

DATE: February 6, 2026

TO: Katharine Bottoni, Chairperson, Milwaukee County Mental Health Board

FROM: Shakita LaGrant McClain, Director, Department of Health and Human Services Prepared by Amy Lorenz, MSSW, LCSW, Deputy Administrator-Operations, Behavioral Health Services (BHS)

SUBJECT: Informational Report from the Director, Department of Health and Human Services (DHHS), Identifying BHS' Funding Allocations and Program Efficiencies for Mental Health Programs in Compliance with Ch. 51 of Wisconsin Statutes

Act 203 Funding Allocations Report for 2025

Issue

Wisconsin Statute 51.41 (8)(a) requires the Milwaukee County Mental Health Board to submit a report on the funding allocations for mental health programs and services by March 1 every year beginning in 2015.

Per the Statute, the report is to include a description of the funding allocations for mental health functions, services, and programs, as well as describe improvements and efficiencies in these areas. The report is to be provided to the County Executive, Milwaukee County Board of Supervisors, and the State Department of Health Services (DHS). DHS is to make the report available to the public by posting it to the DHS website.

Discussion

I. Funding Allocations

In compliance with the Statute, the tables below identify the 2024 net revenues received by program area for both Inpatient Services and Community Access to Recovery Services (CARS). Total patient revenue was \$111.5 million and is 53% of total revenue. For Inpatient Services, due to the closure of the Milwaukee County-operated psychiatric hospital and psychiatric emergency room in 2022, patient revenue is now 0% of funding, while tax levy has increased to 92%. For Community Services, patient revenue was 58% of funding.

In 2024, BHS used \$41.5 million of the budgeted \$53.1 million tax levy with the remainder flowing to reserves or future fiscal year commitments and encumbrances. In terms of the split between Inpatient and CARS, 38% or \$15.7 million of the tax levy allocation supported Inpatient and Emergency Room Services. Community Services received 62% or \$25.7 million of the BHS’s total tax levy allocation, however, with the array of funding sources for Community Services, the tax levy amounts to only 13% of its funding mix.

2024 BHD Funding Allocation						
	Patient Revenues	State/Federal Grants	BCA	Other	Tax Levy	Total
Inpatient Services	-	-	-	1,340,407	15,706,988	17,047,395
Community Services	111,550,270	23,557,725	22,336,586	9,516,875	25,738,435	192,699,891
Total BHD	111,550,270	23,557,725	22,336,586	10,857,282	41,445,423	209,747,286
<i>% of total funding</i>	53%	11%	11%	5%	20%	

2024 Inpatient Services Funding Allocation

II. Program and Service Improvements & Efficiencies

BHS has been working diligently to provide outstanding care to its clients while simultaneously making an increased and continual investment in behavioral health services and support in the community. Strongly aligned with County Executive Crowley’s vision that Milwaukee County is the healthiest community in Wisconsin, BHS focuses on reducing barriers to mental health and substance use disorder services with a strong focus on racial equity, culturally competent, and upstream services.

Grant and Other Awards

In 2025 there were no new grants awarded to Milwaukee County Behavioral Health Services.

Funding Renewal Applications and Awards

Comprehensive Opioid, Stimulant, and Substance Use Site-Based Program (COSSUP) - Beginning on 10/1/2024, the Bureau of Justice Assistance (BJA) awarded Milwaukee County a 3-year project titled “Enhancing Post-Overdoses Outreach Programs and Access to Real-Time Overdose and Emerging Drug Trend Data in Black and Brown Communities.” The project period is 10/1/2024 – 9/30/2027 for a total funding of \$1,600,000 over the three years. This project will address health inequities among individuals with opioid and/or stimulant use disorder and their families, who have been historically underserved, marginalized, and negatively affected by continued poverty, segregation, and inequality.

This project will expand the evidence-based best practice for post-overdose outreach programs. It will enhance the Overdose Public Health and Safety Team (OD-PHAST) infrastructure. Milwaukee County BHS will partner with the Milwaukee County Office of Emergency Management (OEM) and the Medical Examiner's Office. BHS will enter into a sub-awardee contract with the Medical College of Wisconsin. The second budget year period is 10/1/2025 – 9/30/2026 for the amount of \$518,706.

