INTRODUCTION

Family Care (FC), Family Care Partnership (FCP), and PACE (Program of All-Inclusive Care for the Elderly) members were surveyed during 2012 regarding their experience with key features of the services they received from their Managed Care Organization (MCO). This survey is part of the overall Office of Family Care Expansion (OFCE) Quality Management Strategy (QMS) and is intended to provide data from the members to OFCE and MCOs for use in quality improvement. Each MCO was required to include the following core set of statements in their survey:

- My care manager listens to my concerns.
- My nurse listens to my concerns.
- I feel comfortable asking my care manager questions.
- I feel comfortable asking my nurse questions.
- I get help from my care manager when I need it.
- I get help from my nurse when I need it.
- I would recommend (put the name of your MCO here) to a friend.
- I understand information my nurse shares with me.
- I understand information my care manager shares with me.
- I participate in making decisions about the services I will receive.
- I am satisfied with the work that my care manager and nurse (or team) does for me.
- I am happy with the timeliness of the services I receive.
- I am happy with the quality of services I receive.
- I am comfortable with the people who help with my personal care.

Respondents were able to select from five answers:

- Always
- Most of the time
- Sometimes
- Almost never
- Never

Each MCO is responsible for administering its own survey. The survey administration methods are not standardized and the methods used vary from MCO to MCO. This variation could cause differences in the way members responded to the survey.

MCO Abbreviations

The following MCO abbreviations are used throughout this document.

<table>
<thead>

Section 1 - RESPONSE RATES AND DEMOGRAPHICS

Response Rate

The overall response rate for the member surveys administered in 2012 was 38%. This is slightly higher than the response rate has been in the past. The margin of error overall was plus or minus 1.0%. The response rate varied by MCO and ranged from 26% to 53%. When evaluating the applicability of the survey results to the total population, it is useful to consider the margin of error. A margin of error of plus or minus 5% is desirable. Two Family Care MCOs and three Family Care Partnership MCOs had a margin of error of more than plus or minus 5.0%.\(^1\)

Response Rate by MCO

\(^1\) Details on the response rate and margin of error, including data by MCO, are in the Appendix.
Demographics

Gender Distribution of Respondents

About 63% of respondents were female, which is about 3% higher than the overall managed long-term care population. 37% of respondents were male, which is about 3% lower than the overall population. The PACE program had the highest rate of response by a female member.

2 In the tables on gender and age distribution, “respondent” refers to the MCO member for whom the response is being made, regardless of who actually answered the questions.
Overall Age Distribution

The following table reflects the ages of respondents across all three programs. This closely reflects the age breakdown of the Family Care, Family Care Partnership and PACE population overall.

<table>
<thead>
<tr>
<th>Age Groups</th>
<th>Total Members</th>
<th>Managed L/T/ Percent</th>

<td>26%</td>
<td>-2%</td>
</tr>
<tr>
<td></td>
<td>46,647</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Overall Living Situation

53% of respondents lived at home, which is about 12% lower than expected based upon members’ living settings. 38% of respondents were in residential settings, which is about 9% higher than expected.

![Living Situation Distribution](image)

Overall Respondent Type

Most surveys were completed by the members themselves. Guardians were the next most frequent respondent type.
Section 2 - PROGRAM LEVEL RESULTS

This section reports the responses to the survey statements for all managed long-term care programs as a whole and by each program category – Family Care, Family Care Partnership and PACE (some MCOs operate more than one program category and are included as a separate MCO for each category). As indicated above, because of the differences in methods used by MCOs to conduct their survey, as well as variations in response rates and statistical significance, the reader should view the findings in this report with caution.

“Always” and “Most of the Time” Responses

Questions that received the highest and lowest percentage of “Always” responses, by program are:

<table>
<thead>
<tr>
<th>Program</th>
<th>Highest Rated</th>
<th>Lowest Rated</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family Care</td>
<td>My care manager listens to my concerns.</td>
<td>I understand information my care manager shares with me.</td>
</tr>
<tr>
<td>Family Care Partnership</td>
<td>My nurse listens to my concerns.</td>
<td>I am happy with the timeliness of services I receive.</td>
</tr>
<tr>
<td>PACE</td>
<td>I would recommend this MCO to a friend.</td>
<td>I am happy with the timeliness of services I receive.</td>
</tr>
</tbody>
</table>

The graph below shows the average rate of the two most positive responses across all questions by MCO and program.

Average Rate of “Always” and “Most of the Time” Response by MCO

The bar graphs on the following pages show the “Always” and “Most of the Time” responses for each question, by program and by MCO. The tables show the responses in a static order and in descending order by the combined rate of “Always” and “Most of the Time” responses.
All programs

Percentage of "Always" & "Most of the time" Responses

- My care manager listens to my concerns.
- My nurse listens to my concerns.
- I feel comfortable asking my care manager questions.
- I feel comfortable asking my nurse questions.
- I get help from my care manager when I need it.
- I am happy with the quality of services I receive.
- I get help from my nurse when I need it.
- I would recommend this MCO to a friend.
- I am satisfied with the work that my care manager and nurse (or team) does.
- I am happy with the timeliness of services I receive.
- I understand information my care manager shares with me.
- I understand information my nurse shares with me.
- I participate in making decisions about the services I will receive.
- I am comfortable with the people who help with my personal care.

All programs – Sorted High to Low

Percentage of "Always" & "Most of the time" Responses

- I am comfortable with the people who help with my personal care.
- My nurse listens to my concerns.
- My care manager listens to my concerns.
- I get help from my care manager when I need it.
- I get help from my Nurse when I need it.
- I would recommend this MCO to a friend.
- I am satisfied with the work that my care manager and nurse (or team) does.
- I am happy with the quality of services I receive.
- I feel comfortable asking my care manager questions.
- I feel comfortable asking my nurse questions.
- I understand information my care manager shares with me.
- I understand information my nurse shares with me.
- I participate in making decisions about the services I will receive.
All Responses by Program

The graphs on the following pages show the proportion of responses by each of the five possible choices by each of the program categories. The possible responses are:

- Always
- Most of the time
- Sometime
- Almost Never
- Never

Again, because of the variations in survey administration among MCOs, results should be interpreted with caution.

Care Wisconsin – FCP

Care Wisconsin combined both nurse and care manager into single questions for those questions that asked about those roles. The responses to those combined questions are only reflected in one bar on the graph.
APPENDIX

Response Rate and Margin of Error

The response rate is calculated by dividing the number of surveys sent by the number of survey responses received. Margin of error is based on MCO population as of 7/1/2012 using a 95% confidence interval and a 50% response distribution. The margin of error means the likelihood that the response is within plus or minus the percentage listed for the entire MCO population. A margin of error 5% or lower is desired.

</tbody>
</table>

- Margin of error is calculated at 95% confidence and 50% response distribution. A margin of error of 5.0% or less is desirable.
- Note that the total margin of error by program is lower than individual MCO margins of error. This is because, in general, the larger the population, the fewer observations are needed to have a representative sample.
