STEP 4:
PROGRAMMING FOR YOUR WORKSITE
STEP 4: PROGRAMMING FOR MY WORKSITE

Step Four will provide you with background information for specific program strategies that you should consider. After reading through this chapter, you should go through the prioritizing exercise in Step Five to narrow your focus and put your written action plan in place. **DON'T PRIORITIZE YET – wait until you have a good idea of what programming options are available and then walk through the process in Step 5 to choose the best options for your worksite.**

**Program Strategies**

Now that you’ve completed the worksite assessment, employee survey, reviewed other available data and compiled the results, it’s time to look at the program strategies that have been proven to work or are best practices from other worksites. This chapter lists a number of strategies to consider for your wellness program. You should be able to use the Worksite Scorecard at the end of the Worksite Assessment Checklist to get an overview of your current worksite wellness programs or strategies. For those programs or strategies that were checked as either in process or not existing at your worksite, you will have the opportunity to get an overview of the relative resource costs needed to implement the strategy and see what reference or resource materials are available to help with implementation.

**What About Small Businesses?**

The question of whether there is a separate resource kit or section for small businesses has been asked at training classes and through email requests. The decision to not have a separate kit or specific section of strategies for small businesses was done for two main reasons:

1. Although small businesses may not have the resources available to larger businesses, they do have 2 distinct advantages. First, because of their size, it’s easier and simpler to make policy or environmental changes. They don’t have a large bureaucracy that needs to approve changes. Secondly, it’s easier to implement smaller initiatives that can affect the majority of the employees in a small business setting.

2. The strategies in the kit are split into low, medium and high resource commitments. If small businesses are looking for easy and inexpensive strategies they can concentrate their efforts in the low and medium listings. However, they may find that some of the high resource items are really not that hard to implement because of their small staff numbers. The strategies are all presented together, so any size worksite can determine for themselves which ones they want to pursue or ignore.

**A 3-Pronged Approach**

An important concept to include in your programming is to combine individual strategies with environmental and policy changes as a way to increase impact by making it easier to achieve the behavioral change. Rather than pick unrelated strategies, think about having strategies that build off of, or complement, each other. Here’s one example for a physical activity focus:

- **Individual** - conduct a six-week walking campaign that tracks steps or mileage
- **Environment** - map distances and routes for walking near the worksite.
- **Policy** – implement a written policy that allows and encourages staff to walk over the noon hour.
This type of 3-way approach is likely to be more successful because it addresses the issue from multiple perspectives. A more detailed example of a nutrition initiative is illustrated below.

### Focus Areas
Wellness programming can include many components and activities. This resource kit focuses on prevention and behavior change to reduce chronic diseases. The following areas are highlighted, using specific activities or strategies to address each area:

- Health risk assessment (HRA), Medical care and Self-care
- General health education for disease risk factors
- Physical activity
- Nutrition
- Mental health and stress management
- Alcohol and other drug abuse
- Tobacco cessation
- Maintaining interest and motivation

Each focus area has its own distinct section that contains strategies on the first page and references to additional resources on the second page. The resources are highlighted by a shaded color to distinguish them. By looking at the first page of each focus area, you will get an overview of things that can be done in the workplace. If you need additional information or resources to implement a strategy, look to the second page for more detailed information. Examples of the strategy page and the resource page are shown on the following two pages.
PROGRAMMING STRATEGIES: SAMPLE OF PAGE ONE
Illustrated below is a sample of what you will find in the six focus areas that follow this introduction.

**Strategies arranged by resource level.** This provides a summary of programming that you can do at your worksite. The components have been split into **low, medium and high resource needs**, so you can get a quick glance at what you might be able to quickly implement, and what might take more time or be too costly to include at this time. The three levels indicate the relative amount of staff and financial resources that will be needed to implement the program.

**Influencing change on a variety of levels.** The options are further classified by the level where change takes place. In Step Five, there is a summary of the need for change to occur at the **individual, environmental and policy levels**. The tables that follow will indicate which level is being influenced for the related activity.

---

**First Page Sample of Strategies**

**LOW RESOURCES**

1. Offer flexible work hours to allow for physical activity during the day.  
2. Support physical activity breaks during the workday, such as stretching or walking.  
3. Map out on-site trails or nearby walking routes.

**MEDIUM RESOURCES**

1. Provide shower and/or changing facilities on-site.  
2. Implement incentive-based programs to encourage physical activity, such as pedometer walking challenges.

**HIGH RESOURCES**

1. Provide an on-site exercise facility.

---

**PROGRAMMING STRATEGY RESOURCES: SAMPLE OF PAGE TWO**

Page one provides a sample of how strategies for each of the six focus areas (general wellness components for disease risk factors, health risk assessments, physical activity, nutrition, mental health and tobacco cessation) are shown. This page provides a sample of what the second page looks like. The second page will repeat the strategy list, but it will also provide:

- links to additional resources;
- examples or links to examples, and;
- greater details for each of the program areas listed.

By looking at the first page of each program area, you will get an overview of things that can be done in the workplace. If you need additional information or resources to implement a strategy, look to the second page for more detailed information. An example of the second page is shown on the next page.
PHYSICAL ACTIVITY RESOURCES FOR THE RECOMMENDED STRATEGIES

LOW RESOURCES
1. Offer flexible work hours to allow for physical activity during the day. *Supervisors will support this as a standard work practice.*
2. Support physical activity breaks during the workday. *Supervisors will support this as a standard work practice.*

MEDIUM RESOURCES
1. Provide shower and/or changing facilities on-site.

HIGH RESOURCES
1. Provide an on-site exercise facility. [http://www.cdphe.state.co.us/pp/COPAN/resourcekits/resourcekits.htm](http://www.cdphe.state.co.us/pp/COPAN/resourcekits/resourcekits.htm) (page 42)
   American College of Sports Medicine’s Fitness Facility Standards: [http://www.acsm.org/AM/Template.cfm?Section=Search&template=/CM/HTMLDisplay.cfm&ContentID=4476](http://www.acsm.org/AM/Template.cfm?Section=Search&template=/CM/HTMLDisplay.cfm&ContentID=4476)

TWO FINAL REMINDERS:

1) Communication is Key
Regardless of what programming you choose to do, communication is essential to make your program more successful. It is likely that there are some employees that are very experienced in communications and marketing. Make sure you recruit them to be on the wellness committee.

There are many ways to get the word out about your program, including:
- Place information in the company newsletter
- Announce the wellness program through company-wide email
- Announce program information at staff meetings and electronically
- Promote monthly topics and screenings
- Provide educational/awareness trainings using local speakers or providers
- Place informational posters in the hallways or common areas
- Place information in payroll envelopes
- Organize a kick-off event or health fair as part of a larger initiative

2) Wellness Coordinator
This was highlighted in Step Two, but it bears repeating. The level of success for the wellness program is often linked to the coordinator’s time and ability. It is essential that some or all of the coordinator’s time be dedicated to the wellness program. If this isn’t possible, then the company should consider contracting with an outside party to provide programming. Outside parties that may provide selected wellness programming or complete wellness services include:
- Local healthcare organizations
- Health insurance agencies
- Hospital educational outreach
- YMCAs
- Local health coalitions – check with your health department or UW Extension Office
- Independent contractors or consultants

Check with your local contacts to see if any of these sources might be an option.
WHAT: A well-defined program with management support is essential to be successful. Including educational efforts that address knowledge, attitude and behavior change and that are assisted by skill building sessions and social support set the groundwork for a wellness program.

WHY: Organizations that have well-defined worksite wellness programs and policies in place will have a greater chance of being successful. Creating a company culture where wellness is encouraged will reinforce healthy behavior.

Resources for the Wellness Component Recommended Strategies

BEST RESOURCES: Wellness Council of America (WELCOA) for a variety of general wellness information:  http://www.welcoa.org/freeresources/index.php?category=12
WELCOA - WI Affiliate:  http://www.wellnesscouncilwi.org/

LOW RESOURCES
1. Policies outlining the functions of a comprehensive worksite wellness program.
2. Worksite wellness plan summary.
3. Employee orientation to the wellness program and wellness policies.
4. Promotional materials.
5. Health education and information samples.
6. Self-care resources. See the section on Self-care (page 15) for resources.

