

WISCONSIN 2015 BLOOD LEAD TESTING DATA FOR CHILDREN LESS THAN 6 YEARS OF AGE

Source: Wisconsin Blood Lead Testing Data (all data current as of April, 2016)

Tested: Number of unduplicated children with a capillary or venous blood lead test. If a child has a venous test within 90 days after a capillary test, the date, place and result from the venous test was used.

Tested 5 mcg/dL or above: Number of unduplicated children who had a capillary or venous test of 5 mcg/dL or above. If the test is a capillary sample followed within 90 days by a venous test, the value of the venous test result was used.

Rate: Number of children who tested 5 mcg/dL or above, divided by the number of children tested.

WISCONSIN 2015 BLOOD LEAD TESTING DATA FOR CHILDREN LESS THAN 6 YEARS OF AGE

Source: Wisconsin Blood Lead Testing Data (all data current as of April, 2016)

Tested: Number of unduplicated children with a capillary or venous blood lead test. If a child has a venous test within 90 days after a capillary test, the date, place and result from the venous test was used.

Tested 5 mcg/dL or above: Number of unduplicated children who had a capillary or venous test of 5 mcg/dL or above. If the test is a capillary sample followed within 90 days by a venous test, the value of the venous test result was used.

Rate: Number of children who tested 5 mcg/dL or above, divided by the number of children tested.
