Wisconsin Medicaid Promoting Interoperability Program

Eligible Professional Attestation Guidance for the Stage 3 Public Health and Clinical Data Registry Reporting Objective in Program Year 2019

This document contains attestation guidance for the Stage 3 Public Health and Clinical Data Registry Reporting Objective in Program Year 2019 for Eligible Professionals.

The ultimate goal of receiving public health data from Eligible Professionals is to improve surveillance capabilities and use the data collected to positively affect the care of patients in Wisconsin. Several Wisconsin Division of Public Health (DPH) programs have declared readiness to receive public health data from certified EHR technology (CEHRT) for the purposes of the Medicaid Promoting Interoperability Program. Eligible Professionals who collect relevant public health data are invited to coordinate with these DPH programs to send production data from CEHRT. This document recommends actions for Eligible Professionals to take to begin sending public health data to DPH programs and provides attestation guidance to help determine if they are ready to attest to the Public Health and Clinical Data Registry Reporting Objective.

How to Use This Document: Answer the numbered questions in Sections 1 and 2. Each section contains multiple questions that will help guide you in determining how to properly attest to the Public Health and Clinical Data Registry Reporting Objective in Program Year 2019.
- Section 1: Background—This section contains questions to determine if the Eligible Professional is both eligible to submit data to the relevant DPH programs and eligible to participate in the Medicaid Promoting Interoperability Program.
- Section 2: Measure Specific Guidance—This section helps the Eligible Professional determine if he or she is ready to attest to the Public Health and Clinical Data Registry Reporting Objective in Program Year 2019.

Depending on your responses to the yes and no questions, you will be provided with a suggested action or specific guidance. Each possible response contains a bolded **Recommended Action** and/or **Attestation Guidance** to assist you with properly attesting to the Program Year 2019 Stage 3 Public Health and Clinical Data Registry Reporting Objective:
- **Recommended Actions** help guide you through the sections of this document and list actions DPH recommends you take to begin sending public health data to a DPH program.
- **Attestation Guidance** helps you determine if you are ready to attest to the Public Health and Clinical Data Registry Reporting Objective in Program Year 2019.

IMPORTANT: Before answering the questions in the sections below, you should be familiar with the detailed requirements for successfully attesting to the Public Health and Clinical Data Registry Reporting Objective. Refer to the Appendix at the end of this document, or visit the Public Health Meaningful Use Reporting Guidance webpage for this information.

Section 1: Background

Instructions: The questions below will help you determine if you are both eligible to submit data to the relevant DPH programs and eligible to participate in the Wisconsin Medicaid Promoting Interoperability Program. This section contains two questions and guidance for each possible response. Your response to the question(s) will guide you through the document and determine if you should proceed to Section 2.

Start by reading Question 1. Answer the question and read the information corresponding to your response.

Question 1: Do you have the 2015 Edition of certified electronic health record technology (CEHRT)? For Meaningful Use, DPH programs only accept data submitted from EHR technology certified to the current federal standards.		
YES	**DO NOT KNOW**	**NO**
Recommended Action: Once you have confirmed your EHR technology is certified to the current federal standards, proceed to Question 2 below.	**Recommended Action:** If you are unsure about your EHR certification, check with your EHR vendor or verify using the [Certified Health IT Product List](#).	**Recommended Action:** If you do not have EHR technology certified to the current federal standards, do not register your intent to submit data to DPH programs.
Question 2: Are you an Eligible Professional who has participated in the Medicaid Promoting Interoperability Program in a previous Program Year? Healthcare professionals must meet eligibility criteria defined by law to receive incentive payments; additionally, Program Year 2016 was the last year for providers to initiate participation in the Medicaid Promoting Interoperability Program.		
YES	**DO NOT KNOW**	**NO**
This document provides guidance to Eligible Professionals intending to attest to the Wisconsin Medicaid Promoting Interoperability Program. **Recommended Action:** Proceed to Section 2 on Page 3.	For Medicaid Promoting Interoperability Program participation history, log in to the [CMS Medicare & Medicaid EHR Incentive Program Registration & Attestation System](#). CMS has also provided a [Registration User Guide](#).	If you are not an Eligible Professional, this document may not provide you with proper guidance. This document provides guidance to Eligible Professionals intending to attest to the Wisconsin Medicaid Promoting Interoperability Program.

