**LEAD POISONING: EMERGING SOURCES OF LEAD**

Wisconsin Childhood Lead Poisoning Prevention Program
https://dhs.wisconsin.gov/lead
608-266-5817

**DID YOU KNOW THAT...**

- In 2018 alone, nearly 4,000 Wisconsin children who were tested were found to have too much lead in their body?
- Fewer than one in five children get tested for lead in Wisconsin?
- The **Number One** source of lead for children is lead-tainted dust from deteriorated lead-based paint?

Children under age 6 are at greatest risk for lead exposure. A child is lead poisoned if the lead level is 5 micrograms per deciliter or higher. The only way to know a child is lead poisoned is by getting a blood test.

**BUT SOME CHILDREN ARE EXPOSED TO LEAD FROM OTHER SOURCES:**
