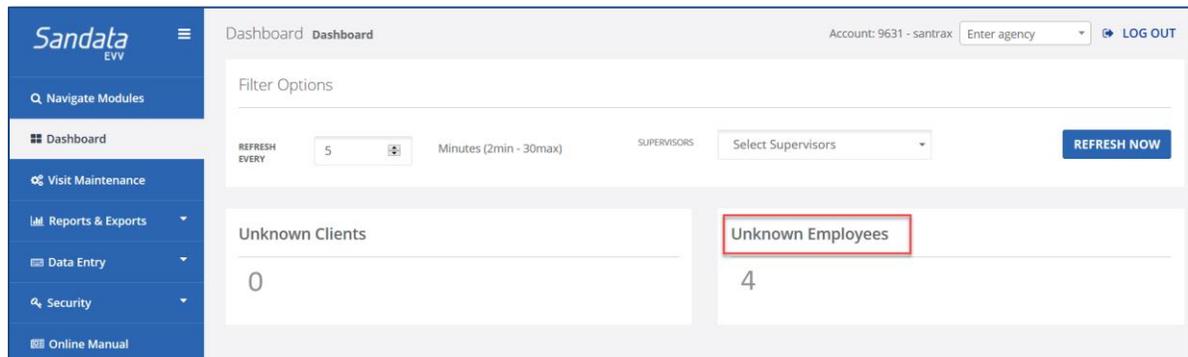

The data defaults to refresh every five minutes but can be changed to refresh between 2 – 30 minutes. All exception types can be viewed in *Visit Maintenance*.

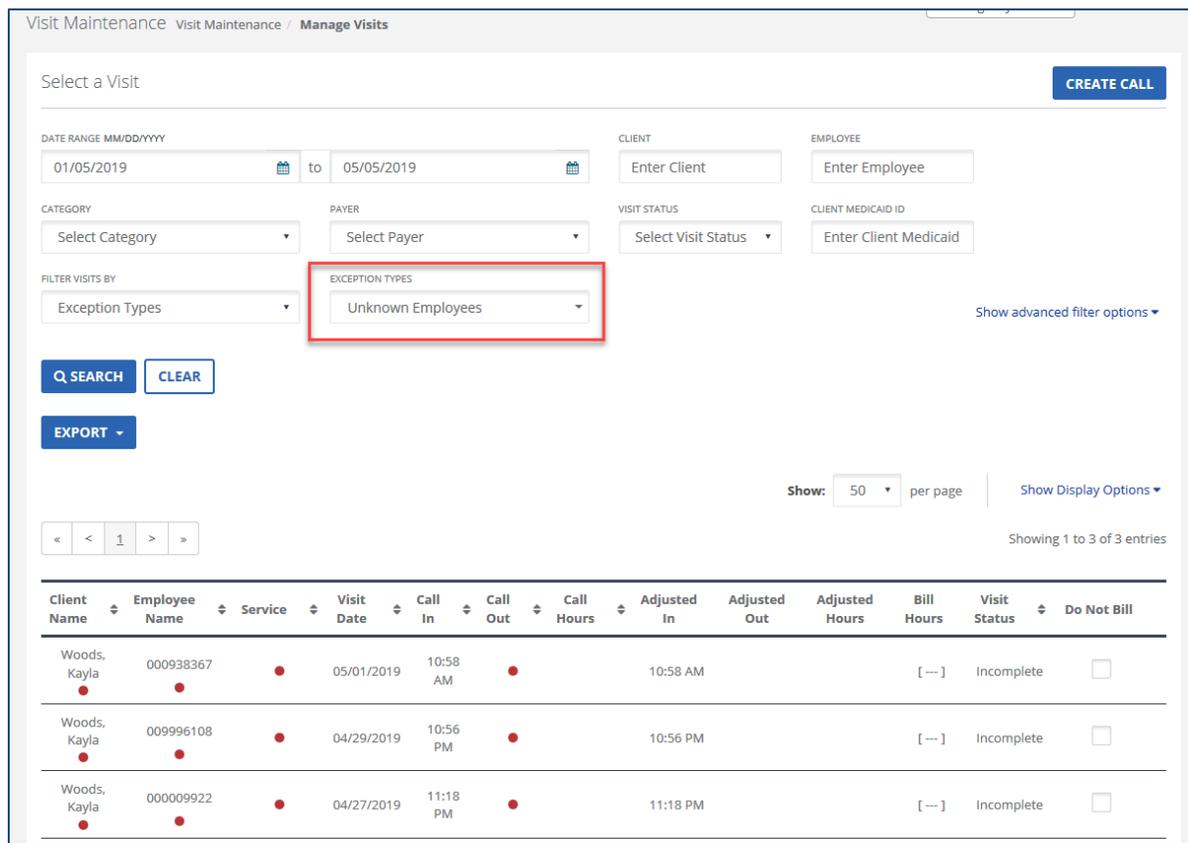

Click the exception category total to display a listing of the visit exception details for that specific exception.

Click the exception category name to link to the *Visit Maintenance* module to view and edit the visits for that exception.

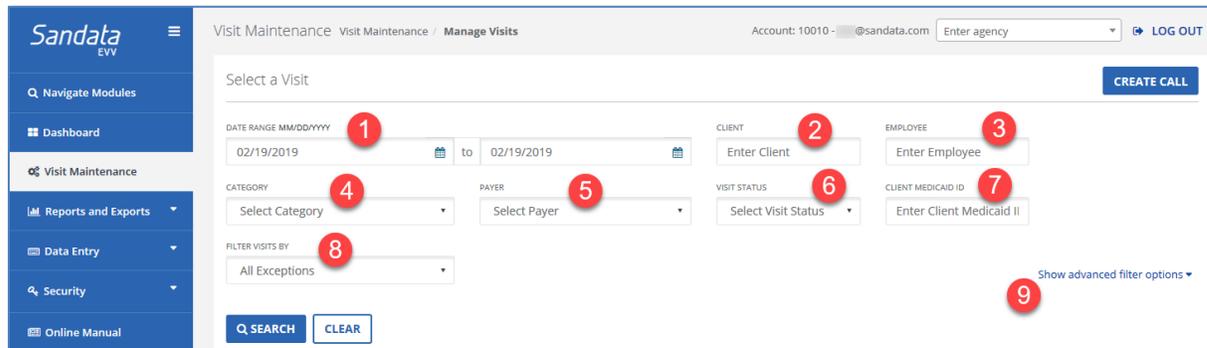

The dashboard shows a sidebar with navigation options: Dashboard, Visit Maintenance, Reports & Exports, Data Entry, Security, and Online Manual. The main content area has a 'Filter Options' section with 'REFRESH EVERY' set to 5 minutes and 'SUPERVISORS' set to 'Select Supervisors'. Below this, there are two summary cards: 'Unknown Clients' with a count of 0, and 'Unknown Employees' with a count of 4. The 'Unknown Employees' card is highlighted with a red box.

The 'Manage Visits' page includes a 'Select a Visit' header with a 'CREATE CALL' button. Below are several filter fields: 'DATE RANGE' (01/05/2019 to 05/05/2019), 'CLIENT' (Enter Client), 'EMPLOYEE' (Enter Employee), 'CATEGORY' (Select Category), 'PAYER' (Select Payer), 'VISIT STATUS' (Select Visit Status), and 'CLIENT MEDICAID ID' (Enter Client Medicaid). The 'EXCEPTION TYPES' dropdown is highlighted with a red box and shows 'Unknown Employees' selected. There are also 'SEARCH', 'CLEAR', and 'EXPORT' buttons. At the bottom, there is a table with 13 columns: Client Name, Employee Name, Service, Visit Date, Call In, Call Out, Call Hours, Adjusted In, Adjusted Out, Adjusted Hours, Bill Hours, Visit Status, and Do Not Bill. The table shows three entries for 'Woods, Kayla' with visit dates 05/01/2019, 04/29/2019, and 04/27/2019, all with an 'Incomplete' status.

Client Name	Employee Name	Service	Visit Date	Call In	Call Out	Call Hours	Adjusted In	Adjusted Out	Adjusted Hours	Bill Hours	Visit Status	Do Not Bill
Woods, Kayla	000938367		05/01/2019	10:58 AM			10:58 AM			[...]	Incomplete	<input type="checkbox"/>
Woods, Kayla	009996108		04/29/2019	10:56 PM			10:56 PM			[...]	Incomplete	<input type="checkbox"/>
Woods, Kayla	000009922		04/27/2019	11:18 PM			11:18 PM			[...]	Incomplete	<input type="checkbox"/>

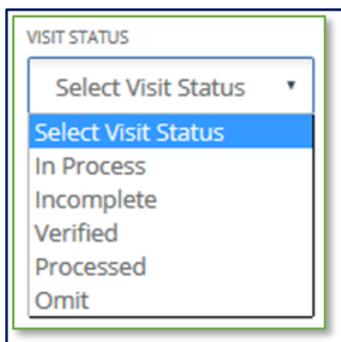

Visit Maintenance – Main Screen

Search Filters

In *Visit Maintenance*, search filters are used to set up parameters to find visits to review and are located on the top half of the *Visit Maintenance* screen. The search results include all data that falls within the specified parameters.

1. **DATE RANGE:** The date fields default to the current date and can be changed by clicking in the date field and typing the date or clicking on the calendar icon to select a date using the pop-up calendar.
2. **CLIENT:** Enter all or part of client’s last name to filter the visit data for that client.
3. **EMPLOYEE:** Enter all or part of employee’s last name to filter the visit data for that employee.
4. **CATEGORY:** Displays a list payer groups if appropriate for configuration. Otherwise, drop-down will be blank.
5. **PAYER:** Displays the list of payers when multiple payers exist.
6. **VISIT STATUS:** This filter allows a user to filter the visits by their status. The options include:

Status	Description
In Process	A visit that has started and not yet completed.
Incomplete	A visit that has exceeded a 24-hr. period and is still missing a call-in/call-out.
Verified	A visit that does not contain any exceptions and is eligible for billing.
Processed	A visit that does not contain any exceptions and has been returned to the claim’s validation engine at least once.

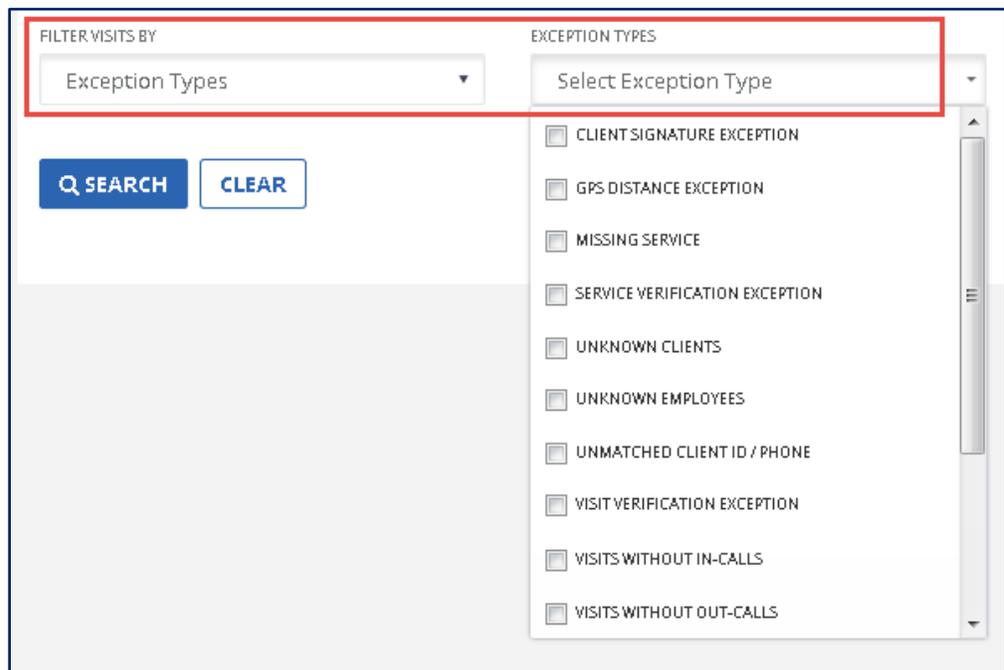

Omit	A visit that is marked 'Do Not Bill'
------	--------------------------------------

7. **CLIENT MEDICAID ID:** Enter the client’s Medicaid ID.

8. **FILTER VISITS BY:**

All Exceptions: This default setting displays all visits containing one or more exceptions within a specified time period.

Exception Types: This option selects visits based on the exceptions which apply to the visit. When selected, an additional field appears prompting the user to choose the specific exception type(s) from the additional drop-down field.

Exception	Description
CLIENT SIGNATURE EXCEPTION	Client’s digital signature or voice recording is missing.
INVALID SERVICE	Service selected on TVV call does not match service for the client.
MISSING SERVICE	Identifies when the service provided for the visit is not specified during the SMC call-in or Telephony call-out.
SERVICE VERIFICATION EXCEPTION	Client did not confirm the selected service.