This concludes Section 1: Background. These questions were asked to determine if an Eligible Professional is both eligible to submit data to DPH programs detailed in this document and eligible to participate in the Wisconsin Medicaid Promoting Interoperability Program. If you have been instructed to do so, proceed to Section 2 on Page 3.

Section 2: Measure-Specific Guidance

Instructions: The questions below will help you determine if you are ready to attest to the Public Health and Clinical Data Registry Reporting Objective in Program Year 2019. This section contains a table for each of the five public health measures available to Eligible Professionals. Each measure contains questions that help identify whether the relevant DPH program is collecting data from Eligible Professionals like you and whether you have taken actions required to begin sending public health data to the program. Your response to the questions will guide you through the document.

For each measure, start by reading Question 1. Answer the question, read the information corresponding to your response, and continue to the next question or measure.

Measure 1: Immunization Registry Reporting	
Question 1: Do you administer immunizations?	
YES	**NO**
DPH is collecting immunization data from Eligible Professionals who administer immunizations. **Recommended Action:** Proceed to Question 2 on Page 4.	DPH is **not** establishing connections to Eligible Professionals who do not administer immunizations. **Attestation Guidance:** Determine which exclusion may be applicable to you. For more information on the public health reporting exclusions, review the [Public Health Meaningful Use Reporting Guidance webpage](#). **Recommended Action:** Proceed to Measure 2: Syndromic Surveillance Reporting.

Measure 1: Immunization Registry Reporting

Question 2: Did you register to submit immunization data to DPH?
In Wisconsin, this registration is completed by submitting a registration form through the Public Health Registration for Electronic Data Submission System (PHREDS).

YES	DO NOT KNOW	NO
Attestation Guidance: Eligible Professionals who have registered with DPH and believe they have taken proper actions to meet the measure should choose the active engagement option that most closely reflects their current status.	**Recommended Action:** If you are not sure if a PHREDS registration form already exists for your organization, email dhsehealth@dhs.wisconsin.gov with the subject line "Confirm Existing Registration Form" and provide the name of your organization.	**Recommended Action:** All Eligible Professionals should register with DPH for the public health program(s) to which they intend to electronically submit data. For additional information on how to register, review the Public Health Meaningful Use webpage. **Attestation Guidance:** Eligible Professionals who believe they have taken proper actions to meet the measure should choose the active engagement option which most closely reflects their current status.

Measure 2: Syndromic Surveillance Reporting

Question 1A: Do you practice in an urgent care setting?
CMS removed this measure for Eligible Professionals attesting to Stage 3 with the exception of providers who are practicing in urgent care settings.

YES	NO
Recommended Action: Proceed to Question 1B below.	**Attestation Guidance:** Determine which exclusion may be applicable to you. For more information on the public health reporting exclusions, review the Public Health Meaningful Use Reporting Guidance webpage. **Recommended Action:** Proceed to Measure 3: Electronic Case Reporting.

Question 1B: Are you sending production syndromic surveillance data via CEHRT to DPH?
Production data refers to data generated through clinical processes involving patient care. Wisconsin providers have the option of submitting this data either directly to BioSense 2.0 or through the Wisconsin Statewide Health Information Network (WISHIN) to BioSense 2.0.

YES	NO
Recommended Action: Proceed to Question 2 on Page 6.	Effective April 27, 2016, DPH is **not** collecting ambulatory syndromic surveillance data from any category of Eligible Professional unless they are already in production and sending syndromic surveillance data to BioSense 2.0 or WISHIN. **Attestation Guidance:** Determine which exclusion may be applicable to you. For more information on the public health reporting exclusions, review the Public Health Meaningful Use Reporting Guidance webpage. **Recommended Action:** Proceed to Measure 3: Electronic Case Reporting.

Measure 2: Syndromic Surveillance Reporting

Question 2: Did you register to submit syndromic surveillance data to DPH?
In Wisconsin, this registration is completed by submitting a registration form through PHREDS.