Children's Mental Health Initiative (CMHI) - CMHI is a SAMHSA grant that began its third year of funding in 2025 with a 4-year award. The project prioritizes: implementation, expansion, and integration of mental health and essential support services to address and meet the needs of the target population of youth, 12–19 years of age, with complex diagnosis and who are co-enrolled in Wisconsin's Children's Long-Term Support (CLTS) Program and the Comprehensive Community Services (CCS) Program. The third year of the grant is from 9/30/2025 and continues through 9/29/2026 for the amount of \$999,549.

Congressionally Directed Spending – Community Project Funding - Through a Congressional Directed Spending Initiative, this is a HRSA (Health Resources and Services Administration) grant that began on 9/1/2022 and is a three-year grant, ending on 8/30/2025, but was granted a no cost extension to now end on 8/30/2026. This award was approved in 2024 for a change in scope to maintain the intent of the initially approved project to enhance and expand the continuum of healthcare services, however, is now pivoting to an equipment only project. The funding will focus on the acquisition of tangible personal property, clinical and administrative equipment, the cost to train individuals to operate the equipment, shipping costs on equipment, service contract costs, IT Equipment, software, and site licenses. This grant is for the amount of \$2,539,000.

Funding to Cover Room and Board Costs for Medicaid Members with an Opioid Use Disorder in Residential Substance Use Disorder Treatment Programs - This grant is from the State of Wisconsin for the calendar year 2025 for the amount of \$726,596. This yearly grant funds the room and board portion of residential treatment for individuals with an opioid use disorder who also have Medicaid to pay for their treatment portion of residential treatment.

Injection Drug Use Treatment (IDUT) - This grant from the State of Wisconsin is for the calendar year 2025 for the amount of \$532,221. This yearly grant funds direct treatment services for individuals with an opioid use disorder.

National Child Traumatic Stress Initiative (NCTSI-Trauma) - This is a SAMHSA grant that began the fifth year of funding in 2025 of a 5-year award. The focus population of this grant is youth, ages 12-17, who are witnesses and victims of violence, homicides, and other traumatic events. In partnership with

Children's Wisconsin and Project Ujima, Wraparound Milwaukee is working to build the capacity of child serving systems in Milwaukee County in becoming more trauma informed. This fifth year period is 9/30/2025 through 9/29/2026 for the amount of \$399,997.

State Opioid Response (SOR) 4 year 2. Beginning 9/30/2025, the State of Wisconsin awarded Milwaukee County the SOR grant for an additional 3-year project period. The second year of this funding is for the amount of \$1,019,244. This grant supports individuals with an Opioid and/or Stimulant use disorder. The majority of this grant funds substance use disorder direct treatment services. Treatment includes residential, day treatment, and outpatient programs. Recovery support services can include bridge housing, peer support, and Recovery Support Coordination (RSC; case management). The SOR grant required a renewal application for year 2 and will again require a renewal for year 3. The second-year budget period is 9/30/2025 until 9/29/2026 for the amount of \$1,019,244.

Temporary Assistance for Needy Families (TANF) Substance Use Disorder Treatment - This funding is from the State of Wisconsin for the calendar year 2025 in the amount of \$4,394,595. 2025 was a renewal of a 5-year grant period that spans 2023-2027. This grant supports individuals living in Milwaukee County that have children under the age of 18 and are in need of substance use disorder (SUD) treatment and recovery support services.

Wisconsin Department of Children and Families (DCF) – DCF grants Milwaukee County funding for AODA (Alcohol and Other Drug Assistance Services) yearly. In 2025, the award amount is for \$816,600. Of this amount, \$500,000 is designated to direct treatment costs and \$316,600 for prevention costs.