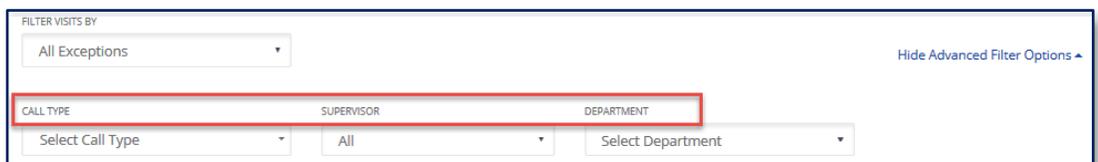

Exception	Description
UNKNOWN CLIENTS	Identifies when a visit occurs where the client is not known to the system. This can occur when the Medicaid ID entered does not match to an existing client or the phone number entered does not match to a known client.
UNKNOWN EMPLOYEES	Identifies when the Santrax ID entered during a telephone call does not match to any known employee.
UNMATCHED CLIENT PHONE/ID	Identifies when a client ID is entered during a telephone call, but the phone number the call was made from is not a number listed for the client.
VISIT VERIFICATION EXCEPTION	Identifies when the start and/or end time have not been verified by the client at the end of the visit, either by confirming during the SMC call-out or verifying the times during the Telephony call-out.
VISIT WITHOUT IN-CALLS	Identifies a visit which does not have a call-in.
VISIT WITHOUT OUT-CALLS	Identifies a visit which does not have a call-out.

All Visits: Sandata EVV will show all visits (including those with exceptions) in the search results for a specified time period.

- Show Advanced Filter Options:** Displays additional filters such as **Call Type**, **Supervisor** and **Department**.

The screenshot shows a search interface with a dropdown menu set to 'All Exceptions'. A red box highlights the 'Show Advanced Filter Options' button in the top right corner. Below the dropdown are 'SEARCH' and 'CLEAR' buttons.

The screenshot shows the search interface with advanced filters expanded. A red box highlights the 'CALL TYPE', 'SUPERVISOR', and 'DEPARTMENT' filter headers. Below them are three dropdown menus: 'Select Call Type', 'All' (for Supervisor), and 'Select Department'.

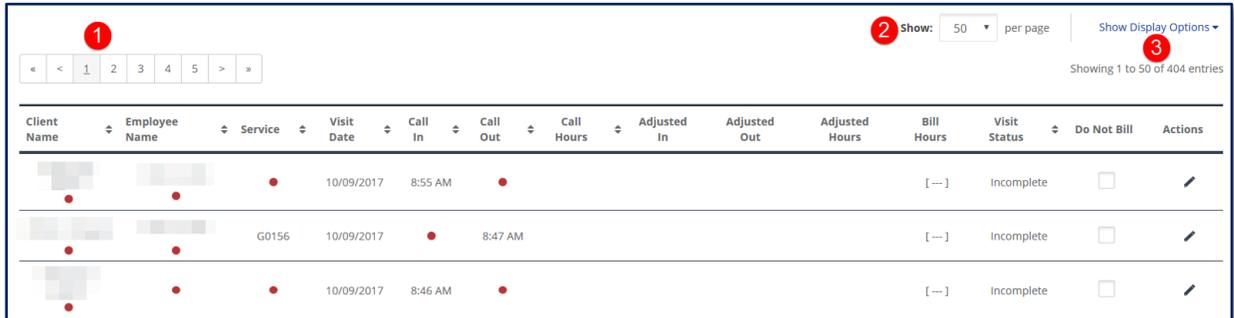

Call Type: Filter visits to show only **MVV** or **Manual** calls.

Supervisor: This filter is available if clients are grouped by supervisor/coordinators.

Department: This filter is available if employees are grouped by departments.

Search Results – Understanding the Visit Grid

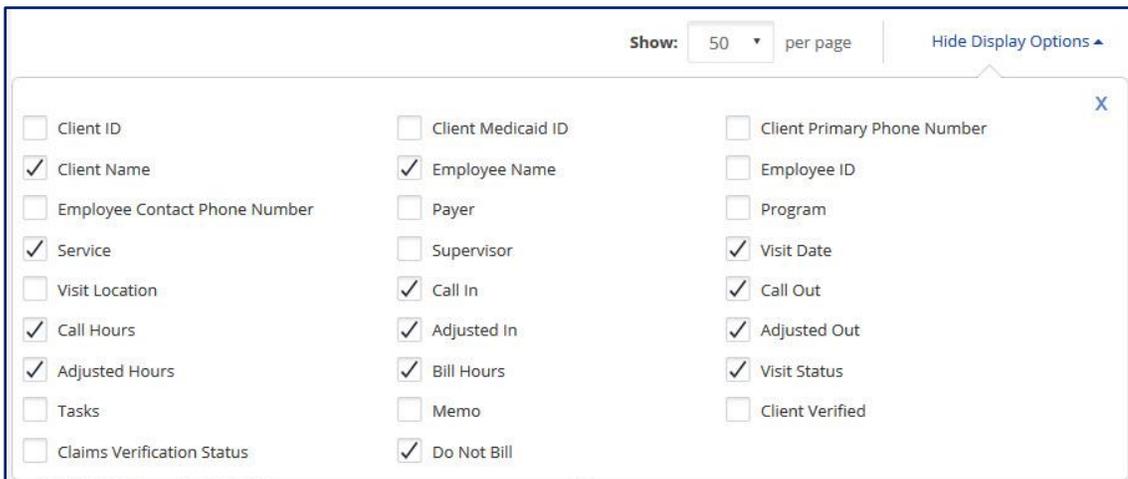

When the filters are applied and a search is performed, the results are displayed in the visit grid at the bottom portion of the screen.

The screenshot shows a table with columns: Client Name, Employee Name, Service, Visit Date, Call In, Call Out, Call Hours, Adjusted In, Adjusted Out, Adjusted Hours, Bill Hours, Visit Status, Do Not Bill, and Actions. Annotations point to: 1. Pagination arrows; 2. 'Show: 50 per page' dropdown; 3. 'Show Display Options' link.

The top of the visit grid displays the following options:

1. Pagination arrows are used to move forward/backward a page, jump to a specific page or first/last page.
2. Lines per page setting to adjust the number of lines per page (default = 50).
3. A **Show Display Options** link allows the user to select additional data elements to display in the visit grid.

The dialog box shows a list of data elements with checkboxes. The 'Show: 50 per page' dropdown is visible at the top right. The dialog title is 'Hide Display Options'.

<input type="checkbox"/> Client ID	<input type="checkbox"/> Client Medicaid ID	<input type="checkbox"/> Client Primary Phone Number
<input checked="" type="checkbox"/> Client Name	<input checked="" type="checkbox"/> Employee Name	<input type="checkbox"/> Employee ID
<input type="checkbox"/> Employee Contact Phone Number	<input type="checkbox"/> Payer	<input type="checkbox"/> Program
<input checked="" type="checkbox"/> Service	<input type="checkbox"/> Supervisor	<input checked="" type="checkbox"/> Visit Date
<input type="checkbox"/> Visit Location	<input checked="" type="checkbox"/> Call In	<input checked="" type="checkbox"/> Call Out
<input checked="" type="checkbox"/> Call Hours	<input checked="" type="checkbox"/> Adjusted In	<input checked="" type="checkbox"/> Adjusted Out
<input checked="" type="checkbox"/> Adjusted Hours	<input checked="" type="checkbox"/> Bill Hours	<input checked="" type="checkbox"/> Visit Status
<input type="checkbox"/> Tasks	<input type="checkbox"/> Memo	<input type="checkbox"/> Client Verified
<input type="checkbox"/> Claims Verification Status	<input checked="" type="checkbox"/> Do Not Bill	

Any additional data element selected from the **Display Options** link is only available during the current session. Upon logging out and logging back in to Sandata EVV, the visit grid returns to the default display.

The data within the visit grid can be sorted by clicking on any of the following column headers:

- **Client Name**
- **Employee Name**
- **Service**
- **Visit Date**
- **Call-In**
- **Call-Out**
- **Call-Hours**
- **Visit Status**

Hovering the mouse over an exception indicator displays a tool tip for that exception detail.

Reviewing a Visit

To view the details of a visit, either click on the visit line or click **Edit**  to the right of the line to display the *Visit Details* screen.

When clicking on a data element on the visit line, the *Visit Details* screen opens directly to that section of the visit.

The top of *Visit Details* screen contains the **CLIENT NAME, CLIENT ID, MEDICAID ID, EMPLOYEE NAME** and **EMPLOYEE ID** information. There are also tabs on the left which display various details of the visit.

Visit Details X				
CLIENT NAME	CLIENT ID #	MEDICAID ID #	EMPLOYEE NAME	EMPLOYEE ID #
Carter, John	59647013	999888555101	Young, Charles

- **EXCEPTIONS:** This screen lists all the visit exceptions for the visit, along with the available option to resolve each exception.

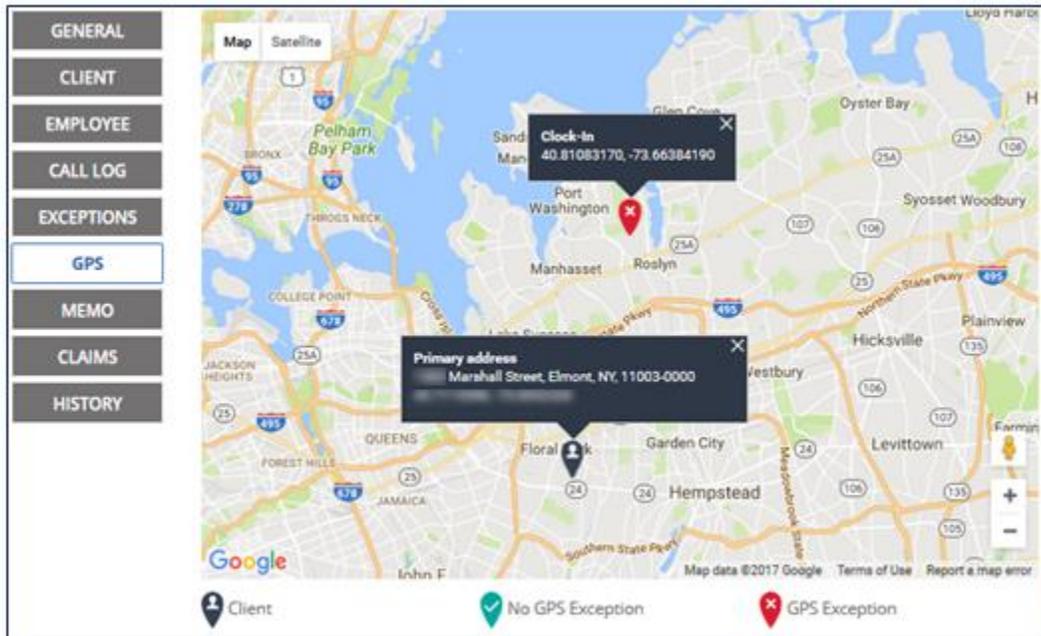

The screenshot shows a sidebar menu on the left with options: GENERAL, CLIENT, EMPLOYEE, CALL LOG, MERGE CALLS, EXCEPTIONS (highlighted), GPS, MEMO, CLAIMS, and HISTORY. The main content area lists exceptions:

- Visits Without In-Calls** (Red dot): This exception needs to be fixed.
- Missing Service** (Red dot): This exception needs to be fixed.
- Visit Verification Exception** (Orange dot): Includes a checkbox for "ACKNOWLEDGE THIS EXCEPTION".
- Client Signature Exception** (Orange dot): Includes a checkbox for "ACKNOWLEDGE THIS EXCEPTION".

Below each exception is a form with fields for "REASON CODE *" (with a "Select Reason" dropdown), "RESOLUTION CODE" (with a "Select Resoluti" dropdown), and "REASON NOTE" (with an "Enter Reason Note" text box). A "SAVE" button is located to the right of each form.

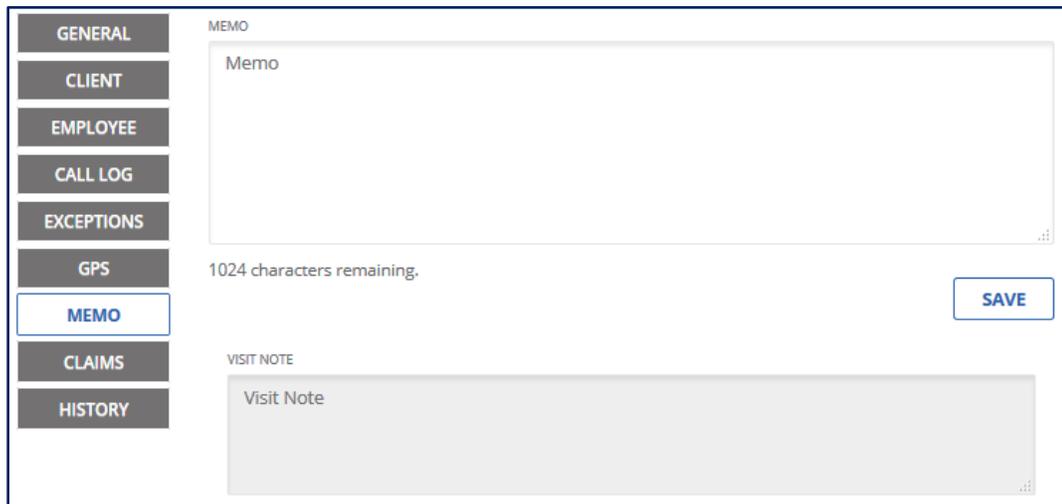

- **GPS:** This screen shows the location of the SMC call-in/call-out times relative to the client's home.

