

Mesothelioma incidence

Health Priority D: Environmental and Occupational Health Hazards

Objective D2c1: By 2010, reduce occupational mesothelioma illness and death by 30 percent below the 2000 baseline.

2010 Target: Incidence rate of 1.1 per 100,000 population

Indicator: Mesothelioma incidence

Wisconsin Mesothelioma Incidence (New Cases), by Sex and Age

Year	Total	Incidence Rate per 100,000 Population	Males	Females	Under Age 65	Ages 65-74	Ages 75+
2000	90	1.6	73	17	26	30	34
2001	94	1.7	66	28	23	33	38
2002	87	1.6	67	20	25	37	25
2003	70	1.2	51	19	14	21	35
2004	93	1.6	73	20	27	25	41
2005	77	1.3	59	18	14	28	35
2006	88	1.5	66	22	15	26	47
2007	79	1.3	57	22	14	35	30
2008	72	1.2	57	15	14	20	38

Source: Wisconsin Cancer Reporting System, Office of Health Informatics, Division of Public Health, Department of Health Services.

Note: Cases per 100,000 population have been age-adjusted to the 2000 U.S. standard population

Note: Numbers of reported cancer cases for a given year may differ slightly from previous publications, as a few cases are reported to the system years after they are diagnosed. In every report the most recent year is the most incomplete. Caution should be used in evaluating trends especially when the number of cases is small.