Opioid Settlement Funds - Milwaukee County has been a successful litigant against the makers and distributors of opioids, which has resulted in approximately \$102 million in settlements thus far. Starting in 2022, all Milwaukee County departments have been invited to participate in an annual application process for available funds. Throughout 2025, BHS had several opioid-settlement funded projects including:

- 1) **MAT Behind the Walls:** This project has allowed for the continuation of a pilot project that was started in 2019 with a grant from the Bureau of Justice Assistance. Recognizing that many people are incarcerated as a result of their addiction, and that incarceration is a period of forced remission, offering treatment while individuals are incarcerated has many benefits. Additionally, individuals are up to 40 times more likely to have a fatal overdose within the first week after release from incarceration. The MAT Behind the Walls project has been able to

offer evidence-based Medication Assisted Treatment (MAT; Vivitrol, Suboxone, and methadone) to individuals who are living with an opioid use disorder. The program has continued to grow over time, helping nearly 100 individuals each year make a successful transition to community-based care for their opioid addiction after release from incarceration.

- 2) **Harm Reduction Vending Machines:** With funds granted by the State Opioid Response (SOR), BHS – CARS was able to purchase 25 Harm Reduction Vending Machines (HRVM). The opioid settlement funds have been able to augment this project by ensuring that supplies can be made available to the community free of charge. In 2023, the first 11 HRVM were disseminated strategically throughout Milwaukee County. An additional 8 HRVM were deployed to the community in 2024. The life-saving and preventative supplies are being accessed and utilized by people living with opioid use disorder and the people who care for them. A quarterly convening of the HRVM host agencies and other vested harm reduction stakeholders commenced in 2025 to ensure community mobilization and achieve efficiencies were possible.
- 3) **Substance Use Disorder (SUD) Residential Treatment Capacity Building:** Recognizing that there are still substantial wait lists for residential treatment in Milwaukee County, funds have been allocated to promote capacity expansion. A formal RFP resulted in three awards being made to help agencies increase capacity for individuals seeking residential treatment. The remaining funds from this grant were used to support the room and board costs that accompany a residential episode of care and are not covered by Medicaid.
- 4) **Community Regranting:** This project included the successful hiring of a Prevention Integration Manager to ensure that all Department of Health and Human Services prevention efforts are evidence-based and strategically aligned. This project has also included regranting of opioid settlement funds to community organizations focusing on prevention, harm reduction, treatment, and recovery-based services.
- 5) **Prevalence of Adulterants in Black and Brown Communities:** Recognizing that the opioid epidemic has disproportionately impacted Black and Brown communities, largely due to the presence of adulterants such as fentanyl and Xylazine in the stimulant drug supply, this project commenced in 2025 to target interventions and efforts. Interviews with individuals who have lived and living substance use experience are being conducted, which will ultimately be utilized to inform an educational media and marketing campaign.

- 6) **SUD System Enhancement:** With Opioid Use Disorders and the accompanying fatal and non-fatal overdoses on the rise, the BHS – CARS SUD network of care has not kept pace with demand for life-saving treatment services. This project has added necessary financial resources to be able to sustain and expand the array of services available to individuals who are seeking treatment for their substance use disorder.

- 7) **Grief Outreach and Grief-Informed Care:** Milwaukee County’s Department of Health and Human Services Behavioral Health Services (BHS) has worked collaboratively with the Milwaukee County Medical Examiner’s Office (MCMEO) and the Medical College of Wisconsin (MCW) to address the areas of overdose related grief and the reduction of future overdoses. Interventions in this project have included providing grief and bereavement support by connecting with families impacted by overdose and conducting next of kin interviews, referring families impacted by overdose to BHS services, providing training to BHS frontline service providers, and piloting trauma and grief-informed group support opportunities for families impacted by an overdose loss.

Comprehensive Community Services (CCS)

In 2025, Comprehensive Community Services (CCS) celebrated 10 years of providing mental health and substance use services within Milwaukee County. The program has continued to grow and concluded the year serving a census of over 2,600 individuals. To support continued outreach and awareness, the CCS team hosted its first CCS Resource Fair and launched a marketing campaign focused on increasing community awareness of available services.

Programs for High-Acuity Youth

In 2025, CCS expanded services for high-acuity youth by adding two specialized coordinated CCS teams designed to meet the complex needs of youth enrolled in the program.

