

CHILD CARE CENTER IMMUNIZATION ASSESSMENT RESULTS

WISCONSIN | 2019-2020

To assess the immunization status of child care center attendees in Wisconsin during 2019-2020, licensed child care centers in Wisconsin were mailed the Wisconsin Child Care Center Immunization Assessment booklet in March 2020 and asked to respond to the assessment online. The assessment collected the number of children ages 2 through 4 years attending the child care center and the number of these attendees in compliance with the Wisconsin immunization law. The results of the assessment are below.

Summary

- 1,704 child care centers reported immunization compliance results for a total of 38,957 children ages 2 through 4 years.
- The percent of child care centers that submitted a report decreased from 54.3% in 2018-19 to 46.0% in 2019-20 (293 fewer centers reported this year than last).
- The median number of attendees ages 2 through 4 years was 14 children (range: 1 to 269 children).
- Vaccination rates have increased since 2018-19, however in 2018-19 more centers reported. These rates still remain higher than [statewide rates](#).

Child care immunization assessment results for attendees ages 2 through 4:

	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	Change from previous year
Polio (3+ doses)	93.0%	92.4%	93.7%	92.5%	93.3%	91.4%	93.3%	1.9%