- **MEMO:** This screen allows the user to make a note and display notes previously entered related to the visit. It also includes a *Visit Note* screen which displays notes entered into SMC during call-out.

This information should not be used to fulfill documentation requirement.

- **CLAIMS:** This screen shows the batch, transaction and date/time each time the visit was returned to the adjudication system (if applicable based on program requirements).

BATCH ID	TRANSACTION ID	DATE RETURNED FOR CLAIMS PROCESSING	INTERNAL CONTROL NUMBER	DETAIL LINE NUMBER	MODIFIER	BILLED UNITS

Identifying Exceptions

Visit exceptions are indicated by a colored circle under one or more columns where the exception exists. The columns are: **Client Name, Employee Name, Service, Call In** or **Call Out**.

- An exception indicates the visit is missing information or the information captured does not meet program requirements.
- A visit may have one or more exception(s).
- Hovering over an indicator displays a pop-up showing the description of the exception(s).

Client Name	Employee Name	Service	Visit Date	Call In	Call Out	Call Hours	Adjusted In	Adjusted Out	Adjusted Hours
Carter, John	Young, Charles	●	08/14/2017	●	2:47 PM				
Carter, John	Young, Charles	●	08/14/2017	●	2:46 PM				
Carter, John	000-44-6258	●	08/14/2017		●				

Exceptions:
Visits without in-calls

- Visit exceptions can be reviewed by clicking the Exceptions link when viewing the *Visit Details* screen.
- Certain exceptions (Visit Verification, Service Verification, Signature Verification, Unmatched Client Phone/ID and GPS Distance) can also be cleared from this screen.

Provider Agency Training Guide

7/15/2020

Correcting Exceptions

The condition causing the exceptions must be fixed or where it is not possible, acknowledged before a visit is matched to a claim. Every visit adjustment or correction requires the user to select a reason code, resolution code and in some cases, additional notes. The list of reason codes is configured based on the EVV Program requirements.

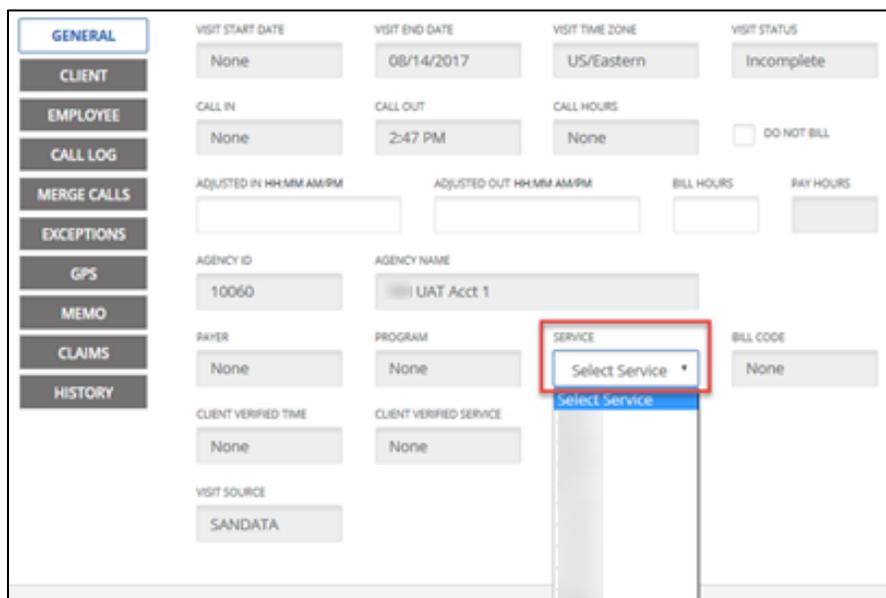

Missing Service Exception

Identifies when the service provided for the visits is not specified during the SMC call-in or Telephony call-out. This type of exception must be fixed for the visit to be in a verified state and eligible to be matched to a submitted claim.

1. Click the exception indicator under the **Service** column.

Client Name	Employee Name	Service	Visit Date	Call In	Call Out	Call Hours	Adjusted In	Adjusted Out
Carter, John	Young, Charles	●	08/14/2017	●	2:47 PM			

2. Select the correct service from the **SERVICE** field drop-down list.

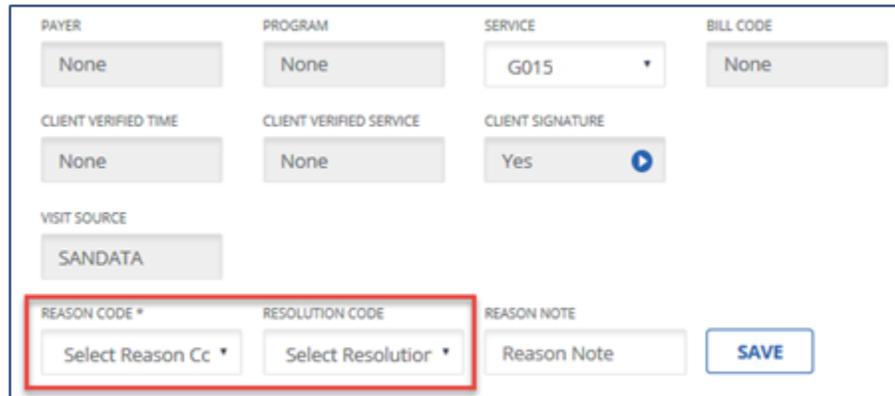

The screenshot shows a form with a left-hand navigation menu containing options like GENERAL, CLIENT, EMPLOYEE, CALL LOG, MERGE CALLS, EXCEPTIONS, GPS, MEMO, CLAIMS, and HISTORY. The main form area contains fields for VISIT START DATE, VISIT END DATE, VISIT TIME ZONE, VISIT STATUS, CALL IN, CALL OUT, CALL HOURS, ADJUSTED IN, ADJUSTED OUT, BILL HOURS, PAY HOURS, AGENCY ID, AGENCY NAME, PAYER, PROGRAM, SERVICE, BILL CODE, CLIENT VERIFIED TIME, CLIENT VERIFIED SERVICE, and VISIT SOURCE. The SERVICE field is highlighted with a red box, and its dropdown menu is open, showing 'Select Service' as the selected option.

3. Select a **REASON CODE** that best explains why the service was not selected at the time of visit.

Some reason codes require a **REASON NOTE** before clicking **SAVE**.

4. Select a **RESOLUTION CODE** from the list.

5. Click **SAVE**.

Client Signature Exception

Identifies when the client signature or voice recording is not captured during the SMC call-out or the client voice recording is not captured during the Telephony call-out. This exception type must be acknowledged for the visit to be in a verified state and eligible to be matched to a submitted claim.

1. Click the exception indicator under the **Client Name** column.

Client Name	Employee Name	Service	Visit Date	Call In	Call Out	Call Hours	Adjusted In	Adjusted Out
Carter, John	Young, Charles	●	08/14/2017	●	2:47 PM			

2. Check the **ACKNOWLEDGE THIS EXCEPTION** checkbox on the Client Signature Exception line.

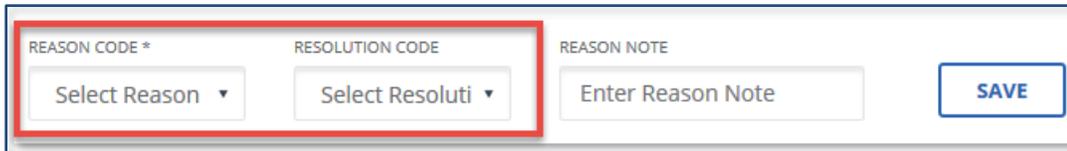

3. Select a **REASON CODE** from the list.

Some reason codes require a **REASON NOTE** before clicking **SAVE**.

4. Select a **RESOLUTION CODE** from the list.

5. Click **SAVE**.

Unknown Client Exception

Identifies when a visit occurs where the client is not known. This can occur when the Medicaid ID entered does not match to an existing client or the phone number entered does not match to a known client. This exception type must be fixed for the visit to be in a verified state and eligible to be matched to a submitted claim.

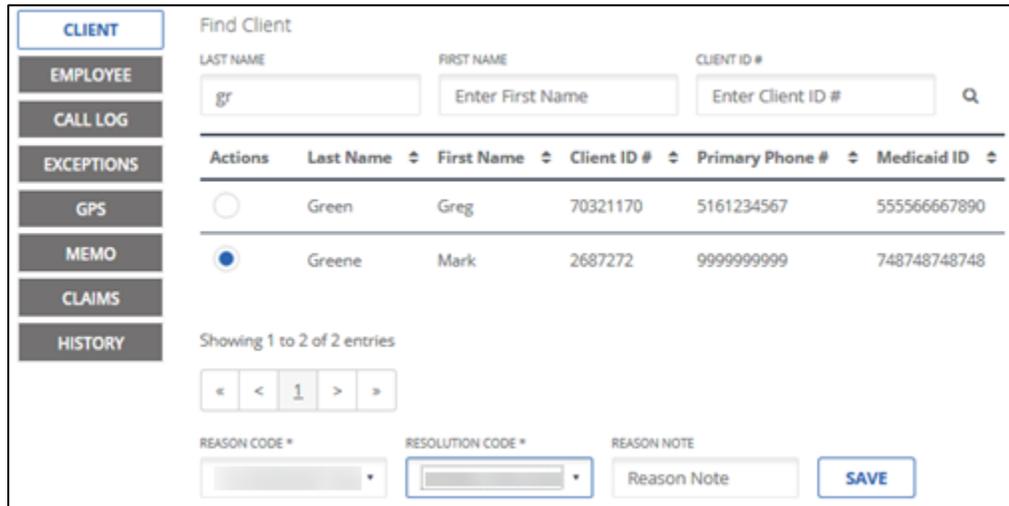

1. Click the exception indicator under the unknown ID under the **Client Name** column.

Client Name	Employee Name	Service	Visit Date	Call In	Call Out	Call Hours	Adjusted In
(347)633-5012 	Moss, Donna		08/15/2017	11:27 AM	11:33 AM	00:06	

2. Use the search fields to search for the client.

3. Select the client from the search results.

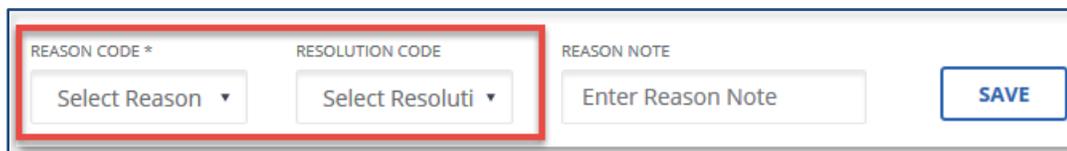

4. Select a **REASON CODE** from the list.

Some reason codes require a **REASON NOTE** before clicking **SAVE**.

5. Select a **RESOLUTION CODE** from the list.

6. Click **SAVE**.

Unknown Employee Exception

Identifies when the Santrax ID entered during a Telephony call-in/call-out does not match to any known employee. The ID entered is displayed instead of the employee name. This exception type must be fixed for the visit to be in a verified state and eligible to be matched to a submitted claim.

1. Click the exception indicator under the unknown ID in under the **Employee Name** column.

Client Name	Employee Name	Service	Visit Date	Call In	Call Out	Call Hours	Adjusted In
Carter, John	000-44-6258		08/14/2017	3:38 PM			

2. Use the search fields to search for the employee.
3. Select an employee from the search results.

Unmatched Client Phone/ID

Identifies when a client ID is entered during a telephone call, but the phone number the call was made from is not a number listed for the client. This exception type must be acknowledged for the visit to be in a verified state and eligible to be matched to a submitted claim.

1. Check the **ACKNOWLEDGE THIS EXCEPTION** checkbox on the Unmatched Client ID / Phone exception line.

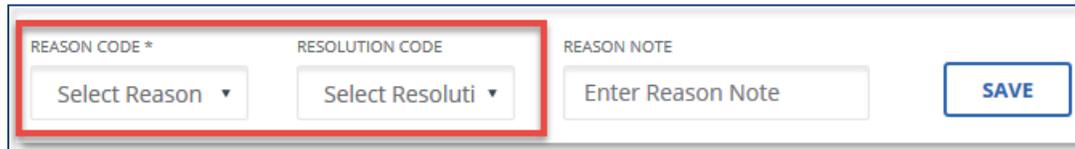

2. Select a **REASON CODE** from the list.

Some reason codes require a **REASON NOTE** before clicking **SAVE**.

3. Select a **RESOLUTION CODE** from the list.

4. Click **SAVE**. The *Call Log* screen shows the originating phone number for the call.

GENERAL	CALL IN		CLIENT ID# 0059647013

	08/16/2017	6:48 AM	EW (telephony)	N/A
EMPLOYEE	USER	ORIGINATING PHONE #	CALL SOURCE	
CALL LOG	000106825	(718) [REDACTED]	SANDATA	

Visit Verification Exception

Identifies when the start and end time has not been verified by the client at the end of the visit, either by confirming during the SMC call-out or the client verifying time during the Telephony call-out. This exception type must be acknowledged for the visit to be in a verified state and eligible to be matched to a submitted claim.