MEDIUM RESOURCES
1. Representative wellness committee.
   http://www.tompkins-co.org/wellness/worksite/workwell/wellcomm.html
2. Health education presentation resources.
3. Health fair as a kick-off or celebration event or an on-line health fair planning guide:
   http://fcs.tamu.edu/HEALTH/health_fair_planning_guide/health_fair_planning_guide.pdf
4. Designate specific areas to support employees such as diabetics and nursing mothers.
   Nursing mothers:
5. Preventive wellness screenings for blood pressure, body composition, blood cholesterol, and diabetes. Screening list:
   http://www.cdphe.state.co.us/pp/copan/resourcekits/WorksiteWElnessResourceKit.pdf  (pages 8-9)
7. On-site weight management/maintenance programs at a convenient time for employees. Lighten Up Wisconsin – an employee wellness campaign:

HIGH RESOURCES
1. Worksite wellness budget considerations.
2. Providing healthcare coverage for prevention of and rehabilitation of chronic disease.
3. Provide wellness programming for family members.  See ideas in Appendix I.
4. Adding weight management/maintenance, nutrition, and physical activity counseling as a member benefit in health insurance contracts.

- See pages 13-16 and pages 54-57 in the Arkansas Worksite Wellness tool kit:
HEALTH RISK ASSESSMENTS

WHY:
A Health Risk Assessment (HRA) is a technique for determining the presence of disease and estimating the risk that someone with certain characteristics will develop disease within a given time span. Employers and their employees can use the HRA to identify people at risk and target specific strategies that will keep them well and reduce health care costs.

WHAT:
The three components of a Health Risk Assessment are: 1) questionnaire, 2) risk calculation, and 3) educational reports. Normally individual clients will receive confidential reports and the employer will receive an aggregate report with grouped statistics from all employees. On average, a Health Risk Assessment costs $15-$50 per employee.

Health Risk Assessments are appealing for several reasons:
- They are easy to complete and are popular with employees.
- They may increase individual motivation and participation in health promotion programs because of risks that are identified.
- They provide group data that can be used by the employer to identify major health problems and risk factors that can be addressed in wellness programming.

Depending on the type of assessment, data may be available just for the individual or the company may receive aggregate data to guide programming and evaluation. Online individual assessments are fast and often free, but most do not provide the employer with aggregate results. See Step 6 Evaluation for a more detailed description of how you can use HRAs.

HOW: ……..
Assessments can be done with paper and pencil surveys or on a computer. Electronic assessments are usually less expensive and provide faster, electronic feedback of results.

Where can I get HELP?
Many local health plans and health care systems have health risk assessment or assessment programs for worksites. Contact your local health plan or health care provider to see what services they offer. Online resources are another source for health risk assessments. Several online HRAs are listed below.

Health Assessment Resources for the Recommended Strategies

LOW RESOURCES
1. Web based assessments.
   - http://www.hmrc.umich.edu/content.aspx?pageid=19&fname=hra.txt

MEDIUM RESOURCES
1. Send employees to a physician as part of annual physical. As part of the HRA, have each employee identify a primary care physician that they can follow-up with to discuss the results and any follow-up steps they should take to reduce risk.
2. Have a follow-up plan for HRAs and biometric screenings that actively involves the employee’s healthcare provider. Work with your healthcare insurer, healthcare provider(s) and your employees to integrate results with follow-up visits with the healthcare provider for further education, medication or treatment.

HIGH RESOURCES
1. Hire an organization to do worksite wellness assessments on-site. There are a number of online companies that provide HRAs as part of their consulting services. Check with local health insurance companies and healthcare providers to see if they provide this service.

🔍 Looking for Tips on Picking the Right HRA?
- How Health Risk Assessments Can Take Your Program To The Next Level
**WHAT:**
People who are physically active reduce their risk for heart disease, diabetes and some cancers and reduce their stress levels. The recommended level of physical activity to produce some health benefits is 30 minutes of moderate activity, at least five times per week. Only 55 percent of Wisconsin adults are meeting that recommendation. Even fewer meet the 60-90 minutes of activity recommendation to lose weight or maintain weight loss.

**WHY:**
People who stay fit will cost the organization less, affecting the bottom line and ultimately saving the company money through their benefits and compensation plan. It can also reduce absenteeism and create a more productive workforce.

