

## Local Data on Poverty Status and Health Insurance Coverage in Wisconsin Southern Region, 2007-2009

	Estimated Number	95% Confidence Interval	Estimated Percent	95% Confidence Interval
<b>Southern Region Population</b>	1,041,000		100%	
<b>Poverty Status</b>				
Less than 100% of FPL	92,000	+/- 15,000	9%	+/- 1%
100%-199% of FPL	174,000	+/- 18,000	17%	+/- 2%
200% or more of FPL	751,000	+/- 33,000	72%	+/- 2%
Unknown	25,000	+/- 5,000	2%	+/- 1%
<b>Insurance Status</b>				
Insured all of the past year	925,000	+/- 36,000	89%	+/- 2%
Insured part of the past year	49,000	+/- 11,000	5%	+/- 1%
Uninsured all of the past year	63,000	+/- 15,000	6%	+/- 1%
<b>Primary Insurance Type</b> (please read note below)				
Currently uninsured	87,000	+/- 18,000	8%	+/- 2%
Employer-sponsored	728,000	+/- 32,000	70%	+/- 2%
Private	54,000	+/- 8,000	5%	+/- 1%
Medicaid	78,000	+/- 13,000	7%	+/- 1%
Medicare	73,000	+/- 9,000	7%	+/- 1%
Others	22,000	+/- 7,000	2%	+/- 1%

### Notes:

Estimated numbers have been rounded to nearest 1,000 to avoid unwarranted precision. Estimated percentages have been rounded to nearest whole percentage. A dash (--) indicates 0.5% or less, or fewer than 1,000 persons.

*Poverty status* is expressed as a percentage of the Federal Poverty Level (FPL), and is based on responses to questions about household size and income.

*Insured all of the past year, insured part of the past year or uninsured all year* measures health insurance status during the 12 consecutive months prior to the survey interview.

*Primary Insurance type* is a measure of persons insured and uninsured at one point in time. It is a “snapshot” of health insurance coverage at the time of the survey interview. **Some people have multiple types of insurance, but each person is counted only once in this table according to their primary insurance type.** Those with multiple types of insurance are tabulated according to the order of categories in the third panel of this table. For example, someone with both Medicare and private insurance would be counted in the private category. This substantially reduces the estimated number and percent with Medicare coverage, and also slightly reduces estimates of private and Medicaid coverage.

The Wisconsin Family Health Survey is a random-sample telephone survey conducted each year by DHS. An adult in each sampled household answers the survey questions on behalf of all people living in that household. Survey data represent all household residents. Persons living in group quarters such as nursing homes, dormitories, and jails are not represented by survey results. More information about the survey is on the Web:
