

# Intro to Mako Medical

- Mako Medical – Henderson, NC and Raleigh, NC
- We have been in business for around 5 years
- CAP Accredited lab, which means we meet the highest standards in the industry
- We are a full service Lab with many of our resources going to Covid Testing and Upper Respiratory testing during Flu season
- Mako currently is licensed to do testing in every state
- Mako is doing testing for many states, universities, hospitals, etc.

- Current Covid testing capacity is 50,000 tests a day
- Resulting in 24-48 Hours after receipt at the lab
- We use the ThermoFisher TaqPath Assasy
- Mako is validated on four types of collections. Nasopharyngeal, Oral, Mid-Turbinate, Anterior Nares
- We ship specimens by FedEx overnight. Samples are validated for four days after collection at room temperature so NO need for ice packs or refrigeration.

- Orders will be placed using an electronic ordering platform so no paper requisition is needed. The order can print a bar code if you have a label printer or a bar code can be printed on a full size paper and included with the specimen. **<https://makoexchangedev.com/covid19-ereq/>**
- Each facility will have a secure portal for resulting in addition to results being reported directly back to the state
- Facilities can receive a phone call as well to report positives so they are not missed
- Mako has a full support team to answer any questions about reporting, shipping, etc. **[accounts@makomedical.com](mailto:accounts@makomedical.com)**

Thank you.