</tr>
</tbody>
</table>

**LOW RESOURCES**

1. Create a company culture that discourages sedentary behavior, such as TV viewing on breaks and sitting for long periods of time.
2. Offer flexible work hours to allow for physical activity during the day.
3. Support physical activity breaks during the workday, such as stretching or walking.
4. Map out on-site trails or nearby walking routes.
5. Host walk-and-talk meetings.
6. Post motivational signs at elevators & escalators to encourage stair use.
7. Provide exercise/physical fitness messages and information to employees
8. Have employees map their own biking or walking route to and from work.
9. Provide bicycle racks in safe, convenient, and accessible locations.

**MEDIUM RESOURCES**

1. Provide shower and/or changing facilities on-site.
2. Provide outdoor exercise areas such as fields and trails for employee use.
3. Provide or support recreation leagues and other physical activity events (on-site or in the community).
4. Start employee activity clubs (e.g., walking, bicycling).
5. Explore discounted or subsidized memberships at local health clubs, recreation centers, or YMCAs.
6. Implement incentive-based programs to encourage physical activity, such as pedometer walking challenges.

**HIGH RESOURCES**

1. Offer on-site fitness opportunities, such as group classes or personal training.
2. Provide an on-site exercise facility.
3. Provide incentives for participation in physical activity and/or weight management/maintenance activities.
4. Allow for use of facilities outside of normal work hours (before/after work).
5. Provide on-site childcare facilities to facilitate physical activity.

*(See next page for more information and additional resources)*
**Resources for the Recommended Physical Activity Strategies**

**LOW RESOURCES**

1. Company culture that discourages sedentary behavior. 
   - Supervisors will support this as a standard work practice. [http://physicalfitness.org/nehf.html](http://physicalfitness.org/nehf.html)

2. Offer flexible work hours to allow for physical activity during the day. 
   - Supervisors will support this as a standard work practice. [http://possibility.com/PowerPause/](http://possibility.com/PowerPause/)

3. Support physical activity breaks during the workday. 
   - Supervisors will support this as a standard work practice. [http://www.cdc.gov/women/planning/walk.htm](http://www.cdc.gov/women/planning/walk.htm)

5. Host walk-and-talk meetings. Employees are encouraged to participate in “walking” meetings for short check-ins with other staff and supervisors. Rather than sit in an office for a quick discussion, go for a walk in the hallway or on a short outside route to cover the same content, but in a nicer environment with the added benefit of a little physical activity. Supervisors will support this as a standard work practice. [http://www.cdc.gov/women/planning/walk.htm](http://www.cdc.gov/women/planning/walk.htm)

8. Have employees map their own biking route to and from work. [http://walkingguide.mapmyrun.com/](http://walkingguide.mapmyrun.com/)

**MEDIUM RESOURCES**

1. Provide shower and/or changing facilities on-site.
2. Provide outdoor exercise areas such as fields and trails for employee use.
3. Support recreation leagues and other physical activity events (on-site or in the community).
4. Start employee activity clubs (e.g., walking, bicycling). [http://aom.americaonthemove.org](http://aom.americaonthemove.org)
5. Explore discounted or subsidized memberships at local health clubs. Contact your local YMCA, fitness centers or other health groups to discuss reduced group rates.
6. Implement incentive-based programs to encourage physical activity, such as pedometer walking challenges. 

**HIGH RESOURCES**

1. Offer on-site fitness opportunities, such as group classes or personal training. 
   - [http://www.acefitness.org](http://www.acefitness.org)

2. Provide an on-site exercise facility. 
   - [http://www.cdphe.state.co.us/pp/copan/resourcekits/WorksiteWEllnessResourceKit.pdf](http://www.cdphe.state.co.us/pp/copan/resourcekits/WorksiteWEllnessResourceKit.pdf) (pages 45-46)

3. Provide incentives for participation in physical activity and/or weight management/maintenance activities. [http://www.wellnesscouncilwi.org](http://www.wellnesscouncilwi.org)

4. Allow for use of facilities outside of normal work hours (before or after work).
5. Provide on-site childcare facilities to facilitate physical activity.

**Looking for Sample Lessons and Materials?**

- See the Eat Smart, Move More...North Carolina in the Worksite site: [http://www.eatsmartmovemorenc.com/NCHealthSmartTklt/WorksiteTklt.html](http://www.eatsmartmovemorenc.com/NCHealthSmartTklt/WorksiteTklt.html)
WHAT:
Both healthy eating and physical activity are associated with the prevention and management of overweight and obesity and other chronic diseases. Healthy eating includes eating a variety of foods and beverages such as fruits and vegetables, whole grains, lean meats and low-fat dairy products. It also means limiting the amount of sweetened beverages consumed and to choose the portion size of foods carefully.