1. Click the exception indicator under the **Client Name** column.

Client Name	Employee Name	Service	Visit Date	Call In	Call Out	Call Hours	Adjusted In	Adjusted Out
Carter, John	Young, Charles	●	08/14/2017	●	2:47 PM

5. Click **SAVE**.

Visit Without In-Call/Visit Without Out-Call

Identifies a visit which does not have a call-in or call-out time. This exception type must be fixed for the visit to be in a verified state and eligible to be matched to a submitted claim.

Client Name	Employee Name	Service	Visit Date	Call In
Carter, John	Young, Charles	G015	08/14/2017	<input type="checkbox"/>

Client Name	Employee Name	Service	Visit Date	Call In	Call Out
			08/11/2017	8:58 AM	<input type="checkbox"/>

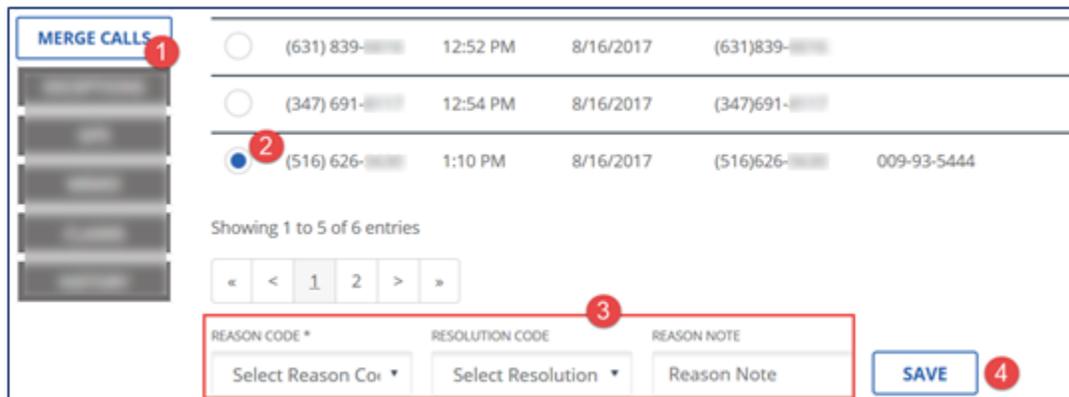

When a user clicks the exception indicator under the call time column, the *Visit Details* screen automatically opens to the *Call Log* screen.

It is recommended to go to the *Merge Calls* screen first to see if there are any available calls that can be merged. If there are none, the user can go back to the *Call Log* to manually add a call time.

Merge Calls

The *Merge Calls* screen only displays when there are calls the can be merged to the visit.

MERGE CALLS

<input type="radio"/>	(631) 839-XXXX	12:52 PM	8/16/2017	(631)839-XXXX
<input type="radio"/>	(347) 691-XXXX	12:54 PM	8/16/2017	(347)691-XXXX

REASON CODE *	RESOLUTION CODE	REASON NOTE
Select Reason Code	Select Resolution	Reason Note

SAVE

1. Click the **MERGE CALLS** link to see if there are any available calls that can be merged to the visit.
2. Click the radio button next to the line to select the call, if there is a call to merge.
3. Select the **REASON CODE**, **RESOLUTION CODE** and **REASON NOTE**, if needed.
4. Click **SAVE**.

Add Manual Call

When a manual call is added, call hours are calculated for the visit. There may be additional exceptions associated with the visit that need to be fixed or acknowledged for the visit to be matched to a claim.

CALL IN			CLIENT ID# 0013199752	
CALL DATE	CALL TIME	CALL TYPE	SERVICE	
08/17/2017	1:00 AM	Manual Call	N/A

ADD

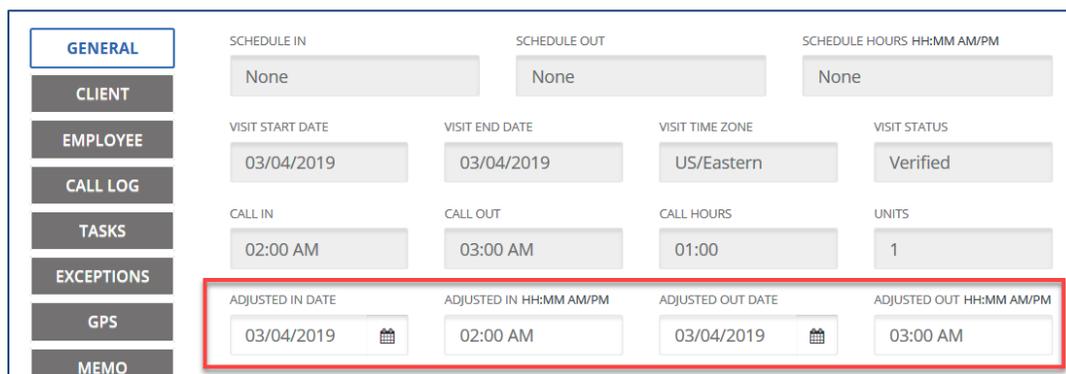

1. Click **CALL LOG**.
2. Enter the appropriate information into the fields.
3. Select the **REASON CODE**, **RESOLUTION CODE**, **SERVICE** and **REASON NOTE**, if needed.
4. Click **ADD**.

Users have the ability go back 365 days to add a manual call to a visit.

Entering Adjusted Times

If the call times for a visit do not reflect the actual start and/or end times of an employee’s visit (i.e. the employee had to do something for the client immediately upon arriving and could not call-in or the client was using the telephone), a user can enter an **ADJUSTED IN** and/or **ADJUSTED OUT** on the General screen to update the visit duration. Sandata EVV will add the adjusted time entered and actual call time to recalculate the visit duration.

GENERAL	SCHEDULE IN	SCHEDULE OUT	SCHEDULE HOURS HH:MM AM/PM	
CLIENT	None	None	None	
EMPLOYEE	VISIT START DATE	VISIT END DATE	VISIT TIME ZONE	VISIT STATUS
CALL LOG	03/04/2019	03/04/2019	US/Eastern	Verified
TASKS	CALL IN	CALL OUT	CALL HOURS	UNITS
EXCEPTIONS	02:00 AM	03:00 AM	01:00	1
GPS	ADJUSTED IN DATE	ADJUSTED IN HH:MM AM/PM	ADJUSTED OUT DATE	ADJUSTED OUT HH:MM AM/PM
MEMO	03/04/2019 	02:00 AM	03/04/2019 	03:00 AM

From the *Visit Details* screen:

1. Click **GENERAL**.
2. Enter the appropriate information into the Adjusted Date(s) and/or Time(s) fields.
3. Select the **REASON CODE, RESOLUTION CODE, SERVICE** and **REASON NOTE**, if needed.
4. Click **ADD**.

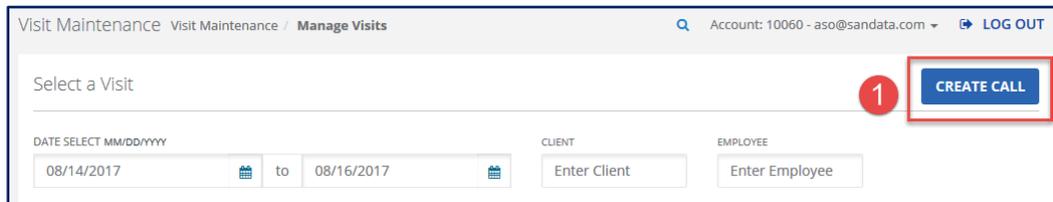

Users have the ability go back 365 days to add adjusted times.

Create Call

The Create Call feature allows the user to create a call in Sandata EVV for instances when a visit occurred but the employee did not call-in or call-out.

1. Click **CREATE CALL** on the *Visit Maintenance* screen.

8 Group Visits

Module Time

45 minutes

This lesson shows how to use the Group Visit functionality in SMC, TVV and EVV to capture visits when one or more employees are providing to one or more clients at the same time.

Module Objectives*

After completing this lesson, you will be able to:

- start, join and end a group visit using SMC;
- start, join and end a group visit using TVV;
- search for group visits in EVV Visit Maintenance;
- create a group visit call in EVV Visit Maintenance; and
- edit/enter a group visit code for a visit.

***Note** – *Functionality may not apply based on program configuration and requirements.*

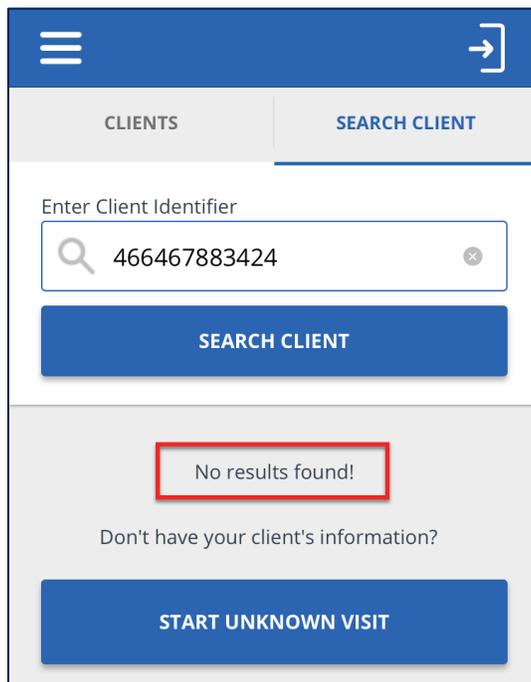

The Group Visit option allows one employee to call-in and call-out for one or more client visits at the same time, or multiple employees to call-in and call-out for one or more client visits at the same time. Group visits can be captured via SMC, TVV and EVV Visit Maintenance.

Sandata Mobile Connect (SMC)

Starting a new Group Visit

When the employee arrives to provide care to the client(s), he or she will:

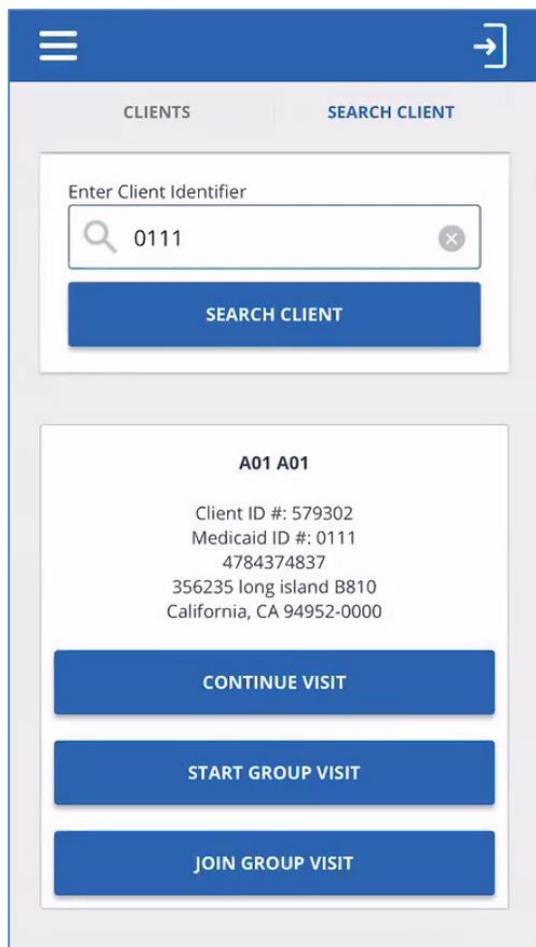

1. Locate the EVV Device or the employee’s personal device.
2. Log in to SMC.
3. Tap in the **ENTER CLIENT IDENTIFIER** search field and enter the 12-digit Medicaid ID or the system generated client ID of the client.
4. Tap the **SEARCH CLIENT** button. (If the ID entered does not match to any client, a “No results found” message displays).

When the client details display, there are options to **CONTINUE VISIT**, **START GROUP VISIT** or **JOIN GROUP VISIT**.

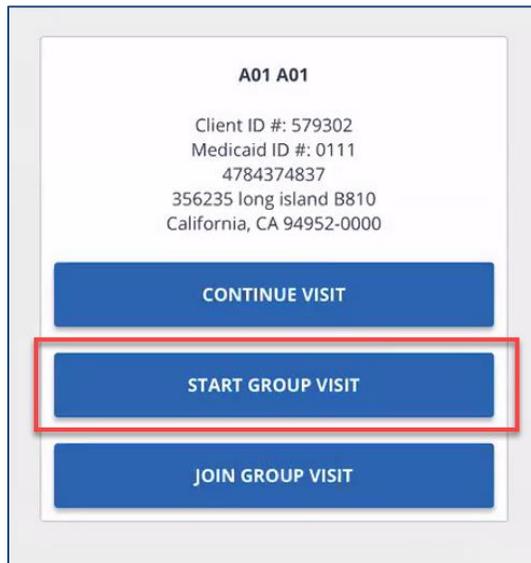

- **CONTINUE VISIT**: this option allows the employee to start a single client visit.
- **START GROUP VISIT**: this option allows an employee to start a new group visit and add clients to the group visit.
- **JOIN GROUP VISIT***: this option allows an employee to join an existing group visit started by another employee who is also providing care at the same location. The employee can add their clients to that group.