The SHINE Team supports youth who are dually enrolled in CCS and CLTS and who exhibit increased behavioral needs related to intellectual and developmental disabilities (IDD) and mental health. This multidisciplinary team includes a Care Coordinator, Mental Health Professional, Occupational Therapist, and Peer Support Specialist.

The LYFE Team focuses on youth experiencing increased suicidality, frequent hospitalizations, and mental health crises. This team includes a Care Coordinator, Mental Health Professional, Peer Support

Specialist, and Crisis Stabilizer. Dialectical Behavior Therapy (DBT) is delivered with fidelity to support youth served by this team.

Supported Apartments

Funds were included and approved as part of the 2025 Milwaukee County Behavioral Health Services budget to develop a Supported Apartment level of care. A competitive RFP resulted in an award being made to Wisconsin Community Services (WCS) to deliver this service. The intention in developing this level of care was to create an opportunity for individuals living in a CBRF or AFH who have a desire to live in a more independent setting but are still in need of supports and skill-building before seeking complete independent living in the community. The Supported Apartment model includes several components, including the master leasing of independent, furnished apartments which are in turn leased to individuals participating in the program for no more than 30% of their available income, provision of a wide range of ancillary services to help individuals build the skills needed to support long-term recovery and increased independence, and assistance with accessing nutritional supports in the community as needed. The first five individuals moved into the Supported Apartments in 2025, with plans underway for up to 20 more individuals to move in the year ahead.

BWTC & BWTC for Families

Better Ways to Cope (BWTC) has been a locally established community-centered substance misuse and harm reduction campaign since 2022. Under this framework, BHS - CARS has been able to regrant funds to community-based organizations who have developed strategies that focus on prevention, harm reduction, treatment, and recovery services for individuals living with or impacted by substance use or misuse. The most recent Better Ways to Cope cohort made \$1.4M in opioid settlement-funded investments with 15 such organizations who introduced new innovations, expanded community reach to populations historically underserved, and expanded capacity. The projects with this cohort commenced in mid-2024, culminating in a celebratory closing of their events in December 2025. Building on the success of the BWTC campaign, BHS – CARS established BWTC for Families by allocating funds from the TANF grant for additional community regranting. The BWTC for Families focus was on SUD prevention, harm reduction, treatment, and recovery services for pregnant women, mothers with a substance use disorder who have minor children, and fathers with a substance use disorder who have minor children. Six awards for such projects were made, with organizations reaching more than 2500 individuals through their efforts, helping to heal families in our community.

Relocation of Programs: Crisis & ACT

The Assertive Community Treatment (ACT) Team and Mobile Crisis Teams (Milwaukee Mobile Crisis, Crisis Assessment Response Team (CART), and Crisis Transportation Team) relocated to Renaissance

Faire Place, 801 S. 60 Street, West Allis, 53214, on June 25-27th, 2025. This new location offers a space that is central to navigating mobile response across Milwaukee County, supports 24/7 operational needs, and provides ample parking and space for growth. As a direct result of being co-located, team members have improved efficiencies and increased collaboration amongst teams.

Third Shift Mobile Services

In collaboration with La Causa Inc., third shift mobile services resumed in September 2025. Prior to the COVID-19 pandemic, La Causa's contracted clinicians provided overnight response largely to adult clients on Emergency Detentions in local emergency rooms. The service was suspended due to safety reasons during the pandemic. The new iteration of third shift mobile is focused on community-based response for individuals of all ages experiencing behavioral health crises. Milwaukee Mobile Crisis clinicians answering calls on the Crisis Line dispatch the third shift mobile team to conduct face-to-face assessments and provide crisis stabilization services four days per week (Friday-Monday). In 2026, the team will strive to reach seven-day service to support Milwaukee County's ability to provide in-person mobile crisis response 24/7.