Worksites that support healthy food choices also support employee efforts to achieve and maintain a healthy weight. Having fresh fruits and vegetables available in the workplace helps to improve access, which ultimately can help people consume more fruits and vegetables. Worksites that support healthy food choices also offer appealing, low-cost, healthful food options at the worksite is one way to promote healthful eating. Vending machines or cafeterias are a quick and convenient way for employees to purchase these types of food.

Supporting breastfeeding employees by reducing worksite barriers is essential, as workplace barriers can create added stress for a woman who is trying to do her best for both her employer and family. Women who breastfeed after returning to work miss less time caring for sick children and their family health care costs are less. Women whose breastfeeding is supported at work are happier, more productive and less likely to resign. Breastfeeding also promotes weight loss and a quicker return to pre-pregnancy weight. A new federal law requires employers with 50 employees or more to provide an accommodation for breastfeeding mothers.

WHY:
Employees are likely to eat or drink snacks and meals at work. Thus, offering appealing, low-cost, healthful food options at the worksite is one way to promote healthful eating. By increasing opportunities for employees to store and prepare food at work, the less likely they are to choose to eat out.

HOW: ……..

NC: Eat Smart North Carolina: Guidelines for Healthy Foods and Beverages at Meetings, Gatherings, and Events http://www.eatsmartmoveorenc.com/HealthyMeetingGuide/HealthyMeetingGuide.html

MEDIUM RESOURCES
1. Make kitchen equipment (refrigerators, microwaves, stoves, etc) available for employee food storage and preparation.
2. Offer local fruits and vegetables at the worksite (i.e. farmer’s market or a community-supported agriculture drop-off point)
3. Provide on-site gardening http://dhfs.wisconsin.gov/health/physicalactivity/gotdirt.htm
4. Provide interactive food opportunities such as taste testing and food preparation skills. Taste testing and food preparation skills increase the likelihood for trying and continuing to eat new foods.
5. Provide opportunities for peer-to-peer modeling of healthy eating. Provide opportunities during lunch time to have employees share how they’ve adopted healthy eating habits and show what they’re eating and any changes they had to make to change their diet.
7. Provide an appropriate place for breastfeeding/pumping. New federal requirement for employers with 50 or more employees: http://www.dol.gov/whd/regs/compliance/whdfs73.pdf

HIGH RESOURCES
1. Provide incentives for participation in nutrition and/or weight management/maintenance activities (these can range from inexpensive low resource items (water bottles) to high resource items (health insurance rebate). (See page 16 for incentive information)
2. Include the employees’ family members in campaign promoting fruit and vegetable consumption (worksite plus family strategy).
3. Provide lactation education programs.

WHAT:
Mental health is a state of well-being in which a person realizes their own abilities, can cope with the normal stresses of life, can work productively, and is able to contribute to his or her own community. Mental health is the foundation for well-being and effective functioning for an individual and community (Healthiest WI 2020). Addressing mental health and physical health as interlinked, is key to overall health and wellness. Mental health issues such as stress, anxiety, depression and other conditions are routinely listed as top concerns in employee health surveys.

WHY:
Mental health conditions are the second leading cause of worksite absenteeism. Estimated costs for untreated and mistreated mental illness total approximately $150 billion in lost productivity each year in the U.S. and businesses pay up to $44 billion of this bill. Additionally there are indirect costs to employers such as absenteeism, work impairment, and disability benefits. However, the total health care costs for workers who receive treatment for depression are two-thirds less than the medical costs of untreated individuals (JOEM, 2005). Effective treatment potentially can save direct and indirect costs for employers and can improve quality of life for all employees.

More than 90 percent of employees agree that their mental and personal problems spill over into their professional lives, and have a direct impact on their job performance. Even moderate levels of depressive or anxiety symptoms can affect work performance and productivity. It is in the employer’s best interest to address mental health as part of a worksite wellness program.

A positive work environment decreases stress, improves overall health, and boosts productivity (NMHA 2006). Most mental illnesses are highly treatable at 70-90 percent; however, untreated mental illness can increase the risk for possible suicide.