***Note:** *Join Group Visit option is not applicable to WI program.*

The screenshot displays a mobile application interface for client management. At the top, there is a blue header with a menu icon on the left and a search icon on the right. Below the header, the screen is divided into two tabs: "CLIENTS" and "SEARCH CLIENT". The "SEARCH CLIENT" tab is active. A search input field is present with the placeholder text "Enter Client Identifier" and the value "0111". Below the input field is a blue button labeled "SEARCH CLIENT". The search results display a client card for "A01 A01" with the following details: Client ID #: 579302, Medicaid ID #: 0111 4784374837, and address: 356235 long island B810 California, CA 94952-0000. Below the client details are three blue buttons: "CONTINUE VISIT", "START GROUP VISIT", and "JOIN GROUP VISIT".

5. Tap **START GROUP VISIT**.

A01 A01

Select Service ▾

START GROUP VISIT

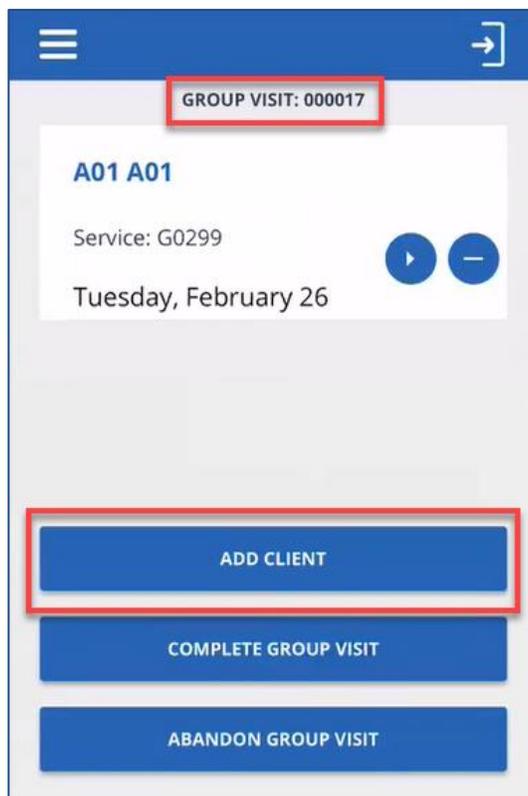

7. A confirmation screen displays asking the employee to confirm the start of the group visit. Tap **YES**.

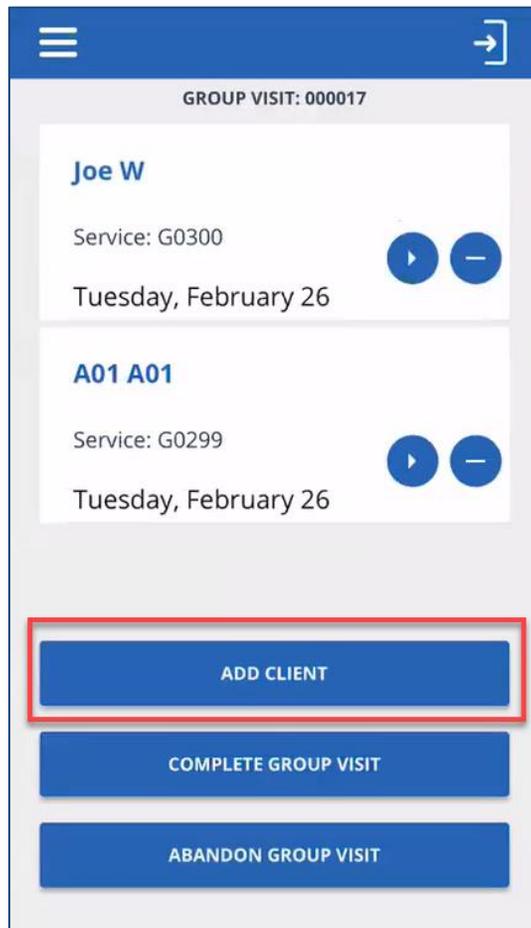

The visit is in progress and a Group Visit code is generated. This 6-digit code is used to identify all clients at a location who are receiving care from one or more employees from the same provider agency.

The employee may add additional clients they are providing care for during the group visit.

The employee may also give the Group Visit code to other employees arriving to provide care to the same clients or different clients at the location. Group visit codes are only valid for use within a provider agency.

8. Tap **ADD CLIENT** to search for additional clients to add to the group. Once added, the clients will appear on the Group Visit screen.

An employee will only see the clients he or she added to the group visit, even if other employees join the group and add clients.

There is no limit to the number of known clients an employee can add to a group visit, or the number of employees who can join a group visit. However, an employee can only add one unknown client to a group visit.

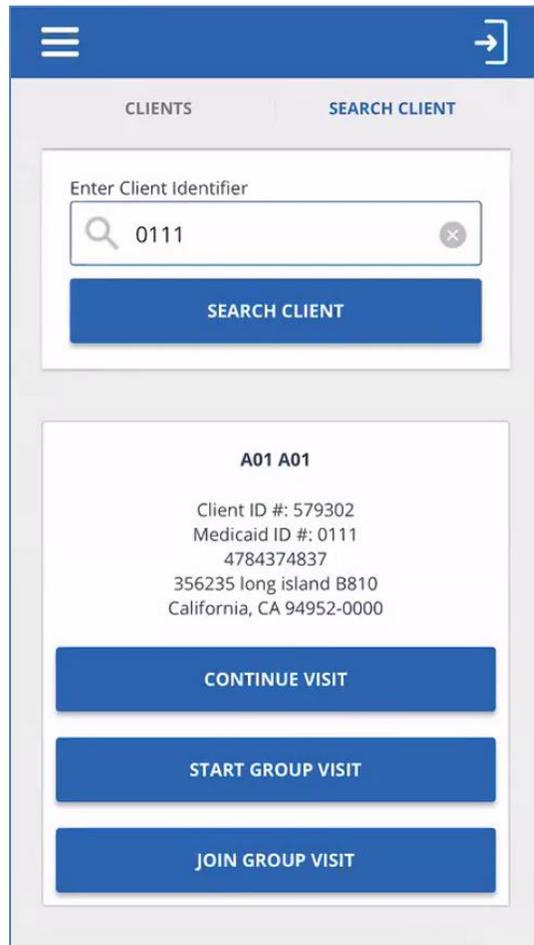

A group visit code is only valid for a maximum of 24 hours. Within the 24 hour period, once the last visit in group ends, the code is closed. The same code cannot be re-generated within 72 hours.

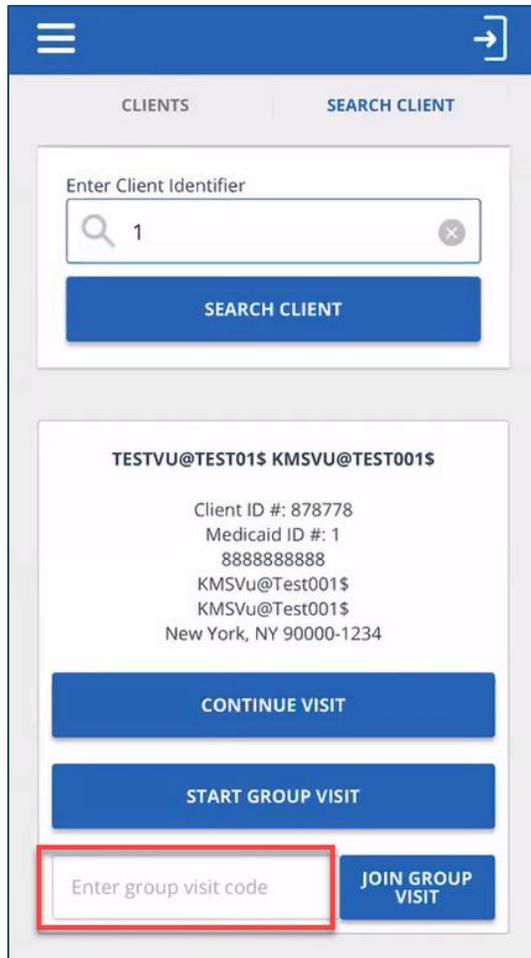

Joining a Group Visit

If an employee needs to join an existing group visit upon arriving at a location, the employee will:

1. Locate the EVV Device or the employee’s personal device.
2. Log in to SMC.
3. Tap in the **ENTER CLIENT IDENTIFIER** search field and enter the 12-digit Medicaid ID of the client.
4. Tap the **SEARCH CLIENT** button. (If the ID entered does not match to any client, a “No results found” message displays).
5. When the client details display, tap **JOIN GROUP VISIT**.

6. Enter the 6-digit group visit code and tap **JOIN GROUP VISIT**.

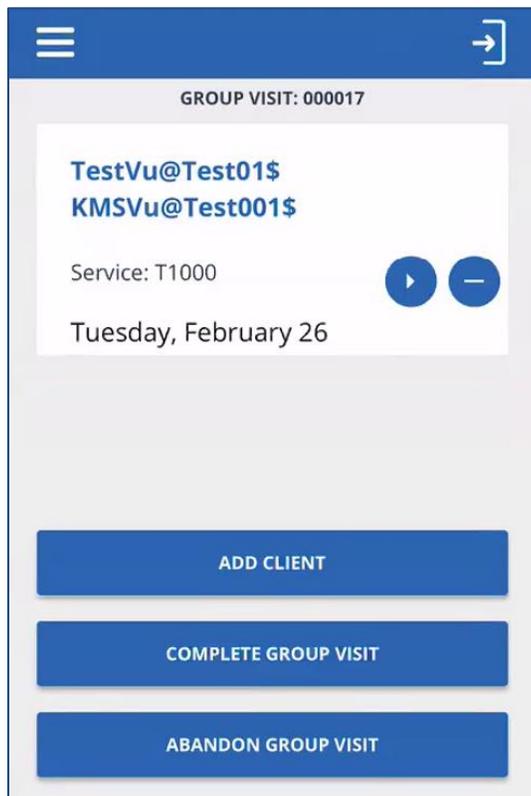

- The Group Visit code must be 6-digits in length.
- The code is only valid for use within the same agency.
- If an invalid code is entered, the following message is displayed.

7. A confirmation screen displays asking the employee to confirm the start of the group visit. Tap **YES**.

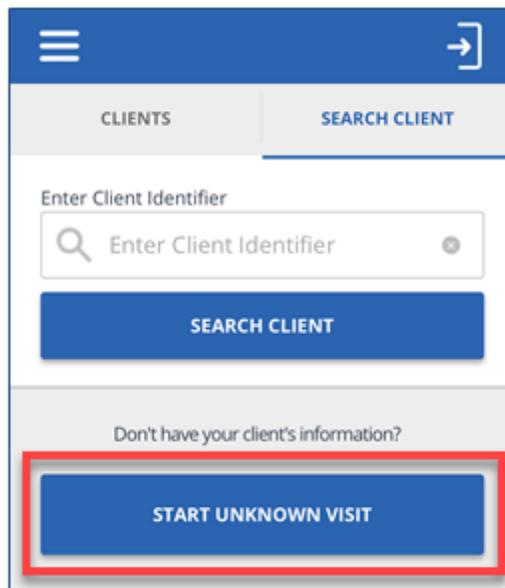

The client is added to the existing in progress Group Visit. The employee may add additional clients or log out of SMC.

Adding an Unknown Client to a Group Visit

If the Medicaid ID or Client ID entered when searching for a client does not return any results, the employee can add an unknown client to the group visit. An employee can only add a maximum of one unknown client to a group visit.

1. From the home screen, Tap **START UNKNOWN VISIT**.

2. Enter the required information and tap **CONTINUE VISIT**.
 - **FIRST NAME** (Required)
 - **LAST NAME** (Required)
 - **MEDICAID ID #** (Optional – if available)

Select Service 

START GROUP VISIT

4. Tap **START GROUP VISIT** again.

5. Tap **YES** to confirm adding the unknown client to the group visit.

Completing a Group Visit

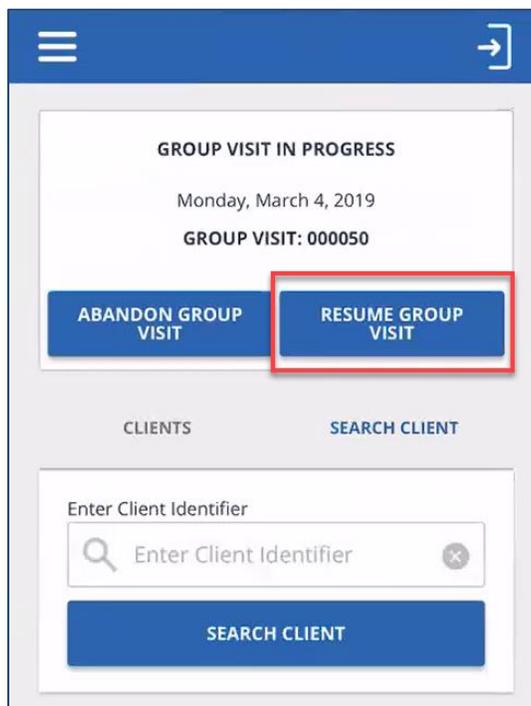

An employee can complete his or her visits within a group individually or complete all visits within a group together.

