

Violent Deaths Among WI Southeastern Residents (2004-2011)

From Wisconsin Violent Death Reporting System

Number of Suicides and Homicides

S = Suicide
H = Homicide
X indicates less than 5

VIOLENT DEATH OVERVIEW

State of WI

For every 100,000 residents:

- 17 died by violent death
- 12 died by suicide
- 3 died by homicide
- 1 died by other violent means

WI's Southeastern Region

For every 100,000 residents:

- 19 died by violent means
- 11 died by suicide
- 6 died by homicide
- 2 died by other violent means

RATES OF VIOLENT DEATH OVER TIME (2004-2011)

- Rates of suicide** have increased for the state and the region.
- Rates of homicide have decreased for the state and the region.

Rates of Violent Death Over Time (per 100,000 in population)

**Suicide rates are for the entire population, but are typically calculated for the 10 and older population. Suicide rates presented here are comparable to the other violent death rates, but are lower than the true suicide rate.

CHARACTERISTICS: SOUTHEASTERN SUICIDE DEATHS

AGE

- Greatest proportion occurred among 45 to 54-year-olds (24%), followed by 35 to 44-year-olds (20%)

SEX

- More occurred among males (75%) than females (25%)

TOP 3 MEANS

- Primarily involved firearms (44%), hanging/strangulation/suffocation (28%), or poisoning (22%)

TOP 3 CIRCUMSTANCES

- Primarily involved current depressed mood (66%), current or prior mental health issue (59%), and/or interpersonal problem (45%)

CHARACTERISTICS: SOUTHEASTERN HOMICIDE DEATHS

AGE

- Greatest proportion occurred among victims aged 15 to 24 (34%), followed by victims aged 25 to 34 (25%)

SEX

- More victims were male (81%) than female (19%)

TOP 3 MEANS

- Primarily involved firearms (68%), sharp instruments (11%), or personal weapons (e.g., beating; 7%)

TOP 3 CIRCUMSTANCES

- Primarily involved argument/abuse/conflict not related to money, property, or drugs (42%), precipitation of another crime (33%), and/or alcohol involved (25%)

SOUTHEASTERN REGION IN COMPARISON TO THE STATE

- Suicide – higher percent of deaths that had a substance problem (other than alcohol)
- Homicide – higher percent of deaths that involved firearms

PREVENTION

Overall, changes in suicide and homicide rates have been modest. Improvement in these rates is warranted considering their costs to society. Examining the characteristics of these deaths, the following may be important to consider for prevention strategies:

- Improving mental health and the availability of services
- Promote strategies to improve firearm safety
- Improving personal relationships and methods to decrease interpersonal conflict
- Decreasing alcohol and other substance issues
- Tailoring interventions to specific age groups or sexes to enhance their effectiveness
