

**Wisconsin Hepatitis C Surveillance Summary**  
*Cases reported 1/1/2011 through 12/31/2011*

<u>Summary</u>			<u>Age</u>		
Total	2666	100%	<15	19	1%
Confirmed (1)	2089	79%	15-24	191	7%
Confirmed, Acute	15	0%	25-34	314	12%
Probable (2)	562	21%	35-44	389	15%
			45-54	936	37%
			55-64	577	23%
			65+	120	5%
			Total	2453	100%
			Unknown	231	
			<u>Race/Ethnicity</u>		
			Hispanic	127	6%
			White	1553	71%
			Black	383	18%
			Asian	26	1%
			Am Indian	57	3%
			Multiple Race	1	0%
			Other	15	0%
			Total	2162	100%
			Unknown	504	
<u>Gender</u>					
Female	997	37%			
Male	1662	63%			
Unknown	7				
<u>Region</u>					
Northeastern	465	20%			
Northern	199	8%			
Southeastern	1053	44%			
Southern	411	17%			
Western	290	12%			
Total	2418	100%			
Unknown	248				

**Footnotes:**

(1) Confirmed: A positive enzyme immunoassay test result with a high signal-to-cut-off ratio, recombinant immunoblot assay (RIBA) or polymerase chain reaction (PCR) test result, a detectable viral load or identified genotype.

(2) Probable: A positive enzyme immunoassay test result with a low or unknown signal-to-cut-off ratio and no other test result reported.

**Technical Notes:**

- This report is compiled by the Wisconsin Viral Hepatitis Prevention Program and is based on reports of hepatitis C virus (HCV) infection submitted by laboratories and local health departments (LHDs). HCV infection is a reportable communicable disease by Wisconsin Administrative Code (Chapter DHS 145). When cases are reported, LHDs contact persons with HCV infection to provide health education, risk reduction counseling, hepatitis A and B vaccine and medical referral as needed.
- Many cases of HCV infection are reported by laboratories. Since laboratories do not generally report demographic data such as region, race, or age, surveillance summary data by demographic characteristics are often incomplete.
- This report is based on HCV surveillance data from the Wisconsin Electronic Disease Surveillance System (WEDSS) as of 4/30/2012. HCV case numbers used in other reports or individual county reports may vary depending on the date data is accessed as WEDSS is not a static database and cases can be updated daily.