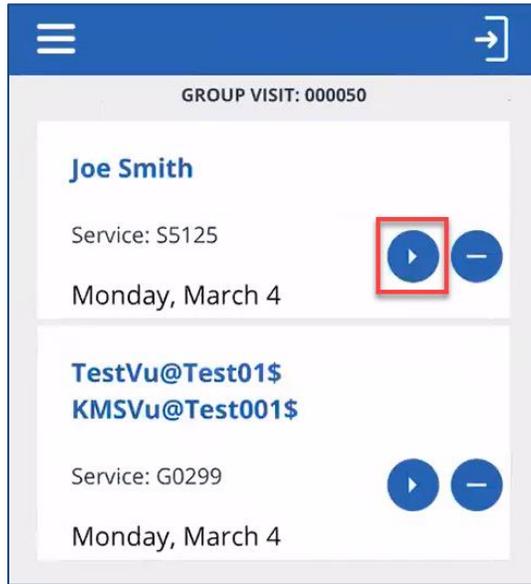

Completing all visits within a group at the same time requires that the visit process is the same for all the clients (e.g. all visits do not require client confirmation during the call-out process). If one or more clients have a different call-out process, the employee must complete the visits individually.

Completing a visit within a Group Visit Individually

1. Log back in to SMC.
2. Tap **RESUME GROUP VISIT**.

3. Tap the 'Play' icon () on a visit to complete.

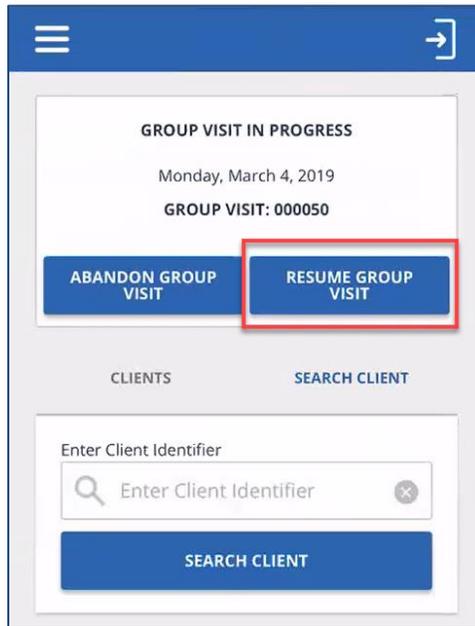

4. Complete the visit following the individual visit process.

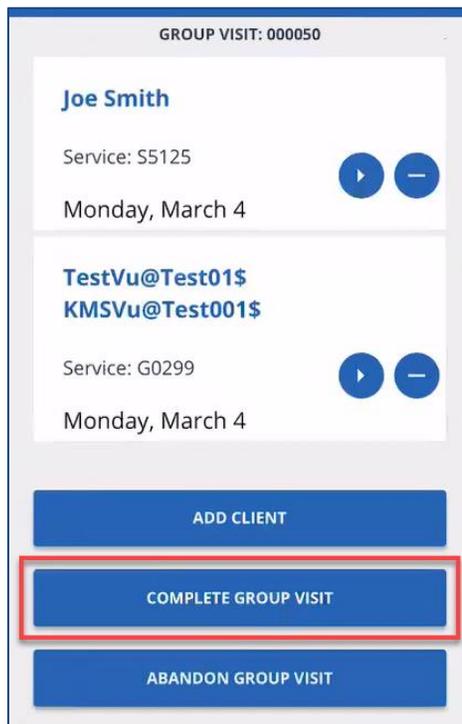

Tapping the 'dash' icon (⊖) allows the employee to abandon the individual visit. An abandoned visit appears in Sandata EVV as an incomplete visit and must be verified in **Visit Maintenance**.

Completing all visits within a Group Visit Together

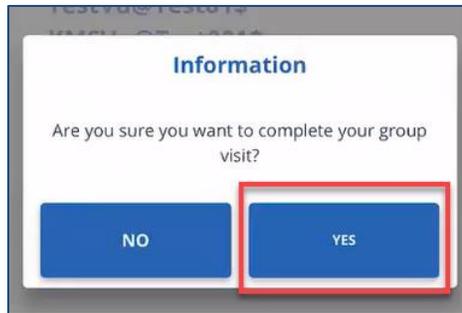

1. Log back in to SMC.
2. Tap **RESUME GROUP VISIT**.

3. Tap **COMPLETE GROUP VISIT**.

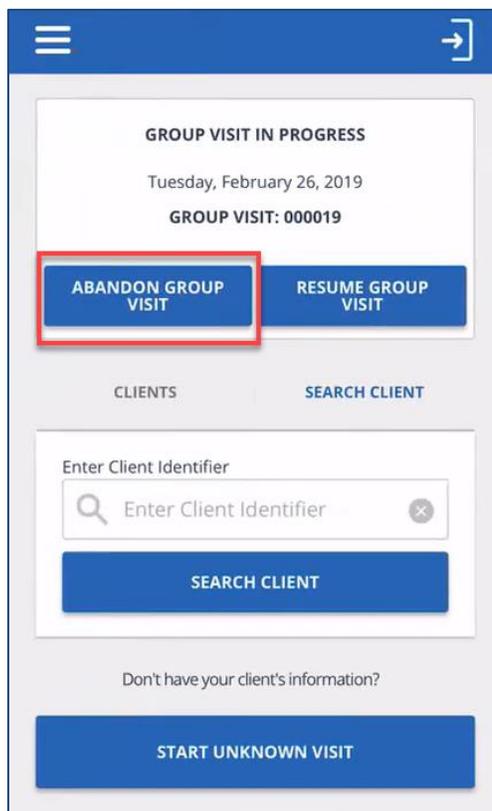

4. Tap **YES** to confirm completion of the group visit.

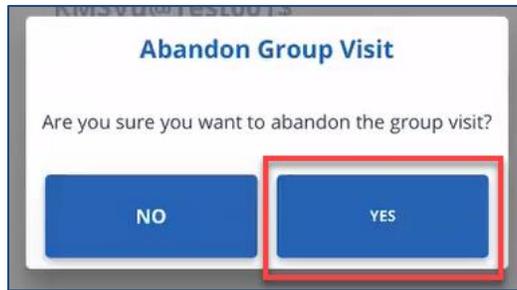

When completing a group visit, the employee is completing his or her client's visits.

Abandoning a Group Visit

1. Log back in to SMC.
2. Tap **ABANDON GROUP VISIT**.

3. Tap **YES** to confirm abandoning the group visit.

When abandoning a group visit, all of the employee's visits within the group appear in Sandata EVV as an incomplete visit and must be verified in **Visit Maintenance**.

 OR
 Press '2' if the client is unable to participate.
If the client is unable to participate, skip to step 20.
20.  Hand the phone to the client and the client will be asked to state their name and today's date.
 Santrax will say: "Please say your first and last name and today's date."
21.  The client should say their first and last name and today's date.
 Santrax will say: "In call received at (TIME). Out call received at (TIME). Total visit length (NUMBER) minutes. Press (1) to confirm, (2) to deny, (3) to replay."
22.  The client should press the appropriate option.
 Santrax will say: "The service performed was (SERVICE). Press (1) to confirm, (2) to deny, (3) to replay."
23.  The client should press the appropriate option.
 Santrax will say: "Please enter second client ID or hang up if done."
24. Repeat steps 16 thru 19 for each additional client beyond the first.
 Or
 Hang up if done.

Group Visit Call Process – Multi-Language Line

Call-In	
1	Dial the toll-free number.
	<p><i>Santrax will prompt for to select a language. Each prompt will be heard in its respective language followed by a selection number. (i.e. "For English, press 1; for Spanish, press 2, etc.)</i></p> <p><i>*Each prompt will be heard in its respective language.</i></p>
2	Press the number that corresponds to the desired language.
	Santrax will say: "Welcome, please enter your Santrax ID."
3	Press the numbers of the Santrax ID (this is system generated and can be found in the employee record in Sandata EVV).

	<p>Santrax will say: <i>"You entered [repeats the Santrax ID entered], press 1 for Yes, press 2 for No."</i></p> <p>If the Santrax ID entered does not match to an employee record, Santrax will say: <i>"You have entered an invalid Santrax ID, please try again."</i></p>
4	Press 1 for Yes.
	Santrax will say: <i>"Is this a Group Visit, press 1 for Yes or 2 for No."</i>
5	Press 1 for Yes.
	Santrax will say: <i>"Press 1 to start a new group visit, 2 to continue to your group visit, 3 to join a group visit, 4 to exit group visit menu."</i>
6	Press 1 to start a new group visit.
	Santrax will say: <i>"You will start a new group visit with group visit code [XXXXXX]. Please press 1 to add a client to the group visit, 2 to complete a visit for a client, 3 to hear the group visit code, 4 to abandon this whole group visit or hang up if you would like to end this call."</i>
7	Press 1 to add a client.
	Santrax will say: <i>"Press 1 to call-in or 2 to call-out."</i>
8	Press 1 to call-in.
	Santrax will say: <i>"Received at [Time]. Please enter first client ID or hang up if done."</i>
9	Enter the client ID for the first client being added to the group visit.
	<p>Santrax will say: <i>"Enter second client ID or hang up if done." *</i></p> <p><i>*Repeat step 9 for each client being added to the group visit.</i></p>
10	Hang up.

Call-Out	
1	Dial the toll-free number.
	<p><i>Santrax will prompt for to select a language. Each prompt will be heard in its respective language followed by a selection number. (i.e. "For English, press 1; for Spanish, press 2, etc.)</i></p> <p><i>*Each prompt will be heard in its respective language.</i></p>
2	Press the number that corresponds to the desired language.
	Santrax will say: <i>"Welcome, please enter your Santrax ID."</i>
3	Press the numbers of the Santrax ID (this is system generated and can be found in the employee record in Sandata EVV).
	<p>Santrax will say: <i>"You entered [repeats the Santrax ID entered], press 1 for Yes, press 2 for No."</i></p> <p>If the Santrax ID entered does not match to an employee record, Santrax will say: <i>"You have entered an invalid Santrax ID, please try again."</i></p>
4	Press 1 for Yes.
	Santrax will say: <i>"Is this a Group Visit, press 1 for Yes or 2 for No."</i>
5	Press 1 for Yes.
	Santrax will say: <i>"Press 1 to start a new group visit, 2 to continue to your group visit, 3 to join a group visit, 4 to exit group menu."</i>
6	Press 2 to continue the group visit.
	<p>Santrax will say: <i>"Please enter the group visit code." *</i></p> <p><i>*If the code entered is not valid, Santrax will say: "You have entered an invalid visit code. Please try again."</i></p>
7	Enter the 6-digit group visit code.
	Santrax will say: <i>"You will continue the group visit with visit code [XXXXXX]. Please press 1 to add a client to the group visit, 2 to complete visit for a client, 3 to hear the group visit code, 4 to abandon this whole group visit or hang up if you would like to end this call."</i>
8	Press 2 to complete the visit.
	Santrax will say: <i>"Please select 1 to call-in or 2 to call out."</i>
9	Press 2 to call-out.
	Santrax will say: <i>"Received at [Time]. Please enter first client ID or hang up if done."</i>
10	Enter the client ID number.
	Santrax will say: <i>"Please enter the Service ID."</i>

11	Press the three-digit ID of the care performed (Service IDs are listed on the back of the Call Reference Guide).
	<i>Santrax will say: "You entered [Service]. Please press 1 to accept, 2 to retry."</i>
12	Press the 1 to accept.
	<p><i>After the service, Santrax will say: "To record the client's voice please press 1 and hand the phone to the client or press 2 if the client is unable to participate.</i></p> <p>Press 1 to record client's voice (hand phone to client):</p> <p><i>Santrax will say: "Please say your name and today's date."</i></p> <p>The client will say their name and the date.</p> <p><i>Santrax will say: "In call received at [Time]. Out call received at [Time]. Total visit length [number] minutes. Press one to confirm, two to deny."</i></p> <p>Client will press appropriate choice.</p> <p><i>Santrax will say: "The service performed was [service]. Press one to confirm, two to deny."</i></p> <p>Client will press appropriate choice.</p> <p><i>Santrax will say: "Enter second client ID or hang up if done."</i></p> <p>Enter the next client ID to complete from the group visit.</p> <p>(repeat steps 10 – 12 for each additional client in the group)</p> <p>Hang up when the last client has been entered.</p>

Visit Maintenance - Generating/Editing Group Visit Codes

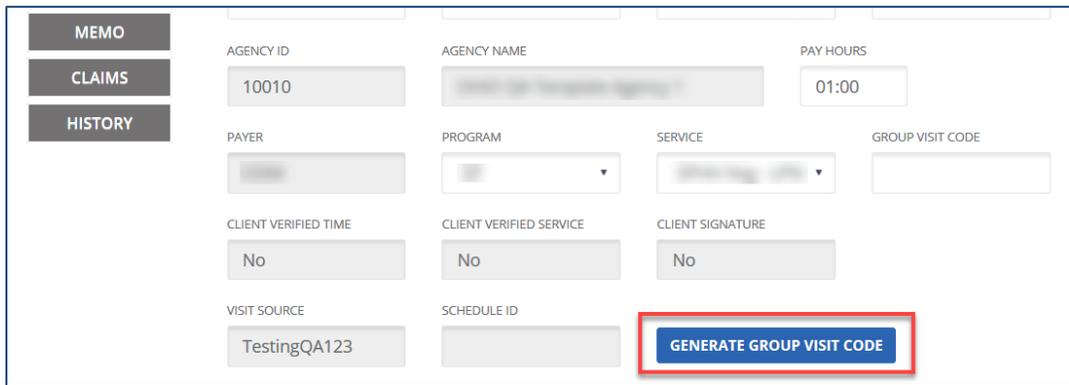

A group visit code is only valid for a maximum of 24 hours. Within the 24 hour period, once the last visit in group ends, the code is closed. The same code cannot be re-generated within 72 hours.