YES	DO NOT KNOW	NO
Attestation Guidance: Eligible Professionals who have registered with DPH and believe they have taken proper actions to meet the measure should choose the active engagement option that most closely reflects their current status.	**Recommended Action:** If you are not sure if a PHREDS registration form already exists for your organization, email dhsehealth@dhs.wisconsin.gov with the subject line "Confirm Existing Registration Form" and provide the name of your organization.	**Recommended Action:** All Eligible Professionals should register with DPH for the public health program(s) to which they intend to electronically submit data. For additional information on how to register, review the Public Health Meaningful Use webpage. **Attestation Guidance:** Eligible Professionals who believe they have taken proper actions to meet the measure should choose the active engagement option which most closely reflects their current status.

Measure 3: Electronic Case Reporting

Question 1: Do you treat or diagnose Category I, II, or III reportable diseases?
According to Wis. Stat. § 252.05, Communicable Diseases, any health care provider who treats or sees a person who has or is believed to have a communicable disease is required to report this information.

YES	DO NOT KNOW	NO
Recommended Action: Proceed to Question 2 below.	**Recommended Action:** A list of reportable communicable diseases and other notifiable conditions is provided in Wis. Admin. Code ch. DHS 145 – Appendix A. The DPH Disease Reporting webpage contains additional information regarding these diseases and conditions and requirements for the timing of reporting.	DPH is **not** establishing connections to Eligible Professionals who do not treat or diagnose Category I, II, or III reportable diseases. **Attestation Guidance:** Determine which exclusion may be applicable to you. For more information on the public health reporting exclusions, review the Public Health Meaningful Use Reporting Guidance webpage. **Recommended Action:** Proceed to Measure 4: Public Health Registry Reporting.

Question 2: Did you register to submit electronic case reporting data to DPH?
In Wisconsin, this registration is completed by submitting a registration form through PHREDS.

YES	DO NOT KNOW	NO
Attestation Guidance: Eligible Professionals who have registered with DPH and believe they have taken proper actions to meet the measure should choose the active engagement option that most closely reflects their current status.	**Recommended Action:** If you are not sure if a PHREDS registration form already exists for your organization, email dhsehealth@dhs.wisconsin.gov with the subject line "Confirm Existing Registration Form" and provide the name of your organization. For further guidance, contact the DPH electronic case reporting team at dhsecr@dhs.wisconsin.gov.	**Recommended Action:** All Eligible Professionals should register with DPH for the public health program(s) to which they intend to electronically submit data. For additional information on how to register, review the Public Health Meaningful Use webpage. **Attestation Guidance:** Eligible Professionals who believe they have taken proper actions to meet the measure should choose the active engagement option which most closely reflects their current status.

Measure 4: Public Health Registry Reporting

Question 1A: Do you clinically or pathologically diagnose cancer and/or provide cancer-directed first-course treatment?

YES	DO NOT KNOW	NO
Recommended Action: Proceed to Question 1B below.	**Recommended Action:** Contact the Wisconsin Cancer Reporting System (WCRS) at cancer@dhs.wisconsin.gov to request more information on its definitions of diagnosis and first-course treatment.	**Recommended Action:** Proceed to Question 3 on Page 9.

Question 1B: Do you have technology certified to create cancer case information and transmit information to cancer registries?

WCRS is only accepting data submitted from EHR technology certified to the current federal standards specific to the cancer reporting option, §170.314(f)(5) and §170.314(f)(6).

YES	DO NOT KNOW	NO
If you answered "Yes" to both Question 1A and 1B, DPH is collecting cancer case reporting data from Eligible Professionals like you. **Recommended Action:** Proceed to Question 2 on the next page.	**Recommended Action:** Verify that your EHR technology is certified to **§170.314(f)(5)** and **§170.314(f)(6)**. If you are unsure about your EHR certification for cancer, check with your EHR vendor or verify using the Certified Health IT Product List.	If you do not have EHR technology certified to **§170.314(f)(5)** and **§170.314(f)(6)**, do not register your intent to submit cancer data to DPH. **Recommended Action:** Proceed to Question 3 on Page 10.

Measure 4: Public Health Registry Reporting

Question 2: Did you register to submit cancer data to DPH?
In Wisconsin, this registration is completed by submitting a registration form through PHREDS.

