

How does lead affect a young child later in school?

Lead causes learning and behavior problems that may cause a child to struggle in school.

How much lead dust does it take to poison a child?

It takes less lead than the size of a sugar packet spread around a two-bedroom house.

Prevent Lead Poisoning During Renovation of Your Older Home

Contractors are required to be trained and certified and work lead-safe.

How to Use These Bookmarks

- Print the bookmarks double-sided on heavier paper, if possible.
- Cut out the bookmarks.
- Place the bookmarks in school libraries, public libraries, *Little Free Libraries* in your neighborhood, in grocery and hardware stores, at your church, and child care centers.

Lead Hurts Kids!

Prevent lead poisoning before it can damage your child's future learning potential.

Lead poisoning is most common in children under age six. A child with lead poisoning may find it hard to speak, read and learn.

Houses built before 1978 are more likely to have lead paint hazards that can poison a child. Look for chipping paint in your home.

For information on how lead can affect a child's ability to learn in school, go to:
