Overweight and Obese by County, Behavioral Risk Factor Surveillance System (2012-2016)

Adults Reporting Overweight or Obese

Overweight and obesity population percentages calculated using body mass index (BMI) categories from self-reported height and weight, where overweight is BMI ≥ 25.0 but <30.0, and obese is BMI ≥ 30.0. Estimates are age-adjusted to U.S. 2000 Census.
Menominee and Pepin counties exclude 2015 and 2016 data due to small sample size.