YES	DO NOT KNOW	NO
Attestation Guidance: Eligible Professionals who have registered with DPH and believe they have taken proper actions to meet the measure should choose the active engagement option that most closely reflects their current status. **Recommended Action:** Proceed to Question 3 on Page 10.	**Recommended Action:** If you are not sure if a PHREDS registration form already exists for your organization, email dhsehealth@dhs.wisconsin.gov with the subject line "Confirm Existing Registration Form" and provide the name of your organization. Additionally, if you are engaged with public health registries not sponsored by DPH, proceed to Question 3 on Page 10.	**Recommended Action:** All Eligible Professionals should register with DPH for the public health program(s) to which they intend to electronically submit data. For additional information on how to register, review the Public Health Meaningful Use webpage. **Attestation Guidance:** Eligible Professionals who believe they have taken proper actions to meet the measure should choose the active engagement option which most closely reflects their current status. Additionally, if you are engaged with public health registries not sponsored by DPH, proceed to Question 3 on Page 10.

Measure 4: Public Health Registry Reporting

Question 3: Do you intend to meet the Public Health Registry Reporting Measure using a registry outside of DPH?

For Program Year 2019, WCRS is the only public health registry for which DPH has declared readiness to accept electronic data from CEHRT.

YES	NO
CMS defines a ''public health registry'' as a registry that is administered by, or on behalf of, a local, state, territorial, or national public health agency and which collects data for public health purposes. This means that CMS does not limit the public health registries that may be used to satisfy the Public Health Registry Reporting Measure to those sponsored by state and local public health agencies. However, if you choose to leverage a registry that is not sponsored by DPH for the Public Health Registry Reporting Measure, DPH does not provide registration, administrative onboarding, compliance, or audit support. **Attestation Guidance:** Eligible Professionals who believe they have taken proper actions to meet the measure with a registry fitting CMS' description of a public health registry should choose the active engagement option that most closely reflects their current status. **Reminder:** The Public Health Registry Reporting Measure may be used twice to meet the required number of measures.	**Recommended Actions:** Complete two steps of due diligence to determine if there is a public health registry available to you. According to CMS, an Eligible Professional must complete steps 1 and 2 below to determine if they qualify for an exclusion from the Public Health Registry Reporting Measure. 1. Check the Public Health Meaningful Use webpage to determine if there is a public health registry sponsored by the state for which you are eligible. For Program Year 2019, WCRS is the only public health registry for which DPH has declared readiness to accept electronic data from CEHRT. 2. Check with the specialty societies with which you are affiliated to determine if there is a public health registry available to you that qualifies for the Meaningful Use Program. CMS defines a ''public health registry'' as a registry that is administered by, or on behalf of, a local, state, territorial, or national public health agency and which collects data for public health purposes. **Attestation Guidance:** After completing the previous two steps of due diligence, if you have determined there is not a qualifying public health registry available to you, then you may self-attest to an exclusion. Determine which exclusion may be applicable to you. For more information on the public health reporting exclusions, review the Public Health Meaningful Use Reporting Guidance webpage.

Measure 5: Clinical Data Registry Reporting

Question 1: Do you intend to meet the Clinical Data Registry Reporting Measure?
DPH has not identified any clinical data registries with readiness to accept clinical data electronically from CEHRT.

YES	NO
DPH has not identified any clinical data registries with readiness to accept clinical data electronically from CEHRT. Therefore, DPH does not provide registration, administrative onboarding, compliance, or audit support for the Clinical Data Registry Reporting Measure. **Attestation Guidance:** Eligible Professionals who believe they have taken proper actions to meet the measure should choose the active engagement option that most closely reflects their current status. **Reminder:** The Clinical Data Registry Reporting Measure may be used twice to meet the required number of measures.	**Recommended Actions:** Complete two steps of due diligence to determine if there is a clinical data registry available to you. According to CMS, an Eligible Professional must complete steps 1 and 2 below to determine if they qualify for an exclusion from the Clinical Data Registry Reporting Measure. 1. Check the Public Health Meaningful Use webpage to determine if there is a clinical registry sponsored by the state for which you are eligible. For Program Year 2019, DPH has not identified any clinical data registries with readiness to accept clinical data electronically from CEHRT. 2. Check with the specialty societies with which you are affiliated to determine if there is a clinical data registry available to you that qualifies for the Meaningful Use Program. **Attestation Guidance:** After completing the previous two steps of due diligence, if you have determined there is not a qualifying clinical data registry available to you, then you may self-attest to an exclusion. Determine which exclusion may be applicable to you. For more information on the public health reporting exclusions, review the Public Health Meaningful Use Reporting Guidance webpage.

