A Dose of Reality for Parents
How to help your child avoid addiction to prescription painkillers
What is prescription painkiller abuse?

- Taking prescription painkillers in a way that was not prescribed
- Taking someone else’s prescription painkillers
- Taking too many pills at one time
- Combining pills with alcohol or other drugs
- Crushing pills into powder to snort or inject them
- Taking prescription painkillers for the sole purpose of feeling good or getting high

In Wisconsin

- Most of the increase in drug-related deaths is due to misuse of prescription drugs.
- The most prevalent category of drugs mentioned on death certificates is “other opioids,” whether by itself or in combination with other drugs.
- Statewide rate of drug-related hospitalizations increased steadily from 2004 to 2012.
- Wisconsin’s rate of drug-related deaths nearly doubled from 2004 to 2012.
- Statewide pattern mirrors the national trend.
Dose of Reality for Parents

Facts:

• Rate of prescription pain killer overdose increased 260% among those ages 12-25
• 4 out of 10 teens believe prescription drugs are less addictive than street drugs
• More than 70% of people who abuse prescription painkillers get them through friends or relatives
Signs of Addiction

**Physical**
- Elation/Euphoria
- Sedation/Drowsiness
- Constricted pupils
- Slowed breathing
- Intermittent nodding off
- Loss of consciousness
- Constipation
- Confusion

**Behavioral**
- Dramatically changing moods
- Social withdrawal or new group of friends
- Loss of interest in sports or hobbies
- Change in eating, sleeping, or personal hygiene
- Taking medications for reasons besides pain
- Consistently late to school/work or increased absences
What Parents Can Do

- Learn how to have a conversation with your child about drugs.
- Ask your healthcare professionals for non-narcotic alternatives if prescribed for your child.
- Offer support to your child.
What Parents Can Do

• Do not supply your child with a steady supply of money if you aren’t certain how it will be spent.
• Rather than staging an “intervention,” focus on creating incentives to get your child to a doctor.
• Bring your child to a medical professional who can check for signs of drug use (including drug testing) and other mental health issues.
What Parents Can Do

• To prevent an accident, take away driving privileges if you suspect drug use.

• Educate yourself about addiction, treatment and recovery.
What Parents Can Do

- NEVER share your opioid or narcotic painkillers.
- LOCK up your prescription medications.
- SAFELY dispose of unused or unwanted prescription painkillers by bringing them to a Drug Take Back site.
  - Visit [www.doseofrealitywi.gov/drug-takeback](http://www.doseofrealitywi.gov/drug-takeback) to find a location nearest you.
