

## Data Source Documentation

<b>Indicator</b>	Physical activity, adults 18+
<b>Demographic Group</b>	Wisconsin adults aged 18 and older
<b>Numerator</b>	The number of adults aged 18+ in the Wisconsin Behavioral Risk Factor Survey (BRFS) sample who reported that they engaged in any leisure-time physical activity in the past month.
<b>Denominator</b>	The number of adults aged 18+ who responded to the Wisconsin BRFS in the relevant year or years. Cases with don't know/refused responses or missing data are excluded.
<b>Details about Data Item</b>	<p>In the tables, the 95% confidence interval (the “+/-“column) indicates the range in which 95 of 100 identical surveys would estimate the percent of Wisconsin adults who engage in any leisure-time physical activity. Add the confidence interval to the estimated percent to find the high boundary and subtract it to find the low boundary. Smaller numbers of cases in the denominator produce larger confidence intervals. Results shown in the tables are weighted to represent the overall population of adults in Wisconsin.</p> <p>BRFS question:  “During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening or walking for exercise?”</p>
<b>Other Data Information</b>	<p>The Wisconsin Behavioral Risk Factor Survey is a sample survey conducted by the Office of Health Informatics in conjunction with the U.S. Centers for Disease Control and Prevention (CDC). The annual number of landline cases is currently approximately 4,500 and has ranged from approximately 4,000 to 5,000 in recent years. Weighted BRFS data are representative of the Wisconsin adult population living in households with landline telephones. CDC calculates the weights using state-level population data and includes a weighting variable in the final data set provided to the state BRFS program. The table by race and ethnicity shows estimates using combined years of data to yield a minimum of 100 cases per group. [Note: BRFS conducts cell phone interviews, but cell phone data have not yet been officially released by CDC.]</p>
<b>Reference Time Period</b>	The month immediately preceding the respondent’s BRFS interview.
<b>Data Source</b>	<p>Wisconsin Behavioral Risk Factor Survey, Office of Health Informatics, Division of Public Health, Wisconsin Department of Health Services.</p> <p>The BRFS is an ongoing probability survey conducted by telephone and carried out in conjunction with the CDC. Each survey year begins on January 1 and ends on December 31.</p>
<b>Additional Information</b>	<p>The CDC Web site (<a href="http://www.cdc.gov/brfss/">http://www.cdc.gov/brfss/</a>) provides substantial information about the BRFS at both the national and state levels, including prevalence and trend data and historical question information. Information about the Wisconsin BRFS is also available at <a href="http://dhs.wisconsin.gov/stats/BRFS.htm">http://dhs.wisconsin.gov/stats/BRFS.htm</a>.</p>