Adding a Code

If a visit that took place should have been captured as a group visit, a user can create a group visit code after the fact in Visit Maintenance. The group visit code can be generated from the *General* screen of the Visit Details by clicking the **GENERATE GROUP VISIT** button. This creates a 6-digit code and adds it to the **GROUP VISIT CODE** field.

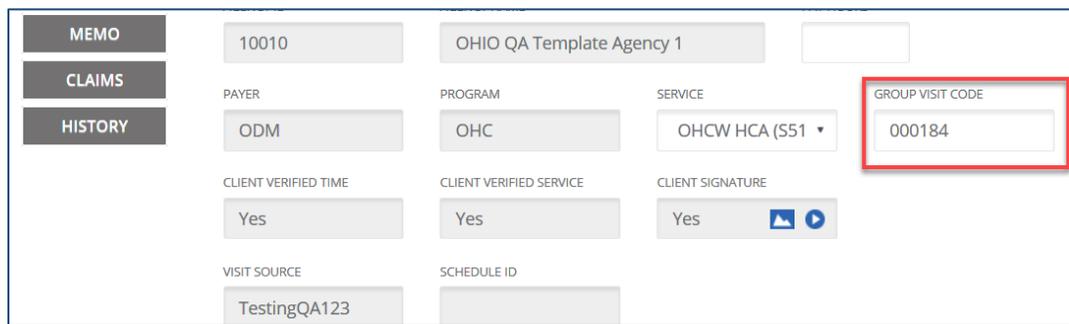

To apply a generated group visit code to other visits, use the search filters to find the visits. Once the visit is found, click on the visit line to view the *General* screen and type the code into the **GROUP VISIT CODE** field of the visit and save the record.

The screenshot shows the 'General' screen of the Visit Details form. On the left, there are tabs for MEMO, CLAIMS, and HISTORY. The main form contains several fields: AGENCY ID (10010), AGENCY NAME (OHIO QA Template Agency 1), PAY HOURS (01:00), PAYER (ODM), PROGRAM (OHC), SERVICE (OHCW HCA (S51)), and GROUP VISIT CODE (empty). Below these are fields for CLIENT VERIFIED TIME, CLIENT VERIFIED SERVICE, and CLIENT SIGNATURE, all set to 'No'. At the bottom, there are fields for VISIT SOURCE (TestingQA123) and SCHEDULE ID (empty). A blue button labeled 'GENERATE GROUP VISIT CODE' is highlighted with a red rectangular box.

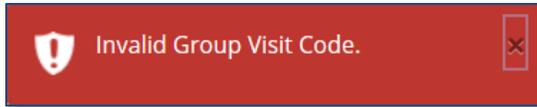

Editing a Code

If a visit is linked to an incorrect group visit or was supposed to be part of an existing group visit, a user can edit the existing code in the **GROUP VISIT CODE** field on the *General* screen of the Visit Details.

The screenshot shows the 'General' screen of the Visit Details form, similar to the previous one. The 'GROUP VISIT CODE' field now contains the value '000184' and is highlighted with a red rectangular box. Other fields remain the same: AGENCY ID (10010), AGENCY NAME (OHIO QA Template Agency 1), PAY HOURS (empty), PAYER (ODM), PROGRAM (OHC), SERVICE (OHCW HCA (S51)), CLIENT VERIFIED TIME (Yes), CLIENT VERIFIED SERVICE (Yes), CLIENT SIGNATURE (Yes), VISIT SOURCE (TestingQA123), and SCHEDULE ID (empty).

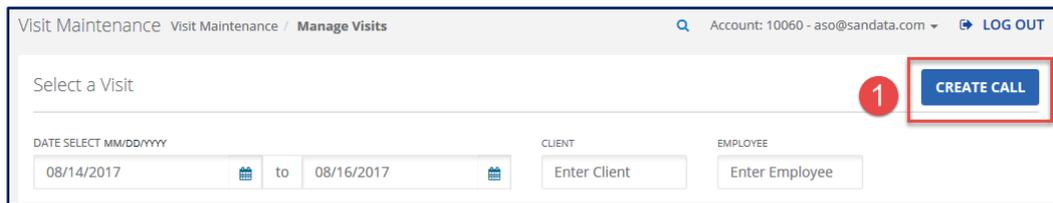

If the code entered is not a valid group visit code, an invalid group visit code message displays.

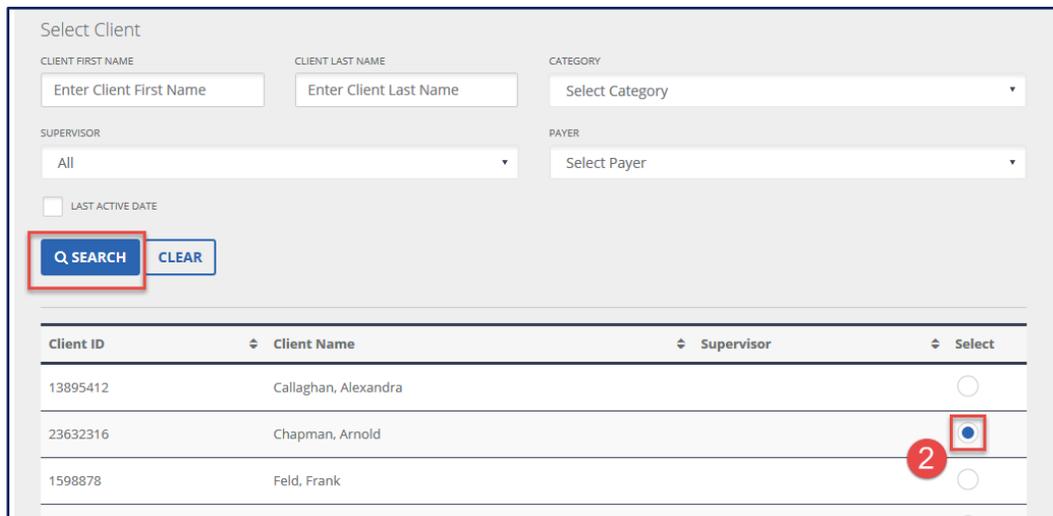

Create Call

The Create Call feature allows the user to create a call in Sandata EVV for instances when a visit occurred but the employee did not call-in or call-out.

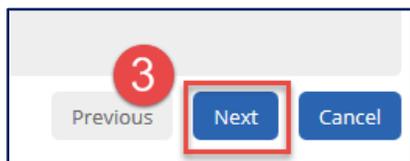

1. Click **CREATE CALL** on the *Visit Maintenance* screen.

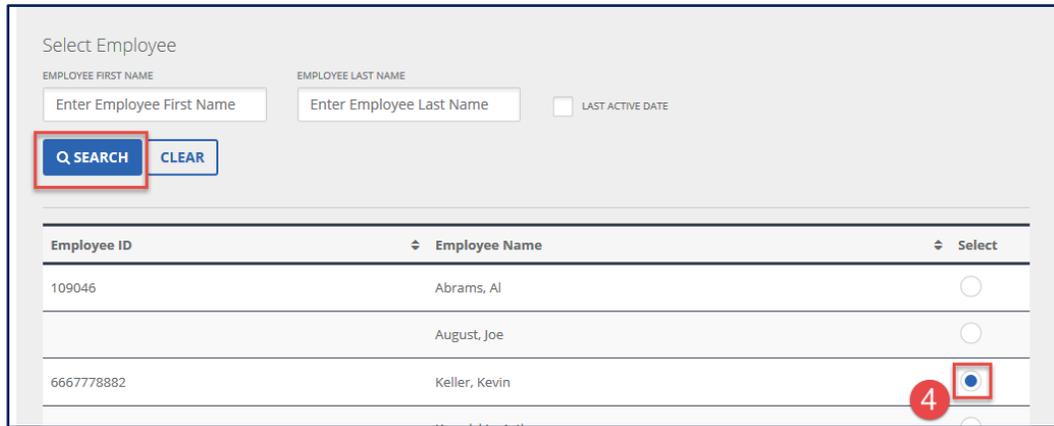

2. Search for and select a client.

3. Click **Next**.

4. Search for and select an employee.

Select Employee

EMPLOYEE FIRST NAME: Enter Employee First Name

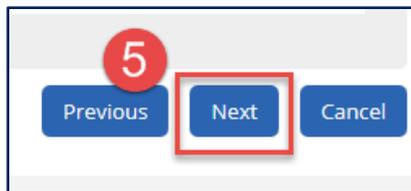

EMPLOYEE LAST NAME: Enter Employee Last Name

LAST ACTIVE DATE

Q SEARCH CLEAR

9 Reports

Module Time

20 minutes

This lesson demonstrates how to generate Sandata EVV reports. At the end of the lesson there are report descriptions.

Module Objectives

After completing this lesson, you will be able to:

- access reports;
- use Daily and Date Range reports; and
- sort and filter reports.

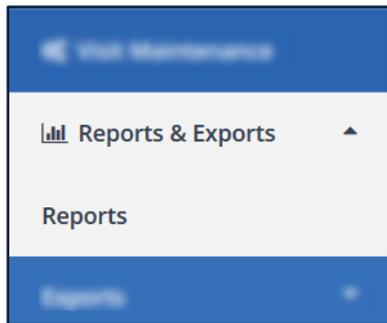

Introduction

There are multiple reports available within Sandata EVV. Different users may have access to different reports. When reports are generated, they can either be saved as a portable document file (.pdf), Excel (.xls) or a comma delimited file (.csv).

There are multiple filters that enable the user to retrieve only the data they want to see.

Access Reports

Click **Reports & Exports>Reports** on the *Navigation* panel.

Reports – Main Window Elements

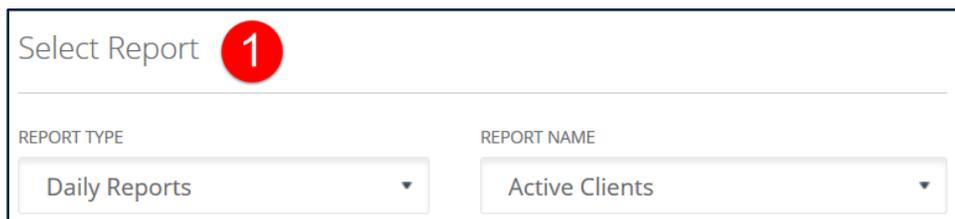

1. **Select Report**

Select the **REPORT TYPE** and **REPORT NAME** of the report being run.

The reports listed in the **REPORT NAME** field change based on the **REPORT TYPE** category selected.

- **Daily:** These reports display results for a selected single date.
- **Date Range:** These reports display results for a selected date range.

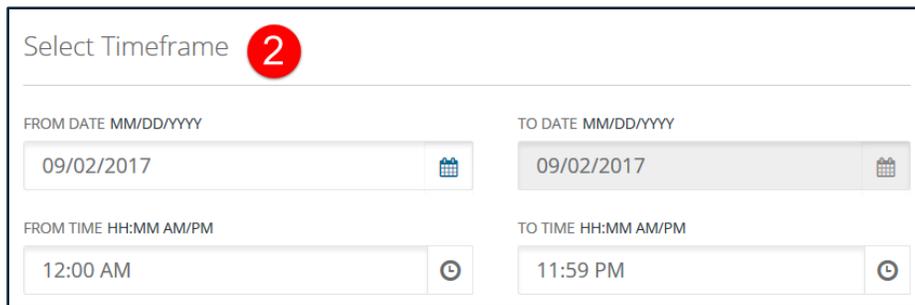

Select Report **1**

REPORT TYPE: Daily Reports

REPORT NAME: Active Clients

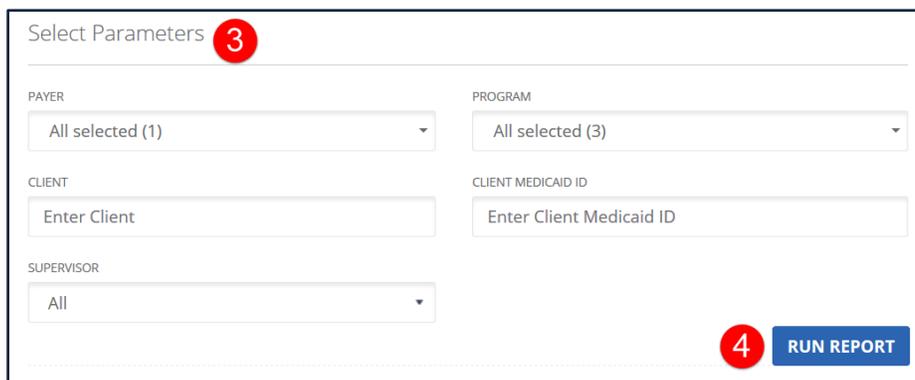

2. Select Timeframe Select the time and/or date range of the reports being run.

Filter	Description
FROM DATE	Enter the beginning date of the date range
TO DATE	Enter the ending date of the date range
FROM TIME	Enter the beginning time of the timeframe
TO TIME	Enter the ending time of the timeframe

3. Select Parameters Various search options are made available for the user to further limit the report results. Depending on the report selected, the parameters can differ. Common filters include, but are not limited to:

Filter	Description
PAYER	List of payers
PROGRAM	List of programs
CLIENT	Search for the client by last name or client ID
CLIENT MEDICAID ID	Enter the client’s Medicaid ID number

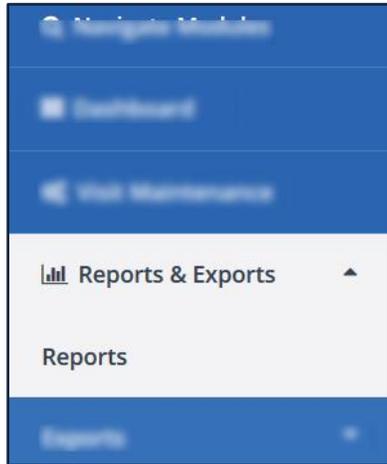

4. Run Report Runs the report based upon the selected criteria.

Running a report

Follow along with the instructor to run a report.

