DON’T LET THE FLU SLOW YOUR FAMILY DOWN.

PROTECT YOUR FAMILY BY GETTING YOUR FLU SHOT.

For information on where you can get a flu shot, visit www.dhs.wisconsin.gov/influenza

In 2016, only 31% of school-aged children (ages 5-18) in Wisconsin got the flu vaccine.*

Being sick with the flu can mean missed school days for children and time away from work for parents.

WHO CAN YOU PROTECT?
