

Interdisciplinary Teams in Family Care Partnership in Dane County

Who is on your interdisciplinary team?

When you participate in a Family Care Partnership program, also known as Partnership, a team of people work together to help you identify the assistance you need and work with you to arrange your long-term care, health and medical services. You are an active participant on the team that also includes, at a minimum, a Partnership doctor, a nurse practitioner, a care manager and a registered nurse. You can choose to include a family member or loved one on your team. Sometimes people also choose other professionals, such as a personal care worker, to participate as team members. In Partnership, this team is called an “interdisciplinary team.”

What does your interdisciplinary team do?

The interdisciplinary team plans, delivers, and oversees your care across all settings, from your home to the hospital. The team completes an assessment of your needs and develops a plan for services to meet those needs. The services outlined in your plan are individualized for you, and focus on the most effective way to meet your needs and outcomes. The care manager, registered nurse, and nurse practitioner authorize payment for your services, and monitor the quality of the services you receive.

Here’s an example of an interdisciplinary team in Partnership. The person in the center is you. The people in the boxes were personally selected by YOU to participate on your team.