1. Click **Reports & Exports>Reports** from the *Navigation* panel. The *Reports* screen displays.

2. Select the **REPORT TYPE** and **REPORT NAME**.

REPORT TYPE
Daily Reports
Select Report Type
Daily Reports
Date Range Reports

REPORT NAME
Active Clients
Select Report Name
Active Clients
Active Employees
Call Listing
Call Summary
Visit Verification

Available reports differ depending upon which report type is selected.

3. Enter **Select Timeframe** information.

Select Timeframe

<p>FROM DATE MM/DD/YYYY</p> <div style="border: 1px solid #ccc; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> 09/02/2017 </div>	<p>TO DATE MM/DD/YYYY</p> <div style="border: 1px solid #ccc; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> 09/02/2017 </div>
<p>FROM TIME HH:MM AM/PM</p> <div style="border: 1px solid #ccc; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> 09:00 AM </div>	<p>TO TIME HH:MM AM/PM</p> <div style="border: 1px solid #ccc; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> 03:00 PM </div>

For *Daily* reports, the default is always the current day's date. For *Date Range* reports, the default is the past two (2) weeks. Both types of reports can be filtered further by entering time constraints.

Maximum date range is 730 days.

4. Set the desired search **Parameters**.

Select Parameters

<p>PAYER</p> <div style="border: 1px solid #ccc; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> All selected (1) </div>	<p>PROGRAM</p> <div style="border: 1px solid #ccc; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> All selected (3) </div>
<p>CLIENT</p> <div style="border: 1px solid #ccc; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> Enter Client </div>	<p>CLIENT MEDICAID ID</p> <div style="border: 1px solid #ccc; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> XXXXXXXXXX </div>

If there is more than one Payer, select from the drop-down list. Neither the **PROGRAM** nor **SUPERVISOR** fields are necessary to run the report. **CLIENT** or **CLIENT MEDICAID ID** narrows the results to just that client.

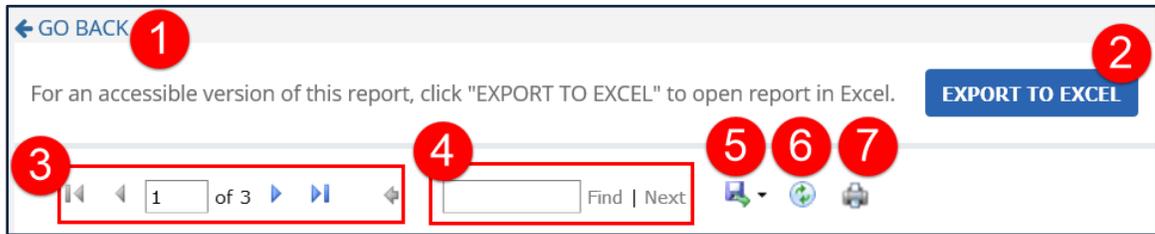

Parameters vary based on the report selected.

To reduce the size of the report and ensure efficiency when running reports with longer date ranges or containing lots of data, it is best to select other parameters such as: **CLIENT** or **CLIENT MEDICAID ID**.

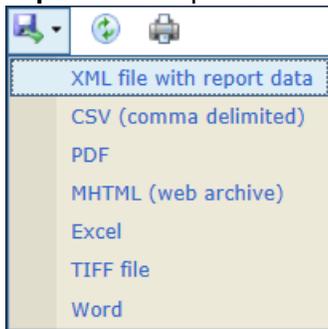

5. Click **Run Report**. The *Preview Report* screen opens.

Navigating a Report

1. **Go Back:** This links closes the *Preview Report* screen and re-displays the report search parameters.
2. **EXPORT TO EXCEL:** This button produces an accessible version of the report in Microsoft Excel.
3. **Page Navigation:** This section will display the current page vs. the total number of pages. Navigate to a specific page by typing a number into the current page field and pressing **<Enter>**. The arrows can be used to navigate to the first, next, previous and last page.
4. **Search Functionality:** Allows you to find data on any page in the report. The **Next** button jumps to the next instance of the search criteria within the document.
5. **Export:** The report can be exported into several formats:

If all report data is to be in a single table, export as CSV (comma delimited) and open in MS Excel.

6. **Refresh:** Re-runs the report and renews the displayed data.
7. **Print:** Use this button to print the report.

Firefox and Chrome users should export the report to PDF and use the PDF print tools.

Sorting a Report

1. **Report Grouping Tab:** This tab displays general information pertaining to the report as well as the sections for grouped reports.
2. **Column Header:** Clicking a column's header will sort the results in either ascending or descending order based on that column's content.

If the column header has no arrow () next to it, the column cannot be sorted.

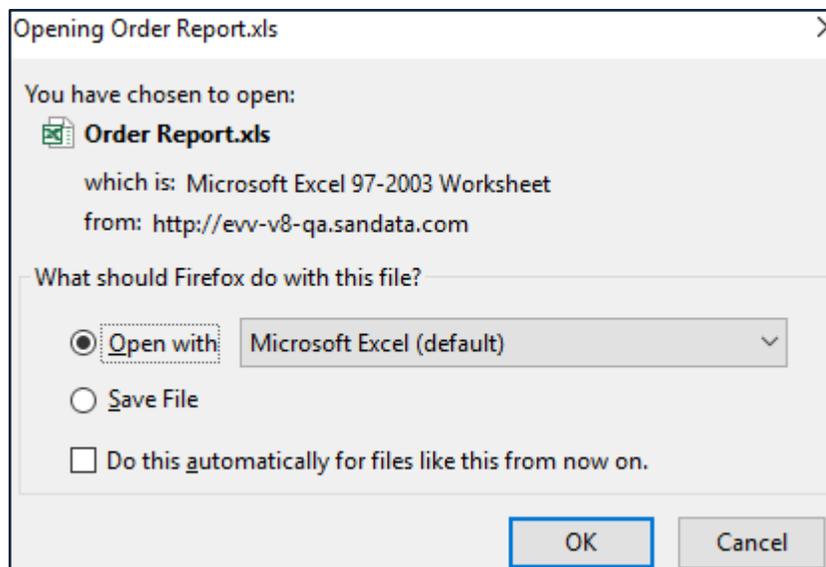

When a column is sorted, a visual indicator ( / ) reveals which column and in which order it is sorted.

Export a Report

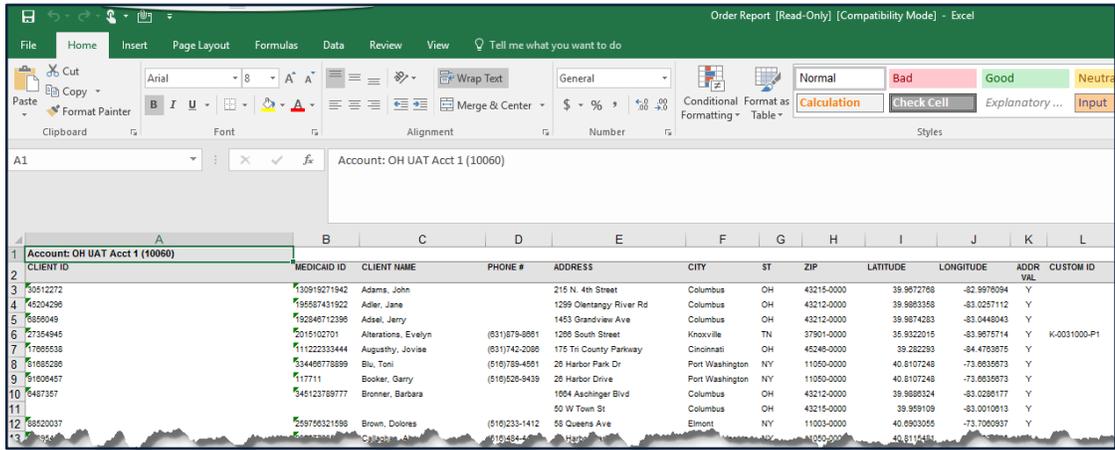

Follow along with the instructor to export a report.

- a. Click **EXPORT TO EXCEL**. The *Opening Order Report.xls* dialog box opens.

- Click **OK** to export the file. The report opens in Microsoft Excel.

On Your Own: Run the Client Summary Report

Sample Available Reports

Role and security level determine the reports available. The reports support monitoring of visits in the field to ensure that clients are receiving the services as required. The reports also help put together the missing pieces in Visit Maintenance.

Daily Reports

- **Active Client Report:** This report lists all active clients as of the date selected.

Use this report to view all client’s phone numbers, active addresses, identify whether or not an address was verified by GPS, the Medicaid ID (for SMC). Client ID (for TVV) and the custom ID field for cross reference.

Date Range Reports

These reports should be run after Visit Maintenance is completed. The corrections made in Visit Maintenance are reflected in these reports.

1. **Client Visit Summary:** This report shows all visits for the selected date range sorted by client, with each client on their own page. Results are sorted per visit, per service. The report includes basic information such as: visit date, Santrax ID, employee name, number of visits, visit start and end time and visit hours.

Use this report to review visit hours and information by client. It is a useful tool to review what services were provided to a client for a given time. It also assists in monitoring trends in the services clients are receiving.

2. **Detail Visit Status Report:** This report is a detailed view of all visits based on the selected date range and parameters. The report groups the client and employee information pertaining to the visit with the visit details such as, exceptions, services, date, time and the actual/adjusted call-in and call-out times.

Use this report to review a detailed overview of all visits within a selected date range. It assists in easily identifying visits that have statuses that need to be corrected. The report can also be printed based on exceptions or visits that need exception handling in order to get them to a verified status for claims validation.

- 3. Summary Visit Status Report:** This report is a summary view of the status of all visits based on the selected date range and parameters. The results are grouped by the duration of time each visit has remained in the same status. It shows visits in a 31 day or monthly range.

Use this report to review the status of all visits within a selected date range at a summary level. The report provides an easy way to quickly identify those visits requiring exception handling. When visits are identified, users can run a more detailed report for that specific visit to identify and correct exceptions.

10 Appendix

Glossary

A

Administrator	The person at the agency with the ability to create new users, assign roles, system privileges and reset passwords.
Aggregator	A central data store for Sandata EVV and alternate data collection EVV systems
Alternate EVV System	Any EVV system that is not Sandata's

C

Client	A person who receives services through the Medicaid program
--------	---

D

Dashboard	Real-time status of the current day's visit exceptions
-----------	--

E

Employee	A person who is employed by an agency provider to provide care to one or more clients
EVV	Electronic Visit Verification
Exception	Indicates missing visit information or visit information that does not meet the rules of the program

F

FVV	Fixed Visit Verification is the method of calling in and out for a visit when a client does not have or allow the caregiver to use their phone and the caregiver is unable to use the mobile App.
-----	---

G

GPS	Global Positioning System
-----	---------------------------

M

Manual Call	Corrective action for the visit exception Visit Without In-Call/Visit Without Out-Call
MVV	Mobile Visit Verification, the process of using a mobile app to capture the start and end of a visit

P

Privilege	A single security permission that controls an action in the Sandata EVV system
-----------	--

R

Reason Code	A pre-defined list of reasons/explanations for the various correction scenarios. A reason code must be selected when making a change to data in Visit Maintenance
Role	A group of privileges (permissions) assigned to the user which allows the user to perform visit activities in Sandata EVV

S

Sandata EVV	Sandata's Electronic Visit Verification system
Santrax	Sandata's telephonic visit capture product name
Security	The module in Sandata EVV where users (office staff) are set up to use the system
Sandata Mobile Connect (SMC)	Sandata's mobile visit verification application

T

Telephonic	The system used to record calls for visits.
Telephony (TVV)	The use of a telephone to record visit data and verification when SMC is not available

U

User	A person with a unique login and password to the Sandata EVV system
Username	One of the fields required to log in to the Sandata EVV system or to log in to the Sandata Mobile Connect App

V

Visit	A "visit" is the electronic service provided during an in-person encounter to a client in a home and community-based setting.
Visit Maintenance	The module within Sandata EVV where visits can be corrected and/or acknowledged