Employers can do more to promote integrated mental and physical health care by creating supportive workplaces that destigmatize mental illness, encourage self-screening, and connect employees to resources. These successful businesses will not only generate cost savings seen in improved employee engagement and well-being, results will be shown in higher product quality, better cost control, greater employee loyalty, and healthier workplaces.

**MEDIUM RESOURCES**

1. Create and sustain a mental health-friendly workplace that provides support and accommodations for employees who are returning to work after receiving or are in mental health/alcohol treatment and recovery. Provide family/employee flexibility allowing schedule accommodations for medical/treatments, sessions, and appointments, as needed.  

   ![Rating](star_rating.png)

2. Provide training specific to educating managers/supervisors in recognizing mental health as a factor in performance issues and offer interactive training components and information for supervisors/managers on how to engage EAP, HR and other resources. Provide targeted mental health support for supervisors/managers and executive leadership addressing mental health issues specific to their needs and stressors.  

   ![Rating](star_rating.png)

3. Create policies and practices that provide guidance to supervisors/managers on how to address performance issues, which include offering consultation, accommodation, and information through EAP or include the HR staff.  

4. Review policies and practices concerning employee privacy and confidentiality, return to work, HIPAA, accommodation and ADA guidelines.  

5. Evaluate or reevaluate the workplace environment, the organization, and its culture with a focus on reducing workplace stress, workload issues, performance reviews, address employee engagement and concerns.  

   ![Rating](star_rating.png)

**HIGH RESOURCES**

1. Provide onsite or off-site Employee Assistance Program (EAP).  

   ![Rating](star_rating.png)

2. Provide confidential Employee Assistance Coordinators (EACs) to help staff obtain information about supportive resources in their community.  

3. Provide and maintain comprehensive health insurance coverage, which includes mental health as part of employee benefits packages. Include screening, brief intervention and referral (SBIRT) as a covered evidence-based benefit.  

4. Provide and maintain comprehensive health insurance coverage with referral mechanisms to connect employees easily to mental health treatment services.  

5. Become a workplace that is able to provide assistance to serious mental illnesses and major traumatic events.  

   ![Rating](star_rating.png)

4. Offer health insurance coverage with referral mechanisms to connect employees easily to mental health services. Include Screening and Brief Intervention and Referral to Treatment (SBIRT) for substance abuse as a covered benefit service for your employees. WI Initiative for Promoting Healthy Lifestyles http://www.WIPHL.org

5. Become a workplace that is able to provide assistance to serious mental illnesses and major traumatic events.
   Trauma can have a significant impact on a person’s well-being, mental health, and use of substances. The website for the National Center for Trauma-Informed Care includes information about the effects of trauma and how workplaces can create trauma sensitive and informed environments: http://mmentalhealth.samhsa.gov/nctic
   ● Supported Employment: Workplace Accommodations and Supports. Provides information to employers on how to help persons with mental illnesses in the workplace who require a more structured strategy for assistance for persons who have more serious mental illnesses to obtain and maintain employment through the provision of ongoing support.
   ● http://www.disability.gov/employment/.../supported_employment
   ● http://mentalhealth.samhsa.gov/cmhs/communitysupport/toolkits/employment
WHAT:
Substance abuse is the unhealthy use of alcohol, drugs, or other substances that negatively interfere with a person’s functioning or well-being. A person could experience negative effects in one or many parts of his or her life, including his or her physical or emotional well-being; significant relationships; spiritual beliefs or connectedness; educational achievements; vocational, financial, or legal issues; or in his or her role as a caregiver or homemaker. Alcohol-related problems also affect worker productivity, workplace safety, and health care costs.

Nationally, Wisconsin ranks high in its alcohol consumption compared to other states. According to the Wisconsin Epidemiological Profile on Alcohol and Other Drug Use, 2008, rates of alcohol dependence, alcohol abuse, and alcohol-related motor vehicle fatalities are higher in Wisconsin than in the United States as a whole. Wisconsin’s employers can play an important role in lowering the social and financial burden of substance abuse and guiding the development of a healthy and productive workforce.

WHY:
Individual alcohol use is influenced by employers’ expectations. Employers should consider whether official policy, sanctioned activities, or common practice creates a culture that condones or contributes to alcohol or drug abuse or creates an environment that embraces prevention messages, encourages alternatives to substance abuse, and supports healthy lifestyles.

Substance abuse is both preventable and treatable, with recovery rates comparable to other chronic health problems like diabetes and asthma. If employers incorporate prevention messages and activities, assist employee access to treatment, and support employee recovery from substance abuse, they can help create healthier and more productive employees, workplaces, and communities.

   - Current health information, articles, and research. [www.webmd.com](http://www.webmd.com)

2. Provide resources for alcohol use self-screening (online/print)
   *The web site below connects people to a free alcohol screening service provided by Join Together, a project of the Boston University School of Public Health. AlcoholScreening.org helps individuals assess their own alcohol consumption patterns to determine if their drinking is likely to be harming their health or increasing their risk for future harm.*
   [www.alcoholscreening.org](http://www.alcoholscreening.org)

3. Encourage the use of telephone help lines - 800 numbers.
   - Wisconsin has a partial system of 2-1-1 information and referral lines. It is 2-1-1 in some communities, and United Way in other communities.
   - Wisconsin Mental Health or Substance Abuse Services: (608) 266-2717
4. Offer stress reduction presentations on varied topics: conflict resolution, managing multiple priorities, project planning, personal finance planning, etc.
   - Health insurance plans such as UW-Physician’s Plus, Group Health, etc. offer stress reduction classes and resources. [www.uwhealth.org](http://www.uwhealth.org)
   - A local listing of stress management programs can be found at: [www.yellowbook.com/category/stress_management_programs/Wisconsin](http://www.yellowbook.com/category/stress_management_programs/Wisconsin)
   - Mindfulness-based Stress Reduction [www.sharpbrains.com](http://www.sharpbrains.com)
5. Provide flexible scheduling during work for training, yoga, meditation, physical activity, treatment sessions, or self-help groups.
6. Provide information about the appropriate use and disposal of prescription medications, including publication of prescription drug disposal drop-off locations and times in your community. The local county agency or public health department should know of drop off locations in your community.
7. Evaluate or reevaluate the workplace alcohol environment. Examine agencies policies related to alcohol and drug use such as: prohibit serving alcohol to anyone under the age of 21 at company events, provide a variety of nonalcoholic beverage choices, amend company personnel policies to suggest respect for those who chose not to drink alcohol for any reason, adopt policy requiring absolute sobriety for employees during business hours, and ask supervisors to model appropriate alcohol use.

**MEDIUM RESOURCES**

1. Create and support a substance abuse prevention, treatment, and recovery friendly work environment that provides family/employee friendly accommodations for medical or therapy appointments or other meetings when needed.
2. Advocate for insurance companies to provide screening, brief intervention, and referral to treatment (SBIRT) services. More information about SBIRT is available on the SAMHSA web site at the following link: [http://sbirt.samhsa.gov](http://sbirt.samhsa.gov)
3. Create policies that provide guidance to supervisors on signs or indicators of substance abuse issues and improve their skills to intervene or supervise an employee who is experiencing or in recovery from substance abuse. These policies should emphasize that employees may access different types of treatment and recovery services that are appropriate with their cultural background, beliefs, and practices.
4. Provide presentations and trainings that support prevention, treatment and recovery messages for supervisors, business leadership team, or management. Check with local health providers for speakers or trainers.
5. Review policies and practices concerning employee privacy, return to work and HIPAA, accommodation, ADA guidelines.

**HIGH RESOURCES**

1. Provide an onsite or off-site Employee Assistance Program (EAP). Employee Assistance Professionals Association [www.eapassn.org](http://www.eapassn.org)
2. Provide confidential Employee Assistance Coordinators (EACs) to help staff obtain information about treatment and recovery resources in their community. EACs provide employees and their family members confidential consultation about personal and work-related concerns, and help find resources to deal with those issues. They participate in a two-day training course to learn how to conduct interviews, assess problems, find community resources and make referrals. EACs are held to strict standards of confidentiality and must sign and adhere to the Employee Assistance Code of Ethics.
3. Provide and maintain comprehensive health insurance coverage, which includes substance abuse treatment resources as part of the employee benefits package.
   - Information about federal health care requirements and resources: [http://www.healthcare.gov](http://www.healthcare.gov)
   - Health Insurance-Provision of Mental Health and Substance Abuse Frequently asked questions [www.mentalhealth.samhsa.gov](http://www.mentalhealth.samhsa.gov)
4. Offer health insurance coverage with referral mechanisms to connect employees easily to substance abuse treatment services.
WHAT:
The negative health effects of smoking are well known. Smoking is the leading cause of preventable death each year in the United States and the associated diseases and health care costs are significant. Smokers tend to require more medical costs, see physicians more often and be admitted to hospitals for longer periods than nonsmokers. More Wisconsin insurers and employers are realizing the value of covering quit smoking treatments. Coverage of smoking cessation medications has increased so that 74 percent of insured Wisconsin residents have coverage for at least one stop smoking medication through their health plans. In addition to direct health effects to tobacco users, other employees are impacted by second-hand smoke. So tobacco cessation in your workplace will positively affect all employees.