This concludes Section 2: Measure-Specific Guidance. These questions were asked to help determine if you are ready to attest to the Public Health and Clinical Data Registry Reporting Objective in Program Year 2019.

Additional Information

For more information on the Wisconsin Medicaid Promoting Interoperability Program's Public Health and Clinical Data Registry Reporting Objective, you can:

Appendix

Public Health and Clinical Data Registry Reporting Objective and Measure Options

To meet Meaningful Use requirements and receive an incentive payment, Eligible Professionals must meet a number of objectives and measures established by CMS for the Medicaid Promoting Interoperability Programs.

All Eligible Professionals will attest to a public health reporting objective that requires providers to actively engage with their public health agency or clinical data registry to submit public health data electronically from EHR technology certified for the Medicaid Promoting Interoperability Programs.

How to Attest to the Objective

The Public Health and Clinical Data Registry Reporting Objective comprises five measure options:

- Measure 1: Immunization Registry Reporting
- Measure 2: Syndromic Surveillance Reporting
- Measure 3: Electronic Case Reporting
- Measure 4: Public Health Registry Reporting*
- Measure 5: Clinical Data Registry Reporting*

*The Public Health Registry Reporting Measure and Clinical Data Registry Reporting Measure may be used twice to meet the required number of measures.

Eligible Professionals in Program Year 2019 are required to attest to any two of the five measures. For more detailed information on the objective and measures, review the [CMS Eligible Professional Stage 3 Public Health and Clinical Data Registry Reporting Objective Specification Sheet](#).

How to Meet a Measure: Demonstrating Active Engagement

To meet any of the public health reporting measures, an Eligible Professional must demonstrate **active engagement** with a public health agency or clinical data registry. Active engagement means the Eligible Professional is engaging in certain actions that signal progress toward sending **production data** to a public health agency or clinical data registry.[1] For example, a provider can actively engage with a public health agency or clinical data registry by registering his or her intent to electronically submit a type of data they collect. For more details on active engagement requirements, review the [Public Health Meaningful Use Reporting Guidance webpage](#).

Public Health Reporting Exclusions

For each of the measure options, an Eligible Professional has the choice to either meet the measure or claim an exclusion. There are multiple exclusions for each of the public health reporting measures, which may be claimed based on the types of public health data collected by an Eligible Professional and the public health agency or clinical data registry's readiness to receive data. Eligible Professionals are required to self-attest to exclusions in the attestation system based on their ability to satisfy the exclusion criteria. An exclusion for a measure does not count toward the total number of measures required to meet the objective. If a provider is unable to meet the required number of measures, the Eligible Professional can meet the objective by excluding from all of the remaining measures. For more information on the public health reporting exclusions, review the [Public Health Meaningful Use Reporting Guidance webpage](#).

---

[1]Submitting production data shows that an Eligible Professional regularly reports data generated through clinical processes involving patient care from CEHRT to a public health program.

Readiness of Public Health Programs in Wisconsin

DPH has declared readiness to electronically receive data from CEHRT for some of its public health programs. DPH's capability to accept data may change; therefore, Eligible Professionals should check the status of each program's capability at the start of each EHR reporting period. This information is regularly updated in the DPH [Meaningful Use Declaration of Readiness table on the Public Health Meaningful Use Reporting Guidance webpage](#).

Registration for Public Health Programs

All Eligible Professionals participating in the Wisconsin Medicaid Promoting Interoperability Program should register with DPH if they intend to submit data to the public health programs that have declared readiness. In Wisconsin, this registration is through the **PHREDS.** PHREDS is a SharePoint site where Eligible Professionals register by submitting a registration form indicating their intent to submit data from CEHRT to the relevant public health program(s). Eligible Professionals who have completed a registration form in previous years do not need to submit a new registration for each EHR reporting period as long as the registration contains accurate information. For additional guidance on how to register your intent to electronically submit data, review the [PHREDS Enrollment and Registration of Intent webpage](#).
