

## Local Data on Poverty Status and Health Insurance Coverage in Wisconsin Southern Region, 2005-2007

	Estimated Number	95% Confidence Interval	Estimated Percent	95% Confidence Interval
<b>Southern Region Population</b>	1,025,000		100%	
<b>Poverty Status</b>				
Less than 100% of FPL	66,000	+/- 11,000	6%	+/- 1%
100%-199% of FPL	164,000	+/- 15,000	16%	+/- 1%
200% or more of FPL	765,000	+/- 31,000	75%	+/- 2%
Unknown	30,000	+/- 6,000	3%	+/- 1%
<b>Insurance Status</b>				
Insured all of the past year	932,000	+/- 34,000	91%	+/- 1%
Insured part of the past year	39,000	+/- 8,000	4%	+/- 1%
Uninsured all of the past year	46,000	+/- 9,000	4%	+/- 1%
<b>Primary Insurance Type</b> (please read note below)				
Currently uninsured	65,000	+/- 10,000	6%	+/- 1%
Employer-sponsored	776,000	+/- 32,000	76%	+/- 2%
Private	51,000	+/- 8,000	5%	+/- 1%
Medicaid	56,000	+/- 9,000	5%	+/- 1%
Medicare	68,000	+/- 9,000	7%	+/- 1%
Others	7,000	+/- 3,000	1%	+/- --%

**Source:** 2005-2007 Wisconsin Family Health Survey, Bureau of Health Information and Policy, Division of Public Health, Wisconsin Department of Health Services (DHS). Sample size for Southern Region: 3,540.

### Notes:

The Southern Region includes the counties of Adams, Columbia, Crawford, Dane, Dodge, Grant, Green, Iowa, Juneau, Lafayette, Richland, Rock, Sauk, and Vernon.

Estimated numbers have been rounded to nearest 1,000 to avoid unwarranted precision. Estimated percentages have been rounded to nearest whole percentage. A dash (--) indicates 0.5% or less, or fewer than 1,000 persons.

*Poverty status* is expressed as a percentage of the Federal Poverty Level (FPL), and is based on responses to questions about household size and income.

*Insured all of the past year, insured part of the past year or uninsured all year* measures health insurance status during the 12 consecutive months prior to the survey interview.

*Primary insurance type* is a measure of persons insured and uninsured at one point in time. It is a “snapshot” of health insurance coverage at the time of the survey interview. **Some people have multiple types of insurance, but each person is counted only once in this table according to their primary insurance type.** Those with multiple types of insurance are tabulated according to the order of categories in the third panel of this table. For example, someone with both Medicare and private insurance would be counted in the private category. This substantially reduces the estimated number and percent with Medicare coverage, and also slightly reduces estimates of private and Medicaid coverage.

The Wisconsin Family Health Survey is a random-sample telephone survey conducted each year by DHS. An adult in each sampled household answers the survey questions on behalf of all people living in that household. Survey data represent all household residents. Persons living in group quarters such as nursing homes, dormitories, and jails are not represented by survey results. More information about the survey is on the Web: <http://dhs.wisconsin.gov/stats/healthinsurance.htm>
