Is Your Home Radon Safe?

Radon is a gas that you cannot see, smell, or taste—but it can be dangerous. It's the second leading cause of lung cancer in the United States.

1 out of 10 Wisconsin homes has high radon levels.

Radon is in the ground naturally. Sometimes it gets into homes through cracks in the floors or walls.

Radon and Smoking: A Dangerous Combination

Reduce your risk of lung cancer by lowering your radon levels and not smoking. If you live in a home with high radon levels, smoking raises your risk of lung cancer by 10 times.

Protect Yourself and Your Family: Test Your Home for Radon!

Testing is cheap and easy. Learn more about testing your home for radon by calling:

1-888-LOW-RADON
(1-888-569-7236)