To have a successful tobacco free facility and campus companies need to provide information and support that allows employees to be successful with ceasing all forms of tobacco usage. This includes smokeless tobacco use.

WHY:
The business case for covering tobacco cessation is clear. According to the Centers for Disease Control, smoking costs the nation $193 billion a year in healthcare costs and lost worker productivity. The CDC estimates each employee that smokes costs your company $3,856 per year -- including lost productivity and excess medical expenses. Smoking cessation programs have shown some immediate return on investment and a significant return on investment in a relatively short time (as little as two years).

http://www.ctri.wisc.edu/Employers/employers_Tools_&_Resources.htm

Professional Assisted Cessation Therapy (PACT) resource guide

Wisconsin Tobacco Quit Line resources order form

(Resources for the Recommended Tobacco Cessation Strategies)

LOW RESOURCES
1. Policy prohibiting tobacco use anywhere on property.
   http://www.cdc.gov/tobacco/research_data/environmental/etsguide.htm
2. Provide prompts and posters to support a no tobacco use policy.
   http://www.wellnessproposals.com/tobacco/tobacco-cessation-posters.htm
3. Promote the Wisconsin Tobacco Quit Line (1-800-QUIT NOW).

MEDIUM RESOURCES
1. Policy that supports participation in smoking cessation activities during duty time (flex-time).

HIGH RESOURCES
1. Provide counseling through an individual, group, or telephone counseling program on-site.
2. Provide counseling through a health plan sponsored individual, group, or telephone counseling program.
3. Provide cessation medications through health insurance.

☞ Looking for Sample Lessons and Materials?
- See pages 17-26 in the Arkansas Worksite Wellness tool kit:
One other resource available to you are program favorites submitted by other worksites. On the “Favorites” web page, you will find links to wellness initiatives that are taking place in worksites throughout Wisconsin. These include a variety of activities ranging from worksite campaigns to policy and environmental changes that have been used in other worksites to try and improve employee health. Although not all of these initiatives are scientifically proven, they have been practically applied in real work settings. Consider using these in conjunction with proven strategies in the WI Worksite Wellness Resource Kit to augment your wellness program.

“Favorites” can be found at: http://www.dhs.wisconsin.gov/health/physicalactivity/Sites/WorksiteFavorites.htm

If you have a program “Favorite” that you’d like to share with other worksites, just download and complete the “Favorites” fillable form at the bottom of the web page and submit it to the email address listed on the form.

**“Favorites” Example:**

**Worksite Name:** Gunderson Lutheran

**Brief Description (1000 character maximum):**
We worked with Stansfield Vending, our local vending machine vendor and a 500 Club member, to stock all of the vending machines in our facilities with additional healthier snack options. We believed it was imperative that employees were part of the decision making, so we hosted a sampling day in which employees could sample the foods and vote on the options they wanted to see in the vending machines. Employees enjoyed sampling 10 different 500 Club-approved snack choices and selecting their top five favorites. We then worked with Stansfield Vending to implement a dual pricing structure where the top five employee-chosen snacks are available for only 50 cents. While we still offer higher fat and calorie items in the machine, they come at a higher price.

**Evaluation:**
Why was this initiative successful?
Early sales results show that when offered affordably priced, healthier snacks, employees made the better choice.

What did employees like/not like about this initiative or receive from this initiative?
Prior to this initiative, 30% of the top 10 snacks purchased were 500 Club-approved choices. After implementing these changes, that number has risen to 80%.

**Attachments?** Please check here if you have attachments that further describe your initiative and what you are willing to share.
**TOOLS & CALCULATORS**
