1 Introduction

The demographic maintenance tool on the ForwardHealth Portal allows providers to securely, efficiently, and conveniently update provider information, such as addresses and financial information, with fewer data entry mistakes.

When a provider updates information using the demographic maintenance tool, in most cases, ForwardHealth immediately updates the provider’s information, which allows for more efficient business practices. Information that cannot be immediately updated is manually verified, which may take additional processing time.

![Figure 23: Taxonomy Panel](image)

Figure 23: Taxonomy Panel

Providers may report multiple taxonomy codes to ForwardHealth as long as the codes accurately describe the provider type and specialty for the provider's enrollment.

### 12.1 Add a Taxonomy Code

If the system does not recognize the entered or selected taxonomy code as reflecting the user’s provider type and specialty, a message indicating the provider type and entered or selected taxonomy code will be displayed above the panel. Confirm that the correct taxonomy code was entered or selected. If the taxonomy code is correct, check the Ignore Message box. ForwardHealth will manually verify the taxonomy code once it is submitted.

Providers who report multiple taxonomy codes can only designate one of the codes as the primary code. If a new taxonomy code is designated to be the primary code, the Primary Indicator for the old code will then display as “N” or not primary. ForwardHealth uses the primary code for identification purposes.