Transition of Crisis Line

On December 2, 2025, Milwaukee Mobile Crisis (MMC) resumed answering all calls to the Milwaukee County Crisis Line (414-257-7222) from community partner IMPACT Inc. Since May 2018, IMPACT 211 call center staff triaged Crisis Line calls, provided community resources and low-level support to callers, and forwarded mental health calls to MMC. With this transition, Milwaukee Mobile Crisis now triages all calls and supports individuals with linkage to community resources directly. When needed, MMC transfers callers to 211 through a warm handoff or utilizes the IMPACT Connect-Unite Us referral platform to be able to link callers and their loved ones to resources throughout Milwaukee County.

Wauwatosa CART

Crisis Assessment Response Team (CART) expanded in 2025 to include the Wauwatosa CART team. In partnership with the Wauwatosa Police Department, a dedicated Police Officer and Crisis Clinician respond to behavioral health crisis calls for residents of all ages. The Wauwatosa CART team responds as requested by dispatch or patrol officers seeking consultation and/or an assessment by the clinician. The team also monitors for known individuals, providing outreach when appropriate. Wauwatosa CART is in service from 11:00am to 7pm Monday-Friday.

Children's Community Mental Health Services and Wraparound Milwaukee

Wraparound Milwaukee-Children's Community Mental Health Services (Wraparound Milwaukee) is a system of care designed to help build strong and healthy communities by enhancing children and

families' ability to meet life's challenges and foster resiliency and hope for a better future. Wraparound Milwaukee continues to provide programming through the CCS benefit as well as through REACH, a crisis-based program designed to serve youth who have complex needs and need crisis support. Youth CCS offers a wide array of service and support options which include specialty teams that focus on youth experiencing their first episode of psychosis, high acuity youth programming, as well as youth dually enrolled in a disability and mental health program.

Wraparound Milwaukee has worked progressively over the years to transform its delivery service and to continuously improve and expand all supports for children and their families. This service delivery occurs through consistent engagement with system partners, such as schools, child protective services, disability services, and youth justice services, as well as partnerships within the greater community. In uniting with families and community partners, Wraparound Milwaukee remains committed to strengthening individuals, homes, and neighborhoods throughout Milwaukee County.

Wraparound Milwaukee continues to operate the children's programming Resource and Referral Line as the front door to all children's support programs across service areas within DHHS. The partnership with Children, Youth and Family Services-Disability services and Wraparound Milwaukee works to support a coordinated response for youth and families seeking help from Milwaukee County. Since 2022, this line has been operated by a fully integrated intake team of Options Counselors being trained and actively screening for all voluntary children's programs offered under the Milwaukee County Department of Health and Human Services (DHHS) umbrella.

Wraparound Milwaukee continues to have a community presence through Owen's Place, two community drop-in centers for youth and young adults. With having multiple locations within the city, it broadens the ability to support youth and young adults. In partnership with Owens Place, Wraparound Milwaukee hosts monthly Grab-and-Go events, between March and October at the northside location, to support the community; over 1100 individuals were served as part of this outreach in 2025. An annual Children's Mental Health Awareness Month event is held in May, and the 2025 event had over 350 attendees and vendors present.

Taking lead through the community-based Youth Behavioral Health Re-design group, Wraparound Milwaukee works amongst a larger group of community stakeholders and has taken an active role in leading through committees around High-Acuity youth programming and system collaboration efforts. This work also assisted in the creation of a white paper about the tiered service model, which will launch a pilot of a rapid outpatient response to service support.

Recommendation:

The DHHS Director, or her designee, requests permission to submit this informational report to the State of Wisconsin Department of Health Services, Milwaukee County Executive, and Milwaukee County Board in compliance with Ch. 51 of the Wisconsin Statutes.

Act 203 Hospital Data Report - Bed Days Count

Granite Hills Data

Year	Distinct People Served	Bed Days
2023	113	1896
2024	496	5522
2025	507	7306
Total	1033	14724

** The calculation of bed days is derived by reviewing the admission date and the discharge date, or the most recent date, if the client has not discharged. The entry of the admission and discharge dates are critical, and the state hospital data is not reviewed as frequently for discharge indicators. Additionally, there may be some uncertainty around the date when Milwaukee County began funding the hospital stay and the clients actual admission date.
